Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

The Administrative Committee and Participants Invensys Pension Plan

We were engaged to audit the financial statements of the Invensys Pension Plan as of December 31, 2010 and 2009, and for the years then ended, as listed in the table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 3, which was certified by State Street Bank & Trust Company, the trustee of the Plan, except for comparing the information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2010 and 2009, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the investment information certified by the trustee and custodians, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Invensys Pension Plan

Notes to Financial Statements

December 31, 2010

1. Plan Description

The Invensys Pension Plan (the Plan) is a noncontributory defined benefit plan which covers most nonunion employees of Invensys, Inc. (the Company), as defined in the Plan. The Company is the Plan Sponsor. All eligible employees become participants following completion of a one-year-of-service eligibility requirement.

The Plan provides that retirement benefits be paid to Plan members who have reached the age of 65. Such benefits are defined in the Plan and are based on compensation levels and years of credited service. The Plan also provides for early retirement, disability, and death benefits. Information concerning the Plan Agreement is available from the Human Resources Department.

Plan Amendments

Effective January 1, 2005, certain employers covered by the Plan do not allow new participants. In addition, certain other employers in the plan permit employees hired after January 1, 2005 to forego participation in the Plan in exchange for enhanced defined contribution plan benefits.

Effective October 31, 2009, the Plan was frozen to new participants on or after November 1, 2009, and participants no longer receive credit for benefit service or additional pay after October 31, 2009, except with respect to any employee included in a unit of employees covered by a collective bargaining agreement on October 31, 2009 if, within the meaning of Section 416(i)(4) of the Code, retirement benefits were the subject of good faith bargaining. Participants continue to earn vesting service after October 31, 2009 for as long as a participant continues to work for Invensys or an affiliated company. A participant is fully vested after five years of service or if they reach age 65 while employed.

Effective September 15, 2010, the Plan Sponsor agreed to merge the Retirement Plan for Bargaining Employees of Safetran Systems Corporation with and become a plan component of the Invensys Pension Plan, such merger to be effected in compliance with Section 414(l) of the Internal Revenue Code of 1986, as amended.

1. Plan Description (continued)

Funding Policy

The Plan is funded annually by the Company in an amount based on actuarial determinations. The contributions are at least equal to the minimum funding standards required by the Employee Retirement Income Security Act of 1974 (ERISA). The Plan has met the ERISA minimum funding requirements.

Contributions made to the Plan by the employer are invested in the Invensys Inc. Master Retirement Trust (Master Trust). The Master Trust pools the Plan's assets with those of other related Company plans, and makes investments in various types of equity and fixed income securities. The trustee holds the funds to manage, invest, and reinvest in accordance with the provisions of the Master Trust agreement.

Plan Termination

Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

2. Significant Accounting Policies

Basis of Accounting

The financial statements have been prepared on the accrual basis of accounting.

Valuation of Investments and Income Recognition

The Plan's participation in the Master Trust is stated at fair value (based primarily on the quoted market prices on the last business day of the plan year) of the securities owned by the Master Trust, as determined by the trustee, State Street Bank & Trust Company (State Street).

Invensys Pension Plan

Notes to Financial Statements (continued)

2. Significant Accounting Policies (continued)

Valuation of Investments and Income Recognition (continued)

Marketable securities are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Securities traded on a national securities exchange are valued at the last reported sales price on the last business day of the plan year; investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and ask prices. The shares of registered investment companies are valued at quoted market prices which represent the net asset values of shares held in the Master Trust. The fair value of the participation units owned by the Plan in common collective trust funds are based on quoted redemption values on the last business day of the plan year. Certain U.S. government and sovereign obligations, most government agency securities, investment-grade corporate bonds, certain mortgage products, and municipal obligations are valued based on quoted market prices, dealer quotations or alternative pricing sources.

Derivative investments (interest rate swaps) are marked-to-market using the derivative trading desk and are priced at the level which, in the desk's judgment, the counterparty would agree to terminate the transaction or at which another party would agree to assume the rights and obligations of the plan under the transaction. The derivatives trading desk verifies prices periodically with the counterparty and/or dealers active in the relevant market.

The fair value of the various limited partnership investments is estimated using various methods. Marketable securities in the partnerships are stated at the quoted market price on the last business day of the Plan year, while nonpublicly traded securities are valued at amounts determined by the general partner.

The Plan also invests in certain securities collateralized by residential and commercial mortgages and other assets that may be affected by, among other things, changes in: interest rates, the quality of the underlying assets or the market's assessment thereof, factors concerning interests in and structure of the issuer or the originator of the receivables, or the creditworthiness of the entities that provide credit enhancements.

2. Significant Accounting Policies (continued)

Valuation of Investments and Income Recognition (continued)

Plan investments are held in the Master Trust, which was established for the investment of assets of the Plan and other Company-sponsored retirement plans. Each participating retirement plan has an undivided interest in the Master Trust. Investment income and expenses are allocated to the Plan based upon its pro rata share in the net assets of the Master Trust.

The cost of investments sold is determined on the basis of average cost. The gain or loss on securities sold is the difference between average cost and market value at the date of disposal.

The valuation methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while plan management believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (Note 7) are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are described in the Plan Document. The accumulated plan benefits for active employees are based on their average compensation during the five years preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

Administrative Expenses

Administrative expenses are paid by the Plan.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

New Accounting Pronouncements

In May 2011, the FASB issued Accounting Standards Update 2011-04, *Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRS*, (ASU 2011-04). ASU 2011-04 amended ASC 820 to converge the fair value measurement guidance in U.S. GAAP and International Financial Reporting Standards (IFRS). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

In January 2010, the Financial Accounting Standard Board ("FASB") issued ASU No. 2010-6, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurement*. The standard requires entities to disclose additional information regarding assets and liabilities that are transferred between levels of the fair value hierarchy and to present purchases, sales, issuances and settlements on a gross basis in the reconciliations of fair value measurements using significant unobservable inputs. Additionally, the standard clarified existing guidance regarding the level of disaggregation of fair value measurements and disclosures regarding the valuation techniques and inputs utilized in estimating Level 2 and Level 3 fair value measurements. The Plan's financial statements reflect the adoption of this accounting standard.

3. Investments

Certain investment information disclosed in the accompanying financial statements, including investments held at December 31, 2010 and 2009, and equity in net investment income of the Master Trust, net appreciation (depreciation) in fair value of insurance contracts, dividends, interest, and investment management fees for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the trustee.

4. Invensys Inc. Master Retirement Trust

The participation of the Plan is approximately 97% of the Master Trust as of December 31, 2010 and 2009, respectively. The Master Trust is comprised of the following:

4. Invensys Inc. Master Retirement Trust (continued)

The Master Trust participated in State Street's securities lending program in 2010 and 2009 by lending certain securities to borrowers to earn additional income, which is included in equity in net earnings of the Invensys Inc. Master Retirement Trust in the statements of changes in net assets. Loans of securities through State Street are collateralized by cash, letters of credit, or securities issued or guaranteed by the United States government or its agencies, equal to at least 102% of the current market value of the loaned securities. At December 31, 2010, the fair value of the loaned securities and collateral amounted to \$16,742,714 and \$16,984,897, respectively. At December 31, 2009, the fair value of the loaned securities and collateral amounted to \$8,706,877 and \$8,999,043, respectively.

5. Interest Rate Swaps

Derivative investments consist of fixed for floating interest rate long maturity swaps (approximately 30 years). The Plan had twenty-two separate swap arrangements outstanding at December 31, 2010 with a total net gross notional amount of \$474,850,000. The Plan had eighteen separate swap arrangements outstanding at December 31, 2009 with a total net gross notional amount of \$523,750,000.

The purpose of this strategy is to economically hedge the change in net funded status for a portion of the pension liability that can occur due to changes in interest rates. The marked to market value of the swaps, including accrued interest, in the over the counter market at December 31, 2010 is \$(27,191,839) and \$(46,264,060) at December 31, 2009. In addition, \$153,167,120 and \$118,212,882 is maintained in money market accounts and other short-term investments at December 31, 2010 and 2009, respectively, for collateral needs related to the swap arrangements. At December 31, 2010 and 2009, approximately \$30,000,000 and \$46,000,000, respectively, of this amount was posted as collateral to dealers.

6. Fair Value Measurements

ASC Topic 820, "Fair Value Measurements" (ASC Topic 820) defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs when measuring fair value.

The standard describes three levels of inputs that may be used to measure fair value:

- Level 1 Inputs are quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Invensys Pension Plan

Notes to Financial Statements (continued)

6. Fair Value Measurements (continued)

Level 2 Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly;

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following table sets forth by level within the fair value hierarchy the Plan's investment assets and liabilities, if any, as of December 31, 2010.

7. Accumulated Plan Benefits

An actuary from Mercer Human Resources Consulting, Inc. estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefit information as of December 31, 2009 and 2008 is as follows:

	2009	2008
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Active participants	\$ 140,904,340	\$ 138,967,625
Retired employees and beneficiaries currently receiving payments	791,953,782	772,894,566

Notes to Financial Statements (continued)

7. Accumulated Plan Benefits (continued)

The reconciliation of the actuarial present value of accumulated plan benefits from December 31, 2008 to December 31, 2009 is as follows:

Actuarial present value of accumulated plan benefits at December 31, 2008	\$ 1,250,266,996
Changes during the year:	
Increase due to benefits accumulated and non-investment experience	25,383,649
Increase for interest due to decrease in the discount period	90,435,913
Actual benefits paid	(88,164,597)
Net increase	<u>27,654,965</u>
Actuarial present value of accumulated plan benefits at December 31, 2009	<u>\$ 1,277,921,961</u>

Significant assumptions underlying the actuarial computations are:

Interest	—7.5% in 2009 and 2008, compounded annually.
Retirement	—Age-related retirement rates from age 55 to age 70 for active employees, with terminated vested participants assumed to retire at age 65.
Mortality	—RP2000 Mortality Tables for Males and Females, without adjustment for collar, benefit amount, or employee/annuitant distinction, but projected by Scale AA to 2015 in 2009 and 2008.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

8. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term, and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

9. Parties-In-Interest

Section 3(14) of ERISA defines a party-in-interest to include, among others, fiduciaries or employees of the Plan, any person who provides services to the Plan or an employer whose employees are covered by the Plan. Accordingly, the management of investments held by the trustee are considered party-in-interest transactions.

10. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS), dated July 6, 1999, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended and restated. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Sponsor has indicated that it will take the necessary steps, if any, to bring the Plan's operations into compliance with the Code.

The Plan applied for a new determination letter on January 26, 2011.

Accounting standards require recording uncertain income tax positions that exist in the Plan's financial statements. Plan management has determined there are no uncertain tax positions and believes there is no adjustment or disclosure required in the Plan's financial statements.

Notes to Financial Statements (continued)

11. Subsequent Events

The Company has evaluated all subsequent events through October 4, 2011, the date the financial statements were available to be issued. During this period, there have been no material events that would require recognition in the financial statements or disclosures to the financial statements.

In each cell, the top number is the count of active participants for each age/service combination and the bottom number is average monthly frozen benefit. Average frozen benefit is not shown for cells with fewer than 20 participants.

Average monthly accrued benefits have been shown in lieu of average compensation because the plan is “hard-frozen”.

Schedule SB, Line 25 – Change in Method

The attribution of non-service-based benefits was changed to comply with final PPA regulations.

Schedule SB, Line 24 – Change in Actuarial Assumptions

Interest discounts and mortality rates were updated from 2009 to 2010 in accordance with PPA, and the sponsor changed its interest rate election from the full yield curve with a two month look-back to segment rates with no look-back.

The expense load to the normal cost decreased from \$4,838,108 to \$3,974,380 to reflect our expectations for the current plan year.

Schedule SB, Line 32 – Schedule of Amortization Bases

The shortfall amortization charge is the sum of the shortfall base amortization for each plan year covered under PPA. Although a shortfall base can be negative, the combined shortfall amortization charge cannot be negative.

Schedule SB, Part V – Summary of Plan Provisions**Benefits included or excluded**

Unless noted below, all benefits provided by the plan are included in this valuation.

- **Plan amendments:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Scheduled benefit increases:** Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement age; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70 ½. This valuation includes increases for current participants over age 70.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Shutdown benefits:** We are not aware of any corporate actions that would create shutdown benefits; therefore, they are excluded.
- **IRC Section 415(b):** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **Benefit restrictions:** Benefit restrictions (if applicable) are ignored in this valuation.

Schedule SB, Part V – Summary of Plan Provisions**BTR Non-Controls Employees**

Effective Date May 31, 1970

Most Recent
Amendment November 1, 2009

Eligibility An eligible employee is any non-union employee of BTR, Inc. (or an affiliated company that has adopted the Plan) who has completed one year of service.

Note: The following employees are not eligible to participate:

- Employees covered under a collective bargaining agreement, unless the agreement specifically provides for participation
- Leased employees or independent contractors
- Non-resident aliens with no income from U.S. sources
- Employees of an employer or affiliated employer that has not adopted this Plan
- Employees who are earning benefits under any other pension plan sponsored by the employer or affiliated employer.

Participation Date A new employee will become a participant in the plan on the first of the month coincident with or following the date he or she became an eligible employee.

Employees hired on or after January 1, 2005 are eligible to forego participation in the plan in exchange for enhanced defined contribution plan benefits.

As a result of the merger of a number of prior plans, the Participation Date of participants of those plans was January 1, 1996. The table following illustrates Participation Dates of employees whose employer became a participating employer after this plan merger.

Schedule SB, Part V – Summary of Plan Provisions**APV**

Effective Date January 1, 1989

Most Recent
Amendment November 1, 2009

Eligibility Each salaried employee of APV becomes a participant and is covered under the plan on the first day of the calendar month coincident with or next following the date on which the employee earns 1,000 or more Hours of Service in such 12 consecutive month period from date of employment or from the anniversary of date of employment.

The plan has been closed to new entrants hired on or after January 1, 2005. In addition, employees hired before January 1, 2005 were eligible to forego future defined benefit accruals in return for enhanced defined contribution plan benefits.

Hours of Service The determination and crediting of an Hour of Service under the Plan shall be in accordance with the provisions of the Department of Labor Regulations 2530.200b-2.

In the event records do not accurately reflect the actual number of Hours of Service to be credited to a participant, such participant shall be credited with 45 hours of service per week if such participant would be credited with at least one Hour of Service during such week.

Benefit Service Benefit Service is granted for employment with an employer as an eligible employee for every 12 months of service that the participant completes. A participant shall be credited with a month of service for each calendar month during which he or she was employed for at least 15 days.

For former participants in the St. Regis Paper Company Retirement Plan, only service since January 1, 1973 is counted.

Benefit service as frozen as of November 1, 2009.

Vesting Service For a participant that was covered under a prior plan as of December 31, 1975, service prior to December 31, 1975 shall be credited in accordance with the prior plan provisions.

After January 1, 1976, a participant shall accrue one year of Vesting Service for each plan year in which he or she has 1,000 or more Hours of Service. No Vesting Service shall be granted for a plan year in which the participant has less than 1,000 Hours of Service.

Schedule SB, Part V – Summary of Plan Provisions**APV (continued)**

If death occurs on or after attainment of age 55, the surviving spouse will receive one-half of the benefit the employee would have been eligible for if the employee had retired with an immediate life annuity on the day before the date of death, reduced by one-half percent for each year the spouse is under age fifty (50) and further reduced by sixty-five percent (65%) of the Social Security Survivor's Benefit when the surviving spouse is age 62 or older. The minimum spouse's death benefit is seventy-five dollars (\$75) a month.

After Retirement

Based on the benefit option chosen.

Cost

The cost of this benefit is borne by employees through a reduction to their accrued benefits.

Shutdown Benefit

If the total workforce of employees has dropped to less than 500 employees and thereafter a major function is closed down permanently, each employee subsequently laid off due to the close down may retire under the Rule of 70 or the Rule of 80.

Rule of 70: If the employee has reached age 55 and completed ten (10) years of service and the total of the Employee's age plus service equals at least 70 or

Rule of 80: The employee has completed at least ten (10) years of service and the total of the employee's age plus service equals at least 80.

The benefit paid will be a special payment and a regular pension calculated as if the employee were then age sixty-five (65).

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods**Actuarial Method****Asset methods**

We used financial data submitted by the trustee as of the valuation date without further audit. Customarily, this information would not be verified by a plan's actuary. We have reviewed the information for internal consistency and we have no reason to doubt its substantial accuracy.

The asset valuation method is the fair market value.

Participant methods

We used the participant data supplied by the plan sponsor. We have reviewed the data and, except for the data estimated missing data discussed on the following page, we have no reason to doubt its substantial accuracy. Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants.
- **Disabled participants:** Disabled participants are included in the active employee count since they continue to earn vesting service for early retirement eligibility. We assume they will not earn future pay credits.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Minimum funding method

Target liability for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- An individual's **accrued benefit** for valuation purposes related to a particular separation date is the accrued benefit described under the plan.
- The **benefit** deemed to accrue for an individual during a plan year is the excess of the accrued benefit for valuation purposes at the end of the plan year over the accrued benefit for valuation purposes at the beginning of the plan year. Both accrued benefits are calculated from the same projections to the various anticipated separation dates as described above.
- An individual's **accrued liability** is the present value of the accrued benefit for valuation purposes at the beginning of the plan year, and an individual's **normal cost** is the present value of the benefit deemed to accrue in the plan year. If multiple decrements are used, the accrued liability and the normal cost for an individual are the sum of the component accrued liabilities and normal costs associated with the various anticipated separation dates. Such accrued liabilities and normal costs reflect the accrued benefits as modified to obtain the benefits payable on those dates and the probability of the individual separating on those dates.
- The plan provides certain benefits which are not based on service. These benefits are attributed to service using the ratio of service on the valuation date to service at decrement.
- The plan's **target normal cost** is the sum of the individual normal costs, and the plan's **funding target liability** is the sum of the accrued liabilities for all participants under the plan.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods**Maximum funding method**

Maximum funding calculations include the excess of the accrued liability computed using the projected unit credit method over the minimum funding target liability. The objective of the projected unit credit method is to fund each participant's benefits under the plan as they accrue, taking into consideration future compensation increases. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- An individual's **projected accrued liability** is the present value of benefits based on credited service as of the beginning of the plan year and projected compensation that would be used in the calculation of the benefit on each expected separation date. If multiple decrements are used, the accrued liability for an individual is the sum of the component accrued liabilities associated with the various anticipated separation dates.
- The plan's **projected funding target liability** is the sum of the projected accrued liabilities for all participants under the plan.

The Administrative Committee and Participants Invensys Pension Plan

We were engaged to audit the financial statements of the Invensys Pension Plan as of December 31, 2010 and 2009, and for the years then ended, as listed in the table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 3, which was certified by State Street Bank & Trust Company, the trustee of the Plan, except for comparing the information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2010 and 2009, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the investment information certified by the trustee and custodians, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Invensys Pension Plan

Notes to Financial Statements

December 31, 2010

1. Plan Description

The Invensys Pension Plan (the Plan) is a noncontributory defined benefit plan which covers most nonunion employees of Invensys, Inc. (the Company), as defined in the Plan. The Company is the Plan Sponsor. All eligible employees become participants following completion of a one-year-of-service eligibility requirement.

The Plan provides that retirement benefits be paid to Plan members who have reached the age of 65. Such benefits are defined in the Plan and are based on compensation levels and years of credited service. The Plan also provides for early retirement, disability, and death benefits. Information concerning the Plan Agreement is available from the Human Resources Department.

Plan Amendments

Effective January 1, 2005, certain employers covered by the Plan do not allow new participants. In addition, certain other employers in the plan permit employees hired after January 1, 2005 to forego participation in the Plan in exchange for enhanced defined contribution plan benefits.

Effective October 31, 2009, the Plan was frozen to new participants on or after November 1, 2009, and participants no longer receive credit for benefit service or additional pay after October 31, 2009, except with respect to any employee included in a unit of employees covered by a collective bargaining agreement on October 31, 2009 if, within the meaning of Section 416(i)(4) of the Code, retirement benefits were the subject of good faith bargaining. Participants continue to earn vesting service after October 31, 2009 for as long as a participant continues to work for Invensys or an affiliated company. A participant is fully vested after five years of service or if they reach age 65 while employed.

Effective September 15, 2010, the Plan Sponsor agreed to merge the Retirement Plan for Bargaining Employees of Safetran Systems Corporation with and become a plan component of the Invensys Pension Plan, such merger to be effected in compliance with Section 414(l) of the Internal Revenue Code of 1986, as amended.

Invensys Pension Plan

Notes to Financial Statements (continued)

1. Plan Description (continued)

Funding Policy

The Plan is funded annually by the Company in an amount based on actuarial determinations. The contributions are at least equal to the minimum funding standards required by the Employee Retirement Income Security Act of 1974 (ERISA). The Plan has met the ERISA minimum funding requirements.

Contributions made to the Plan by the employer are invested in the Invensys Inc. Master Retirement Trust (Master Trust). The Master Trust pools the Plan's assets with those of other related Company plans, and makes investments in various types of equity and fixed income securities. The trustee holds the funds to manage, invest, and reinvest in accordance with the provisions of the Master Trust agreement.

Plan Termination

Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

2. Significant Accounting Policies

Basis of Accounting

The financial statements have been prepared on the accrual basis of accounting.

Valuation of Investments and Income Recognition

The Plan's participation in the Master Trust is stated at fair value (based primarily on the quoted market prices on the last business day of the plan year) of the securities owned by the Master Trust, as determined by the trustee, State Street Bank & Trust Company (State Street).

Invensys Pension Plan

Notes to Financial Statements (continued)

2. Significant Accounting Policies (continued)

Valuation of Investments and Income Recognition (continued)

Marketable securities are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Securities traded on a national securities exchange are valued at the last reported sales price on the last business day of the plan year; investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and ask prices. The shares of registered investment companies are valued at quoted market prices which represent the net asset values of shares held in the Master Trust. The fair value of the participation units owned by the Plan in common collective trust funds are based on quoted redemption values on the last business day of the plan year. Certain U.S. government and sovereign obligations, most government agency securities, investment-grade corporate bonds, certain mortgage products, and municipal obligations are valued based on quoted market prices, dealer quotations or alternative pricing sources.

Derivative investments (interest rate swaps) are marked-to-market using the derivative trading desk and are priced at the level which, in the desk's judgment, the counterparty would agree to terminate the transaction or at which another party would agree to assume the rights and obligations of the plan under the transaction. The derivatives trading desk verifies prices periodically with the counterparty and/or dealers active in the relevant market.

The fair value of the various limited partnership investments is estimated using various methods. Marketable securities in the partnerships are stated at the quoted market price on the last business day of the Plan year, while nonpublicly traded securities are valued at amounts determined by the general partner.

The Plan also invests in certain securities collateralized by residential and commercial mortgages and other assets that may be affected by, among other things, changes in: interest rates, the quality of the underlying assets or the market's assessment thereof, factors concerning interests in and structure of the issuer or the originator of the receivables, or the creditworthiness of the entities that provide credit enhancements.

Invensys Pension Plan

Notes to Financial Statements (continued)

2. Significant Accounting Policies (continued)

Valuation of Investments and Income Recognition (continued)

Plan investments are held in the Master Trust, which was established for the investment of assets of the Plan and other Company-sponsored retirement plans. Each participating retirement plan has an undivided interest in the Master Trust. Investment income and expenses are allocated to the Plan based upon its pro rata share in the net assets of the Master Trust.

The cost of investments sold is determined on the basis of average cost. The gain or loss on securities sold is the difference between average cost and market value at the date of disposal.

The valuation methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while plan management believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (Note 7) are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are described in the Plan Document. The accumulated plan benefits for active employees are based on their average compensation during the five years preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

Administrative Expenses

Administrative expenses are paid by the Plan.

2. Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

New Accounting Pronouncements

In May 2011, the FASB issued Accounting Standards Update 2011-04, *Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRS*, (ASU 2011-04). ASU 2011-04 amended ASC 820 to converge the fair value measurement guidance in U.S. GAAP and International Financial Reporting Standards (IFRS). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

In January 2010, the Financial Accounting Standard Board ("FASB") issued ASU No. 2010-6, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurement*. The standard requires entities to disclose additional information regarding assets and liabilities that are transferred between levels of the fair value hierarchy and to present purchases, sales, issuances and settlements on a gross basis in the reconciliations of fair value measurements using significant unobservable inputs. Additionally, the standard clarified existing guidance regarding the level of disaggregation of fair value measurements and disclosures regarding the valuation techniques and inputs utilized in estimating Level 2 and Level 3 fair value measurements. The Plan's financial statements reflect the adoption of this accounting standard.

3. Investments

Certain investment information disclosed in the accompanying financial statements, including investments held at December 31, 2010 and 2009, and equity in net investment income of the Master Trust, net appreciation (depreciation) in fair value of insurance contracts, dividends, interest, and investment management fees for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the trustee.

4. Invensys Inc. Master Retirement Trust

The participation of the Plan is approximately 97% of the Master Trust as of December 31, 2010 and 2009, respectively. The Master Trust is comprised of the following:

Invensys Pension Plan

Notes to Financial Statements (continued)

4. Invensys Inc. Master Retirement Trust (continued)

The Master Trust participated in State Street's securities lending program in 2010 and 2009 by lending certain securities to borrowers to earn additional income, which is included in equity in net earnings of the Invensys Inc. Master Retirement Trust in the statements of changes in net assets. Loans of securities through State Street are collateralized by cash, letters of credit, or securities issued or guaranteed by the United States government or its agencies, equal to at least 102% of the current market value of the loaned securities. At December 31, 2010, the fair value of the loaned securities and collateral amounted to \$16,742,714 and \$16,984,897, respectively. At December 31, 2009, the fair value of the loaned securities and collateral amounted to \$8,706,877 and \$8,999,043, respectively.

5. Interest Rate Swaps

Derivative investments consist of fixed for floating interest rate long maturity swaps (approximately 30 years). The Plan had twenty-two separate swap arrangements outstanding at December 31, 2010 with a total net gross notional amount of \$474,850,000. The Plan had eighteen separate swap arrangements outstanding at December 31, 2009 with a total net gross notional amount of \$523,750,000.

The purpose of this strategy is to economically hedge the change in net funded status for a portion of the pension liability that can occur due to changes in interest rates. The marked to market value of the swaps, including accrued interest, in the over the counter market at December 31, 2010 is \$(27,191,839) and \$(46,264,060) at December 31, 2009. In addition, \$153,167,120 and \$118,212,882 is maintained in money market accounts and other short-term investments at December 31, 2010 and 2009, respectively, for collateral needs related to the swap arrangements. At December 31, 2010 and 2009, approximately \$30,000,000 and \$46,000,000, respectively, of this amount was posted as collateral to dealers.

6. Fair Value Measurements

ASC Topic 820, "Fair Value Measurements" (ASC Topic 820) defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs when measuring fair value.

The standard describes three levels of inputs that may be used to measure fair value:

- Level 1 Inputs are quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

6. Fair Value Measurements (continued)

Level 2 Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly;

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following table sets forth by level within the fair value hierarchy the Plan's investment assets and liabilities, if any, as of December 31, 2010.

7. Accumulated Plan Benefits

An actuary from Mercer Human Resources Consulting, Inc. estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefit information as of December 31, 2009 and 2008 is as follows:

	2009	2008
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Active participants	\$ 140,904,340	\$ 138,967,625
Retired employees and beneficiaries currently receiving payments	791,953,782	772,894,566
Inactive participants with deferred benefits	342,621,195	333,583,303
	<u>1,275,479,317</u>	<u>1,245,445,494</u>
Nonvested benefits	2,442,644	4,821,502

7. Accumulated Plan Benefits (continued)

The reconciliation of the actuarial present value of accumulated plan benefits from December 31, 2008 to December 31, 2009 is as follows:

Actuarial present value of accumulated plan benefits at December 31, 2008	\$ 1,250,266,996
Changes during the year:	
Increase due to benefits accumulated and non-investment experience	25,383,649
Increase for interest due to decrease in the discount period	90,435,913
Actual benefits paid	(88,164,597)
Net increase	<u>27,654,965</u>
Actuarial present value of accumulated plan benefits at December 31, 2009	<u>\$ 1,277,921,961</u>

Significant assumptions underlying the actuarial computations are:

Interest	—7.5% in 2009 and 2008, compounded annually.
Retirement	—Age-related retirement rates from age 55 to age 70 for active employees, with terminated vested participants assumed to retire at age 65.
Mortality	—RP2000 Mortality Tables for Males and Females, without adjustment for collar, benefit amount, or employee/annuitant distinction, but projected by Scale AA to 2015 in 2009 and 2008.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

8. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term, and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

9. Parties-In-Interest

Section 3(14) of ERISA defines a party-in-interest to include, among others, fiduciaries or employees of the Plan, any person who provides services to the Plan or an employer whose employees are covered by the Plan. Accordingly, the management of investments held by the trustee are considered party-in-interest transactions.

10. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS), dated July 6, 1999, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended and restated. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Sponsor has indicated that it will take the necessary steps, if any, to bring the Plan's operations into compliance with the Code.

The Plan applied for a new determination letter on January 26, 2011.

Accounting standards require recording uncertain income tax positions that exist in the Plan's financial statements. Plan management has determined there are no uncertain tax positions and believes there is no adjustment or disclosure required in the Plan's financial statements.
