The Plan, as amended and effective January 1, 2008, is a defined contribution plan covering all employees of ReachLocal (the Company). It is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

b. Contributions

Participants may contribute up to 90 percent of pretax annual compensation, as defined in the Plan document and allowed by law. Company contributions are discretionary. The Company did not make any contributions during the year ended December 31, 2009.

c. Participant Accounts

Each participant's account is credited with the participant's contribution, allocations of the Company's contribution, if applicable, and Plan earnings. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account. Participants direct the investment of their accounts into various investment options offered by the Plan.

d. Vesting

Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Company's matching contribution portion of their accounts plus actual earnings thereon is based on years of continuous service. Participants vest 25 percent each year until they become 100 percent vested after 4 years of credited service, as defined in the Plan document.

e. Distribution of Benefits

Upon termination of employment, death, disability, or retirement, participants may elect to receive the value of their vested account balance in a lump sum payment. Participants may also take a financial hardship withdrawal under certain circumstances.

f. Participant Loans

Participants may borrow the lesser of \$50,000 (reduced by the participant's highest outstanding loan balance during the 12-month period ending on the date of the loan) or 50 percent of their vested account balance with a minimum loan amount of \$500. Loan terms range up to five years, but may be extended if the proceeds are to be used for the purchase of a primary residence. Loans are secured by the balance in participants' accounts and bear interest at rates ranging from 5.25 to 9.5 percent. Principal and interest are paid ratably through payroll deductions.

Notes to Financial Statements
For the Year Ended December 31, 2009

g. Forfeited Accounts

Forfeited non-vested accounts will be used to reduce future Company contributions or pay plan expenses. There were no forfeitures as of December 31, 2009 and 2008.

2. Summary of Significant Accounting Policies

a. Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

b. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

c. Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

d. Net Appreciation in Fair Value of Investments

Realized gains and losses on investments are based on the market value of the asset at the beginning of the year, or at the time of purchase for assets purchased during the year, and the related fair value on the day the investments are sold during the year. Unrealized gains and losses on investments are based on the market value of the assets at the beginning of the year, or at the time of purchase for assets purchased during the year, and the related fair value at the end of the year. Net realized and unrealized appreciation in fair value of investments is reflected in the accompanying Statement of Changes in Net Assets Available for Plan Benefits.

e. Payment of Benefits

Benefits are recorded when paid.

f. Subsequent Events

There were no subsequent events to December 31, 2009 which would require disclosure or adjustment to the Plan's financial statements.

g. Administrative Expenses

Certain administrative expenses incidental to the administration of the Plan, including fees of the administrative agent and independent public accountants, may be paid by the Plan. The Company, at its discretion, decided to pay for certain of these administrative expenses on behalf of the Plan. Most investment options have management fees, which reduce the overall return on assets. The net appreciation on investments is reflected net of these fees.

3. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the Statements of Net Assets Available for Plan Benefits.

4. Investments

The following presents investments that represent five percent or more of the Plan's net assets at December 31, 2009 and 2008. Investments with balances that do not exceed five percent of the Plan's net assets are identified by an asterisk (*) in the table below.

5. Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1	Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
Level 2	<p>Inputs to the valuation methodology include</p> <ul style="list-style-type: none">• quoted prices for similar assets or liabilities in active markets;• quoted prices for identical or similar assets or liabilities in inactive markets;• inputs other than quoted prices that are observable for the asset or liability;• inputs that are derived principally from or corroborated by observable market data by correlation or other means. <p>If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.</p>
Level 3	Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Common/Collective trusts: Valued at the net asset value (NAV) of shares held by the Plan at year end.

Mutual funds: Valued at the NAV of shares held by the Plan at year end.

Participant loans: Valued at amortized cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
