Internal Memo**

October 5, 2010

To: Data Documents, Inc. - Denver Bargaining Unit Pension Plan File

From: Glen Gahan, FSA, EA

This memo is to document an error with our original 2008 Schedule SB attachment to Form 5500 and document our corrective actions.

A typo was discovered on the 2008 Schedule SB attachment to Form 5500. Item # 12 had an entry of \$1,624 and item #13 had an entry of \$0 on the original Schedule SB. The correct entries are \$0 for item #12 and \$1,624 for item #13.

I discussed this issue with Michael Spaid an enrolled actuary with the Seattle office of the IRS; phone number (206) 220-5664. As he advised, we will:

1. Draft this internal memo describing the situation and the corrective action to be taken.
2. Document in this narrative that proper employer elections had been made not to use the carryover balance (COB) to satisfy quarterly contributions nor to elect any deemed waiver of COB. Item #12 indicates whether an election was made for a deemed waiver of COB, and this should be \$0.
3. State that we had a typographical error and reversed the entries for items #12 and #13 of the 2008 SB.
4. Amend the 2008 Sch SB.
5. Submit an entire amended 2008 Form 5500. Since that Form 5500 was originally filed as a paper filing, file the amended Form 5500 in paper form.
6. Attach as a pdf to the 2009 Form 5500 the amended 2008 Sch SB and this internal memo describing why the 2008 SB was amended.

Actuarial Cost Method

Annual costs were calculated using the Traditional Unit Credit Actuarial Cost Method as required by the Pension Protection Act of 2006. The Traditional Unit Credit Method is one of the Accrued Benefit Actuarial Cost Methods.

The target normal cost for each year is defined as the actuarial present value of retirement and ancillary benefits that are earned in the current year.

The funding target is defined as the actuarial present value of retirement and ancillary benefits that have been earned in years of service prior to the current year.

Asset Valuation Method

The value of plan assets is based on the two-year average of the expected market values of assets as described under IRS Notice 2009-22. These expected values are based on the two years prior effective rates of interest and cannot be less than 90% nor more than 110% of the market value of assets.

Contributions for the prior plan year made after the end of the plan year are included in the current year's market value of assets at their discounted value, based on the prior year's effective interest rate.
