Report of Independent Auditors

Pension Investment Committee
Selected Defined Benefit Pension Plans

We were engaged to audit the accompanying statements of net assets available for benefits of each of the AMETEK, Inc. Selected Defined Benefit Pension Plans, listed on pages 2 and 3, as of December 31, 2010 and 2009, and the related statements of changes in net assets available for benefits, listed on pages 4 and 5, for the years then ended and the statements of accumulated plan benefits, listed on page 6, as of December 31, 2009 and the related statements of changes in accumulated plan benefits, listed on page 7, for the year then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 4, which was certified by The Bank of New York Mellon/BNY Mellon, N.A., the trustee of the plans, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the plans' investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2010 and 2009, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express opinions on the accompanying financial statements for each of the plans taken as a whole. The form and content of the information included in the financial statements, other than that derived from the investment information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

1. Summary of Significant Accounting Policies

Allocation of the Master Retirement Trust

At December 31, 2010 and 2009, the assets of the AMETEK, Inc. ("AMETEK" or the "Company") Pension Plans (the "Plans") were held by The Bank of New York Mellon Corporation ("Trustee") as Trustee of the AMETEK, Inc. Employees' Master Retirement Trust ("Trust").

Assets attributable to the individual plans participating in the Trust are equitable shares, which are based on each Plan's proportionate share of total net assets of the Trust as of the end of each month, excluding unpaid contributions. Contributions received, benefits paid and shared and direct administrative expenses are accounted for as direct cash flows designated to the individual plans during the period. The Trustee allocates earned income, realized gains and losses and unrealized gains and losses to individual plans based on each Plan's pro rata share of the fair value of the Trust's net assets at the end of the period.

Investment valuation

The Plans' investments are stated at fair value. See Note 4 for further discussion and disclosures related to fair value measurements.

Portfolio managers of the Trust may enter into certain types of futures and option contracts in order to enhance liquidity or protect the total return of the Trust's portfolio from market volatility. Realized and unrealized gains and losses from these contracts are included in investment income.

Purchases and sales of securities are reflected on the trade dates. Gains and losses on sales of securities are based on the average cost of securities. Dividend income is recorded on the ex-dividend date. Income from other investments is recorded as earned.

Actuarial cost methods

The actuarial cost methods utilized by consulting actuaries are as prescribed by Employee Retirement Income Security Act of 1974 ("ERISA") and the Internal Revenue Code ("IRC"), as amended by the Pension Protection Act of 2006, and regulatory guidance from the U.S. Treasury and the Internal Revenue Service ("IRS").

Administrative expenses

Administrative expenses of all Plans are paid by the Trust and are charged to the respective Plans.

Basis of presentation

The accompanying financial statements have been prepared on the accrual basis of accounting.

Use of estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates and assumptions.

1. Summary of Significant Accounting Policies (continued)

Risks and uncertainties

The Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Subsequent Events

Management evaluated subsequent events for the Plans through September 28th, 2011, the date the financial statements were available to be issued.

2. Description of the Plans

Contributions, benefits and eligibility

All of the Plans are noncontributory defined benefit pension plans covering employees of AMETEK who meet certain age and service requirements. The Plans comply with applicable laws and regulations. For a more detailed description of the Plans participating in the Trust, the pension plan documents should be referred to for each of the Plans listed on pages 2 and 3.

AMETEK's contributions, which are determined annually on an actuarial basis, along with net appreciation (depreciation) in the fair value of the investments, are designed to sufficiently fund the benefits to be paid to Plan participants. The contributions of AMETEK are calculated using the assumptions and methods prescribed by ERISA and the IRC, as amended by the Pension Protection Act of 2006, and applicable regulations. Generally, the minimum required contribution is the plan's target normal cost (the value of benefits to be earned during the year) and seven-year amortization of any funding shortfall (the excess of the funding target over assets). The Plans have met the ERISA minimum funding requirements.

Although it has not expressed an intention to do so, the Company reserves the right under the Plans to discontinue its contributions at any time and to terminate the Plans subject to the provisions of ERISA. Upon termination, the net assets of the Plans will be allocated for payment to the participants in an order of priority as prescribed by ERISA and its related regulations and the plans documents.

Should the Plans terminate at some future time, their assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation

("PBGC") at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

The actuarial present value of accumulated plan benefits under the Plans was calculated by the consulting actuaries, based on the latest available data as of December 31, 2009. The actuarial present value of accumulated

2. Description of the Plans (continued)

plan benefits is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Prior to January 1, 1997, Employees' Retirement Plan of AMETEK, Inc. ("Salaried") plan, which was frozen to all salaried employees hired after January 1, 1997. All salaried employees joining AMETEK on or subsequent to January 1, 1997 are eligible to participate in a retirement feature offered within other defined contribution plans sponsored by AMETEK.

Effective January 1, 2010, the net assets of the Lamb – Kent, Hourly Employees' and Specialty Metal Products plans were merged into the Salaried plan. While participation in the Salaried plan is closed to salaried employees hired or rehired on or after January 1, 1997 as described above, hourly employees at participating divisions will participate in the Salaried plan once they meet the former Hourly Employees' plan's related eligibility requirements.

Significant actuarial assumptions at December 31, 2009

Assumed rate of return on investments

The assumed rate of return on investments is 8.25% compounded annually, net of investment expenses.

Funding interest rate

Liabilities are calculated using the segment rates as prescribed in IRC Section 430(h)(2). The segment rates are equivalent to the following effective interest rates, net of investment expenses:

Plan	Effective interest rate
Salaried	6.55%
U.S. Gauge Sellersville	6.44%
Chemical Products (Wapakoneta)	6.66%
Chemical Products (Nesquehoning)	6.64%
Aerospace – Union	6.56%

Mortality basis

Mortality is based on a variation of the RP-2000 Mortality Table with separate rates for annuitants and non-annuitants.

Retirement

Retirement under the various Plans is assumed to take place based on retirement rates which generally result in assumed retirement at ages ranging from 62 to 65.

Actuarial Assumptions

These actuarial assumptions are based on the presumption that the Plans will continue. Were the Plans to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Investment Information (continued)

The Plans utilize a valuation hierarchy for disclosure of the inputs to the valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on the Plans' own assumptions used to measure assets and liabilities at fair value. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The following is a description of the valuation methodologies used for assets at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

Level 1 investments are unadjusted, observable inputs from active markets. Temporary cash investments are stated at cost, which approximates fair value. Quoted market prices are used to value investments when available. Investments such as common stocks traded on exchanges are valued at the last reported sale prices on the last business day of the year or, if not available, the last reported bid prices. Real estate investments are valued on a quarterly basis using discounted cash flow models which consider long-term lease estimates, future rental receipts and estimated residual values. Fixed income securities such as government and corporate obligations are primarily measured using a market approach pricing methodology, where observable prices are obtained by market transactions involving identical or comparable securities of issuers with similar credit ratings. Corporate obligations are all investment grade quality. Mutual funds are valued at quoted market prices which represent the net asset values of shares held by the Plans at year end. Securities that use similar valuation techniques and inputs as described above are categorized as Level 1 of the fair value hierarchy.

Level 2 investments are equity funds and fixed income funds that are valued by the vendor using observable market inputs. Common collective trusts are valued based on the plan's unit of ownership and net asset value of the investment entity's pooled investments. Investments in partnership interests are valued based on estimated net asset value of the underlying investments. These level 2 investments have no unfunded commitments and no limits as to the frequency of redemptions. The level 2 investments have various redemption terms and notice periods. U.S. Large cap stock investments have daily redemption without notice. Diversified common stocks – U.S. investments have redemption terms that range from monthly to quarterly with notice periods between 30 to 60 days. Diversified common stocks – Global investments have redemption terms that range from daily to monthly with no notice period. Global asset allocation and Inflation Related fund investments have monthly redemption terms with no notice period. Hedge funds are considered level 3 investments as their values are determined by the sponsor using unobservable market data.

4. Investment Information (continued)

The objectives of the Plans' investment strategy are to maximize the Plans' funded status and minimize Company contributions and Plan expense. Because the goal is to optimize returns over the long term, an investment policy that favors equity holdings has been established. Since there may be periods of time where both equity and fixed-income markets provide poor returns, an allocation to alternative assets may be made to improve the overall portfolio's diversification and return potential. The Company periodically reviews the Trust's asset allocation, taking into consideration plan liabilities, plan benefit payment streams and the investment strategy of the pension plans. The actual asset allocation is monitored frequently relative to the established targets and ranges and is rebalanced when necessary.

The equity portfolio is diversified by market capitalization and style. The equity portfolio also includes an international component.

The objective of the fixed-income portion of the pension assets is to provide interest rate sensitivity for a portion of the assets and to provide diversification. The fixed-income portfolio is diversified within certain quality and maturity guidelines in an attempt to minimize the adverse effects of interest rate fluctuations.

Other than investments in hedge funds, certain investments are prohibited. Prohibited investments include venture capital, private placements, unregistered or restricted stock, margin trading, commodities, short selling and rights and warrants. Foreign currency futures, options and forward contracts may be used to manage foreign currency exposure.

5. Income Tax Status

The Plans have received determination letters from the IRS dated as follows:

Employees' Retirement Plan of AMETEK, Inc. (001)	January 3, 2003
Pension Plan for Shop Employees of U.S. Gauge Division of AMETEK, Inc. (003)	October 29, 2010
Chemical Products (Wapakoneta, Ohio Plant) Division of AMETEK, Inc. Hourly Employees' Pension Plan (012)	October 19, 2010
Chemical Products (Nesquehoning, Pennsylvania Plant) Division of AMETEK, Inc. Hourly Employees' Pension Plan (032)	October 19, 2010
AMETEK, Inc. Aerospace Division Pension Plan for Union Represented Employees (043)	October 19, 2010

The determination letters state that each of the Plans qualifies under Section 401(a) of the IRC and, therefore, the related trusts are exempt from taxation. Once qualified, the Plans are required to operate in conformity with the IRC to maintain their qualification. In January, 2010 the Plan Sponsor submitted applications to the IRS for new determination letters for the plans above except for the Lamb - Kent, Hourly Employees' and Specialty Metal Products plans which were merged into the Salaried Plan effective January 1, 2010 as described in Note 7. On October 19 and 29, 2010, the Plan Sponsor received new determination letters from the IRS for the Chemical Products - Wapakoneta, Chemical Products - Nesquehoning, Aerospace and U.S. Gauge Plans, respectively. Subsequent to the issuance of the new determination letters, the restated Plans were adopted. The Plan Sponsor believes the Plans are being operated in compliance with the applicable requirements of the IRC and therefore believes the Plans are qualified and the related trusts are tax-exempt. IRS response is pending for the Employees' Retirement Plan.

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plans. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plans, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken. The Plans have recognized no interest or penalties related to uncertain tax positions. The Plans are subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan sponsor believes it is no longer subject to income tax examinations for years prior to 2007.

7. Plan Amendments

During 2009, all of the Plans were amended to incorporate changes required under IRC Section 415, the Pension Protection Act of 2006, the Worker, Retiree, and Employer Recovery Act of 2008 and the Heroes Earnings Assistance and Relief Tax Act of 2008, which were effective as of January 1, 2008.

In December 2009, the Lamb – Kent, Hourly Employees' and Specialty Metal Products Plans were amended to merge the Plans' net assets into the Salaried Plan effective January 1, 2010.

In December 2009, the Aerospace – Union Plan was amended, effective October 1, 2009, for participants who reached age 60 and retire on or before March 31, 2010, and execute their retirement election on or after October 1, 2009, but no later than November 14, 2009, are eligible to receive early retirement benefits. If a participant is eligible for the early retirement benefits based on the qualifications above and retires with 25 or more years of credited service, the participant shall not be required to retire within the time period described in the Aerospace – Union Plan.

In December 2010, the Chemical Products (Wapakoneta) Plan was amended for Participants who die on or after January 1, 2010, to increase the post retirement Lump Sum Death Benefit: to \$5,500 for Participants who retired on or after January 15, 2001 and before January 20, 2004; and to \$6,500 for Participants who retire on or after January 20, 2004.

In December 2010, the Chemical Products (Nesquehoning) Plan was amended to increase the employee retirement benefit amount per month per year of credited service as follows: \$41.00 for service from September 24, 2009 through September 23, 2010; \$43.00 for service from September 24, 2010 through September 23, 2011; \$45.00 for service from September 24, 2011 through September 23, 2012; and \$47.00 for service on and after September 24, 2012.

All of the Plans were restated effective January 1, 2010 and submitted to the IRS in proposed form. Upon receipt of the new determination letters for the Chemical Products – Wapakoneta, Chemical Products – Nesquehoning, Aerospace and U. S. Gauge Plans, the restated Plans were adopted. The restated Employees' Retirement Plan will be adopted upon receipt of the determination letter.

8. Differences Between Financial Statements and Form 5500

There are no differences between the financial statements to the Plan's Form 5500 at December 31, 2010.

The following is a reconciliation of assets available for benefits per the financial statements to the Plan's Form 5500 at December 31, 2009:

9. Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards ("IFRS") ("ASU 2011-04"). ASU 2011-04 generally aligns the principles for fair value measurements and the related disclosure requirements under US GAAP and IFRS. The amendments are largely clarifications, however ASU 2011-04 amends the application of the in-use valuation premise and the application of discounts and premiums in measuring fair value. ASU 2011-04 also has additional disclosure requirements for qualitative information and the valuation processes used for Level 3 assets or liabilities, all transfers between Level 1 and Level 2 of the fair value hierarchy, for any nonfinancial asset measured at fair value that an entity uses in a way that differs from its highest and best use, and finally, for the level of the fair value hierarchy in which an asset or a liability (financial or nonfinancial) would be categorized if that asset or liability had been measured at fair value in the statement of financial position. ASU 2011-04 will be effective on January 1, 2012 for the Plans. The Plans are currently evaluating the impact of adopting ASU 2011-04 on our fair value measurement disclosures.

In January 2010, FASB issued ASU No. 2010-06, *Improving Disclosures About Fair Value Measurements* ("ASU 2010-06"). ASU 2010-06 provides amendments that clarify existing disclosures and require new disclosures related to fair value measurements providing greater disaggregated information on each class of assets and liabilities and more robust disclosures on transfers between levels 1 and 2 and activity in level 3 fair value measurements. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods. The Plans adopted the applicable provisions within ASU 2010-06 effective January 1, 2010. The Plans are currently evaluating the impact of adopting the level 3 disclosures of ASU 2010-06 that are effective for fiscal years beginning after December 15, 2010.

In September 2009, the FASB issued ASU 2009-12, *Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)* ("ASU 2009-12"). ASU 2009-12 amended Accounting Standards Codification ("ASU") 820 to allow entities to use net asset value per share (or its equivalent), as a practical expedient, to measure fair value when the investment does not have a readily determinable fair value and the net asset value is calculated in a manner consistent with investment company accounting. ASU 2009-12 was effective for interim and annual periods ending after December 15, 2009. The adoption of ASU 2009-12 did not have a material impact on the Plans' financial statements. See Note 4.

In February 2010, the FASB issued ASU No. 2010-09, *Subsequent Events* ("ASU 2010-09"). ASU 2010-09 removes the requirement for an SEC filer to disclose a date in both the issued and revised financial statements for which the Company evaluated events that occur after the balance sheet date but before financial statements are issued or are available to be issued. ASU 2010-09 was effective as of February 2010.

Change in Methods and Assumptions Since Last Year

Contributions	<p>The funding interest rate was changed from the segment interest rates for January 2009 valuations to the segment interest rates for January 2010 valuations.</p> <p>The required mortality table used to calculate the funding target and target normal cost was changed from separate RP-2000 tables for annuitants and non-annuitants for 2009 to separate RP-2000 tables for annuitants and non-annuitants for 2010.</p> <p>The method with regard to the allocation of ancillary disability and supplemental benefits between the funding target (benefits allocated to past service), the target normal cost (benefits allocated to service during the valuation year), and future years' target normal costs was changed for the Legacy Specialty Metals plan.</p> <p>There was a change in the method of determining the "effective interest rate" for the plans due to the release of new guidance.</p>
---------------	--

Data Sources	<p>Towers Watson used asset data supplied by the company. The company furnished participant data as of the valuation date. The company also provided contribution information, the postretirement benefit asset, postretirement benefit liability and amounts recognized in accumulated other comprehensive income as of fiscal year-end. Data were reviewed for reasonableness and consistency, but no audit was performed. Towers Watson is not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.</p>

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
