Independent Auditor's Report

Mr. Barry Poll
Universal Pool Company Inc. 401(k) Savings Plan
South Holland, Illinois

We were engaged to audit the financial statements of **Universal Pool Company 401(k) Savings Plan** as of December 31, 2010 and 2009, and for the year ended December 31, 2010, and the supplemental schedule as of December 31, 2010, as listed in the accompanying index. These financial statements and supplemental schedule are the responsibility of the plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by Transamerica Life Insurance Company, the custodian of the plan, except for comparing such information with the related information included in the financial statements and supplemental schedule. We have been informed by the plan administrator that the custodian holds the plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the custodian as of and for the year ended December 31, 2010 and 2009, and for the year ended December 31, 2010, that the information provided to the plan administrator by the custodian is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the custodians, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Note 1 - Description of Plan

The following description of Universal Pool Company 401(k) Savings Plan (the plan) provides only general information. Participants should refer to the plan agreement for a complete description of the plan's provisions.

General

The plan was established by Universal Pool Company, Inc. (the company), the plan's sponsor, on September 1, 1997 and covers all eligible employees of the company. The plan is a defined contribution 401(k) savings plan. The plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Administration of the Plan

The plan sponsor and administrator is Universal Pool Company, Inc. The custodian, Transamerica Life Insurance Company, holds the plan's assets. All information relating to the value of the plan's assets and related investment income was obtained from reports submitted by the custodian. These reports were certified by the custodian as being complete and accurate.

All investments are participant-directed. Participants may change their investments daily and can select from the numerous investment options offered by the plan with varying investment strategies.

Administrative costs are paid by the plan to the extent not paid by the plan sponsor.

Eligibility

All employees who are at least 21 years of age and who have completed one year and at least 1,000 hours of service are eligible to enter the plan. Eligible employees can enter the plan on the first day of the month following the completion of eligibility requirements. Those employees who have met eligibility requirements and are employed at the end of the plan year are eligible for the company matching and discretionary contributions.

Employer Contributions

The employer may make a discretionary contribution into the profit sharing plan as determined by the company's board of directors. For the years ended December 31, 2010 and 2009, the board elected not to make employer-matching contributions.

Participant Contributions

Each year, participants may contribute pretax annual compensation up to amounts allowed by the Internal Revenue Service. There is no minimum contribution. Participants who have attained age 50 may make catch-up contributions in addition to their regular deferral contributions. Eligible employees may also contribute, with the consent of the plan administrator, amounts representing distributions from other qualified defined benefit or defined contribution plans. Participant contribution rates may be increased or decreased at any time.

Note 1 - Description of Plan (Continued)

Vesting

All participants are immediately vested 100% in their elective salary-deferral contributions to their 401(k) plan accounts and earnings thereon. Employer 401(k) matching contributions and employer profit-sharing contributions (and earnings thereon) vest 20% after two full years of credited service, then at the rate of 20% per full year of credited service for the next four years.

Payment of Benefits

Upon termination of service for a reason other than death, a participant may elect to receive either a lump-sum amount or purchase an annuity. Upon termination of service due to death, a lump-sum payment of the participant's account balance will be distributed to the beneficiary. Upon termination of service, a mandatory lump-sum distribution will be made to participants with account balances of $5,000 or less.

Participant Accounts

Each participant's account is credited (charged) with the participant's contribution and allocations of (a) the company's contribution and (b) plan earnings (losses). The benefit to which the participant is entitled is the benefit that can be provided from the participant's vested account. The payment of plan benefits to an individual reduces his/her account balance.

Notes Receivable from Participants

Participants may borrow from their accounts a minimum of $1,000 up to a maximum equal to the lesser of 50% of their account balance or $50,000. Loans for the purchase of a principal residence can be paid over a reasonable period of time, which may not exceed ten years. The term on loans other than for the purchase of a principal residence may not exceed five years. The loans are secured by the balance in the participant's account and bear interest at a reasonable fixed rate, which is commensurate with local prevailing rates as determined by the plan administrator. Principal and interest are payable no less frequently than quarterly, through payroll deductions.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the plan are prepared under the accrual method of accounting.

Note 2 - Summary of Significant Accounting Policies (Continued)

Notes Receivable from Participants

Effective January 1, 2010, the plan retrospectively adopted updated accounting principles generally accepted in the United States of America (GAAPUSA) regarding the reporting of loans to participants by defined contribution plans. Such loans are now required to be presented as "notes receivable from participants" that are measured at their unpaid principal balance plus any accrued but unpaid interest. Prior to this change, loans to participants were presented as investments that were measured at fair value. This change resulted in a reclassification of $291,540 from investments to notes receivable from participants in the 2009 Statement of Net Assets Available for Benefits. In addition, fair value measurement disclosures regarding loans to participants are no longer required.

Delinquent loans are reclassified as distributions based on the terms of the plan document.

Transamerica Stable Value Option

Under accounting principles generally accepted in the United States of America (GAAPUSA), investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. GAAPUSA requires investments in fully benefit-responsive investment contracts to be presented at fair value in the statements of net assets available for benefits and that amount representing the difference between fair value and contract value of these investments to also be presented as a separate line item in the statements of net assets available for benefits. The Transamerica Stable Value Option qualifies as a fully benefit-responsive investment contract and is subject to the previously mentioned reporting requirements. Since the fair value and contract value of this investment is equal or only an insignificant difference as of December 31, 2010 and 2009, the plan's financial statements do not include a separate line item that reconciles the difference between the two values. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

Investment Valuation and Income Recognition

All plan investments are carried at fair value in accordance with GAAPUSA. See Note 3 for more information on fair value measurements.

Effective January 1, 2010, the plan adopted new guidance that requires the plan to report significant transfers between Level 1 and Level 2 and the reasons for those transfers, as well as disclosing the reasons for transfers in or out of Level 3. Additionally, the guidance requires the plan to clarify existing disclosure requirements about the level of disaggregation and inputs and valuation techniques. The adoption of this guidance did not have an impact on the plan's financial statements.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation and Income Recognition (Continued)

The new guidance also requires the reconciliation of changes in Level 3 fair value measurements to present purchases, sales and settlements separately on a gross basis rather than as a net amount, effective for fiscal years beginning after December 15, 2010. The plan does not expect the adoption of the guidance for Level 3 activity to have a significant impact on its financial statements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

The plan's investments are exposed to various risks, such as interest rate, credit and overall market volatility. Due to these risk factors, it is reasonably possible that changes in the value of investments will occur in the near term and could materially affect the amounts reported in the financial statements.

Forfeitures

Forfeitures of employer contributions are used to reduce future employer contributions and are allocated in the same manner as the matching employer contribution for the plan year. Forfeited nonvested accounts as of December 31, 2010 and 2009 totaled $22,263 and $21,620, respectively.

Risks and Uncertainties

The plan's investments are exposed to various risks such as interest rate, credit and overall market volatility. Due to these risk factors, it is reasonably possible that changes in the value of investments will occur in the near term and materially affect the amounts reported in the financial statements.

Payment of Benefits

Benefits are recorded when paid.

Management Estimates

The preparation of financial statements in conformity with GAAPUSA requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of additions to and deductions from net assets available for benefits during the reporting period. Actual results could differ from those estimates.

Note 3 - Fair Value Measurements

GAAPUSA defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal market or, in the absence of a principal market, the most advantageous market accessible to the reporting entity as of the measurement date. Under GAAPUSA, the principal market is the market in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity. The most advantageous market, which may be a hypothetical market, is the market in which the reporting entity would sell the asset or transfer the liability with the price that maximizes the amount that would be received for the asset or minimizes the amount that would be paid to transfer the liability, considering transaction costs in the respective market.

GAAPUSA describes three approaches to measuring fair value: the market approach, the income approach and the cost approach. Each approach includes multiple valuation techniques. GAAPUSA does not prescribe which valuation technique should be used when measuring fair value, but does establish a fair value hierarchy that prioritizes the inputs used in applying the various techniques based on the degree to which such inputs are observable to market participants. Inputs broadly refer to the assumptions that market participants use to make pricing decisions, including assumptions about risk.

The plan's investments are classified in one of the following three categories based on the inputs used to determine their respective fair values.

- Level 1 - Quoted prices (unadjusted) for identical assets or liabilities in active markets as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

- Level 2 - Observable market-based inputs or unobservable inputs that are corroborated by market data. These inputs may include quoted prices for similar assets or liabilities in active markets as well as quoted prices for identical or similar assets or liabilities in inactive markets.

- Level 3 - Unobservable inputs that cannot be corroborated by market data. These inputs reflect management's best estimate of fair value using its own assumptions about the assumptions a market participant would use in pricing the asset or liability.

When the inputs used to value an investment fall into more than one level, the investment is classified in its entirety based on the lowest level input that is significant to that investment's fair value measurement. Management's assessment of the significance of a particular input to the fair value measurement requires judgment and is dependent on factors specific to the investment. Valuation techniques used need to maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Note 3 - Fair Value Measurements (Continued)

As of December 31, 2010, the following valuation methodologies have been used to value the plan's investments:

- Pooled Separate Accounts - Valued at the net asset value (NAV) per unit as determined by the insurance company or contract administrator. Such NAV is based on the value of the underlying assets and liabilities of the account. The investment objectives of the trust held by the plan is to preserve principal and provide a stable return over the life of the investment. Participants may transfer in and out of such trusts on a daily basis without any prohibitive restrictions.

- Transamerica Stable Value Option - Valued by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the plan believes its valuation methods are appropriate and consistent with other market participants, the different methodologies or assumptions used to determine fair value of certain financial instruments could result in a different fair value measurement as of the reporting date.

Note 4 - Investments

The plan has entered into an insurance contract with Transamerica Life Insurance Company. Under the terms of this contract, Transamerica Life Insurance Company maintains the plan's investment assets in both its general account and in a series of pooled separate accounts. The assets invested in Transamerica Life Insurance Company's general account are credited with a fixed rate of interest as determined by Transamerica Life Insurance Company. This interest rate is reset at least annually. The assets invested in the various pooled separate accounts are credited with actual earnings on the underlying investments and charged for plan withdrawals and administrative expenses.

The following table presents the fair value of investments that represent 5% or more of the plan's net assets as of December 31, 2010 or 2009.

	2010		2009	
	Number of Units	Fair Value	Number of Units	Fair Value

During 2010, the plan's investments in pooled separate accounts, stable value option and money market (including gains and losses on investments bought, sold as well as held during the year) appreciated in value by $597,860.

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the custodian of the plan has certified as to the completeness and accuracy of the plan's investments reflected in the statements of net assets available for benefits as of December 31, 2010 and 2009, the schedule of assets held at end of year as of December 31, 2010 and the related investment activity reflected in the statement of changes in net assets available for benefits for the year ended December 31, 2010, as indicated above and in total.

Note 5 - Transamerica Stable Value Option

Objectives

The Transamerica Stable Value Option's (the Fund) key objectives are to provide preservation of principal, maintain a stable interest rate and provide daily liquidity at contract value for participant withdrawals and transfers in accordance with the provisions of the plan.

Note 5 - Transamerica Stable Value Option (Continued)

Nature of Investment Contracts

To accomplish the objectives outlined above, the Fund invests primarily in investment contracts such as traditional guaranteed investment contracts (GIC) where the issuer takes a deposit from the Fund and purchases investments that are held in the issuer's general account. The issuer is contractually obligated to repay the principal and a specified rate of interest guaranteed to the Fund.

In a contract structure, the underlying investments are owned by the Fund and held in trust for plan participants. The contract amortizes the realized and unrealized gains and losses on the underlying fixed income investments, typically over the duration of the investments, through adjustments to the future interest crediting rate (which is the rate earned by participants in the Fund for the underlying investments). The issuer of the contract provides assurance that the adjustments to the interest crediting rate do not result in a future interest crediting rate that is less than zero, which would result in a loss of principal or accrued interest.

The key factors that influence future interest crediting rates for a contract include:

- The level of market interest rates
- The amount and timing of participant contributions, transfers and withdrawals into/out of the contract
- The investment returns generated by the fixed income investments that back the contract
- The duration of the underlying investments backing the contract

Contracts' interest crediting rates are reset on a monthly basis. While there may be slight variations from one contract to another, most contracts use a formula that is based on the characteristics of the underlying fixed income portfolio. Over time, the crediting rate formula amortizes the Fund's realized and unrealized market value gains and losses over the duration of the underlying investments.

Because changes in market interest rates affect the yield to maturity and the market value of the underlying investments, they can have a material impact on the contract's interest crediting rate. In addition, participant withdrawals and transfers from the Fund are paid at contract value but funded through the market value liquidation of the underlying investments, which also impacts the interest crediting rate. The average yield and crediting interest rates for the Fund were 2.99% and 3.00% in 2010 and 2009, respectively.

Events that Limit the Ability of the Fund to Transact at Contract Value

Certain events limit the ability of the plan to transact at contract value with the issuer. Such events include termination of the plan, a material adverse change to the provisions of the plan or the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The plan administrator does not believe that the occurrence of any such event, which would limit the plan's ability to transact at contract value with participants, is probable.

Note 5 - Transamerica Stable Value Option (Continued)

Issuer-Initiated Contract Termination

The issuer may not terminate the contract before its maturity date unless the balance of the contract is zero and no current deposit arrangements have been made.

Note 6 - Excess Contributions Payable

As a result of the 2010 Actual Deferral Percentage test required by the IRS, two highly compensated employees (HCE) were found to have contributed more than the IRS limits. The plan was required to refund these excess contributions to the employees. Therefore, as of December 31, 2010, a total of $2,221 was recorded as excess contributions payable.

Note 7 - Party-In-Interest Transactions

The plan's investments are managed by Transamerica Life Insurance Company, the custodian of the plan. Transamerica Life Insurance Company qualifies as a party-in-interest. Fees paid by the plan to the custodian were $18,558 for the year ended December 31, 2010.

Note 8 - Plan Termination

While the plan is intended to be permanent, it may be terminated at the discretion of the company subject to the provisions of ERISA. Upon termination of the plan or complete discontinuance of contributions, the custodian may commence distribution to each participant. In the event of plan termination, participants would become 100% vested in all of their accounts.

Note 9 - Income Tax Status

The plan documents were established under an IRS volume submitter program and offered by its third-party administrator. The third-party administrator has received a determination letter from the IRS as of March 31, 2008 and has represented to the plan that, as designed, the plan is in compliance with the applicable requirements of the Internal Revenue Code. The plan is required to operate in conformity with the Internal Revenue Code to maintain its qualification. The company is not aware of any course of action or series of events that have occurred that might adversely affect the plan's qualified status.

Note 9 - Income Tax Status (Continued)

GAAPUSA requires plan management to evaluate tax positions taken by the plan and recognize a tax liability if the plan has taken an uncertain tax position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2007.

Note 10 - Subsequent Events

On January 1, 2011, the trustee and custodian of the plan were changed to Fidelity Investments.

The plan administrator has evaluated subsequent events through September 27, 2011, the date the 2010 financial statements were available to be issued and October 4, 2010 with respect to the comparative 2009 financial statements.

Note 11 - Reconciliation of Financial Statements to Form 5500
