Independent Auditors' Report

To the Participants and Administrator of the MeadWestvaco Corporation
Retirement Plan for Bargained Hourly Employees

We were engaged to audit the accompanying statements of net assets available for benefits and of accumulated plan benefits of the MeadWestvaco Corporation Retirement Plan for Bargained Hourly Employees (the "Plan") as of December 31, 2010 and 2009 and the related statement of changes in net assets available for benefits for the year ended December 31, 2010 and the supplemental Schedule of Assets (Held at End of Year) as of December 31, 2010. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 5, which was certified by The Northern Trust Company, the trustee for the Plan, and John Hancock Life Insurance Company, custodian for the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedule. We have been informed by the plan administrator that the trustee and custodian hold the Plan's investment assets and execute investment transactions. The plan administrator has obtained a certification from the trustee and custodian as of and for the years ended December 31, 2010 and 2009, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America, and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974

Amount of Benefits (continued)

Early Retirement (continued)

Legacy Westvaco Locations

Benefit computed as for normal retirement, based on allowed service at date of early retirement and reduced 0.25% monthly between ages 62 and 65, reduced by 0.50% monthly prior to age 62. For applicable locations, benefit is unreduced at age 62 and over for employees with at least 20 years of service. For Wilkata participants, benefit is reduced by the lesser of the reduction above or 5/12% for each month prior to age 65.

Late Retirement

The normal retirement benefit based on benefit rate and service at actual retirement.

Amount of Benefits (continued)

Disability Retirement (continued)

Legacy Mead Locations (continued)

At-A-Glance participants do not have a specific disability benefit. Disabled participants are eligible for retirement or vested benefits depending on their age and service.

Legacy Westvaco Locations

Accrued benefit to date without reduction for early commencement.

Vested Deferred Retirement

Accrued benefit commencing at age 65, or actuarially reduced as early as age 55. Participants at locations 025B, 025G, 025T, 026B, 029B, 034B and legacy Westvaco locations receive the benefit reduced as for early retirement.

Preretirement Death

Legacy Mead Locations

The amount is determined as if he terminated, or retired if eligible, on the first day of the month prior to his death with a 50% (75% if eligible for early retirement) Joint and Survivor annuity option in effect. The benefit is payable at the later of the participant's death or when he would have qualified for early retirement.

Schedule SB, Part V—Summary of Plan Provisions

Normal Form of Benefits

Life annuity. Married participants receive an actuarially reduced pension for life with 50% continuing to a surviving spouse upon death of the participant.

5-year Certain and Life for single Wilkata participants. Vested terminated participants at Wilkata with less than 15 years of service receive a life annuity.

Optional Form of Benefits

Some eligible legacy Mead locations may elect to take their benefit as a lump sum.

Company Service

Entire period of employment since hire (or rehire if not vested at prior termination and had 5 consecutive years with no break in service).

Credited or Allowed Service

Generally, entire period of employment after becoming a participant, adjusted for breaks in service.

ERISA Maximum Benefit

Retirement benefit is capped at \$195,000 payable as a life annuity reduced for early receipt.

Salary is capped at the IRC Section 401(a)(17) limit for benefit determination. The IRC Section 401(a)(17) limit for 2010 is \$245,000.

Container Plans

As of November 30, 1995, the Container Division was sold. Service was terminated for all Container Pension and Retirement Plan participants, and benefit accruals were fully vested as of November 30, 1995.

Wilkata Plan

The Wilkata Plan was frozen as of December 31, 1996. Service was frozen and all participants were fully vested as of this date.

Wilkata participants began accruing additional service under the MeadWestvaco Retirement Plan for Bargained Hourly Employees as of January 1, 2003.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

FOR BARGAINED HOURLY EMPLOYEES
NOTES TO FINANCIAL STATEMENTS

Note 1 - Description of the Plan

Organization and Administration

The following description of the MeadWestvaco Corporation Retirement Plan for Bargained Hourly Employees (the "Plan") provides only general information. Participants should refer to the Plan Document for a more complete description of the Plan's provisions. The Plan is a noncontributory defined benefit plan, which has been approved by the Board of Directors of MeadWestvaco Corporation (the "Company"). Plan assets, except for the investment in two group annuity contracts managed by the John Hancock Life Insurance Company ("John Hancock"), are invested in the MeadWestvaco Corporation Master Trust (the "Master Trust"). The Northern Trust Company is the Plan's trustee (the "Trustee") and John Hancock is the trustee for the group annuity contracts. The Plan is administered by the Benefit Plans Administration Committee and the Benefit Plans Investment Policy Committee, both of which are appointed by the Chief Executive Officer of the Company. Administrative expenses, including benefit payment service charges and actuarial, trustee and audit fees, are paid by the Plan. Commissions and fees paid in connection with securities transactions and the Pension Benefit Guaranty Corporation (the "PBGC") premiums are also paid by the Plan. The Company pays for a blanket fidelity insurance policy which provides coverage for the Plan.

Eligibility and Vesting

All MeadWestvaco Corporation bargained hourly employees are members of the Plan. Employees are eligible to participate immediately upon employment. The Plan provides for lifetime retirement benefits beginning at age 65 with reduced benefits available upon earlier retirement. Plan participants at certain locations who have 20 years of credited service may retire with full benefits at age 62. Similar amendments may be adopted for other locations as the cycle of contract negotiations is completed. Benefits vest after five years of credited service.

Note 1 - Continued

Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event of discontinuance of the Plan, all accrued benefits become vested and plan assets will be allocated to retirees and participants based on a predetermined order of precedence set forth in the Plan and by ERISA. First priority is payment of benefits derived from employee contributions, if any, and payment of benefits to participants who have been retired for three or more years. Second priority is payment of benefits to participants who would have been retired for three or more years had they elected early retirement. Third priority is payment of all remaining benefits which were vested prior to Plan termination. The final priority is payment of all other benefits. Any balance remaining would be disbursed by the Trustee at the direction of the Board of Directors of the Company.

Insurance coverage by the PBGC guarantees each participant's vested benefits (exclusive of benefits which would become vested upon Plan termination) up to \$4,500 per month for Plan terminations occurring during 2010. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risk and Uncertainties

The actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation and demographics. Investment securities held indirectly through the Plan's interest in the Master Trust are also exposed to various risks, such as interest rate, market and credit risks. Due to the changing nature of these assumptions and the level of risk associated with certain investment securities, it is at least reasonably possible that changes in these assumptions and changes in the values of the investment securities will occur in the near term and, due to the uncertainties inherent in setting assumptions, the effect of such changes could materially affect the amounts reported in the financial statements.

Allocation of Units of the Master Trust

Each month, the value of each individual plan's investment in the Master Trust is determined by specific contributions to that plan, net of benefit payments, and a proportionate allocation of Master Trust earnings (losses). Master Trust earnings (losses) are comprised of interest and dividend income and the net appreciation (depreciation) in the fair value of investments, reduced by investment management fees. Net appreciation (depreciation) in the fair value of Master Trust investments consists of the realized gains (losses) and the unrealized appreciation (depreciation) on those investments.

MEADWESTVACO CORPORATION
RETIREMENT PLAN
FOR BARGAINED HOURLY EMPLOYEES
NOTES TO FINANCIAL STATEMENTS

Note 2 - Continued

The allocation percentage of these earnings is calculated on the monthly valuation date by dividing the Plan's current fund balance, net of funding activities directly attributable to the Plan, by the consolidated fund balance of all plans participating in the Master Trust. Following such determination, each plan is credited with a proportionate allocation of Master Trust net earnings.

Security Transactions and Valuations

The Master Trust's investments are stated at fair value. The fair value of a financial instrument is the amount that would be received to sell an asset in an orderly transaction between market participants at the measurement date (the exit price). Security transactions of the Master Trust are accounted for on the trade date. Investments in equity and fixed income securities listed on national securities exchanges are valued at fair value based on the sales price per the fund company, which is reported on composite listings on the valuation date. Equity and fixed income securities and other assets are valued at fair value based on the official closing price on the NASDAQ listing. If not NASDAQ traded, the securities are valued at broker price or, if no bid is available, the securities are valued at a quoted bid price obtained from a major market maker. Units held in collective trusts and 103-12 investment entities are valued at the unit value as reported by the investment managers, which is based on the quoted market value of underlying assets or market interest rates and quoted values for similar securities, as of December 31, 2010 and December 31, 2009. Investments in partnerships and joint ventures are valued at estimated fair value based upon a valuation of the underlying portfolio using guidelines or standard industry practices. Real estate investments are valued at estimated fair value based upon fund statements provided by the fund managers. Dividends are recorded on the ex-dividend date. Interest is recorded on the accrual basis. The Group Annuity Contracts with John Hancock are valued at contract value, which consists of contract cost adjusted for investment income, benefit payments and expenses, which approximates fair value.

Payment of Benefits

Benefit payments to participants are recorded when paid.

Funding Policy, Actuarial Methods and Assumptions

Contributions to the Plan, if any, are paid by the Company and equal or exceed ERISA minimum funding standards. The actuary's funding recommendations are based on the Projected Unit Credit Actuarial Cost Method in conjunction with the actuarial assumptions. In August 2006, the President signed into law the Pension Protection Act of 2006 (the "PPA"). The PPA establishes new minimum funding rules for defined benefit pension plans beginning in 2008. The Company does not anticipate any required funding payments in the foreseeable future as a result of this legislation due to the overfunded status of the Plan. The Company made no contribution for the year ended December 31, 2010 in accordance with the ERISA minimum funding requirements.

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable to the service employees have rendered under the Plan's provisions. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

The actuarial present value of accumulated plan benefits is determined by Aon Hewitt and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Note 2 - Continued

For the year ended December 31, 2010 and 2009, the following actuarial assumptions were used:

- Mortality (active and retiree) - using the RP-2000CH Fully Generational and the RP-2000CH Mortality Table projected to 2019, respectively
- Mortality (disabled) - using the RP-2000DR Disabled Mortality Table
- Average retirement age - 62
- Asset valuation method - fair market value
- Interest rate - 2010 and 2009 - 8.00%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated benefits.

Derivatives

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust utilizes both exchange traded investment instruments, such as equity and interest rate futures, options on futures, and over-the-counter ("OTC") instruments, such as options and forward exchange contracts. Select major financial institutions are used in derivatives transactions. When engaging in OTC and forward exchange contracts, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. The Master Trust manages this for interest rate derivatives by requiring counterparties to post collateral with de minimis thresholds. The Master Trust manages credit exposure for forward exchange contracts through credit approvals, limits, and monitoring procedures and, to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. Procedures are in place at the trustee and at the investment managers to regularly monitor and report market and counterparty credit risks associated with these instruments.

RETIREMENT PLAN
FOR BARGAINED HOURLY EMPLOYEES
NOTES TO FINANCIAL STATEMENTS

Note 2 - Continued

The Master Trust does not anticipate nonperformance by counterparties to these contracts, and no material loss would be expected from any such nonperformance.

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Foreign Currency Exchange Contracts:

A forward foreign currency exchange contract ("forward currency contract") is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate. Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies, and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward exchange contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of the contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

Future Contracts:

A future contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date, in accordance with terms specified by a regulated future exchange. The Master Trust uses equity index and fixed income future contracts to manage exposure to the market.

Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held or hedge the fair value of other fund investments. The Master Trust does not employ leverage in its use of futures; thus, cash balances are maintained at a level at least equal to the contract value of the futures.

Future contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a future contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the future contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the future contract. Such receipts or payments are known as variation margin, which are settled daily and are included in the realized gains (losses) on future contracts. The Master Trust will record a variation margin receivable or payable in the net assets for variation margins, which have not yet been paid at the end of the year.

Future contracts involve, to varying degrees, credit and market risks. The Master Trust enters into future contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the future contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a future contract and the underlying index or security.

Options:

An option contract is a contract in which the writer of the option grants the buyer of the option the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain options, including options on indices, will require cash settlement by the Master Trust if the option is exercised. The Master Trust may enter into put or call option contracts in order to hedge against potential adverse price movements in the value of the portfolio assets, as a temporary substitute for selling selected investments; to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments; and to enhance potential gain. The Master Trust does not employ leverage in its use of options; thus, cash balances are maintained at a level at least equal to the underlying index exposure of the option contracts.

When the Master Trust purchases or writes an option, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. Options purchased or written are valued at the last sale price or, in the absence of a sale; the mean between the closing bid and asked prices or at the most recent asked price (bid for purchased options) if no bid and asked price are available. OTC purchased or written options are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is closed. Changes in the fair value of an option are recognized in earnings of the Master Trust.

If the Master Trust writes a covered call option, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option, it accepts the risk of a decline in the value of the underlying security below the exercise price. OTC options have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased options is limited to the premium initially paid.

MEADWESTVACO CORPORATION
RETIREMENT PLAN
FOR BARGAINED HOURLY EMPLOYEES
NOTES TO FINANCIAL STATEMENTS

Note 2 - Continued

In addition, certain risks may arise upon entering into option contracts prior to the expiration date, and a change in value of the option contract may not correlate exactly with changes in the value of the securities or currencies hedged.

The Master Trust uses the following types of options: options on fixed income futures, options on equity indices, options on foreign currencies, and options on equity securities.

Swaps:

A swap is an agreement between two parties to exchange different financial returns on a notional investment amount. The major forms of swaps traded are interest rate swaps, credit default swaps, and total return swaps. The Master Trust uses swap and swaption (an option on a swap) contracts to adjust exposure to interest rates, fixed income securities exposure, credit exposure, and equity exposure, and to generate income based on the investment views of the portfolio managers regarding interest rates, indices and debt issues. Swaps are valued using a modeling technique which utilizes a market based discounted cash flow analysis.

Interest rate swaps involve exchanges of fixed rate and floating rate interest. Interest rate swaps are often used to alter exposure to interest rate fluctuations, by swapping fixed rate obligations for floating rate obligations, or vice versa. The counterparties to the swap agree to exchange interest payments on specific dates, according to a predetermined formula. The payment flows are usually netted against each other, with one party paying the difference to the other.

A credit default swap is a contract between a buyer and seller of protection against pre-defined credit events. The Master Trust may buy or sell credit default swap contracts to seek to increase the Master Trust's income or to mitigate the risk of default on Master Trust securities.

A total return swap is a contract between a buyer and seller of exposures to certain asset classes such as equities. The Master Trust may buy or sell total return contracts to seek to increase or reduce the Master Trust's exposure to certain asset classes.

Note 3 - Federal Income Taxes

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated January 20, 2011, that the Plan and related Master Trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since receiving the determination letter, however, the Plan Administrator believes the Plan and Master Trust continue to be designed and operated in compliance with the requirements for income tax exemption under the IRC, and no income tax provision is required.

The Plan recognizes the tax benefits of certain tax positions only when the position is "more likely than not" to be sustained assuming examination by tax authorities. The tax benefit recognized is the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. As of and during the period ended December 31, 2010, the Plan did not have any liabilities for any uncertain tax positions. The Plan's open tax years for the prior three years are subject to examination by the IRS.

Note 4 - Group Annuity Contracts - John Hancock

Prior to April 1, 1970, all contributions to the Plan were used to purchase deferred annuity benefits under participating group annuity contracts administered by John Hancock. John Hancock maintains the contributions in a general account. Specific securities within the general account are not attributed to the investment contract with the Plan. The Plan owns a series of guarantees that are embedded in the insurance contract. The contractual guarantees are backed up by the full faith and credit of John Hancock, the contract issuer. Employee retirement benefits, to the extent derived from those contributions, are contractually obligated to be repaid the principal and specified interest rate that is guaranteed to the Plan. There are no reserves against contract value for credit risk of the contract issuer or otherwise. The John Hancock contract is valued using a predetermined rate of interest applied to the contract.

Note 8 - Related Party Transactions

MeadWestvaco Corporation as Plan sponsor is a related party. The Short Term Investment Fund is managed by The Northern Trust Company and, therefore, these transactions qualify as party-in-interest transactions.

Note 9 - Fair Value Measurement

The Plan applies the provisions of Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 820-10 “Fair Value Measurements and Disclosures,” which establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Inputs may be based on independent market data (“observable inputs”) or they may be internally developed (“unobservable inputs”). The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820-10 are as follows:

Level 1 - Observable inputs based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly or indirectly, including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not considered to be active, inputs other than quoted prices that are observable for the asset or liability, and inputs that derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Unobservable inputs that reflect an entity’s own assumptions about what inputs a market participant would use in pricing the asset or liability based on the best information available in the circumstances.

MEADWESTVACO CORPORATION
RETIREMENT PLAN
FOR BARGAINED HOURLY EMPLOYEES
NOTES TO FINANCIAL STATEMENTS

Note 9 - Continued

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the period.

In January 2010, the FASB issued ASU 2010-06, *Improving Disclosures about Fair Value Measurements*, (ASU 2010-06). ASU 2010-06 amended ASC 820 to clarify certain existing fair value disclosures and require a number of additional disclosures. The guidance in ASU 2010-06 clarified that disclosures should be presented separately for each “class” of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2 and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the Plan adopted the guidance in ASU 2010-06 as of December 31, 2010. Adoption of ASU 2010-06 did not have a material effect on the Plan’s net assets available for benefits or its changes in net assets available for benefits.

Management’s assessment of the assets specific to the Master Trust (which holds the assets of the retirement plans) and are based on the lowest level of any input that is significant to the fair value measurement in its entirety, as of December 31, 2010 and 2009. The categorization of a value determined for a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Plans’ perceived risk of that instrument. Plan Management has used valuation techniques to maximize observable inputs and minimize the use of unobservable inputs.

Note 9 - Continued

Following is a description of the valuation methodologies used for assets at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

Equities: Valued at the closing price reported in the primary and secondary markets. When quoted prices are not available, similar instruments adjusted for certain risks that may not be observable are used, such as liquidity risks.

Corporate bonds: Certain corporate bonds are valued at the closing price reported in the primary and secondary markets in which the bond is traded. Other bonds are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

U.S. government securities: Valued at the closing price reported in the primary and secondary markets in which the individual security is traded. When quoted prices are not available for identical or similar securities, the security is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Mutual funds and common collective trusts: Fair value represents the net asset value (NAV) of the fund shares, which is calculated based on the valuation of the funds' underlying investments at fair value at the end of the year. The investments are public investment vehicles, which are using the NAV provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the fund, excluding transaction costs, minus its liabilities, and then divided by the number of shares outstanding. See the fair value tabular information for a further explanation of the NAV.

Note 9 - Continued

Derivatives: Valued by third party vendors based on discounted cash flow models with market based interest rates as inputs. See Note 2 for a description of value for derivative instruments.

Partnerships and joint ventures: Valued quarterly on the basis of discounted cash flow analysis and comparable market inputs.

Real estate: Valued quarterly on the basis of a discounted cash flow approach, which includes the future rental receipts, expenses, and residual values as the highest and best use of the real estate from a market participant's view as rental property.

Other assets and liabilities: Valued at the closing price reported in the primary and secondary markets in which the individual security is traded. When quoted prices are not available, the security is valued using observable inputs, such as similar instruments.

Total Master Trust assets and liabilities at fair value classified within Level 3 were \$224,656,391 and \$180,227,820, as of December 31, 2010 and 2009, respectively. Such amounts were 6% and 5% of "Total investments" on the Master Trust's statement of net assets at fair value as of December 31, 2010 and 2009, respectively. The following information is presented for assets recorded in the Plan's statement of net assets available for benefits at December 31, 2010 and 2009, respectively.

The John Hancock group annuity contracts had a fair value of \$1,982,420 and \$1,956,835 at December 31, 2010 and 2009, respectively, classified within Level 3. The John Hancock contract is valued at its principal balance and accumulated interest based on its guaranteed interest rate. The change in value for the period ended December 31, 2010 is attributed to sales of \$97,999 and realized income of \$123,584.

Transfer In/Out ⁽²⁾	-	-	(4,551,406)	(10,997)	1,129,590	-	(3,432,813)
Ending Market Value 12/31/10	\$ 33,000	\$132,670,426	\$11,400,454	\$16,043,855	\$11,070,818	\$53,437,838	\$224,656,391

⁽¹⁾ Derivatives are included in "Other" category.

⁽²⁾ Due to market conditions that were present at 12/31/2009, certain corporate debt securities were utilizing unobservable inputs. As the market became more stable in 2010, the securities transferred from Level 3 to Level 2 by using observable inputs.

The weakening demand for US government securities and less stable market conditions during 2010 resulted in the need to use unobservable inputs to value the securities. Consequently, they were transferred from Level 2 to Level 3.

Note 10 - Recent Accounting Pronouncements

In May 2011, the FASB issued Accounting Standards Update 2011-04, *Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs*, (ASU 2011-04). ASU 2011-04 amended ASC 820, *Fair Value Measurements and Disclosures*, to converge the fair value measurement guidance in US generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRSs). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures (although certain of these new disclosures will not be required for nonpublic entities). The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.
