DURO BAG MANUFACTURING COMPANY EMPLOYEES' PENSION PLAN

Notes to Financial Statements

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements of the Duro Bag Manufacturing Company Employees' Pension Plan (the "Plan") have been prepared on the accrual basis.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Investment transactions are accounted for on the trade date (the date the order to buy or sell is executed). The cost of investments sold is computed on an average cost basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Investment securities, in general, are exposed to various risks such as interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Expenses

Certain expenses and costs of administering the Plan were paid by the Duro Bag Manufacturing Company (the "Plan sponsor") and accordingly, are not reflected in the Plan's financial statements.

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the Plan Administrator and Actuary to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Related Party Transactions

Certain Plan investments are invested in accounts managed by The Bank of New York Mellon and Union Bond & Trust Company (the "Trustees"). The Bank of New York Mellon and Union Bond & Trust Company are the Trustees as defined by the Plan and therefore, these transactions qualify as parties-in-interest.

Several employees of the Plan sponsor provide administrative services to the Plan. These services include Plan oversight and day-to-day Plan administration. The Plan is not charged by the Plan sponsor for the services its employees provide to the Plan.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Subsequent Events

The Plan has evaluated subsequent events through December 14, 2010, which is the date these financial statements were available to be issued, and have been determined that there are no subsequent events that require disclosure under applicable GAAP for subsequent events.

NOTE 2 DESCRIPTION OF THE PLAN

The following description of the Duro Bag Manufacturing Company Employees' Pension Plan provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan covering certain salaried employees of the Plan sponsor not covered under a separate pension plan. The Bank of New York Mellon and Union Bond & Trust Company are the Plan's trustees and asset custodians. Mercer is the Plan's actuary. The Plan is administered by the Plan sponsor. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code. The Plan was amended on June 4, 2003 to effectively "freeze" the Plan effective August 31, 2003, at which time all participants under the Plan ceased to accrue additional benefits from that point forward. Additionally, effective the date of the freeze, the Plan does not permit new entrants.

Benefits under the Plan are funded by the Plan sponsor. Contributions are made based on recommendations by the Actuary, who performs annual valuations of the Plan. The funds are held, invested and disbursed by the asset custodian.

Contributions

The Plan sponsor contributes such amounts as are necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid to Plan members. The contributions are designed to fund the Plan's normal service costs on a current basis. Effective May 1, 1993, employee contributions were no longer mandatory or permitted by the Plan and have ceased. Participants are fully vested in their contributions made prior to May 1, 1993. Present employee's accumulated contribution at February 28, 2010 and 2009 were \$1,078,940 and \$1,054,373, respectively, including interest credited at 120% of the mid-term applicable federal rates compounded annually.

Vesting

Employees with five or more years of services are fully vested and entitled to pension benefits beginning at normal retirement age, which is 65.

Notes to Financial Statements (Continued)

NOTE 2 DESCRIPTION OF THE PLAN (CONTINUED)

Benefits

Benefits are received at normal retirement age or, if elected, at early retirement. Employee participants may elect early retirement beginning at age 55 after completion of ten years of credited service. Benefits under the Plan are based on an employees' highest average compensation during any consecutive five-year period of the employees' last ten years of credited service. A vested participant who terminated for any reason other than retirement, disability or death is entitled to the monthly vested termination benefit beginning on the normal retirement date in the amount of their accrued benefit. Participants may elect to receive their distributions, subject to certain Plan provisions, in the form of an annuity or in a lump-sum payment. If the participant's accrued benefit is less than \$5,000, the participant is paid a lump-sum payment as soon as practical after the termination date.

Generally, payment of benefits will be in the form of a single life annuity for unmarried participants and a joint and survivor annuity for married participants, unless the employee, with spousal consent, elects another form of benefit permitted by the Plan. Other optional forms of pension benefit are available at the participant's option.

Death and Disability Benefits

Commencing September 1, 2003, no participant may become eligible to receive a disability retirement benefit as a result of termination of employment by reason of total and permanent disability after August 31, 2003.

If a married vested participant dies before benefit payments have begun, a death benefit will be paid to the participant's beneficiary based on the time of death. If an unmarried participant dies before benefit payments have begun, the beneficiary will be eligible to receive only a return of the participant's employee contributions under the Plan, with interest.

Common collective trusts	158,413	256,835
Net appreciation (depreciation)	<u>\$ 5,405,257</u>	<u>\$ (9,650,865)</u>

NOTE 4 FAIR VALUE MEASUREMENTS

The financial statements have been prepared in accordance with applicable GAAP accounting for Fair Value Measurements and Disclosures. Under applicable GAAP literature, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date.

In determining fair value, the Plan uses various valuation approaches. The applicable GAAP literature establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Plan. Unobservable inputs are inputs that reflect the Plan's assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the ability to observe inputs as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

DURO BAG MANUFACTURING COMPANY EMPLOYEES' PENSION PLAN

Notes to Financial Statements (Continued)

NOTE 4 FAIR VALUE MEASUREMENTS (CONTINUED)

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at February 28, 2010 and 2009.

Equity securities: Valued at the closing price reported in the active market in which the individual security is traded.

Fixed income securities and mutual funds: Valued at the net asset value ("NAV") of shares held by the Plan at year end.

Common collective trusts: Valued at fair value of the collective trust's underlying investments based on information reported by the investment advisor using the audited financial statements of the collective trust at year-end.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of February 28, 2010:

	Level 1	Level 2	Level 3	Total
Equity securities	\$ 5,641,644	\$ -	\$ -	\$ 5,641,644

NOTE 5 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments including lump-sum distributions that are attributable under the Plan's provisions to the service that employees have rendered to date and that are expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) present employees or their beneficiaries, and (c) beneficiaries of employees who have died. Benefits for retired or terminated employees or their beneficiaries are based on actual benefits earned during their term of employment. The accumulated plan benefits for active employees are based on their actual compensation over their respective years of service, utilizing various benefit formulas as specified by the Plan. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated Plan benefits is that amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payments (by means of decrements such as for death, disability, withdrawal, retirement, or termination of employment) between the valuation date and the expected dates of payment. The actuarial assumptions below are based on the assumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

Notes to Financial Statements (Continued)

NOTE 5 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (CONTINUED)

The components of the actuarial present value of accumulated Plan benefits as of March 1, 2009 and 2008 are:

The actuarial value of Plan assets was \$26,930,226 and \$36,245,547 as of March 1, 2009 and 2008, respectively.

The components of the changes in accumulated Plan benefits for the years ended March 1, 2009 and 2008 are:

	2009	2008

Actuarial present value of accumulated plan benefits as of March 1, 2009 and 2008, respectively	<u>\$ 37,563,714</u>	<u>\$ 38,898,580</u>

Due to inherent uncertainties in actuarial estimates, it is reasonably possible that actuarial estimates could change in the near term.

NOTE 6 GENERAL ACTUARIAL DATA (CONTINUED)

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Administrative expenses are added to current year normal cost based on prior year expenses.

Beginning with the 2009 valuation, the asset method was changed from a smoothed value with 12 months in the average period to a smoothed value with 24 months in the average period. The funding interest rate was changed from the segmented yield curve without phase-in or look-back to the full yield curve with a four-month look-back.

NOTE 7 FUNDING POLICY

For the years ended February 28, 2010 and 2009, the funding policy was to contribute at least the minimum amount required under ERISA, as calculated by the Plan's actuary. During 2010 and 2009, contributions were made to meet the minimum funding requirements of ERISA.

NOTE 8 TAX STATUS

The Plan obtained its latest determination letter on July 29, 2002, in which the Internal Revenue Service stated that the Plan and related trust qualifies under the applicable provisions of the Internal Revenue Code and therefore, is exempt from federal income taxes. The Plan has been amended since receiving the determination letter. The plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

DURO BAG MANUFACTURING COMPANY EMPLOYEES' PENSION PLAN

Notes to Financial Statements (Continued)

NOTE 10 PLAN TERMINATION

The Company expects the Plan to be continued indefinitely, but reserves the right to terminate the Plan and contributions thereunder, in whole or in part, at any time by action of its Trustees. If the Plan is terminated or partially terminated, benefits will be distributed pursuant to the terms of the Plan. Its net assets generally will not be available on a pro-rata basis to provide participants' benefits. Generally, the Plan provides the following priorities:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired when benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guarantee Corporation (PBGC) up to the applicable limitations (discussed below).
3. All other noninsured vested benefits.
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2010 and 2009, that ceiling is \$4,500. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial conditions of the plan sponsor and the level of benefits guaranteed by the PBGC. PBGC insurance guarantees are backed by the solvency of the PBGC – a U.S. Government agency. Should the PBGC become insolvent, additional appropriations to the agency would need to be authorized by the U.S. Government in order to pay guaranteed benefits.

NOTE 11 VOLUNTARY CORRECTION PROGRAM

Subsequent to February 28, 2008, the Plan determined it had neglected to make certain lump-sum and annuity distributions to various terminated employees as required by the Plan document. The Plan sponsor filed a Voluntary Correction Program (VCP) submission to the IRS. The Plan sponsor anticipates paying benefits of approximately \$685,000 plus interest and penalties. The Plan administrator does not expect the final outcome of the VCP submission to affect the Plan's tax status.

<i>Post retirement death benefit</i>	None, other than the benefit available under a selected optional form.
<i>Payment of pension</i>	All forms of payment are actuarially equivalent to a life annuity. Actuarial equivalence is determined based on the UP84 Mortality Table set back 2 years in age and 5.50% interest. The normal form is a Life Annuity for unmarried participants and 50% Joint and Survivor Annuity for married participants. Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Actuarial methods

Asset method

We used financial data submitted by the trustee as of March 1, 2009 without further audit. Customarily, this information would not be verified by a plan's actuary. We have reviewed the information for internal consistency and we have no reason to doubt its substantial accuracy.

The asset valuation method is an annual average of the adjusted market value over the last 25 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. The actuarial value of assets is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430. A characteristic of this asset valuation method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than market.

Participant methods

We used the participant data supplied by the plan sponsor. We have reviewed the data and have no reason to doubt its substantial accuracy. Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
- **Insurance contracts:** The plan does not have any insurance contracts.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants.
- **Estimated benefits:** We estimated benefits for terminated vested participants for whom exact calculations are not available.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Benefits included or excluded

Unless noted below, all benefits provided by the plan are included in this valuation.

- **Plan amendments:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Late retirement increases:**
 - Active participants: Late retirement actuarial increases apply to participants who defer retirement beyond age 65.
 - Deferred vested participants: Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Shutdown benefits:** We are not aware of any corporate actions that would create shutdown benefits; therefore, they are excluded.
- **IRC Section 415(b):** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **Benefit restrictions:** Benefit restrictions (if applicable) are ignored in this valuation.

Plan sponsor elections

- **Funding interest rates**
 - Full yield curve.
 - Four-month lookback.
- **Asset method**
 - Average value.
 - 25 months in averaging period.
 - Annual frequency.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Funding method

The funding target is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- An individual's **accrued liability** is the present value of benefits based on credited service as of the beginning of the plan year, and an individual's **normal cost** is the present value of the benefit deemed to accrue in the plan year. If multiple decrements are used, the accrued liability and the normal cost for an individual are the sum of the component accrued liabilities and normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual normal costs, and the plan's **funding target** is the sum of the accrued liabilities for all participants under the plan.

Significant events

To the best of our knowledge, no event occurred during the year that would significantly affect the valuation results.

Schedule SB, Line 32 – Schedule of Amortization Bases

The shortfall amortization charge is the sum of the shortfall base amortization for each plan year covered under PPA. Although a shortfall base can be negative, the combined shortfall amortization charge cannot be negative.

Schedule SB, Line 25 – Change in Method

Beginning with the 2009 valuation, expected administrative expenses were added to the normal cost and the asset method was changed from a smoothed value with 13 months in the average period to a smoothed value with 25 months in the average period. The funding interest rate was changed from the segmented yield curve with no phase-in or look-back to the full yield curve with a four-month look-back.

Schedule SB, Line 21b – Explanation of Discount Rate Applicable Month Discrepancy

The full yield curve with an applicable look-back month of November 2008 was used to value funding liabilities as of March 1, 2009.

The applicable month has not been entered here due to restrictions within the EFAST2 system which did not allow for an entry in line 21b if the "N/A, full yield curve used" option was selected in line 21a. Since the applicable month was the fourth month preceding the month including the valuation date (November 2008), "4" would have been entered in line 21b had the system allowed an entry.

Line 21b was completed on the pdf attachment of the Schedule SB.
