REPORT OF INDEPENDENT AUDITORS

Sandia Corporation Investment Committee and
Plan Participants of the Sandia Corporation Pension Security Plan

We were engaged to audit the accompanying statement of net assets available for benefits of the Sandia Corporation Pension Security Plan as of December 31, 2010, and the related statement of changes in net assets available for benefits for the year ended December 31, 2010, and the supplemental schedule of assets (held at end of year) as of December 31, 2010. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 4, which was certified by the Northern Trust Company and the Prudential Insurance Company of America, the trustees of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedule. We have been informed by the plan administrator that the trustees hold the Plan's investment assets and execute investment transactions. The plan administrator has obtained certifications from the trustees as of and for the year ended December 31, 2010, that the information provided to the plan administrator by the trustees is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule as of and for the year ended December 31, 2010, taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the trustees, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

We have audited the statement of net assets available for benefits as of December 31, 2009, and the related statement of changes in net assets available for benefits for the year then ended, and in our report dated October 13, 2010, we expressed an opinion that these financial statements present fairly, in material respects, in conformity with accounting principles generally accepted in the United States.

SANDIA CORPORATION PENSION SECURITY PLAN

Notes to Financial Statements

December 31, 2010 and 2009

NOTE 1 DESCRIPTION OF THE PLAN

General

The Sandia Corporation Retirement Income Plan (the Plan) is a non-contributory defined benefit pension plan covering non-union employees in certain job classifications (as defined) who have one year of service and are at least age 21, and all retired and terminated vested employees in such job classifications. Sandia Corporation (the Company) is a wholly owned subsidiary of Lockheed Martin Corporation (Lockheed Martin or the Corporation). A description of the Plan is contained in the Summary Plan Description, which is provided to all participants.

Funding Policy

The Company makes annual contributions to the Plan in amounts equal to the minimum funding requirements of the Employee Retirement Income Security Act of 1974 (ERISA), as determined by the Plan's actuary, sufficient to fund the Plan's current service cost on a current basis and to fund the unfunded accrued liability plus interest thereon over a period of up to 30 years. No contributions were required for 2010 and 2009. Participant contributions were required prior to July 1, 1975. The participants' accumulated contributions pertaining to years prior to 1975, including interest credited at an annually compounded rate of 2.95% and 2.48% for the years ended December 31, 2010 and 2009, respectively, were \$49,824 and \$55,768 at January 1, 2010 and 2009, respectively.

Benefit Payments

Based on plan provisions, the Plan provides for monthly pension payments to participating employees upon their attaining the minimum age and service requirements specified in the Plan Document. The amount of such payments depends on length of service and pension band amounts that are a function of job title and classification. Participants become fully vested after five years of credited service.

As changes in employee job categories result in changes in eligibility between the Plan and the Sandia Corporation Retirement Income Plan (RIP), actuarially determined amounts of assets are transferred between the plans. These transfers are shown as transfers from/to Retirement Income Plan in the statements of changes in net assets available for benefits.

NOTE 1 DESCRIPTION OF THE PLAN *(continued)*

Plan Termination

Although it has not expressed any such intent, the Company has the right under the Plan to discontinue contributions, if any, at any time and to terminate the Plan subject to provisions set forth in ERISA. Upon any termination of the Plan, the assets will be allocated first, to participants' contributions; second, to benefits payable as an annuity; third, to other nonforfeitable benefits; fourth, to all other benefits; and fifth, in the event there is any remaining balance and to the extent permitted by law, to the Department of Energy.

Certain benefits under the Plan are secured by Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain survivors' pensions. However, PBGC does not guarantee all benefits under the Plan and the amount of benefit protection is subject to certain limitations.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared based on the accrual method of accounting.

Certain prior-year amounts have been reclassified to conform to required current-year presentation.

Payment of Benefits

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make certain estimates and assumptions that affect the amounts reported in the financial statements, supplemental schedules, and accompanying notes. Actual results could differ from those estimates.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Investment Contracts

Under the terms of the contract between Prudential Insurance Company of America (Prudential) and the Plan, Prudential manages funds on behalf of the Plan. Prudential has been granted discretionary authority concerning purchases and sales of investments in the funds within the separate accounts. The investments in the pooled separate accounts represent ownership of units of participation in various commingled funds rather than ownership of specific assets. The investments in the pooled separate accounts are stated at fair value.

The Plan's assets held in an unallocated insurance contract are valued at contract value as certified by Prudential. Contract value represents contributions made under the contract, plus interest and less funds used to pay retirement benefits and administrative expenses. These investments are carried at contract value, which approximates fair value.

A minimum balance requirement that is determined annually by Prudential, exists under the contract for the conservative stock fund pooled separate account and the unallocated insurance contract.

Master Trust Investments

Under the terms of a trust agreement between Northern Trust Company (the Master Trustee) and the Plan, the Master Trustee holds funds on behalf of the Plan, which are combined with funds of the RIP in one Sandia Corporation Pension Plans Trust (Master Trust). The Master Trustee maintains records reflecting the net assets in the Master Trust and details of changes therein for each plan. Assets held by the Master Trustee are segregated into investment manager accounts and a cash account. The investment managers have investment authority over assets in their accounts and the Master Trustee has authority over the cash account. The realized and unrealized gains and losses, and investment income of the Master Trust are allocated to the Plan based on the number of units outstanding at each month-end during the year.

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/(depreciation) include the Plan's gains and losses on investments bought and sold as well as held during the year.

Derivative Instruments

Derivative financial instruments may be used by the investment managers of the Master Trust as part of their respective strategies. These strategies include the use of futures contracts, interest rate swaps, options on futures, and options as substitutes for certain types of securities. Notional amounts disclosed below do not quantify risk or represent assets or liabilities of the Master Trust, but are used in the calculation of the cash settlements under the contracts.

The fair values of these instruments are recorded as investments of the Master Trust. To the extent that a gain has been recognized, these instruments are recorded as assets and to the extent that a loss has been recognized, these instruments are recorded as liabilities. Changes in the fair value of the derivative instrument are reflected in investment income as net investment gain/(loss) in the Master Trust. As of December 31, 2010 and 2009, these derivative financial instruments were held for trading purposes. The notional amounts and fair values are presented as gross assets and liabilities as of December 31, 2010 and 2009 as follows:

	2010		2009	
	Notional Amount	Amount Included in Fair Value of Asset	Notional Amount	Amount Included in Fair Value of Asset

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Foreign Currency Forward Contracts

To help reduce the risk of foreign currency exchange rate losses related to international equity securities held by the Master Trust, the Master Trust holds foreign currency forward contracts that represent commitments either to purchase or sell foreign currencies at a specified future date and at a specific price. Such contracts are recorded at fair value as a receivable or payable for foreign currency forward contracts in the net assets of the Master Trust. Realized and unrealized gains and losses on the forward contracts, resulting from the settlement of contracts and changes in the exchange rates, are reflected in investment income.

Risks and Uncertainties

The Plan invests in investment securities that are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term. The changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Tax Status

The Plan received a determination letter from the Internal Revenue Service dated December 8, 2008, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. Management of the Company believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan is qualified and the related trust is tax exempt.

SANDIA CORPORATION PENSION SECURITY PLAN

Notes to Financial Statements

December 31, 2010 and 2009

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Tax Status (continued)

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effect of a tax position is recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdiction; however, there are currently no audits for any tax period in progress. The plan administrator believes it is no longer subject to income & examination for years prior to 2004.

Subsequent Events

The Company evaluated subsequent events and transactions through August 8, 2011, the date these financial statements were available to be issued. The Company is not aware of any subsequent events that would require recognition or disclosure in the financial statements.

Recent Accounting Pronouncements

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-06, Improving Disclosures about Fair Value Measurements. ASU 2010-06 amended certain of the disclosures required under ASC 820. The guidance in ASU 2010-06 clarified that disclosures should be presented separately for each “class” of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Level 1, 2, and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and liabilities on a gross basis, which is delayed until 2011, the guidance in ASU 2010-06 becomes effective for reporting periods beginning after December 15, 2009. The Plan adopted this guidance for the financial statements issued for the year ended December 31, 2010. The Plan’s adoption of the guidance did not have a material impact on this Plan’s net assets available for benefits or its changes in net assets available for benefits.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Recent Accounting Pronouncements (continued)

In May 2011, the FASB issued Accounting Standards Update 2011-04, *Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs*, (ASU 2011-04). ASU 2011-04 amended ASC 820, *Fair Value Measurements and Disclosures*, to converge the fair value measurement guidance in US generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRSs). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures, although certain of these new disclosures will not be required for nonpublic entities. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

NOTE 3 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service rendered by employees from the date of eligibility to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's enrolled actuary and is the amount that results from applying the actuarial assumptions (shown below) to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, withdrawal, or retirement) between the valuation date and the expected date of payment.

SANDIA CORPORATION PENSION SECURITY PLAN

Notes to Financial Statements

December 31, 2010 and 2009

NOTE 3 **ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS** *(continued)*

The actuarial valuation for the Plan was made by AonHewitt Associates. Actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. Significant assumptions underlying the actuarial computations included (a) discount rates of 6.76% and 6.69% for the years ended December 31, 2009 and 2008, respectively, and (b) assumed mortality (modified RP-2000 Mortality Table and standard RP-2000 Mortality Table for the years ended December 31, 2009 and 2008, respectively), and (c) retirement ages, disability, and turnover rates based upon published statistical data and Plan experience. The interest rate assumptions used to calculate the actuarial present value of accumulated plan benefits are adjusted annually to reflect current, rather than long term, shifts in the economy. This can result in significant year-to-year fluctuations in the value of the accumulated plan benefits.

The actuarial present value of accumulated plan benefit information as of beginning of the year was as follows:

	December 31, 2009
Vested benefits of participants	
currently receiving payments	\$ 106,617,093
Other vested benefits	54,169,241
Non-vested benefits	5,214,447
Total	\$ 166,000,781

The net change in the actuarial present value of accumulated plan benefits is the result of the following, for the year ended December 31, 2009:

Change in actuarial assumptions and methods	\$ (5,820,263)
Plan amendments	3,579,640
Interest due to a decrease in discount rate	10,746,823
Benefits accrued (including transfers to Retirement Income Plan)	2,967,441
Benefits paid	(12,031,172)
Net increase	\$ (557,531)
<i>Actuarial present value of accumulated plan benefits</i>	
Beginning of period	166,558,312
End of period	\$ 166,000,781

NOTE 3 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Consistent with prior-year activity, changes in employee job categories of active participants result in changes in eligibility between the Plan and the RIP. During 2010 and 2009, the impact of the active participant transfers between the Plan and the RIP was not material to the Plan.

NOTE 4 MASTER TRUST

All investment information for the Master Trust disclosed in the accompany financial statements and supplemental schedules including investments held at December 31, 2010, and net appreciation (depreciation) in fair value of investments, interest and dividends for the year ended December 31, 2010, was obtained or derived from information provided to the plan administrator and certified as complete and accurate by Northern Trust and Prudential, the trustees of the Master Trust.

The Plan's interest in the Master Trust's net assets as of December 31, 2010 and 2009, was approximately 7.7% and 7.9%, respectively. The Plan's interest in the Master Trust represented more than 5% of the Plan's net assets.

The Master Trust participates in a securities lending program under which securities of the Trust are loaned to selected security brokerage firms. The Master Trust transfers titles of the loaned securities, but retains the right to redeem securities on short notice and is entitled to all distributions made by the issuer of the securities during the term of the loan. All such loans require collateralization by U.S. government securities, cash, or letters of credit that always equal at least 100% of the loaned security market value plus accrued interest. Cash collateral received on loaned securities as of December 31, 2010 and 2009, was invested in a commingled fixed-income fund. There are also limitations on the aggregate market value of securities that may be loaned to any one broker and to all brokers as a group. At December 31, 2010 and 2009, securities were on loan with a market value of \$271,051,740 and \$283,999,203, respectively.

NOTE 6 FAIR VALUE MEASUREMENT

The following table sets forth by level, within the fair value hierarchy, the Master Pension Plans Trust's (the Master Trust) assets at fair value as of December 31, 2010:

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The fair value hierarchy established by ASC 820 prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1:* Observable inputs—quoted prices in active markets for identical assets and liabilities.
- Level 2:* Observable inputs other than the quoted prices in active markets for identical assets and liabilities—includes quoted prices for similar instruments, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets.
- Level 3:* Unobservable inputs—include amounts derived from valuation models where one or more significant inputs are unobservable and require the development of relevant assumptions.

The following is a description of the valuation methodologies used to measure fair value for Master Trust assets:

Common stocks and preferred stocks: Common stocks appear in all three valuation levels, while preferred stocks are categorized only as Level 1 and Level 3. Common stocks and preferred stocks categorized as Level 1 are valued based on quoted market prices. Common stocks categorized as Level 2 are valued based on quoted prices for similar securities or quoted prices for identical or similar securities in inactive markets. There is one preferred stock categorized as Level 3, since it is a private placement security and is traded “over the counter” with no primary exchange. In addition, there is one common stock categorized as Level 3. This security is not actively traded, and is valued at a nominal amount.

NOTE 6 FAIR VALUE MEASUREMENT *(continued)*

Government and corporate debt securities: Government and corporate debt securities categorized as Level 2 are valued based on inputs other than quoted prices that are observable for the asset (e.g., interest rates and yield curves observable at commonly quoted intervals). Those securities categorized as Level 3 are foreign bonds which are not traded on an exchange, and the pricing has been provided by a broker.

Mortgage- and asset-backed securities: Mortgage- and Asset-Backed Securities categorized as Level 2 are valued based on inputs other than quoted prices that are observable for the asset (e.g., interest rates and yield curves observable at commonly quoted intervals). Fixed-income securities categorized as Level 3 are valued based on evaluated prices using unobservable inputs such as prepayment speed assumptions and liquidity.

Common/collective trusts and 103-12 investment entities: Common/collective trusts and 103-12 investment entities value is based on the NAVs of the shares held by the trust at year end. The value of the NAV is based on closing market prices of the underlying securities in the trust's portfolio. The NAV per share is the total value of the trust divided by the number of shares outstanding. The NAV is corroborated by observable market data (e.g., purchases or sales activity). Accordingly, these investments are categorized as a Level 2. There is also a special case of a common/collective trust valued as a Level 1. This is the collective short-term interest fund (STIF) held at Northern Trust. Although this is a common/collective trust, it is essentially a cash vehicle, and it is being categorized as a Level 1.

The methods described above may produce a fair value calculation that may not indicate net realizable value or reflect future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following is a description of the valuation methodologies used for measuring other assets (managed by Prudential) at fair value:

The Conservative Stock Fund and Short-Term Fund are held in pooled separate accounts, which are valued based on the NAV of the shares held by the Plan at year end. The NAV per share is the total value of the funds divided by the number of shares outstanding. The values of the investments in the funds are based on the closing quoted market prices of the underlying securities in the funds. The NAV is corroborated by observable market data (e.g., purchases or sales activity). Accordingly, these investments are categorized as Level 2.

The Fixed Income Fund is held in the Prudential Insurance Company of America (PICA) General Account. The Plan holds units in the General Account consisting of a proprietary blended investment portfolio. Unit value for this account is provided by Prudential. Since the underlying value of the investments is not available, this investment is categorized as a Level 3.

NOTE 7 RELATED-PARTY TRANSACTIONS

Certain Plan investments are managed by Prudential, who also serves as administrator of certain benefits paid to plan participants.

The Plan holds units of trust funds managed by Prudential, a trustee of the Plan. This transaction qualifies as party-in-interest transactions: however, they are exempt from the prohibited transactions rules under ERISA. During 2010, the Plan paid Prudential \$11,716 in trustee and transactional fees. The Plan also owed the trustee \$126,212 in fees as of December 31, 2010.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Retirement Benefits

Normal

An individual who first became a pension plan participant after June 30, 1975, or is otherwise not eligible for the prior plan minimum benefit shall have the monthly pension amount determined solely by the following formula (called Formula #4):

$[(a) \times (b)] + [(c) \times (d)]$ where

(a) equals Pension Band Amount (see below)

(b) equals Benefit Service

(c) equals .001

(d) equals average annual amount of supplemental salary payments (e.g. shift premium) paid to an employee during the last 36 month period.

Pension Band Amount is a monthly dollar amount per year of service which is a function of Pension Band Number, which is in turn a function of job title and classification as shown below¹:

Pension Band	MTC and OPEIU Employees	SPA Employees
101	\$40.36	N/A
103	\$43.80	N/A
105	\$47.16	N/A
106	\$48.91	N/A
107	\$50.64	\$50.40
108	\$52.32	N/A
109	\$54.06	N/A
110	\$55.73	N/A
112	\$59.12	N/A
113	\$60.86	\$60.57
115	\$64.25	N/A
116	\$65.95	\$65.63
119	\$71.07	N/A
122	\$76.18	N/A

¹ The rates are shown as of October 1, 2009 for the MTC and OPEIU employees and as of December 1, 2009 for the SPA employees. The additional 4.00% increases were negotiated for all MTC and OPEIU bands effective October 1, 2010. The additional 4.00% increases were negotiated for all SPA bands effective on December 1, 2010 and December 1, 2011 and 3.00% increases effective on December 1, 2012, and December 1, 2013.

2010 Schedule SB, line 27 – Actuarial Information Based on Pre-PPA
Funding Rules
Sandia Corporation Pension Security Plan
EIN: 85-0097942 PN: 005

An individual who is a prior plan employee shall have the pension determined as the greater of the above Formula #4 and Formula #1. Formula #1 is 1% of the first \$3,000 of annual earnings, plus 2% of the excess, for each year of plan participation. Accruals under Formula #1 are suspended as of December 31, 1989.

Former employees of Lockheed Martin Corporation Specialty Components ("Pinellas") and the Lockheed Martin Corporation receive a benefit equal to the above described benefit based on total service (service accrued while a Sandia employee plus service accrued at former company), not less than the accrued regular benefit under Pinellas or Lockheed Martin (whichever applicable) at the date of transfer. In addition, the Pinellas participants receive a benefit based on their Personal and Voluntary Pension Accounts.

Early

The accrued normal retirement benefit is reduced 0.5% for each month that retirement precedes age 55 for participants who are eligible for Service Retirement and have less than 30 years of Eligibility Service.

Disability

Accrued normal retirement benefit, payable without a reduction for early commencement. Effective July 1, 2009, this special disability benefit was eliminated for OPEIU employees. Effective July 1, 2010, this special disability benefit was also eliminated for MTC and SPA employees. Benefits for participants who become disabled after these dates will be paid according to the vesting provisions of the plan.

Vesting

Any participant who is at least age 22, and leaves employment before age 65 with at least five years of vesting service is entitled to a deferred vested pension at age 65. Any participant who leaves employment on or after age 65 with at least five years of vesting service is entitled to a vested pension commencing immediately. A participant eligible for early retirement may elect to receive a reduced benefit. The reductions are based on tabular factors for deferred vested participants that vary based on the participant's age at the benefit commencement date.

Preretirement Spouse's Benefits

Eligibility

The spouse of an active participant who dies after becoming eligible for a deferred vested pension.

Benefit

The benefit amount, derived from the participant's accrued benefit, and the annuity commencement date are dependent on the deceased's years of employment as follows:

- (a) Fifteen or more years or service pension eligible: 90%² of accrued benefit payments commence upon the participant's death without early retirement reductions
- (b) Less than 15 years or not yet service pension eligible: 86% of accrued benefit; payments commence on the deceased's 65th birthday.

Death Benefit

Eligibility

A beneficiary of a Prior Plan Employee if there is no surviving spouse.

Benefit

An amount equal to the participant's employee contributions plus accumulated interest reduced by any benefit payments made to the participant. If death occurs after retirement and the participant did not have an eligible survivor at retirement, then the amount will not be less than the accrued December 31, 1975, annual annuity.

Return of Employee Contributions

A participant who terminates employment and is not eligible for a Service Pension or a Disability Pension may, with spousal consent, elect to receive a single sum payment equal to the Participant's Prior Plan Employee Contributions plus interest on any date between the participant's termination of employment and the participant's benefit commencement date. This single sum payment will reduce the participant's accrued benefit under the plan.

Normal Form of Payment

Life annuity for single participants, 100% joint and survivor annuity with a pop-up for married participants.

² Effective February 13, 2002, the qualified pre-retirement survivor annuity (QPSA) was changed to the joint and 100% survivor annuity from the joint and 50% survivor annuity. Prior to changes effective February 13, 2002, the applicable reductions were 46.5% and 45% for retirements and terminations of employment, respectively, on or after April 21, 1994. For retirements and terminations of employment prior to April 21, 1994 the reductions were 45% and 44%, respectively.

Funding Rules
Sandia Corporation Pension Security Plan
EIN: 85-0097942 PN: 005

Optional Forms of Payment

50% joint and survivor annuity with a pop-up.

Actuarial Equivalence

Participant's benefit is reduced 14% for 100% joint and survivor annuity with a pop-up and 7% for 50% joint and survivor annuity with a pop-up. For a Service or a Disability Pension, 14% is replaced by 10% and 7% is replaced by 5%.

Schedule B, line 11—Justification for Change in Actuarial Assumptions

The RPA current liability interest rate increased from 6.69% as of January 1, 2009 to 6.76% as of January 1, 2010. This rate was changed in accordance with PPA Section 106(b) and remains within the prescribed ranges. Additionally, the mortality table that is used to determine current liability has been changed to the 2010 Static Mortality Table with separate annuitant and nonannuitant rates. Because these changes are mandated, they are not subject to the approval requirements of IRC Section 412(c)(5)(B).

The funding interest rate assumption changed from 8.50% as of January 1, 2009 to 7.00% as of January 1, 2010, to better reflect anticipated plan experience.

The mortality rates, retirement rates and withdrawal rates have all been updated to better reflect anticipated plan experience.

To the best of my knowledge, the information supplied in this schedule and on the accompanying schedules, statements, and attachments, if any, is complete and accurate, and in my opinion each assumption, used in combination, represents my best estimate of anticipated experience under the plan. Furthermore, in the case of a plan other than a multiemployer plan, each assumption used (a) is reasonable (taking into account the experience of the plan and reasonable expectations) or (b) would, in the aggregate, result in a total contribution equivalent to that which would be determined if each such assumption were reasonable; in the case of a multiemployer plan, the assumptions used, in the aggregate, are reasonable (taking into account the experience of the plan and reasonable expectations).
