Schedule SB, Part V – Statement of actuarial assumptions/methods

A. Minimum funding method

The target liability for minimum funding calculations is calculated as follows:

- An individual's accrued liability is the present value of benefits based on credited service and average pay as of the beginning of the plan year, and an individual's normal cost is the present value of the benefit deemed to accrue in the plan year. If multiple decrements are used, the target liability and the normal cost for an individual are the sum of the component target liabilities and normal costs associated with the various anticipated separation dates.
- The plan's target normal cost is the sum of the individual normal costs, and the plan's funding target is the sum of the accrued liabilities for all participants under the plan.

B. Maximum deductible contribution method

Calculations of maximum deductible contributions include the excess of the accrued liability computed using the projected unit credit method over the minimum funding target liability. The objective of the projected unit credit method is to fund each participant's benefits under the plan as they accrue, taking into consideration future compensation increases. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- An individual's **projected accrued liability** is the present value of benefits based on credited service as of the beginning of the plan year and projected compensation that would be used in the calculation of the benefit on each expected separation date. If multiple decrements are used, the accrued liability for an individual is the sum of the component accrued liabilities associated with the various anticipated separation dates.
- The plan's **projected** unit credit liability is the sum of the projected accrued liabilities for all participants under the plan. The excess of the plan's projected accrued liability over the plan's funding target is included in the "cushion amount."

C. Asset valuation method

The asset valuation method is the fair market value.

Schedule SB, Part V – Statement of actuarial assumptions/methods (continued)

D. Valuation procedures

Financial and census data: We used financial data submitted by the trustee as of January 1, 2008 without further audit and participant data as supplied by the plan sponsor. Customarily, this information would not be verified by a plan's actuary. We have reviewed the information for internal consistency and we have no reason to doubt its substantial accuracy.

IRC Section 415(b): The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.

Participants included: The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.

Participants excluded: None.

Insurance contracts: The plan does not have any insurance contracts.

E. Plan sponsor elections

Funding interest rate – effective January 1, 2009:

- Full yield curve
- 2 lookback months

Mortality assumption – effective January 1, 2008:

- PPA separate static annuitant and nonannuitant mortality tables

Treatment of insurance contracts – effective January 1, 2008:

- Not applicable

Schedule SB, Part V – Statement of actuarial assumptions/methods (continued)

F. Actuarial assumptions

The following assumptions were used in valuing the liabilities and benefits under the plan for purposes of determining contributions and liabilities for funding.

Discount rate elections¹	
▪ Funding	Full yield curve with 2 month lookback
Mortality elections	
▪ Healthy and disabled participants	2009 PPA separate static annuitant and nonannuitant mortality tables
417(e) lump sums	
▪ Annuity substitution	N/A
▪ Generational mortality option	N/A
▪ Phase-in option	N/A
Other economic assumptions	
▪ Salary increases	N/A
▪ Flat-dollar benefit increases	N/A
▪ Social Security wage base	N/A
▪ Expenses	Expected administrative expenses (assumed to equal prior year administrative expenses) discounted to beginning of year are included in normal cost. Investment expenses are not treated as administrative expenses for this purpose.

¹ Based on interest rate methodology elections described above.

Schedule SB, Part V – Summary of plan provisions

Following is a summary of the major plan provisions used to determine the plan's financial position. It should not be used in determining plan benefits.

Effective date and Plan year	Amended effective May 22, 1972. The plan year is the calendar year.
Definitions	
Normal retirement age	The first day of the month on or following the participant's 65 th birthday.
