Note 1. **Description of Plan** - The following description of the Plan provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined contribution plan covering all full-time employees of Peko Precision Products, Inc. and Marex Acquisition Corporation d/b/a Martec Industries (the "Companies"). Employees who have one year of service and are age twenty-one or older are eligible to make their own contributions to the Plan. All employees are eligible to receive profit sharing amounts from their respective employers into their participant accounts. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions - Eligible participants may defer up to 75% of their pre-tax annual compensation, as defined in the Plan, as a qualified pre-tax contribution subject to maximum annual dollar contribution restrictions of ERISA and the Internal Revenue Service. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Employer contributions are discretionary and calculated as a pro-rata portion of the contribution equal to the ratio of the participant's compensation to the compensation of all eligible participants of the contributing employer.

Participant Accounts - Each participant's account is credited with the participant's contribution and allocations of the Plan's earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account. The participants direct their allocation of investments to funds managed by John Hancock Retirement Plan Services.

Vesting - Participants are immediately vested in their contributions plus actual earnings thereon. Vesting for employer contributions is based on years of service with participant's becoming fully vested after seven years of service. Additional vesting breakdowns can be found in the Plan document.

Payment of Benefits - On termination of service due to death, disability, or retirement, a participant may elect to receive either a lump-sum amount equal to the value of the participant's vested interest in his or her account, or annual installments over a ten-year period. For termination of service due to other reasons, a participant may receive the value of the vested interest in his or her account as a lump-sum distribution.

Administrative Expenses - Administrative expenses are paid for by the Plan.

Forfeited Accounts - Any forfeitures arising under the Plan are first allocated to offset plan expenses and then to restore a participant's forfeiture. Any remaining forfeitures are allocated to participant accounts.

Note 2. **Summary of Significant Accounting Policies**

Method of Accounting - The financial statements of the Plan are prepared using the accrual method of accounting.

Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts and disclosures. Actual results may differ from those estimates.

Investment Valuation and Income Recognition - The Plan's investments are stated at fair market value using quoted market prices in an active market. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis.

Payments of Benefits - Benefits are recorded when paid.

Subsequent Events - In accordance with ASC 855-10, the Company evaluated subsequent events through September 30, 2011, the date these financial statements were available to be issued.

Note 6. Fair Value of Financial Instruments

ASC 820-10, *Fair Value Measurements,* establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The following is a description of the valuation methodologies used for assets measured at fair value:

Money market and mutual funds - Valued at the net asset value of shares held by the plan at year end (Level 1).

Guaranteed interest account - Valued at the net fair value of shares held by the plan at year end (Level 3).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Assets measured at fair value are summarized below:

Note 7. Investment Contract with Insurance Company

The Plan has an investment contract with 3-Year Compound sponsored by John Hancock Life Insurance Company of New York (JNY). 3-Year Compound maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for Plan withdrawals and administrative expenses. The contract is included in the statements of net assets available for benefits at fair value as determined using the market approach based on market prices of similar contracts. The adjustment from fair value to contract value for the investment contract is based on the contract value as reported to the Plan by 3-Year Compound. Contract value represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses.

The fair value of the investment contract at December 31, 2010 and 2009 was $166,117 and $161,859, respectively. The average yield and crediting interest rates for 2010 and 2009 were approximately 0.05% and 3.18%, respectively. Such interest rates are reviewed on a quarterly basis for resetting.

Certain events, such as the premature termination of the contract by the Plan or the termination of the Plan, would limit the Plan's ability to transact at contract value with 3-Year Compound. The plan administrator believes the occurrence of such events that would also limit the Plan's ability to transact at contract value with the Plan participants is not probable.

At December 31, 2010 and 2009, the Plan's interest in the net assets of the 3-Year Compound was approximately 2.88% and 3.23%, respectively. Investment income and administrative expenses relating to the 3-Year Compound are allocated to the individual plans based upon average monthly balances invested by each plan.

The following information included in the financial statements of the 3-Year Compound was obtained from data that has been prepared and certified to as complete and accurate by John Hancock Life Insurance Company of New York, the underlying insurance contract investment of this 3-Year Compound. At December 31, 2010 and 2009, the insurance contract investment disclosure contains information only for the Plan.

	2010	2009
Guaranteed investment contract value	$ 166,141	$ 158,065
Investment (loss) income	(24)	3,794

Note 8. Plan Termination

Although it has not expressed any intent to do so, the Companies have the right under the Plan to terminate the Plan subject to the provisions of ERISA and the Plan.

Note 9. Tax Status

The Plan obtained its latest determination letter on March 31, 2008, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan is currently designed and is being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Organization has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded as of December 31, 2010. There are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions and the Department of Labor; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.
