(1) Description of the Plan

The following description of the Mosaic Pension Plan for Salaried and Non-Union Hourly Employees (the Plan) provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions.

Effective January 1, 1998, the Plan was amended to allow participants to freeze their service accruals under the Plan and begin participating in the Mosaic Investment Plan. For participants who chose this option, their benefit at retirement is based on credited service through December 31, 1997, and the participant's age and final average pay at retirement. Employees hired on or after January 1, 1998 are not eligible to participate.

Effective March 31, 2003, the Plan was amended to provide that no participant will accrue any further benefits under the Plan after March 31, 2003. All participants who elected or were deemed to have elected prior to January 1, 1998 to remain in the Plan had their credited service and pay frozen as of March 31, 2003. All participants who elected prior to January 1, 1998 to participate in the Mosaic Investment Plan had their pay frozen as of March 31, 2003 (their credited service was frozen as of December 31, 1997). Vesting service for purposes of eligibility for the terminated vested benefit and early retirement benefit will continue to accrue until the participant's termination or retirement, as required by law. The age of each participant as of the date he or she elects to commence his or her pension benefit will continue to be used to determine the applicable early commencement factors for both terminated vested and early retirement benefits and lump-sum factors, also required by law.

(a) General

The Plan is a noncontributory, defined benefit pension plan covering substantially all salaried and non-union hourly employees of Mosaic Global Holdings Inc. and Mosaic Phosphates MP, Inc. (collectively, the Company) who were hired prior to January 1, 1998. The Plan was established to provide retirement income for the benefit of salaried and non-union hourly employees of the Company. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). Effective January 1, 2006, the Plan was renamed the Mosaic Pension Plan for Salaried and Non-Union Hourly Employees.

(b) Pension Benefits

Eligible employees became participants in the Plan on the date of hire. A participant's pension rights become vested when the participant completes five years of service or reaches age 65. Normal retirement age under the Plan is age 65. Participants become eligible for early retirement at or after age 55 with 10 or more years of service. Early retirement benefits for salaried employees are reduced 4% per year for commencement of pension benefits before age 62.

The retirement benefits for employees are calculated using a formula based upon the participant's final average salary (average salary during the highest paid five consecutive calendar years out of the participant's last 10 years of service), years of credited service, and the final average salary in excess

of “covered compensation” (the 35-year average of the Social Security wage base). The normal form of pension is a life annuity for an unmarried participant and a 50% joint and survivor annuity for a married participant. Other forms of pension available include a 10-year term certain annuity, a 75% joint and survivor annuity, and a 100% joint and survivor annuity. Employees may elect to receive their benefits in a lump-sum distribution.

Former participants of the FMI Employee Retirement Plan (merged into the Plan on January 1, 1999); the Retirement Plan for Non-Union Hourly Employees of IMC Global Operations, Inc. (merged into the Plan on January 1, 1999); and the Retirement Plan for Hourly Employees of IMC Fertilizer, Inc. represented by Local No. 4-786 Oil, Chemical, and Atomic Workers International Union (merged into the Plan on April 16, 1992) are eligible for benefits as detailed in the applicable plan documents in effect prior to the respective mergers.

(c) *Funding Policy*

Contributions to the Plan by the Company for the funding of current and past service cost of benefits are determined by the Plan’s actuary and are within the funding standards of ERISA. The Company has met the minimum funding requirements in 2009 and 2008.

While the Company has not expressed any intent to discontinue its contributions, it is free to do so at any time, subject to the provisions of ERISA. Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants’ benefits. Whether a particular participant’s accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

(d) *Administrative Expenses*

The Company pays certain administrative expenses of the Plan.

(e) *Change in Trustee*

Effective February 20, 2008, a new trustee (Russell Trust Company) was appointed to the Plan. The Plan assets transferred to the new trustee were transferred into funds comparable to those offered by the former trustee (Northern Trust Company).

(2) *Summary of Significant Accounting Policies*

(a) *Investment Valuation and Income Recognition*

The Plan’s beneficial interest in The Mosaic Company Defined Benefit Plan Master Trust (Master Trust) is stated at fair value as described in note 4.

Notes to Financial Statements

December 31, 2009 and 2008

Purchases and sales of securities are accounted for on a trade-date basis. Dividend income is recorded on the ex-dividend date. Interest from investments is recorded on the accrual basis.

Net income or loss from the Master Trust is allocated monthly to each participating plan based on the ratio of each plan's equity to the total equity of all participating plans prior to the allocations.

(b) *New Accounting Pronouncements*

In June 2009, the Financial Accounting Standards Board (FASB) issued a standard that established the Accounting Standards Codification (ASC) and amended the hierarchy of U.S. GAAP such that the ASC became the single source of authoritative nongovernmental U.S. GAAP. The ASC did not change current U.S. GAAP, but was intended to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature related to a particular topic in one place. All previously existing accounting standard documents were superseded and all other accounting literature not included in the ASC is considered non-authoritative. New accounting standards issued subsequent to June 30, 2009 are communicated by the FASB through Accounting Standards Updates (ASUs). This standard did not have an impact on the Plan's financial statements. However, references in the Notes to the Financial Statements previously made to various former authoritative U.S. GAAP pronouncements have been changed to reflect the appropriate section of the ASC.

In May 2009, the FASB issued a new accounting standard regarding subsequent events. This standard clarifies that management must evaluate, as of each reporting period, events or transactions that occur after the balance sheet date and through the date financial statements are issued or are available to be issued. This standard is not expected to significantly change practice because its guidance is similar to that in U.S. accounting literature, on which management relied previously for assessing and disclosing subsequent events. In February 2010, the FASB issued ASU No. 2010-09, "*Amendments to Certain Recognition and Disclosure Requirements*", that amends guidance on subsequent events. This amendment removes the requirement for SEC filers to disclose the date through which an entity has evaluated subsequent events. However, the date-disclosure exemption does not relieve management of an SEC filer from its responsibility to evaluate subsequent events through the date on which financial statements are issued. The adoption of this standard did not have a material impact on the Plan's financial statements.

(c) *Actuarial Present Value of Accumulated Plan Benefits*

Accumulated plan benefits are the estimated future payments that are attributable under the Plan's provisions to service rendered by the participants to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries.

(d) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

(3) Interest in Master Trust and Trustees Certifications

The plan administrator has obtained certifications from Russell Trust Company and Northern Trust Company as of and for the years ended December 31, 2009 and 2008, respectively, that the information provided below to the plan administrator by the trustees is complete and accurate.

The Plan's investments are held in the Master Trust. The Plan's investments in the Master Trust are stated at the Plan's equity in the net assets of the Master Trust at December 31, 2009 and 2008. The Plan held a 54.7% and 54.3% interest in the Master Trust at December 31, 2009 and 2008, respectively. Administrative and investment expenses relating to the Master Trust are allocated to the individual plans based upon the ratio invested by each plan at the time the expense is paid.

The net assets of the Master Trust are as follows:

	December 31,	
	2009	2008
Investments, at fair value:		
Common collective trust funds	\$ 316,144,064	\$ 303,256,955

(4) Fair Value Measurements

On January 1, 2008, the Plan adopted ASC 820. ASC 820 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required to be recorded at fair value, the Plan considers the principal or most advantageous

market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of nonperformance.

ASC 820 also establishes a fair value hierarchy that requires the Plan to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 established three levels of inputs that may be used to measure fair value:

- Level 1: quoted prices in active markets for identical assets or liabilities;
- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or
- Level 3: unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Investments are stated at fair value. The common/collective trust funds are stated at unit value, which represents the fair value of the underlying investments. Partnership and limited liability company interests are stated at the independently audited net asset value of the underlying fund which approximates fair value. Mutual funds and common stocks are based on quoted market prices.

Instruments Measured at Fair Value on a Recurring Basis

The following table summarized the Master Trust's investments that were accounted for at fair value within the fair value hierarchy of ASC 820, as of December 31, 2009 and 2008 (Level 1, 2 and 3 inputs are defined above):

	Fair value measurements at December 31, 2009 using input type			
	Level 1	Level 2	Level 3	Total

(5) Accumulated Plan Benefits

An actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts or interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Plan No. 002

Notes to Financial Statements

December 31, 2009 and 2008

At December 31, 2008, the actuarial present value of accumulated plan benefits was as follows:

Vested benefits:	
Participants currently receiving payments	\$ 90,512,015
Other participants	96,066,188
Total vested benefits	186,578,203
Nonvested benefits	4,107,919
Total actuarial present value of accumulated plan benefits	\$ 190,686,122

The changes in the actuarial present value of accumulated plan benefits for the period January 1, 2008 to December 31, 2008 were as follows:

Actuarial present value of accumulated plan benefits as of the beginning of the period	\$ 164,672,782
Benefits paid	(14,372,316)
Increase due to passage of time	13,241,059
Other changes	27,144,597
Actuarial present value of accumulated plan benefits as of the end of the period	\$ 190,686,122

Other changes within the above table primarily relate to changes in actuarial assumptions from the prior period to the current period presented. The more significant assumptions underlying the actuarial computations for the Plan are as follows:

Interest rate	6.65%
Assumed retirement age	Probability scale extending from age 55 (7% probability of retirement) through age 65 (100% probability of retirement)
Mortality	2009 Static Mortality Table for Annuitants and Non-Annuitants per Section 1.430(h)(3)-1(e)

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(6) Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service, dated August 13, 2003, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code), and therefore, the related trust is exempt from taxation. The Plan has been amended since receiving the determination letter. However, the plan administrator believes the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax exempt.

(7) Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for benefits and Company contributions per the financial statements to the Form 5500:

	<u>2009</u>
Net assets available for benefits per the financial statements	\$ 178,013,594
Add Company contribution receivable	<u>8,500,000</u>
Net assets available for benefits per the Form 5500	<u><u>186,513,594</u></u>
 Total Company contributions per the financial statements	 \$ —
Add Company contribution receivable	<u>8,500,000</u>
Total contributions per the Form 5500	<u><u>\$ 8,500,000</u></u>

(8) Risks and Uncertainties

The Plan invests in various investment securities through the Master Trust. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in their near term could materially affect the amounts reported and disclosed in the financial statements.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
