Profit sharing contributions, if any, made to the Plan will be allocated based on a formula that takes into account a Participant's estimated Social Security taxable wages. In general, these contributions, if any, will be allocated as follows to eligible Participants for a Plan Year:

- (a) An amount equal to a percentage of eligible compensation, plus
- (b) An amount equal to eligible compensation in excess of the Social Security Taxable Wage Base (as defined) times the lesser of the percentage in (a) or 5.7%.

The Firm may designate all or a portion of any matching and profit sharing contributions for a Plan Year as "Qualified Matching Contributions" and "Qualified Nondiscretionary Contributions", respectively, and allocate them to Non Highly Compensated Employees to help the Plan pass one or more annually required IRC nondiscrimination test(s).

The Participant's pretax contributions, the Firm's contributions and any interest and appreciation on such contributions invested are not included in the participant's taxable income until distributed.

Separate accounts are maintained for each Participant. Each participant's account is credited with the participant's contribution and the related Plan earnings (losses). The benefits to which a Participant is entitled are the benefits that can be provided from the Participant's vested account.

Vesting

Participants are always 100% vested in their "Rollover Contributions", "Qualified Matching Contributions", "Qualified Nonelective Contributions", "Regular Contributions" and any earnings thereon. "Employer Matching Contributions", "Basic Matching Contributions" and "Employer Profit Sharing Contributions" and any earnings thereon will be vested in accordance with the following schedule:

Years of Service	Vesting Percentage
Less than 2	0 %
2	20 %
3	40 %
4	60 %
5	80 %
6	100 %

Forfeited Accounts

A forfeiture occurs in the Plan when a terminated non-vested participant receives a distribution of the entire vested account balance, or if the participant does not receive a distribution after five consecutive one year breaks in service. Forfeited amounts are restored to a participant's account if the participant is re-employed before five consecutive one year breaks in service. If a participant received a distribution, the participant must first repay the full distribution before the end of the five-year period that begins on the date that the participant is re-employed to qualify for the re-instated forfeited amounts.

Forfeitures are retained in the Plan and will first be used to pay the Plan's administrative expenses. Any amounts not used to pay the Plan's administrative expenses will be used to reduce future Firm contributions payable under the Plan. At March 31, 2010 and 2009, the balance in the forfeiture accounts totaled \$259,522 and \$118,889 respectively. During the Plan Year, forfeitures in the amount of \$29,856 were used to pay the Plan's administrative expenses while \$335,364 were used to reduce employer contribution. Subsequent to the plan year, forfeitures totaling \$187,200 were used to reduce the current plan year's employer contribution receivable.

Investment Options

Under the terms of the Plan, a Participant makes all investment decisions with respect to his/her account balance, subject to available investment alternatives. A Participant may invest his/her account in any whole dollar increments to the available investment alternatives. Participants should refer to the respective mutual fund prospectus for a more complete description of the investment objectives. The investment options include various registered investment companies ("mutual funds").

Plan Benefits

A Participant may elect, upon separating from service to the Firm, or upon attaining the age of 59-1/2 if actively employed, to withdraw all or a portion of his or her before-tax contributions for any reason. A Participant may request a hardship withdrawal under the IRS safe harbor regulations based on the balance of his or her vested account. A Participant may request a withdrawal during any part of the Plan Year.

Notes to Financial Statements

March 31, 2010 and 2009

Benefits are payable to the Participant, or his or her beneficiary, upon death, or to the Participant upon disability, retirement or termination of employment. Payments will be made in a lump sum, as determined by IRS rules.

Participant Loans

Participants may borrow from their account a minimum of \$1,000 up to a maximum equal to the lesser of one-half of their vested account balance or \$50,000 reduced by the highest outstanding loan balance in their account during the prior twelve month period. Loans are secured by up to 50% of the Participant's vested account balance and bear a reasonable rate of interest as determined by the plan administrator based on prevailing interest rates. The interest rate remains fixed throughout the duration of the loan. The range of interest for Participant Loans is between 7% and 9.25%.

A Participant may only have one loan outstanding at any given time. Loan proceeds will be withdrawn from available contribution sources and investment options in the order established by the Trustee. All loans must be repaid in level payments through after-tax payroll deductions on at least a quarterly basis over a five year period unless it is for the purchase of a principal residence, in which case the loan repayment period may not extend beyond 10 years from the date of the loan. If a loan is not repaid within its stated period, it will be treated as a taxable distribution.

The plan administrator shall consider a loan in default if any scheduled repayment remains unpaid as of the last business day of the calendar quarter following the calendar quarter in which a loan is initially considered past due. In the event of a default, death, disability or termination of employment, the entire outstanding principal and accrued interest shall be immediately due and the Participant will be deemed to have received a taxable distribution from the Plan.

2. Summary of Significant Accounting Policies

The accompanying financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United State of America. A description of the more significant accounting policies follows.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investment valuation and Income Recognition

Quoted market prices, which represent the fair value on the last business day of the Plan's year are used to value the investments in mutual funds and each such investment is valued at the published net asset value for the respective fund on the last business day of the Plan's year. Participant loans are valued at their outstanding balances, which approximate fair value.

The annual net appreciation (depreciation) in the fair value of investments is reflected in the statement of changes in net assets available for benefits. Net appreciation (depreciation) in the fair value of investments consists of realized gains and losses and the unrealized appreciation (depreciation) on those investments.

The accompanying notes are an integral part of these financial statements.

New Accounting Pronouncements

In 2009, the FASB issued ASC 820-2009-9, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly and is effective for annual periods ending after June 15, 2009. ASC 820-2009-9 provides additional application guidance in determining fair values when there is no active market or where the price inputs being used represent distressed sales. It states the objective of fair value measurement – to reflect how much an asset would be sold for in an orderly transaction (as opposed to a distressed or forced transaction) at the date of the financial statements under current market conditions. Specifically, it reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. The adoption of ASC 820-2009-9 did not have an impact on the Plan's financial statements.

In 2009, the FASB issued ASC 855. ASC 855 provides general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In addition, ASC 855 requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date. ASC 855 is effective for interim or annual reporting periods ending after June 15, 2009. The adoption of ASC 855 did not have an impact on the Plan's financial statements.

In July 2009, the FASB issued SFAS 168. SFAS 168 approved the FASB Accounting Standards Codification as the single source of authoritative nongovernmental GAAP. The FASB Accounting Standards Codification is effective for interim or annual periods ending after September 15, 2009. All existing accounting standards have been superseded and all other accounting literature not included in the FASB Accounting Standards Codification will be considered nonauthoritative. The adoption of SFAS 168 does not impact the Plan's financial statements.

For periods ending and after December 15, 2009, the FASB issued ASU No. 2009-12, "Fair Value Measurements and Disclosures (Topic 820) – Investments in Certain Entities That Calculate Net Asset Value per Share (or its Equivalent)." ASU 2009 -12 provides guidance about using net asset value to measure the fair value of interests in certain investment funds and requires additional disclosures about interest in investments in investment funds. The Plan's fair value methodologies are consistent with ASU No. 2009 -12 its adoption does not have an impact on the Plan's financial statements.

The accompanying notes are an integral part of these financial statements.

Macquarie Holdings (USA) Inc. 401(k) Plan and Trust

Notes to Financial Statements

March 31, 2010 and 2009

In January 2010, the FASB issued ASU No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements." ASU No. 2010-06 provides amended disclosure requirements related to fair value measurements. ASU No. 2010-06 is effective for financial statements issued for reporting periods beginning after December 15, 2009 for certain disclosures and for reporting periods beginning after December 15, 2010 for other disclosures. The adoption of ASU No. 2010-06 is not expected to have an impact on the Plan's financial statements.

3. Risks and Uncertainties

The Plan provides for various investment options in any combination of mutual funds as offered to Plan participants. Market values of investments may rise or decline for a number of reasons including changes in prevailing market and interest rates, defaults and credit ratings. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in the risks noted above in the near term could materially affect Participants' account balances and the amounts reported in the statements of net assets available for benefits and the statement of changes in net assets available for benefits.

4. Plan Termination

While the Plan is intended to be permanent, it may be terminated at any time at the discretion of the Firm, subject to ERISA and IRS provisions. In the event of Plan termination, Participants will become 100% vested in unvested amounts in their employer contributions.

5. Information Certified by Fidelity Management Trust Company (Unaudited)

6. Fair Value Measurement

ASC 820, "Fair Value Measurements," establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. ASC 820, "Fair Value Measurements," establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly;

Level 3 – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Transfers between levels, if any, are recognized at the beginning of the reporting period in which they occur.

Plan assets include mutual funds and participant loans. Mutual Funds are valued at net asset value. Participant loans are valued at amortized cost, which approximates fair value. As there is no observed market for participant loans and they are issued at market interest rates, Plan management has assigned the loans a fair value equal to their amortized cost. The loans correspond to level 3 assets based upon the lack of observable market information and overall assumptions as to their fair value. The following table sets forth by level, within the fair value hierarchy, the Plan's assets fair value on a recurring basis as of March 31, 2010 and 2009:

7. Related Party Transactions

Certain Plan investments are shares of mutual funds managed by Fidelity Investments Institutional Operations Company, Inc. Fidelity Investments Institutional Operations Company, Inc. is the recordkeeper as defined by the Plan and, therefore, transactions with these entities qualify as party-in-interest transactions. Fees paid for investment management and other administrative services were borne by the Firm for the Plan years ended March 31, 2010 and 2009.

8. Subsequent Events

As of January 1, 2011, the 401k committee has decided to increase the non-discretionary matching contributions in an amount equal to 50% of each Participant's pretax contributions not to exceed 6% of the participant's eligible compensation for the Plan Year. Further, the limit of non-discretionary matching contribution limit of \$5,000 is removed as of January 1, 2011 and replaced with 3% of the IRS compensation limit (\$245,000 as of 2011).

The 401k committee further decided to change the plan year from a fiscal year (April 1 to March 31) to a calendar year effective January 1, 2011. Therefore, we will have a short plan year from April 1, 2010 to December 31, 2010.

The Plan has evaluated subsequent events through January 10, 2011, the date these financial statements were issued.

We were engaged to audit the financial statements and supplemental schedules of the Macquarie Holdings (USA) Inc. 401(k) Plan and Trust (the "Plan") at March 31, 2010 and 2009, and for the year ended March 31, 2010, as listed in the accompanying index. "Employer Matching Contributions", "Basic Matching Contributions" and "Employer Profit Sharing Contributions" and any earnings thereon will be vested in accordance with the following schedule:

Years of Service	Vesting Percentage
Less than 2	0 %
2	20 %
3	40 %
4	60 %
5	80 %
6	100 %

Forfeited Accounts

A forfeiture occurs in the Plan when a terminated non-vested participant receives a distribution of the entire vested account balance, or if the participant does not receive a distribution after five consecutive one year breaks in service. Forfeited amounts are restored to a participant's account if the participant is re-employed before five consecutive one year breaks in service. If a participant received a distribution, the participant must first repay the full distribution before the end of the five-year period that begins on the date that the participant is re-employed to qualify for the re-instated forfeited amounts.

Forfeitures are retained in the Plan and will first be used to pay the Plan's administrative expenses. Any amounts not used to pay the Plan's administrative expenses will be used to reduce future Firm contributions payable under the Plan. At March 31, 2010 and 2009, the balance in the forfeiture accounts totaled \$259,522 and \$118,889 respectively. During the Plan Year, forfeitures in the amount of \$29,856 were used to pay the Plan's administrative expenses while \$335,364 were used to reduce employer contribution. Subsequent to the plan year, forfeitures totaling \$187,200 were used to reduce the current plan year's employer contribution receivable.

Investment Options

Under the terms of the Plan, a Participant makes all investment decisions with respect to his/her account balance, subject to available investment alternatives. A Participant may invest his/her account in any whole dollar increments to the available investment alternatives. Participants should refer to the respective mutual fund prospectus for a more complete description of the investment objectives. The investment options include various registered investment companies ("mutual funds").

Plan Benefits

A Participant may elect, upon separating from service to the Firm, or upon attaining the age of 59-1/2 if actively employed, to withdraw all or a portion of his or her before-tax contributions for any reason. A Participant may request a hardship withdrawal under the IRS safe harbor regulations based on the balance of his or her vested account. A Participant may request a withdrawal during any part of the Plan Year.

Benefits are payable to the Participant, or his or her beneficiary, upon death, or to the Participant upon disability, retirement or termination of employment. Payments will be made in a lump sum, as determined by IRS rules.

Participant Loans

Participants may borrow from their account a minimum of \$1,000 up to a maximum equal to the lesser of one-half of their vested account balance or \$50,000 reduced by the highest outstanding loan balance in their account during the prior twelve month period. Loans are secured by up to 50% of the Participant's vested account balance and bear a reasonable rate of interest as determined by the plan administrator based on prevailing interest rates. The interest rate remains fixed throughout the duration of the loan. The range of interest for Participant Loans is between 7% and 9.25%.

A Participant may only have one loan outstanding at any given time. Loan proceeds will be withdrawn from available contribution sources and investment options in the order established by the Trustee. All loans must be repaid in level payments through after-tax payroll deductions on at least a quarterly basis over a five year period unless it is for the purchase of a principal residence, in which case the loan repayment period may not extend beyond 10 years from the date of the loan. If a loan is not repaid within its stated period, it will be treated as a taxable distribution.

The plan administrator shall consider a loan in default if any scheduled repayment remains unpaid as of the last business day of the calendar quarter following the calendar quarter in which a loan is initially considered past due. In the event of a default, death, disability or termination of employment, the entire outstanding principal and accrued interest shall be immediately due and the Participant will be deemed to have received a taxable distribution from the Plan.

2. Summary of Significant Accounting Policies

The accompanying financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United State of America. A description of the more significant accounting policies follows.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investment valuation and Income Recognition

Quoted market prices, which represent the fair value on the last business day of the Plan's year are used to value the investments in mutual funds and each such investment is valued at the published net asset value for the respective fund on the last business day of the Plan's year. Participant loans are valued at their outstanding balances, which approximate fair value.

The annual net appreciation (depreciation) in the fair value of investments is reflected in the statement of changes in net assets available for benefits. Net appreciation (depreciation) in the fair value of investments consists of realized gains and losses and the unrealized appreciation (depreciation) on those investments.

New Accounting Pronouncements

In 2009, the FASB issued ASC 820-2009-9, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly and is effective for annual periods ending after June 15, 2009. ASC 820-2009-9 provides additional application guidance in determining fair values when there is no active market or where the price inputs being used represent distressed sales. It states the objective of fair value measurement – to reflect how much an asset would be sold for in an orderly transaction (as opposed to a distressed or forced transaction) at the date of the financial statements under current market conditions. Specifically, it reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. The adoption of ASC 820-2009-9 did not have an impact on the Plan's financial statements.

In 2009, the FASB issued ASC 855. ASC 855 provides general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In addition, ASC 855 requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date. ASC 855 is effective for interim or annual reporting periods ending after June 15, 2009. The adoption of ASC 855 did not have an impact on the Plan's financial statements.

In July 2009, the FASB issued SFAS 168. SFAS 168 approved the FASB Accounting Standards Codification as the single source of authoritative nongovernmental GAAP. The FASB Accounting Standards Codification is effective for interim or annual periods ending after September 15, 2009. All existing accounting standards have been superseded and all other accounting literature not included in the FASB Accounting Standards Codification will be considered nonauthoritative. The adoption of SFAS 168 does not impact the Plan's financial statements.

For periods ending and after December 15, 2009, the FASB issued ASU No. 2009-12, "Fair Value Measurements and Disclosures (Topic 820) – Investments in Certain Entities That Calculate Net Asset Value per Share (or its Equivalent)." ASU 2009 -12 provides guidance about using net asset value to measure the fair value of interests in certain investment funds and requires additional disclosures about interest in investments in investment funds. The Plan's fair value methodologies are consistent with ASU No. 2009 -12 its adoption does not have an impact on the Plan's financial statements.

The accompanying notes are an integral part of these financial statements.

March 31, 2010 and 2009

In January 2010, the FASB issued ASU No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements." ASU No. 2010-06 provides amended disclosure requirements related to fair value measurements. ASU No. 2010-06 is effective for financial statements issued for reporting periods beginning after December 15, 2009 for certain disclosures and for reporting periods beginning after December 15, 2010 for other disclosures. The adoption of ASU No. 2010-06 is not expected to have an impact on the Plan's financial statements.

3. Risks and Uncertainties

The Plan provides for various investment options in any combination of mutual funds as offered to Plan participants. Market values of investments may rise or decline for a number of reasons including changes in prevailing market and interest rates, defaults and credit ratings. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in the risks noted above in the near term could materially affect Participants' account balances and the amounts reported in the statements of net assets available for benefits and the statement of changes in net assets available for benefits.

4. Plan Termination

While the Plan is intended to be permanent, it may be terminated at any time at the discretion of the Firm, subject to ERISA and IRS provisions. In the event of Plan termination, Participants will become 100% vested in unvested amounts in their employer contributions.

6. Fair Value Measurement

ASC 820, "Fair Value Measurements," establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. ASC 820, "Fair Value Measurements," establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly;

Level 3 – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Transfers between levels, if any, are recognized at the beginning of the reporting period in which they occur.

Plan assets include mutual funds and participant loans. Mutual Funds are valued at net asset value. Participant loans are valued at amortized cost, which approximates fair value. As there is no observed market for participant loans and they are issued at market interest rates, Plan management has assigned the loans a fair value equal to their amortized cost. The loans correspond to level 3 assets based upon the lack of observable market information and overall assumptions as to their fair value. The following table sets forth by level, within the fair value hierarchy, the Plan's assets fair value on a recurring basis as of March 31, 2010 and 2009:

7. Related Party Transactions

Certain Plan investments are shares of mutual funds managed by Fidelity Investments Institutional Operations Company, Inc. Fidelity Investments Institutional Operations Company, Inc. is the recordkeeper as defined by the Plan and, therefore, transactions with these entities qualify as party-in-interest transactions. Fees paid for investment management and other administrative services were borne by the Firm for the Plan years ended March 31, 2010 and 2009.

8. Subsequent Events

As of January 1, 2011, the 401k committee has decided to increase the non-discretionary matching contributions in an amount equal to 50% of each Participant's pretax contributions not to exceed 6% of the participant's eligible compensation for the Plan Year. Further, the limit of non-discretionary matching contribution limit of \$5,000 is removed as of January 1, 2011 and replaced with 3% of the IRS compensation limit (\$245,000 as of 2011).

The 401k committee further decided to change the plan year from a fiscal year (April 1 to March 31) to a calendar year effective January 1, 2011. Therefore, we will have a short plan year from April 1, 2010 to December 31, 2010.

The Plan has evaluated subsequent events through January 10, 2011, the date these financial statements were issued.
