Independent Auditors' Report

To the Plan Administrator of ASC Tucson Production and Maintenance Employees Pension Plan:

We were engaged to audit the accompanying statements of net assets available for benefits of the ASC Tucson Production and Maintenance Employees Pension Plan (the "Plan") as of December 31, 2010 and 2009, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 5, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of December 31, 2010 and 2009, and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information in the Plan's financial statements that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

ASC Tucson Production and Maintenance Employees Pension Plan

Notes to Financial Statements

1. DESCRIPTION OF THE PLAN

The following description of the ASC Tucson Production and Maintenance Employees Pension Plan (the “Plan”) is provided for general information purposes only. Participants and all others should refer to the Plan document for a more complete description of the Plan’s provisions.

General

The Plan is a noncontributory defined benefit pension plan covering substantially all hourly rated employees of Air Systems Components (“ASC Tucson”) and Hart & Cooley, Inc. who are members of the collective bargaining unit (Local Union No. 548 of the Sheet Metal Workers International Association) at the Tucson, Arizona plant of Tomkins Industries, Inc. (the “Company”). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

Effective January 1, 2005, Hart & Cooley, Inc. became a participating employer, covering the Union employees at the Tucson, Arizona plant. ASC Tucson Plan participants who transferred to Hart & Cooley continued their participation in the Plan. Hart & Cooley, Inc. Union employees voted March 29, 2006 to cease future benefit accruals effective May 31, 2006. Effective May 31, 2006, Hart & Cooley ceased to be a participating employer in the Plan. Hart & Cooley employees no longer accrue further benefits under this Plan. However, participants will continue to receive vesting credit for service with Hart & Cooley at the Tucson, Arizona plant. Effective May 31, 2007, ASC Tucson employees ceased to accrue additional benefits under the Plan, but will continue to receive vesting credit for service with ASC Tucson at the Tucson, Arizona plant.

On September 24, 2010, Tomkins Acquisitions Limited (formerly Pinafore Acquisitions Limited), acquired the entire issued ordinary share capital of Tomkins plc, the parent company of the Company. Tomkins plc was re-registered as a private company and its name was changed to Tomkins Limited. No changes have been made to the Plan as a result of the acquisition.

The Tomkins North American Retirement Board (the “Plan Administrator”) administers the Plan. The Plan Administrator has full power, authority and responsibility to control and manage the operations and administration of the Plan. The Northern Trust Company (“Northern Trust” or “Trustee”) was appointed by the Plan Administrator as trustee for certain qualified defined benefit pension plans for the Company and Tomkins Industries, Inc. (“Tomkins”).

A single trust agreement, The Tomkins US Master Trust for Defined Benefit Plans (“Master Trust”) Agreement, governs the assets of the plans from Tomkins, the Company and their affiliates, (collectively, the “Participating Plans”).

1. DESCRIPTION OF THE PLAN (CONTINUED)

Eligibility

Each employee, as described above, was eligible to enter the Plan upon meeting the eligibility requirements of 1 full year of service with at least 1,000 hours in a plan year and at least 12 months had passed since their first hour of service.

Vesting

Full vesting occurs when a participant has 5 years of credited service, attains age 65, retires as a result of disability or dies.

Pension Benefits

Normal monthly payments, which begin at age 65 are equal to the participant's years of credited service multiplied by an amount stipulated in the collective bargaining agreement as follows:

Date of Retirement or Termination	Benefit Rate
Certain other rates applied prior to February 1, 1995	
February 1, 1995 – February 1, 1996	\$ 7.00
February 1, 1996 – January 31, 2000	\$ 8.00
After January 31, 2000	\$ 9.00

Participants may elect to receive their pension benefits in the form of a joint and survivor annuity, life annuity with five years certain or certain other distribution forms as allowed by the Plan document. After attaining age 55 and 15 years of service, participants may also elect early retirement.

Internal Revenue Service ("IRS") regulations allow qualified plans to distribute to previously terminated participants, without their consent, the present value of any accrued benefit up to \$1,000. With a participant's consent, the present value of any accrued benefit of up to \$5,000 can be distributed.

Forfeitures

Non-vested amounts attributable to terminated participants are forfeited and shall be used to reduce the contributions from the Company.

1. DESCRIPTION OF THE PLAN (CONTINUED)

Death and Disability Benefits

In the event of an active employee's death with at least five years of service, a death benefit of \$1,000 is paid to the participant's surviving beneficiary.

Participants with 15 years of service are eligible for reduced retirement benefits if they become permanently disabled while a covered employee.

Tax Status

The IRS has determined and informed the plan sponsor by a letter dated July 22, 2004, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). Although the Plan has been amended since receiving the determination letter, the Plan Administrator believes the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, they believe that the Plan is qualified and the related trust tax exempt thus, no provision for income taxes is included in the accompanying financial statements. The Company filed a Determination Letter Application with the IRS on January 31, 2008 for the Plan. This request for determination is still pending with the IRS.

Accounting principles generally accepted in the United States of America ("GAAP") requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded as of December 31, 2010, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements have been prepared using the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires Plan management to make estimates and assumptions that affect the accompanying financial statements and accompanying notes. The most significant of these estimates relates to the determination of the accumulated plan benefits and the funded status of the Plan. Actual results could differ from those estimates and such differences could be material.

In addition, the Master Trust includes certain investments whose fair values have been estimated by the Trustee and Plan management in absence of readily determinable values. The information used to value these assets was the most current at the time of the valuation, and differences from the estimated value will be reported in future periods. See Note 6, *Interest in Tomkins US Master Trust* and Note 7, *Fair Value Measurements and Disclosures*, for further disclosure regarding investment valuation and fair value measurements.

New Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (“FASB”) issued additional guidance related to fair value measurements to clarify existing disclosure requirements and require additional disclosure about fair value measurements. The guidance clarifies existing fair value disclosures about the level of disaggregation presented and about inputs and valuation techniques used to measure fair value for measurements that fall in either Level 2 or Level 3 of the fair value hierarchy. The additional disclosure requirements include disclosure regarding the amounts and reasons for the significant transfers in and out of Level 1 and Level 2 of the fair value hierarchy and separate presentation of purchases, sales, issuances and settlements of items within Level 3 of the fair value hierarchy. The guidance is effective for periods beginning after December 15, 2009 except for the disclosures about Level 3 activity of purchases, sales, issuances and settlements, which is effective for interim and annual reporting periods beginning after December 15, 2010. Effective January 1, 2010, the Plan adopted the provisions of the additional guidance required to be adopted during 2010. Those provisions required to be adopted after December 15, 2010 are not expected to have a material impact on the Plan’s financial statements. These disclosures are required to be provided only on a prospective basis.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investment Valuation

The investment in the Master Trust in the accompanying financial statements represents the Plan's share of the Master Trust's net assets, which are valued at fair value, as further described in Note 7 – *Fair Value Measurements and Disclosures*. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As further described in Note 6, *Interest in Tomkins US Master Trust*, the Plan's share of the income (loss), net appreciation (depreciation) in fair value of investments and expenses of the Master Trust represents the Plan's allocation of these items from the Master Trust.

Concentration of Investments and Risks and Uncertainties

The Plan provides for various investments through the Master Trust. Investment securities, in general, are subject to various risks, such as interest rate, credit and overall market volatility risk. Additionally, the value, liquidity and related income of the investment securities are sensitive to changes in the economic conditions and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates. Certain investments (such as the insurance company pooled separate accounts and common/collective trusts) may be less liquid and include restrictions on their sale. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of such investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits and the funded status of the Plan.

As of December 31, 2010, approximately 66% of the Master Trust net assets were invested in the NTGI Collective Daily Russell 3000 Fund – Non-Lending ("Russell 3000"). A significant decline in the market value of the Russell 3000 would significantly affect the Master Trust net assets. See Note 7, *Fair Value Measurements and Disclosures*, for a brief description of the underlying assets of the Russell 3000. The Master Trust is also a significant investor in the Russell 3000.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the amounts reported in the financial statements and accompanying notes.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Concentration of Investments and Risks and Uncertainties (continued)

The Pension Protection Act of 2006, as amended by the Worker, Retiree and Employer Recovery Act of 2008, imposes certain benefit restrictions for qualified defined benefit plans that do not meet certain funding thresholds. Collectively bargained plans have a delayed effective date for application of the benefit restriction rules which is generally the earlier of (i) the end of an agreement ratified before January 1, 2008 and (ii) January 1, 2010. A plan's funded percentage is referred to as the Adjusted Funding Target Attainment Percentage (AFTAP). The 2010 AFTAP for the Plan is 80%. Because the Plan's AFTAP equals or exceeds 80%, the Plan is not subject to any benefit restrictions.

Administrative Expenses and Investment Management Fees

The Plan's operating, investment and administrative expenses are generally paid as provided for in the Plan document. Expenses for trustee fees and investment management fees are generally allocated; however, other fees such as actuarial, auditing and legal fees are specifically identified and charged to the Participating Plans. Other administrative functions are performed by employees of the Company or its subsidiaries at no cost to the Plan. All other costs not paid by the Plan are paid by the Company.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Subsequent Events

The Plan Administrator has evaluated subsequent events through October 10, 2011, which is the date the financial statements were available to be issued. No events or transactions discovered during this evaluation require recognition or disclosure in the financial statements.

3. FUNDING POLICY

The Company's policy is to make contributions to meet the minimum funding requirements under IRC 412. The contributions for 2010 and 2009, as detailed in the actuary's valuation reports, met the minimum funding requirements of ERISA and the IRC.

4. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service rendered by employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to employees or their beneficiaries upon retirement, death, disability, or termination. Benefits payable under all circumstances noted above are included in the computation of the actuarial present value of accumulated plan benefits to the extent they are deemed attributable to employee service rendered to the freeze dates or valuation date.

The actuarial present value of accumulated plan benefits is determined by an enrolled actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of benefit payments (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The effect of any Plan amendments on accumulated Plan benefits is recognized during the year in which such amendments become effective.

The significant actuarial assumptions used in the actuarial valuation as of December 31, 2009 are as follows:

Retirement age	Various probabilities from age 55 to 70
Mortality	UP94 Mortality Table for males and females projected eight years
Form of payment	Straight-life annuity with five years guaranteed
Discount rate	7.75% per annum, compounded annually

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as determined by the actuary as of December 31, 2009 is as follows:

Vested benefits:	
Participants currently receiving benefits	\$ 1,558,522
Other participants	1,725,789
Total vested benefits	3,284,311
Nonvested benefits	8,373
Total actuarial present value of accumulated plan benefits	\$ 3,292,684

4. ACCUMULATED PLAN BENEFITS (CONTINUED)

The changes in the actuarial present value of the Plan's accumulated plan benefits for the year ended December 31, 2009, are as follows:

Actuarial present value of accumulated plan benefits – January 1, 2009	\$ 3,098,199
Increase (decrease) during the year attributed to:	
Actual benefits paid	(197,537)
Decrease in the discount period	239,954
Actuarial loss	67,532
Change of assumption ^(a)	84,536
Net increase	194,485
Actuarial present value of accumulated plan benefits – December 31, 2009	\$ 3,292,684

(a) The full yield curve as of the October prior to the valuation year has been changed to the three-segment yield curve with a 24-month average as of the September prior to the valuation year. The discount rate changed to 7.75% from 8.00% used in the prior valuation.

5. INFORMATION CERTIFIED BY THE TRUSTEE

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election and as requested by the plan administrator, the following information has been certified by the Trustee and was not subjected to any auditing procedures performed by the Plan's independent auditors, except for comparing such information to the related investment information included in the financial statements:

- Investment in Tomkins US Master Trust as shown in the accompanying Statements of Net Assets Available for Benefits as of December 31, 2010 and 2009
- Plan's interest in net investment income of the Tomkins US Master Trust as shown in the accompanying Statements of Changes in Net Assets Available for Benefits for the years ended December 31, 2010 and 2009
- Investment information included in Notes 6 and 7.

6. INTEREST IN TOMKINS US MASTER TRUST (UNAUDITED)

The Plan Administrator implemented the Tomkins Master Trust Statement of Investment Policy, (the “Investment Policy”), a single investment policy that applies to all Participating Plans. Investments are managed under agreements by which the investment managers have been given the authority to make individual investment decisions within the guidelines stated in the Investment Policy. Therefore, the Plan’s portion of the net income (loss), net appreciation (depreciation) in fair value of investments and expenses of the Master Trust are determined on a pro-rata basis and measured monthly. Use of the Master Trust permits the commingling of the trust assets of a number of plans administered by the Retirement Board for investment and administrative purposes. At December 31, 2010 and 2009, the Plan’s interest in net assets of the Master Trust was approximately 0.71% and 0.70% respectively. Such interests are included in the accompanying Statements of Net Assets Available for Benefits. In compliance with the Department of Labor’s reporting requirements, the net change in value from participation in the Master Trust is reported as a single line item in the accompanying Statements of Changes in Net Assets Available for Benefits.

The investments of the Master Trust at December 31, 2010 and 2009 are summarized as follows:

	2010	2009

6. INTEREST IN TOMKINS US MASTER TRUST (UNAUDITED) (CONTINUED)

Derivative Financial Instruments, Interest Rate Swaps and Other

The Master Trust's fixed income manager uses derivative financial instruments in the normal course of its investing activities to hedge against adverse changes in the fixed income market and to achieve overall investment portfolio objectives. These financial instruments include fixed income interest rate swaps. Swap agreements involve the exchange by the Master Trust with a counter-party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments) with respect to a notional amount of principal. The Master Trust carries the fair value of the swap as an asset or liability in the Master Trust's net assets. Market risk of loss is limited to the changes in fair value from December 31 of each year presented, through the applicable expiration date. The average duration of the fixed income portfolio incorporating all long positions and interest rate swaps as of December 31, 2010 was 9.46 years. Swap agreements involve elements of credit, market risk or risk if the counter-party is unable to meet the terms of the contracts. Due to the nature of the Master Trust's investments, the Company does not believe credit risk is significant.

The following table provides a quantitative summary of derivative activity as of and for the years ended December 31, 2010 and 2009:

<i>Derivative Instruments</i>	Plan Year	Notional/ Contractual Amount ^(a)	Assets ^(b)	Liabilities ^(b)
Interest rate swaps	2010	\$ 282,200,000	\$ 2,883,686	\$ (4,477,807)

In addition, as a result of the Master Trust's participation in certain insurance company pooled separate accounts, those accounts may be invested from time to time in derivative financial instruments as defined and allowed by the bylaws of each of the respective accounts. Financial exposure to the Master Trust is limited to its proportional interest in these accounts.

The Master Trust has investments in insurance company pooled separate accounts and insurance company general accounts pursuant to certain guaranteed annuity contracts with various insurance companies. These contracts contain certain minimum balance requirements and certain restrictions on termination of the contracts. The minimum balance requirements were met as of December 31, 2010 and 2009. The Company does not intend to terminate these contracts at this time.

7. FAIR VALUE MEASUREMENTS AND DISCLOSURES

FASB Accounting Standards Codification ("ASC") Topic 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. This hierarchy consists of three broad levels that prioritize the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described as follows:

- Level 1-Inputs to the valuation based upon quoted prices (unadjusted) for identical assets or liabilities in active markets that are accessible as of the measurement date.
- Level 2-Inputs to the valuation include quoted prices in either markets that are not active, or in active markets for similar assets or liabilities, observable inputs other than quoted prices, and inputs that are derived principally from or corroborated by observable market data.
- Level 3-Inputs to the valuation that are unobservable reflecting the Plan's or Master Trust's own assumptions about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for investments measured at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

U.S. Government Securities: U.S. government securities are stated at fair value based on multiple pricing services, based on a bid evaluation process using observable, market-based inputs effective

7. FAIR VALUE MEASUREMENTS AND DISCLOSURES (CONTINUED)

the last day of the plan year or last reported sale or bid date if no sale took place on the last business day of the year and are classified as Level 1 investments.

Insurance Company Pooled Separate Accounts (PSAs): PSAs are valued at the net asset value as determined by the PSA's designated accountants. Agreements with the insurance company can include provisions containing certain minimum balance requirements. Net asset value is calculated based on the fair value of the underlying investments, which are generally traded in an active market; however, there is a lack of transparency in pricing. These investments are classified as Level 3 investments.

Common/Collective Trusts (CCTs): The investments include an equity index fund and a short-term investment fund. The equity index fund's primary objective is to approximate the risk and return characterized by the Russell 3000 Index. This index is commonly used to represent the broad U.S. equity market. The fund provides for daily redemptions at the reported unit value with one day advance notice requirement. CCTs are valued daily based on the fair values of the underlying investments in the CCT, which are generally traded in an active market and which represent the net asset value of the units held by the Plan at year end. The Master Trust was permitted to redeem investment units at net asset value as of the measurement date.

The units of the short-term investment fund are valued at the total value of the underlying investments less any liabilities divided by the outstanding units. The investment strategy is to maintain a \$1 unit value. The fund transacted at the \$1 unit value as of the measurement dates.

The CCT's are classified as Level 2 investments.

Insurance Company General Accounts: These investments are valued at fair value based on the contractual agreement between the Plan and the insurance company and typically include consideration of contractual interest rates, current interest rates and duration of the contract. There can be restrictions on the sale of such investments based on the terms of the contract, and these investments are classified as Level 3 investments.

Interest Rate Swap Contracts: The interest rate swap contracts are valued at fair value as determined by Northern Trust based on various comparative pricing services and the fair value represents the amount the Master Trust would receive or pay to terminate the agreement as of the measurement date, and these investments are classified as Level 2 investments.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different

methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Fair value, end of year	\$ 9,990,822	\$ 2,639,211

* Certain amounts in the prior year were broken out further to conform to the current year presentation.

The availability of observable market data is monitored to assess the appropriate classification of financial statements within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. For the years ended December 31, 2010 and 2009, there were no transfers in or out of levels 1, 2, or 3.

Notes to Financial Statements

8. PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right, under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan is terminated, the assets of the Plan will be allocated to Plan participants and beneficiaries in accordance with applicable provisions of ERISA and the Plan document. Should unfunded vested benefits exist, such benefits will be provided up to specified limitations as described in ERISA and by the Pension Benefit Guaranty Corporation (the “PBGC”).

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors’ pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan’s termination, subject to a statutory ceiling on the amount of an individual’s monthly benefit.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan’s net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Additional information regarding the priority of participants’ claims to the assets of the Plan upon termination and benefits guaranteed by the PBGC is available from the Plan Administrator.

9. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

A short-term investment fund and the NGTI Collective Daily Russell 3000 Fund – Non-Lending, which are included in the investments within the Master Trust, are managed by Northern Trust, the trustee. Certain expenses related to audit, custody, asset management and actuarial services are paid from Plan assets. These transactions qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules.

Schedule SB, Part V – Statement of Actuarial Assumptions and Methods

Asset Method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.69%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.75%, and the applicable limitation for the plan year, equal to 6.69%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.00%, and the applicable limitation for the plan year, equal to 6.38%. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Schedule SB, Part V – Statement of Actuarial Assumptions and Methods

Nature of Actuarial Calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are truncated to be consistent with the instructions for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Credited Service (Benefit Accrual)

The sum of (i) and (ii) below:

- (i) Past Service Credit is all service rendered by a participant while regularly employed by Lear Siegler prior to January 1, 1978, provided that no Past Service Credit shall be granted to any employee who was entitled to receive a vested benefit from the Sheet Metal Workers National Pension Fund (Plan B) on the date the Employer was acquired by Environmental Air Products.
- (ii) Future Service Credit is all service rendered by a participant after January 1, 1978 (January 1, 1982 for employees at the E. Ventura Plant).

Service is credited on the basis of one year for each calendar year during which the participant worked at least 1,800 hours, and one month for each 150 hours during any calendar year the participant worked less than 1,800 hours. Effective May 31, 2006 Credited Service is frozen for all Hart & Cooley active participants. Effective May 31, 2007 Credited Service is frozen for all ASC active participants.

Continuous Service (Eligibility and Vesting)

A participant will be credited with Continuous Service for each calendar year following his date of employment (not in excess of 10 years with Lear Siegler) in which he completes at least 1,000 hours of service.

Retirement Income

Normal: A monthly pension equal to \$9.00 multiplied by Credited Service not in excess of 25 years.

Early: The early retirement benefit is, at the participant's option, either a deferred benefit commencing at age 65 equal to the normal retirement benefit based on Credited Service at early retirement, or an immediate benefit equal to such deferred benefit, reduced by 1/2 of 1% for each complete calendar month by which such participant is under the age of 65.

Late: A monthly pension equal to the greater of:

- a A monthly pension determined as of the Normal Retirement Date; actuarially increased to the Late Retirement Date.
- b A monthly pension commencing on the participant's actual retirement date determined as of the Late Retirement Date.

Schedule SB, Part V – Schedule of Principal Plan Provisions

Vesting

Eligibility: A participant is 100% vested when he has completed at least 5 years of Continuous Service or attainment of his Normal Retirement Date while employed.

Benefit: A monthly retirement income commencing at his Normal Retirement Date equal to his accrued retirement income.

A former participant who is entitled to a vested deferred retirement benefit and terminated service with 15 or more years of Continuous Service may, on or after his attainment of age 55, elect to receive an immediate retirement benefit equal to the deferred benefit reduced by 1/2 of 1% for each complete calendar month by which such participant is under age 65.

Disability

Eligibility: Total and permanent disability as determined by the Committee, and after the completion of 15 years of Continuous Service and at least 5 years of Future Service Credit on the date of disability.

Benefit: The disability retirement benefit is equal to the early retirement benefit payable, based on the participant's age at disability, increased by 10%. If the participant is below age 55 at the time of disability, the benefit will be calculated assuming he had reached his 55th birthday on the date of disability. The disability retirement benefit shall not be greater than the retirement benefit the participant would receive if he was age 65 on the date of disability.

Normal Form of Payment

A monthly pension payable for life with 60 months guaranteed.

Death Benefit

a Lump Sum Death Benefit

The beneficiary of a participant who dies while in active service after the completion of five years of Future Service Credit will be entitled to a one time lump-sum payment of \$1,000.

b Surviving Spouse's Option Before Retirement

The retirement benefit payable to the spouse is equal to the retirement benefit which would have been payable to such spouse under the Plan's joint and 50% survivor benefit if the participant had retired on the earliest early retirement date following the date of death.
