Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

INDEPENDENT AUDITORS' REPORT

The Plan Administrator Kennecott Corporation Pension Plan for Hourly Employees

We were engaged to audit the accompanying statements of net assets available for benefits of the Kennecott Corporation Pension Plan for Hourly Employees (the Plan) as of December 31, 2009 and 2008, the related statements of changes in net assets available for benefits for the years then ended, the statement of accumulated plan benefits as of December 31, 2008, and the related statement of changes in accumulated plan benefits for the year then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, as amended, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information described in Note 9, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing the information with the related information included in the financial statements. We have been informed by the Plan Administrator that the trustee holds all of the Plan's investment assets and executes investment transactions. The Plan Administrator has obtained certifications from the trustee as of December 31, 2009 and 2008, and for the years then ended, that the information provided to the Plan Administrator by the trustee is complete and accurate. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to Financial Statements

December 31, 2009 and 2008

- 1. Description of the Plan** The following brief description of the Kennecott Corporation Pension Plan for Hourly Employees (the Plan) provides only general information. Participants should refer to the Plan document for a complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan covering all eligible hourly employees who are represented by or included in a collective bargaining unit of Kennecott Utah Copper LLC and its affiliates (collectively, the Company or the Employer), as defined in the Plan document. The Plan was effective June 30, 1989. Employees begin participating in the Plan upon employment. Kennecott Utah Copper LLC is an indirect wholly owned subsidiary of Rio Tinto America, Inc., which is an indirect wholly owned subsidiary of Rio Tinto plc (the Parent). The Plan is intended to be a qualified retirement plan under the Internal Revenue Code (IRC) and is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Pension Benefits

Generally, participants with five years of continuous service, as defined by the Plan, are entitled to pension benefits upon retirement. Pension benefits are provided to participants under several types of retirement options based upon years of continuous service and age. Retirement benefits are paid to pensioners or beneficiaries in various forms of single life and joint and survivor annuities.

Employees are eligible for normal retirement at age 65. Early retirement benefit options are based upon attainment of various age and/or service criteria. The normal form of the benefit for an unmarried participant is a life annuity. For a married participant, the normal form of a benefit is an actuarially reduced 55% joint and survivor annuity.

Participants with five or more years of continuous service are entitled to monthly pension benefits beginning at normal retirement age equal to the sum of: 1) \$35.00 multiplied by the number of years of continuous service up to 15 years, plus 2) \$36.50 multiplied by the number of years of continuous service in excess of 15 years up to 30 years, plus 3) \$38.00 multiplied by the number of years of continuous service in excess of 30 years. These multipliers are periodically amended under the terms of the collective bargaining agreement. Benefits may be reduced for early retirement.

1. Description of the Plan *Pension Benefits – Continued*

Continued

On October 1, 2009, the collective bargaining agreement was amended and the pension multipliers were increased effective January 1, 2010, 2013, and 2016, for all years of service, as follows:

	<u>2010</u>		<u>2013</u>		<u>2016</u>
\$	42.00	\$	44.00	\$	47.00

In addition, effective January 1, 2010, the pension multiplier will be retroactively adjusted to \$42.00 for retirees and disability retirees who terminated employment on or after July 1, 2006. A 75% joint and survivor annuity option (excluding a death pop-up provision) was added as a benefit payment option.

Death and Disability Benefits

If an active employee who has completed five years of continuous service dies, a death benefit equal to 50% of the employee's accrued normal benefit will be paid to his or her surviving spouse over the spouse's lifetime.

Active employees, who have ten years of continuous service who become permanently and totally disabled, as defined by the Plan, receive a pension allowance equal to their accrued normal pension allowance, plus a \$300 per month supplement. Employees are eligible to receive this benefit until they are eligible to receive unreduced Social Security benefits for age or disability or they reach age 62, whichever occurs first.

Master Trust

The Plan's investments are held by The Northern Trust Company (the trustee) in the Rio Tinto America Master Retirement Trust (the Master Trust). The Master Trust includes the assets of the Plan and the following other defined benefit pension plans:

- U.S. Borax Inc. Retirement Plan for Boron Hourly Employees
- U.S. Borax Inc. Retirement Plan for Wilmington Hourly Employees
- Luzenac America, Inc. Retirement Plan for Windsor Hourly Employees
- Luzenac America, Inc. Retirement Plan for Three Forks Hourly Employees
- Rio Tinto America, Inc. Retirement Plan

1. Description of the Plan *Master Trust – Continued*

Continued

The Plan and each of the above-referenced plans have an undivided interest in the assets of the Master Trust as of December 31, 2009. As of December 31, 2008, the Plan and each of the above-referenced plans also had an undivided interest in the assets of the Master Trust, except for certain annuity contracts, which belonged specifically to the U.S. Borax Inc. Retirement Plan for Boron Hourly Employees, the U.S. Borax Inc. Retirement Plan for Wilmington Hourly Employees, and the Rio Tinto America, Inc. Retirement Plan. The annuity contracts were considered “allocated contracts” and were excluded from the net assets of the Master Trust as of December 31, 2008, as the insurer of the annuity contracts had assumed the liability to satisfy the benefits based on the annuity premiums paid by the Plan. The fair market value of the annuity contracts of the Master Trust totaled \$65,918,177, none of which was allocated to the Plan, as of December 31, 2008. In December 2009, the Master Trust terminated the annuity contracts. The assets of the Master Trust are pooled and invested in specific investments permitted under the Master Trust Agreement, as determined by the Rio Tinto America Master Trust Pension Investment Committee.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting and in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan’s management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein; the disclosure of contingent assets and liabilities; and the actuarial present value of accumulated Plan benefits at the dates of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan invests in various securities including U.S. government securities, corporate debt instruments, registered funds, common/collective trusts, and corporate stocks. Investment securities, in general, are exposed to various risks, such as interest rate, credit, liquidity, overall market volatility, and changes in economic conditions. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the accompanying statements of net assets available for benefits.

FOR HOURLY EMPLOYEES**

**2. Summary of
Significant
Accounting
Policies**
Continued

Risks and Uncertainties – Continued

Employer contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in the estimates and assumptions in the near term would be material to the financial statements.

Investments

The Plan's interest in the Master Trust is carried at the fair value of the Plan's pro rata share of net assets, based on the beginning of year value of the Plan's interest plus actual contributions (if any) and allocated investment income (loss), less actual distributions, actual administrative expenses, and allocated administrative expenses.

Investment income (loss), net appreciation (depreciation) in the fair value of investments, and administrative expenses are allocated based upon the Plan's pro rata share of net assets to total net assets of the Master Trust at the date of allocation. The allocations are performed on a monthly basis. The Master Trust's investments in securities, which include debt and equity securities, are valued at quoted market prices from national securities exchanges on the last business day of the Plan year, if available. Common/collective trusts and real estate partnerships investments do not have quoted market prices and, therefore, the values were provided by the trustee.

Investment Valuation and Income Recognition

Purchases and sales of securities by the Master Trust are reflected on a trade-date basis. Gains or losses on sales of securities are based on average cost. Dividend income is recorded on the ex-dividend date. Income from investments is recorded as earned on an accrual basis.

Funding Policy

Plan participants are not allowed to make contributions to the Plan. The Company contributes annually such amounts as are necessary, subject to ERISA's minimum funding requirements, to meet the actuarial projected benefits to be paid to Plan participants at retirement. For the year ended December 31, 2009, the Company contributed \$35,080,000, of which \$33,250,000 is included as a contribution receivable from employer on the statement of net assets available for benefits as of December 31, 2009.

Funding Policy - Continued

A minimum contribution of \$5,860,026 was required for the year ended December 31, 2009. The Company recorded contributions of \$3,231,526, for the year ended December 31, 2008. A minimum contribution of \$482,777 was required for the year ended December 31, 2008.

Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions for service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries. Generally, benefits under the Plan are based on employees' years of pensionable service and a defined dollar multiplier. The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of December 31, 2008 and changes in accumulated plan benefits reported for the year ended December 31, 2008, are based on a beginning of the year valuation performed as of and for the year ended January 1, 2009.

The following are the more significant assumptions underlying the actuarial computations as of December 31, 2008:

	<u>Active Lives</u>	<u>Retired Lives</u>
Assumed rate of return on investments	6.00%	6.00%
Mortality basis	RP-2000 Employees Table projected to 2024	RP-2000 Healthy Annuitant Table projected to 2016
Retirement age	Earlier of age 65 and 5 years of service or age 70	Not applicable

Accumulated Plan Benefits - Continued

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Expenses

Administrative expenses of the Plan are paid by the Plan, as provided in the Plan document. The Company provides accounting and other administrative services to the Plan without charge. Administrative expenses charged to the Plan totaled \$910,492 and \$560,746 for the years ended December 31, 2009 and 2008, respectively.

Payment of Benefits

Benefit payments to participants are recorded when paid by the Plan.

Recent Accounting Pronouncements

In May 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Codification (ASC) 855, *Subsequent Events*, which establishes general accounting standards and disclosure requirements for events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. The Plan adopted ASC 855 upon its issuance and the application had no impact on the Plan's financial statements.

In June 2009, the FASB issued ASC 105, *Generally Accepted Accounting Principles*, which establishes the "FASB Accounting Standards Codification™" as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with US GAAP. ASC 105 became effective for annual financial periods ended after September 15, 2009. The Plan adopted ASC 105 during the year ended December 31, 2009. The adoption had no impact on the Plan's financial statements.

Recent Accounting Pronouncements - Continued

In September 2009, the FASB issued Accounting Standards Update (ASU) No. 2009-12, Fair Value Measurements and Disclosures (Topic 820): Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent), which provides guidance regarding fair value measurement of investments in certain entities that calculate net asset value per share (or equivalent). This update applies to investments that do not have a readily determinable fair value and are held by an entity that is required to report investment assets at fair value. This update creates a practical expedient to measure the fair value of such investments on the basis of the net asset value per share (or its equivalent) and requires disclosures by major category of the investments about the attributes of investments, such as the nature of any restrictions on the investor's ability to redeem its investments at the measurement date, any unfunded commitments, and the investment strategies of the investees. Although the adoption of this update did not materially impact the Plan's financial statements, the Plan is now required to provide additional disclosures with respect to its investments in the Master Trust.

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*. ASU 2010-06 amends Subtopic 820-10 to require disclosure of the transfers in and out of Levels 1 and 2. The update also requires additional information for Level 3 related to purchases, sales, issuances and settlements, and requires more detailed disclosure regarding valuation techniques and inputs. ASU 2010-06 as it relates to Levels 1 and 2 is effective for fiscal years and interim periods beginning after December 15, 2009. Requirements relating to Level 3 are effective for fiscal years and interim periods beginning after December 15, 2010. The Plan adopted the currently effective provisions of ASU 2010-06 during January 2010, and its application is not expected to have a material impact on the Plan's financial statements.

**3. Interest in
Master Trust**

As of December 31, 2009 and 2008, the Plan's interest in the Master Trust, was approximately 31.1% and 33.2%, respectively. Investment income and administrative expenses relating to the Master Trust are allocated by the trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

**4. Securities
Lending**

The Master Trust participated in a securities lending program with the trustee, The Northern Trust Company. The program allowed the trustee to loan securities, which are assets of the Master Trust, to approved borrowers. The trustee required the borrowers, pursuant to a security loan agreement, to deliver collateral to secure each loan. The collateral was required to be between 100 percent and 105 percent of the fair value of the securities borrowed. The Master Trust had the risk of loss with respect to an unfavorable change in fair value of the invested cash collateral. However, the borrowers had the risk of loss related to the decrease in the fair value of the securities collateral and, therefore, were required to deliver additional securities to maintain the required collateral.

**4. Securities
Lending**
Continued

In the event of default by the borrowers, the trustee was required to indemnify the Master Trust by purchasing replacement securities equal to the number of unreturned loaned securities or, if replacement securities were not able to be purchased, the trustee credited the Master Trust for the market value of the unreturned securities. In each case, the trustee applied the proceeds from the collateral for such loan to make the Master Trust whole.

The fair value of securities on loan to the borrowers as of December 31, 2009 and 2008 was \$66,555,335 and \$45,337,209, respectively. Cash collateral of \$68,879,003 and \$46,163,328 was received for securities on loan as of December 31, 2009 and 2008, respectively. Securities collateral of \$0 and \$0 was received for securities on loan as of December 31, 2009 and 2008, respectively. A portion of the income generated from the cash collateral was remitted to the borrowers, and the remainder was allocated between the Master Trust and the trustee in its capacity as a security agent. Securities lending income allocated to the Master Trust amounted to \$224,767 and \$483,765 for the years ended December 31, 2009 and 2008, respectively. Securities lending income allocated to the trustee amounted to \$56,150 and \$405,592 for the years ended December 31, 2009 and 2008, respectively. On May 1, 2010, the Plan terminated the Securities Lending arrangement with The Northern Trust Company.

**5. Fair Value
Measurements**

Fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In order to increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes observable and unobservable inputs used to measure fair value into three broad levels. These levels, in order of highest priority to lowest priority, are described as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets that are accessible at the measurement date for assets and liabilities.

Level 2: Observable prices other than Level 1 that are based on inputs quoted in less active markets or other observable inputs that can be corroborated by observable market data.

Level 3: Unobservable inputs supported by little or no market data for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

**5. Fair Value
Measurements**

The following is a description of the valuation methodologies used for assets measured at fair value.

- Cash equivalents: Short-term investment funds composed of high-grade money market instruments with maturities of less than ninety days.
- Common stocks: Valued at the closing price reported on the active market where the securities are traded.
- Preferred stocks: Valued at the closing price reported on the active market where the securities are traded.
- Corporate bonds: Stated at fair value based on a bid evaluation process using observable, market based inputs on the valuation date.
- Government bonds: Stated at fair value based on a bid evaluation process using observable, market based inputs on the valuation date.
- Mutual funds: Valued at quoted market prices at year-end.
- Assets under securities lending arrangement: Assets are valued as noted for the individual asset class and are daily market priced to ensure collateral is sufficient for securities lent out.

The following is a description of the valuation methodologies used for comingled funds which consist of common/collective trusts, real estate partnerships, and registered funds. These funds are held by the Master Trust and are measured at net asset value:

Common/Collective Trusts

In 2009 and 2008, the comingled funds held common/collective trusts through benefit-responsive investment contracts with The Northern Trust Company. Contributions are maintained in a general account which is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses.

Because the common/collective trust is fully benefit-responsive, net asset value is the relevant measurement attribute for that portion of the assets available for benefits attributable to the common/collective trust. Net asset value, as reported to the comingled funds by The Northern Trust Company, represents contributions made, plus earnings, less participant benefit payments and administrative expenses.

Common/Collective Trusts – Continued

Certain events may limit the ability of the comingled funds to transact at net asset value with the issuer. Such events include termination of the contract, spin-offs, and the liberalization of plan withdrawal or transfer rules. Upon occurrence of any of these events, a market value adjustment may apply. The Plan Administrator does not believe that the occurrence of any such event, which would limit the comingled fund's ability to transact at net asset value is probable.

Real Estate Partnerships

There are no readily available market quotations for the real estate partnerships. The real estate partnerships are valued at the net asset value as determined by using estimated fair value of the underlying assets held in the real estate partnerships. Net asset value is used as a practical expedient for fair value.

Registered Funds

Registered fund are valued at the net asset value of shares held by the Plan at year-end, based on published market quotations on active markets.

**6. Party-in-
Interest**

The trustee is a party-in-interest to the Plan. Fees paid by the Master Trust to the trustee for investment management services qualify as party-in-interest transactions for which a statutory exemption exists. Fees paid by the Plan to parties in interest for administrative and actuarial services were \$424,961 and \$506,018 for the years ended December 31, 2009 and 2008, respectively. In addition, certain employees of the Company provide administrative services for the Plan for which the Plan is not charged.

**7. Federal
Income Taxes**

The Internal Revenue Service has issued a favorable determination letter, dated September 22, 2003, stating that the Plan, as then designed, constitutes a qualified plan under Section 401(a) of the IRC, as amended. Although the Plan has been amended subsequent to the receipt of the favorable determination letter, the Company and its legal counsel believe that the Plan is designed and is currently being operated in compliance with applicable provisions of the IRC and, therefore, is exempt from federal income taxes.

FOR HOURLY EMPLOYEES**

**8. Plan
Termination**

Although it has not expressed any intent to do so, the Company has the right under the Plan document, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets available for benefits of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder, and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

**9. Certification
of Information
Provided**

The Plan Administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted under that election, the Plan Administrator has obtained certifications as of and for the years ended December 31, 2009 and 2008 from The Northern Trust Company, the trustee of the Plan, that all of the information provided by the trustee is complete and accurate. The Plan Administrator has instructed the independent auditors not to perform any auditing procedures with respect to the following information certified by the trustee, except for comparing such information certified by the trustee to information included in the Plan's financial statements:

- The investment assets of the Plan
- The recording of Plan investment transactions and investment income

**10. Subsequent
Events**

The Plan Administrator has evaluated events occurring subsequent to year end through October 14, 2010, the date the financial statements were available to be issued.

Subsequent to year end, Plan management elected to change trustees from The Northern Trust Company to State Street Bank and Trust Company. As of May 1, 2010, all Plan assets were transferred to the new trustee.

Schedule SB, Line 25 – Change in Method

Asset valuation method

For the 2009 plan year, the Valuation Assets are determined using a method that spreads asset gains/(losses) over 2 years. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the Valuation Assets.

The expected return on plan assets is 8.00% per annum, limited by PPA to the third segment rate permitted under IRS guidance.

For the 2008 plan year, the valuation assets were based on Market Value.

Change in discount rates

Discount rates to value funding liabilities were changed from the full yield curve with no lookback to the full yield curve with a two-month lookback.

Schedule SB, Line 22 – Description of Weighted Average Retirement Age

This age is derived by applying, for an employee with the characteristics of an average new entrant to the plan, the following formula, modified so that the "½" is not used for t = FRA-ERA.

$$\sum_{t=0}^{FRA-ERA} ({}_t p_{ERA}) * (q_{ERA+t}^r) * (ERA + t + \frac{1}{2})$$

$$\sum_{t=0}^{FRA-ERA} ({}_t p_{ERA}) * (q_{ERA+t}^r)$$

FRA = age by which everyone is assumed to retire
ERA = age before which nobody is assumed to retire
 ${}_t p_{ERA}$ = probability of surviving at work to age ERA + t
 q_{ERA+t}^r = probability of retiring at age ERA + t

Actuarial cost method

For minimum required and maximum contribution purposes:

The Funding Target is the present value of accrued benefits and based on service to date.

The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, including the expected plan expenses during the year.

The cushion amount is 50% of the Funding Target plus the increase in the Funding Target due to future increases in benefit levels.

Asset valuation method

The Valuation Assets are determined using a method that spreads asset gains/(losses) over 2 years. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the Valuation Assets.

The expected return on plan assets is 8.00% per annum, limited by PPA to the third segment rate permitted under IRS guidance.
