Report of Independent Auditors

To the Participants and Administrator of the
Marine and Power Systems Retirement Plan:

In our opinion, the accompanying Statements of Net Assets Available for Benefits as of December 31, 2010 and 2009 and the related Statements of Changes in Net Assets Available for Benefits for the years then ended and the Statement of Accumulated Plan Benefits as of January 1, 2010 and the related Statement of Changes in Accumulated Plan Benefits for the year then ended, present fairly, in all material respects, information regarding the net assets available for benefits of the Marine and Power Systems Retirement Plan (the "Plan") at December 31, 2010 and changes therein for the year then ended and its financial status as of January 1, 2010, and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Statement by Enrolled Actuary (see instructions before signing):

To the best of my knowledge, the information supplied in this schedule and on the accompanying schedules, statements, and attachments, if any, is complete and accurate, and in my opinion each assumption, used in combination, represents my best estimate of anticipated experience under the plan. Furthermore, in the case of a plan other than a multiemployer plan, each assumption used (a) is reasonable (taking into account the experience of the plan and reasonable expectations) or (b) would, in the aggregate, result in a total contribution equivalent to that which would be determined if each such assumption were reasonable; in the case of a multiemployer plan, the assumptions used, in the aggregate, are reasonable (taking into account the experience of the plan and reasonable expectations).

The gain/(loss) due to investment return is recognized over four years. The actuarial value of assets is further limited to not less than 80% or greater than 120% of market value.

For the maximum deductible contribution, the rules under the Pension Protection Act apply, based on the plan sponsor's election of an allowable asset averaging method. The actuarial value of assets is an average of the market value of assets as of the valuation date and the adjusted market value of assets as of the preceding two years. The adjusted assets reflect expected earnings (subject to a statutory cap) and actual cash flow. The resulting value is limited to between 90% and 110% of the market value of assets. The methodology was changed from market value of assets in 2008.

Actuarial cost method:

Projected Unit Credit

This cost method develops the annual cost or expense of the Plan in two parts: that attributable to benefits accruing in the current year, known as the normal or service cost; and that due to service earned prior to the current year, known as the actuarial accrued or past service liability. Each of these components is calculated individually for each active employee.

The normal cost is the present value of the portion of projected benefits that is attributable to service accrued in the current year. The unfunded actuarial liability reflects the difference between the portion of projected benefits attributable to service credited prior to the valuation date and assets already accumulated. The unfunded actuarial liability is paid off in accordance with a specified amortization procedure.

Under the projected unit credit cost method, if actual plan experience is close to the assumptions, the normal cost will increase each year for each employee as he or she approaches retirement age. The total contribution is made up of the sum of the individual normal costs and the amortization payment on the unfunded actuarial liability.

SUMMARY OF PLAN PROVISIONS

This subsection summarizes the major provisions of the Marine and Power Systems Retirement Plan applicable to employees of SPD Technologies, as included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Plan Status:

Plan is closed to all new hires.

Normal retirement:

Age requirement:

65

Service requirement:

5 years of participation service; None if participation commenced prior to January 1, 1988.

Amount:

A certain percentage of earnings up to a breakpoint each year plus a different percentage of earnings in excess of the breakpoint. The percentages and the associated breakpoints are listed in the following chart. A flat rate minimum benefit for each year of service is also listed in the following Chart of Plan Provisions. For Henschel non-highly compensated employees hired before June 2, 1989, the benefit is based on 1.4% of final five-year average earnings less 1.4% of the primary Social Security benefit times years of service. For service after age 45, both percentages become 1.8%.

Compensation:

For any Plan Year, but only during the time he or she was a participant, the total taxable earnings, including overtime, bonuses and severance pay and suggestion or scientific awards reported to a participant in Box 1 on Form W-2, but excluding any reimbursements or expenses or losses, employer contributions under any employee stock purchase plan or deferred compensation plan. The amount of any elective deferrals the participant has authorized the employer to make in accordance with IRC Sections 125 and 401(k) shall be included.

Compensation is limited per IRC section 401(a)(17), as amended for EGTRRA to \$245,000.

Early retirement:

Age requirement: 55

Service requirement:

10 years of vesting service; for Henschel hourly employees and Henschel non-highly compensated employees hired prior to June 2, 1989, 5 years of vesting service.

Amount:

Normal retirement accrued benefit reduced by the early retirement factors as listed in the following Chart of Plan Provisions.

Temporary early retirement supplement:

Amount:

A participant who retires after his Early Retirement Date with at least 30 years of service and satisfies certain age and date of retirement requirements, is entitled to the monthly amount listed in the following Chart of Plan Provisions. This temporary supplement is payable until the earlier of age 62 or death.

Deferred retirement:

Additional accruals to actual retirement date.

Disability:

Eligibility:

This subsection summarizes the major provisions of the Marine and Power Systems Retirement Plan applicable to employees of Power Paragon, Inc., and as included in the valuation. It is not intended to be, nor should it be interpreted as a complete statement of all plan provisions.

Plan Status: The plan is closed to employees hired on or after January 1, 2007. Employees hired prior to January 1, 2007 will receive ongoing accruals.

Normal Retirement:

Age requirement: 65

Service requirement: 1 year of vesting service.

Compensation: Defined as total annual compensation actually paid by employer, including elective contributions or deferrals made by the employer on behalf of the employee that are not includible in gross income. Compensation is capped at \$245,000 (adjusted for cost of living, as provided by Code Section 401(a)(17)). Average Monthly Compensation is attained by dividing total compensation during the highest five consecutive calendar years out of the last ten consecutive calendar years by 60.

Amount: 0.65% multiplied by Credited Service (not to exceed 35 years) times the lesser of the participant's Average Monthly Compensation and Monthly Covered Compensation, plus 1.30% multiplied by Credited Service (not to exceed 35 years) times the participant's Average Monthly Compensation in excess of Monthly Covered Compensation.

Minimum amount: For Grandfathered Participants a minimum benefit equal to (a) – (b), as defined below. For purposes of computing the Grandfather Minimum Benefit, Credited Service includes service under the current plan as well as Teledyne and MagneTek Plans.

(a) 1.00% multiplied by Credited Service (not to exceed 30 years) times the lesser of the participant's Average Monthly Compensation and Monthly Covered Compensation, plus

Attachment to 2010 Schedule B of Form 5500
Schedule B, Line 6 – Summary of Plan Provisions

EIN 13-3937436 / PN 012

1.65% multiplied by Credited Service (not to exceed 30 years) and the participant's Average Monthly Compensation in excess of Monthly Covered Compensation.

(b) MagneTek Plan accrued benefit plus any transition credits at Severance from Service Date converted to a life annuity with 120 months certain benefit.

Grandfathered Participants are employees covered by the Teledyne Plan on October 30, 1992, who were age 45 with 5 years of vesting service and age plus service at least equal to 60 on October 30, 1992, who became participants in the MagneTek Plan on October 31, 1992, and who commenced participation in the plan on January 1, 1995.

Early Retirement:

Age requirement:

55

Service requirement:

10 years of Vesting Service

Amount:

Accrued normal retirement benefit reduced by actuarial equivalent factors for early commencement.

Early commencement reduction:

Based on actuarial equivalence using 1984 Unisex Pension Mortality Table with an interest rate of 7-1/2%.

Deferred Retirement:

Additional accruals to actual retirement date.

Disability:

Service requirement:

5 years of Vesting Service

Benefit:

Accrued Benefit calculated using level Compensation from disability until age 65 or benefit commencement date and Credited Service from employment commencement date to age 65 or benefit commencement date. If benefits commence before age 65, an actuarial equivalent reduction will be applied for early commencement.

1. Plan Description

The following brief description of the Marine and Systems Retirement Plan (formerly the SPD Technologies Retirement Plan) (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

The Plan is a non-contributory defined benefit plan which covers substantially all the employees of SPD Technologies, a division of L-3 Communications Corporation (the “Company”), a wholly owned subsidiary of L-3 Communications Holdings, Inc. The Plan also covered employees of the following subsidiaries of the Company: SPD Technologies, Inc., SPD Electrical Systems, Inc., SPD Switchgear, Inc., Henschel, Inc., and PacOrd, Inc. Effective October 15, 1992, any employee of PacOrd, Inc., who was hired on or after such date, is not eligible to participate in the Plan. Effective September 1, 1995, any employee of Henschel, Inc. who was hired on or after such date, is not eligible to participate in the Plan. Effective January 1, 1995, any salaried employee of SPD Technologies, Inc., or SPD Switchgear, Inc. who is hired on or after such date, is not eligible to participate in the Plan. The Plan is subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared using the accrual basis of accounting.

Investment in Master Trust

Investment assets of the Plan are maintained in the L-3 Communications Corporation Master Trust (the “Master Trust”) administered by The Bank of New York Mellon, as Trustee. The Plan participates in the Master Trust along with other defined benefit plans sponsored by the Company (collectively, the “L-3 Participating Plans”). The only investment of the Plan is its interest in the net assets of the Master Trust. The fair value of the Plan’s interest in the Master Trust is determined based on the beginning of year value of the Plan’s interest in the trust plus actual contributions and allocated investment income (loss) less actual distributions and actual administrative expenses. Assets held in the Master Trust primarily consist of corporate equity securities, commingled trust funds and mutual funds, corporate bonds and Government and mortgage-backed securities. See Note 6 for a description of the valuation methodologies of the assets of the Master Trust.

The Master Trust records investment transactions on the trade-date, dividend income on the ex-dividend date, interest income as earned and determines realized gains and losses on sales of securities based on the average cost method.

Net Investment Gain (Loss) from Master Trust

The net investment gain (loss) from the Master Trust includes interest and dividend income and net appreciation or depreciation in the fair value of investments, which includes gains or losses realized upon disposition of investments and net unrealized appreciation or depreciation of investments. The net investment gain or loss is allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Benefit Payments

Benefit payments are recorded when paid.

Plan Expenses

The administrative expenses of the Plan are paid for by the Plan. Administrative expenses are allocated to the Plan at the direction of the Company based upon the Plan's respective portion of the expense. Investment management fees of the Master Trust are allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make significant estimates and assumptions that affect the reported amounts of assets, liabilities, benefit obligations, and changes therein, disclosures of contingent assets, liabilities and benefit obligations, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results will differ from those estimates.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are determined based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in the estimates and assumptions in the near term would be material to the financial statements.

The investments held in the Master Trust are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in risks in the near term would materially affect the investments and related allocation reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

Subsequent Events

The Plan continued to evaluate events after the Statement of Net Assets Available for Benefits date through September 15, 2011, the date the financial statements were available to be issued.

3. Contributions

Generally, the Company's funding policy is to contribute amounts in accordance with the Internal Revenue Code ("IRC") and the minimum funding requirements under ERISA. There were no contributions required from the Company in 2010 and 2009 under the minimum funding requirements of ERISA. Contributions are calculated using the Projected Unit Credit Actuarial Cost Method. Under this method, the total actuarial liability for participants is the actuarial present value as of the valuation date of all benefits attributed by the pension benefit formula to employee service rendered prior to that date, which assumes the normal cost will increase each year for each employee as he or she approaches retirement age. The yield (interest, dividends and net realized and unrealized gains and losses) on investments of the Plan serves to adjust future contributions that will be required to provide for the defined level of benefits.

4. Plan Benefits

The Plan provides an annual benefit for each year of service, which ranges from 1% to 2% of compensation based on length of service, compensation levels and division of SPD. Benefits vest 100% after five years of service and are payable at age 65. Effective June 30, 2008, benefit accruals under the Plan have been frozen for UAW Local 1612 represented employees of SPD Electrical Systems, Inc. and SPD Switchgear, Inc.

The Plan permits early retirement for participants at age 55 with at least 10 years of service. The benefit may begin at the date of early retirement, reduced by up to 6% for each year prior to age 65 depending on length of service and division of SPD. Retirees may elect to receive their pension benefits in the form of a joint and survivor annuity or a life annuity payable monthly from the date of retirement. Under the joint and survivor annuity, if a vested participant dies prior to the date pension benefits commence, the surviving spouse of the deceased vested participant receives benefits equal to 50% of the amount which would have been payable to the retiree under a joint and survivor annuity. Under the life annuity, there are no continuing payments after the death of the retiree. If participants are terminated before completing five years of service, they forfeit the right to receive their accumulated benefits.

The following presents the more significant assumptions underlying the actuarial computations as of January 1, 2010 and 2009.

Mortality basis	RP-2000 Combined Table
Retirement	Retirement starting at 55, with 100% by age 70.
Discount rate for the determination of the present value of accumulated plan benefits	2010 and 2009 – 7.5%

The foregoing actuarial assumptions are based upon the assumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors may be used in determining the actuarial present value of accumulated plan benefits.

6. Fair Value Measurements

The Plan adopted the standards for fair value measurements. The provisions of the standards are applicable to all of the Plan's assets and liabilities that are measured and recorded at fair value. The standards establish a framework for measuring fair value and expand related disclosures. The standards define fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants. It establishes a fair value hierarchy that gives the highest priority to observable inputs and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are described below.

Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date. The Plan's Level 1 assets include equity securities, certain mutual funds and U.S. Treasury bonds, all of which fair value is derived from quoted market prices.

Level 2: Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date. The fair value is determined using a valuation model based on observable market inputs. The Plan's Level 2 assets include commingled trust funds, certain mutual funds, corporate bonds, government securities and forward contracts.

Level 3: Pricing inputs that are generally unobservable inputs and not corroborated by market data. The Plan has no Level 3 assets.

The table below reports by level, within the fair value hierarchy, the assets held in the Master Trust at fair value as of December 31, 2010 and 2009, including a description of the valuation methodologies. As required by the standards, each asset is classified based on the lowest level of input that is significant to the fair value measurement.

Asset Category	Fair Value Measured at December 31, 2010				Fair Value Measured at December 31, 2009			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

⁽¹⁾ Equity securities consist of investments in common stock of U.S. and foreign companies. The fair value of equity securities is based on quoted market prices available in active markets at the close of a trading day, primarily the New York Stock Exchange (NYSE), National Association of Securities Dealers Automated Quotations (NASDAQ), and various foreign exchanges. The Level 2 investment balance is derived from a pooled equity fund offered by a registered investment company, which fair value is based on net asset value (NAV). NAV is calculated by the fund manager based on the fair value of the fund's holdings, primarily equity securities traded in active markets, determined as of the end of each month. Withdrawals are permitted monthly based on NAV.

⁽²⁾ Approximately 50% in 2010 and 53% in 2009 of plan assets invested in fixed income — investment grade securities consist of a mutual fund offered by a registered investment company. The mutual fund invests in investment grade fixed income securities, mortgaged-backed securities, U.S. treasury

and agency bonds and corporate bonds. This fund is classified by the Company as a Level 1 measurement within the fair value hierarchy as the mutual fund trades on an active market and daily, quoted prices are available.

- ⁽³⁾ The remaining 50% in 2010 and 47% in 2009 of plan assets invested in fixed income — investment grade securities is derived from pooled bond funds offered by registered investment companies. As these funds do not trade in an active market, the fair value is based on NAVs calculated by fund managers based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs.
- ⁽⁴⁾ Fixed income — high yield consists of investments in corporate high-yield bonds from various industries. The fair values of these investments are based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs.
- ⁽⁵⁾ Real Estate Investment Trusts (REITs) consist of securities that trade on the major exchanges and invest in real estate directly, either through properties or mortgages.
- ⁽⁶⁾ Other consists of short term investments maintained in a commingled trust or pooled fund, which primarily invests in short term, high quality money market securities such as government obligations, commercial paper, time deposits and certificates of deposit, which are classified as Level 2.

7. Accounting Standards Issued and Not Yet Implemented

In May 2011, the FASB issued a revised accounting standard for fair value measurement and disclosure. The revisions clarify how to measure fair value and require additional disclosures as follows: 1) transfers between Level 1 and Level 2 of the fair value hierarchy, 2) the valuation process used and the sensitivity of a fair value measurement categorized within Level 3 of the fair value hierarchy to changes in unobservable inputs, and 3) the categorization by level of the fair value hierarchy for items that are not measured at fair value in the Statement of Net Assets Available for Benefits, but for which the fair value of such items is required to be disclosed. The revised accounting standard is effective for the Company beginning after December 15, 2011, and is not expected to have an impact on the Plan's Net Assets Available for Benefits.

8. Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated October 29, 2008, that the Plan is designed in accordance with the applicable sections of the IRC. The Plan has been amended since receiving the determination letter. The Plan administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable regulations of the IRC; therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions by the Plan, and has concluded that as of December 31, 2010, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to the year ended December 31, 2006.

9. *Related Party Transactions*

Certain plan investments held in the Master Trust are units of a commingled trust fund managed by The Bank of New York Mellon, the Plan's trustee.

10. *Termination Priorities*

While the Company has not expressed any intention to do so, it is free to discontinue its contributions at any time and to terminate the Plan, subject to collective bargaining and the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated as specified by the Plan in accordance with ERISA, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination.
- b. Benefits attributable to participants who have retired at least three years before the termination date of the Plan or those participants who were eligible to retire and receive pension benefits at least three years before, but who did not elect to retire at that time.
- c. Benefits commencing at retirement age to participants who are eligible to receive guaranteed benefits under ERISA.
- d. All vested and non-vested benefits.

To the extent the Plan's net assets are not sufficient to fund the accumulated benefits upon Plan termination, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation, up to specified limits.
