For the year ended December 31, 2009, the Company contributed a matching contribution equal to 100% of the employee's contribution, subject to a maximum matching contribution equal to 5% of the employee's compensation. This matching contribution remained in effect until the end of the pay period ended March 27, 2009. From that point, the Company contributed a matching contribution equal to 40% of the employee's contribution on the first 5% of an employee deferral. While there is an option in the plan for an additional discretionary contribution, no discretionary amounts were contributed during 2010 and 2009. Employer matching contributions are also invested at the direction of participants. The amount of the Company matching contribution is subject to change on an annual basis at the discretion of the Company's Board of Directors.

Participant Accounts

Each participant's account is credited with the participant's contribution and allocation of (a) the Company's contribution and (b) Plan earnings, and charged with an allocation of administrative expenses. The value of participant's accounts is updated each business day to reflect any contributions, exchanges between investment options, and investment earnings and losses.

Vesting

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the Company contributions portion of participant accounts is based on years of continuous service. A participant is 100% vested in Company contributions 1) after 3 years of service, 2) at normal retirement date, 3) at early retirement date, 4) upon total and permanent disability, or 5) if death occurs while a participant is still employed by the Company.

Payment of Benefits

On termination of service due to death, disability or retirement, a participant may elect to receive an amount equal to the value of the participant's vested interest in a lump-sum amount. For termination of service due to other reasons, a participant may receive the value of the vested interest in his or her account as a lump sum distribution.

NOTE 1 — DESCRIPTION OF PLAN (Continued)

Forfeitures

At December 31, 2010 and 2009 forfeited non-vested accounts totaled approximately $26,000 and $21,600, respectively. These accounts are first used to pay administrative expenses of the Plan, and then used to reduce the matching contributions of the employer.

NOTE 2 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Estimates

The preparation of financial statements in accordance with generally accepted accounting principles requires the Plan Administrator to make estimates and assumptions that affect the reported amount of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Accordingly, actual results could differ from those estimates.

Investments

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Participants may change their investment options daily.

Payment of Benefits

Benefits are recorded when paid.

Administrative Expenses

All administrative expenses except those related to investment transactions are paid by the Plan Sponsor.

Subsequent Events

In preparing these financial statements the Company has evaluated events and transactions for potential recognition through September 27, 2011, the date the financial statements were available for issuance.

NOTE 4 — FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board (FASB) Accounting Standards Codification ASC 820-10 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1 – inputs are based upon unadjusted quoted prices for identical instruments traded in active markets.
- Level 2 – inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 – inputs are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability. The fair values are therefore determined using model-based techniques that include option pricing models, discounted cash flow models, and similar techniques.

NOTE 4 — FAIR VALUE MEASUREMENTS (Continued)

The asset or liability's fair value measurement within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The Plan's investments are valued as follows:

Mutual funds: Valued at the net asset value (NAV) of shares held by the plan at year end.

Common / Collective Trusts: The Plan's interest in the common / collective trusts is valued based on the net asset value reported by the trustee of the funds.

Common collective trust funds are stated at fair value as determined by the issuer of the funds based on the fair market value of the underlying investments. Common collective trust funds with underlying investments in investment contracts are valued at the fair market value of the underlying investments and then adjusted by the issuer to contract value. Fair value approximates contract value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2010 and 2009:

	Assets at Fair Value as of December 31, 2010			
	Level 1	Level 2	Level 3	Total

NOTE 5 — TAX STATUS

The Plan is a non-standardized prototype plan sponsored by Milliman USA, Inc., which received notification from the United States Treasury Department on November 27, 2001 that the Plan is qualified under Internal Revenue Code (IRC) Section 401(a) and the Trust is exempt from Federal income taxes under the provisions of IRC Section 501(a). The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable provisions of the IRC.

NOTE 6 — PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants will become 100 percent vested in their employer contributions.

NOTE 7 — TRUSTEE CERTIFICATIONS

The following information included in the accompanying financial statements and supplemental schedule was obtained from data that has been prepared and certified as complete and accurate by the Trustee.

	2010	2009
Investments at fair value :		
Mutual funds and common collective trusts	$27,126,263	$25,065,133
Investment income	$ 3,046,201	$ 4,346,515

NOTE 8 — RISKS AND UNCERTAINTIES

The Plan provides for various investment options in a variety of investment securities. Investment securities are exposed to various risks, such as interest rate risk, financial market risk and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amount reported in the statement of net assets available for benefits.
