JACKSON TUBE SERVICE, INC. RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2010

NOTE 1 - DESCRIPTION OF PLAN

The following brief description of the Jackson Tube Service, Inc. Retirement Plan (the Plan) is provided for general information purposes only. For more complete information on benefit, vesting and other plan provisions, participants should refer to the current summary plan description or the Plan agreement.

General - The Plan is a defined benefit pension plan designed to provide retirement and death benefits to eligible employees of Jackson Tube Service, Inc. (the Employer, Plan Sponsor or Company). Substantially all employees are covered by the Plan provisions. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits - Employees with five or more years of service are entitled to a pension benefit beginning at normal retirement age (65) equal to .767% of average compensation for each year of service (not to exceed thirty years), less the accrued benefit, if any, received from the prior salaried plan. The Plan permits early retirement at age 60, after ten years of service. Pension benefits for early retirement are reduced 6 $\frac{2}{3}$ % for each year early retirement precedes normal retirement. Employees may elect to receive the value of their accumulated plan benefits as a lump-sum distribution upon retirement or termination, or they may elect to receive their benefits as a monthly annuity payable for ten years certain and life thereafter.

Effective December 31, 2007, the Plan was amended to both prohibit new employees from becoming participants in the Plan and to freeze current participants' plan benefits. Upon freezing the Plan, all participants were immediately 100% vested in their accrued retirement benefits. Currently, the Company has not expressed an intention to terminate the Plan.

Death Benefit - If an active employee dies, the employee's beneficiary is entitled to a death benefit that is the greater of a lump-sum benefit or monthly annuity benefit, as determined by formula.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The accompanying financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification.

Investment Valuation and Income Recognition - Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Plan has entered into a contract with Principal Life Insurance Company (Principal) for the investment of funds and the payment of benefits provided by the Plan. The Plan invests in the various pooled separate accounts which are maintained and administered by Principal and are carried at fair value as determined by Principal. The Plan also invests in money market funds and U.S. government securities held by Access Financial Group, Inc.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Benefit Payments - Benefit payments to participants are recorded when paid.

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries or employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from the Principal Life Insurance Company and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The Plan has elected to present actuarial benefit information as of the beginning of the Plan year.

The significant actuarial assumptions used to determine the employer contributions to the Plan as of December 31, 2009 are (a) life expectancy of participants IRS Prescribed Mortality-Optional Combined Table for Small Plans, male and female (b) retirement age assumptions (normal retirement - 65, early retirement - 60, late retirement - no maximum age); and (c) valuation interest based on segment rates (benefit payments in less than 5 years - 5.03%, benefit payments in 5 to 20 years - 6.73%, benefit payments in more than 20 years - 6.82%). Benefits under the Plan are based on .767% of average compensation times credited years of service up to a maximum of 30 years. The accumulated plan benefits for active employees are based on credited years of service up to the date as of which the benefit information is presented times plan compensation at that date.

The significant actuarial assumptions used to determine the employer contributions to the Plan as of December 31, 2008 are (a) life expectancy of participants IRS Prescribed Mortality-Optional Combined Table for Small Plans, male and female (b) retirement age assumptions (normal retirement - 65, early retirement - 60, late retirement - no maximum age); and (c) valuation interest based on the Yield Curve as specified by law (benefit payments in less than 4.5 years - 8.11%, benefit payments in 4.5 to 14.5 years - 8.74%, benefit payments in 14.5 to 29.5 years - 7.50%). Benefits under the Plan are based on .767% of average compensation times credited years of service up to a maximum of 30 years. The accumulated plan benefits for active employees are based on credited years of service up to the date as of which the benefit information is presented times plan compensation at that date.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan's management to make estimates and assumptions that affect the amounts and disclosures reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Plan Expenses - A significant portion of the Plan's administrative expenses are paid by the Plan Sponsor.

Subsequent Events - The Plan administrator has evaluated subsequent events through October 6, 2011, the date the financial statements were available to be issued.

NOTE 3 - INFORMATION PREPARED AND CERTIFIED BY THE TRUSTEE

The investment information included throughout the Plan's financial statements and supplemental schedule as of and for the years ended December 31, 2010 and 2009 was prepared by or derived from information provided by the trustee and furnished to the Plan administrator. The Plan administrator has obtained certifications from the trustee that information provided to the Plan administrator by the trustee related to these investments is complete and accurate. Accordingly, as permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information in Notes 4, 10 and 13 and supplemental schedule related to the Plan's investments.

Principal Life Insurance Company also certified to the completeness and accuracy of \$687,835 and \$824,028 of net appreciation in fair value of investments for the years ended December 31, 2010 and 2009, respectively. The remaining \$65 of depreciation for 2010 relates to assets held by Access Financial Group, Inc. and was not certified.

NOTE 4 - INVESTMENTS

The Plan's investments in pooled separate accounts are held with the Principal Life Insurance Company. The Plan's investments in money market funds and U.S. government securities are held by Access Financial Group, Inc. During the years ended December 31, 2010 and 2009, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated (depreciated) in value as follows:

	<u>2010</u>	<u>2009</u>
Pooled separate accounts	\$ 687,835	\$ 824,028
U.S. government securities	(65)	-
Total	<u>\$ 687,770</u>	<u>\$ 824,028</u>

The fair values of individual investments that represent 5.0 percent or more of the Plan's net assets are as follows:

	<u>December 31</u>	
	<u>2010</u>	<u>2009</u>
Principal Bond & Mortgage Fund	\$ 426,497	\$ 467,728
Principal Partners Large-Cap Growth Fund I	439,895	353,502
Principal Partners Large-Cap Value III Fund	281,386	239,491
Principal Large Cap Growth Fund	439,895	348,418
Principal Large-Cap Value Fund I	511,233	440,714
Principal Large-Cap S&P 500 Index Fund	363,055	304,166
Principal Core Plus Bond Fund	456,072	470,391

NOTE 5 - FUNDING POLICY

The Plan Sponsor makes annual contributions to the Plan so that all employees' benefits will be fully provided for by the time they retire. The Plan met the minimum funding requirements of ERISA for 2010 and 2009. The Plan Sponsor authorized a contribution to the Plan of \$350,000 in 2010 (\$185,000 in 2009). Contributions are intended to cover the aggregate of normal cost and interest plus an amount necessary to amortize the unfunded frozen initial liability over 20 years.

NOTE 6 - PLAN TERMINATION

The Plan Sponsor intends to continue the Plan indefinitely but reserves the right to end or amend it. In the event the Plan is terminated, a participant's accumulated plan benefits will be paid, subject to the availability of sufficient assets of the Plan and level of benefits guaranteed by the Pension Benefit Guarantee Corporation (PBGC) at the time. The priority of benefit payments will be determined by the Plan document and ERISA.

NOTE 7 - INCOME TAX STATUS

The Plan adopted a standardized form of a prototype plan sponsored by the Principal Life Insurance Company. The prototype plan has received an opinion letter dated March 25, 2002 from the Internal Revenue Service as to the prototype plan's qualified status. The prototype plan opinion letter has been relied upon by this Plan. The Plan administrator believes the Plan is designed and is being operated in compliance with the applicable provisions of the Internal Revenue Code.

The Plan administrator evaluated the Plan's tax positions and concluded that there are no uncertain tax positions that require recognition or disclosure in the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by tax authorities for years before 2007.

NOTE 8 - TRANSACTIONS WITH PARTIES-IN-INTEREST

Investment custodian fees incurred by the Plan amounted to \$25,075 and \$40,975 for the years ended December 31, 2010 and 2009, respectively.

NOTE 9 - RISKS AND UNCERTAINTIES

The Plan may invest in various types of investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of the investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for plan benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE 10 - FAIR VALUE MEASUREMENTS

The Plan has determined the fair value of certain assets and liabilities through application of accounting guidance that establishes a framework for measuring fair values.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Standards require the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, standards establish a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

Pooled separate accounts: Level 2 assets are valued at the unit value as reported to the Plan by the trustee, which represents the fair value of the units held by the Plan. Level 3 assets are valued based on unobservable inputs used for valuing the assets. Unobservable inputs are those that reflect the Plan's own assumptions about the assumptions that market participants would use in pricing the asset. This data is based on the best information available in the circumstances and, therefore, relies on significant judgment in determining the fair value assigned to such assets. For real estate, an independent appraisal is performed annually by an appraiser selected by the Plan's third-party administrator.

Money market funds and U.S. government securities: Valued at the closing price reported on the active market on which the individual securities are traded.

NOTE 10 - FAIR VALUE MEASUREMENTS (CONTINUED)

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2010 and 2009:

The Plan has corrected the presentation of certain pooled separate accounts for U.S. properties within the Plan's investment fair value classification disclosure for 2009. These investments, which were valued at \$174,819, were previously presented as Level 2 investments and have now been presented as Level 3 investments. Furthermore, these investments were originally misclassified as part of Fixed income funds rather than separately as U.S. properties.

The following table reconciles the fair value measurements of Plan assets using significant unobservable inputs (level 3) for the years ended December 31, 2010 and 2009.

Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

NOTE 13 - RECENT ACCOUNTING PRONOUNCEMENTS

Fair Value Measurements and Disclosures

In 2010, the Financial Accounting Standards Board ("FASB") issued authoritative guidance expanding disclosures related to fair value measurements including (i) the amounts of significant transfers of assets or liabilities between Levels 1 and 2 of the fair value hierarchy and the reasons for the transfers, (ii) the reasons for transfers of assets or liabilities in or out of Level 3 of the fair value hierarchy, with significant transfers disclosed separately, (iii) the policy for determining when transfers between levels of the fair value hierarchy are recognized and (iv) for recurring fair value measurements of assets and liabilities in Level 3 of the fair value hierarchy, a gross presentation of information about purchases, sales, issuances and settlements. The new guidance further clarifies that (i) fair value measurement disclosures should be provided for each class of assets and liabilities (rather than major category), which would generally be a subset of assets or liabilities within a line item in the statement of financial position and (ii) disclosures should be provided about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for each class of assets and liabilities included in Levels 2 and 3 of the fair value hierarchy. The disclosures related to the gross presentation of purchases, sales, issuances and settlements of assets and liabilities included in Level 3 of the fair value hierarchy will be required beginning January 1, 2011. The remaining disclosure requirements and clarifications made by the new guidance became effective on January 1, 2010. The adoption of this accounting standard had no impact on the Plan's statement of net assets available for benefits or statement of changes in net assets available for benefits as it only amends required disclosures.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
JACKSON TUBE SERVICE, INC. RETIREMENT PLAN
EIN 310811394 Plan No. 001

Assumptions Prescribed by Law	
Mortality	<u>During Benefit Payment Period</u> IRS Prescribed Mortality-Optional Combined Table for Small Plans, male and female. <u>Before Benefit Payment Period</u> IRS Prescribed Mortality-Optional Combined Table for Small Plans, male and female.
Assumptions Selected by Actuary	
Retirement Age	Normal Retirement Age as defined in Plan Provisions
Expected Expense	\$40,975 included in Target Normal Cost.
Disability	1987 Commissioner's Group Disability Table, six month elimination period, male and female.
Marriage	75% married; husbands are 3 years older than wives.
Withdrawal	2003 Society of Actuaries Small Plan Age Table, multiplied by 0.75.
Form of Benefit and Basis	100% of active participants will elect a benefit paid in a lump sum at the assumed retirement ages based on the applicable mortality and the plan's funding target interest rates. Participants who are already terminated on the valuation date are assumed to receive their benefit on the normal form at the assumed retirement age.
Methods Prescribed by Law	
Liability Measure	Funding target is the present value of the benefits accrued on the valuation date. Target Normal Cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Benefit Accrual	All benefits paid at decrement are considered in total and then split to determine how much is included in Funding Target. The following pieces are included in the Funding Target. • The portion based on the plan's definition of accrued benefit. • The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement. The benefits included in Target Normal Cost are calculated similarly, by splitting the benefits. The Target Normal Cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.

Methods Selected by Plan Sponsor	
Asset Measure	The asset valuation method is prescribed by law for plans that elect to use a value other than market value. For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years. The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the Maximum Allowable Rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value. When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.
Segment Rates	24 month average with no weighting to prior law basis. Use rates where August is the last month included in the average.
PBGC Premium Basis	Premiums are calculated using the funding target rates used for the plan year. This method was elected with the 01/01/2009 plan year and must continue for five years before a change can be made.
Methods Elected by Actuary	
Retirees	Assets and liabilities for current and future retirees are included.
HCE Benefit Payment Restrictions	A ratio of the market value of assets and funding target is used to determine if restrictions apply. Assets and Funding Target are as of the valuation date and are reduced by: • any retiree benefit index or floor • amounts for HCEs who were previously restricted • an amount for the retiring HCE
Vested Benefits	A benefit is included in vested benefits when the participant will meet age and service eligibility requirements at the decrement age. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date. The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, and pre-retirement death benefits in excess of the Survivor Annuity Death Benefit except as noted in the Plan Provisions.
