Report of Independent Auditors

To the Plan Administrator of the
Tektronix, Inc. 401(k) Plan

We were engaged to audit the accompanying statements of net assets available for benefits of the Tektronix, Inc. 401(k) Plan as of January 5, 2010, and December 31, 2009 and 2008, and the related statement of changes in net assets available for benefits for the period ended January 5, 2010 and the year ended December 31, 2009, and the supplemental schedule of assets (held at end of year) as of December 31, 2009. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 3, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedule. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of January 5, 2010, and December 31, 2009 and 2008, and for the period ended January 5, 2010 and the year ended December 31, 2009, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the investment information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Tektronix, Inc. 401(k) Plan

Notes to Financial Statements (In Thousands)

1. Description of the Plan

The following description of the Tektronix 401(k) Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan Document for more complete information regarding the amount and type of benefits, vesting, and other provisions of the Plan.

General

The Plan is a defined contribution plan covering all regular employees of Tektronix, Inc. (the Company) or any of its participating companies. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions

Participants can elect to have Tektronix, Inc. contribute from 1% to 50% of their eligible pay to the Plan. Tektronix, Inc. makes a basic contribution of 2% of eligible pay for all participants plus a matching contribution of 100% of the first 4% of elective contributions. All employees eligible to participate in the Plan receive the basic 2% contribution regardless of their election to contribute to the Plan. The employee and employer contributions are allocated according to the participant's allocation election. If no employee allocation election is made, the employer basic 2% contribution is allocated to the moderate aggressive index fund. However, at any time, a participant may diversify out of the moderate aggressive index fund and direct the basic contribution into any of the other investment options. Contributions are subject to certain limitations.

Participant Accounts

Individual accounts are maintained for each Plan participant. Each participant account is credited with contributions, an allocation of the Plan's earnings/losses, and charged with withdrawals and certain administrative expenses. Contributions are allocated based on the participant's election and earnings/losses are allocated based on participant account balances. Participants may also contribute amounts representing distributions from other qualified plans.

Notes to Financial Statements (continued)

1. Description of the Plan (continued)

Participant Loans

The Plan allows for loans to active participants on such terms as the Investment and Administrative Committee approves. Participants may borrow from their accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of their account balance in all funds. The loans are secured by the balance in the participant's account and bear interest based on the prime rate as of the first business day of the month of origination plus 1%, with individual loan rates ranging from 4.25% to 10.5% at December 31, 2009. Principal and interest are repaid ratably through biweekly payroll deductions. Loan terms cannot exceed five years.

Plan Termination

The Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, Plan assets would be allocated among participants in proportion to their account balances.

Vesting and Benefits

Participants are immediately 100% vested in all contributions to the Plan and are eligible to receive benefits upon termination, retirement, or disability. Benefits can be received by electing a lump-sum settlement, installment payments, or a combination thereof. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Plan Merger

Effective January 5, 2010, the Plan merged into the Danaher Corporation & Subsidiaries Savings Plan (DSP) and the provisions of the DSP superseded the provisions of the Plan. December 28, 2009 was the last day participants were allowed to direct or diversify investments, obtain a loan, or request a distribution from the Plan. All assets were transferred to the DSP on January 5, 2010.

2. Significant Accounting Policies

Basis of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Valuation of Investments

The Plan's investments are presented at fair value, which has been determined based on the fair value of the underlying investments. When quoted market prices are not available, the fair value of investments is estimated primarily by independent investment brokerage firms and insurance companies.

Administrative Expenses

Reasonable and permissible expenses directly attributed to the administration and servicing of the Plan are charged to the Plan. Certain other materials and services for administration of the Plan, including facilities, equipment and supplies, and certain payroll expenses of administrative and clerical personnel, are provided by Tektronix, Inc. without charge to the Plan. Tektronix, Inc. also pays certain professional fees related to the Plan.

Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated July 22, 2003, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the Internal Revenue Service, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax exempt.

New Accounting Pronouncements

In April 2009, the Financial Accounting Standards Board (FASB) issued FASB Staff Position 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP 157-4). FSP 157-4 amended FASB Statement No. 157 (codified as ASC 820) to provide additional guidance on estimating fair value when the volume and level of activity for an asset or liability have significantly decreased in relation to its normal market activity. FSP 157-4 also provided additional guidance on circumstances that may indicate that a transaction is not orderly and on defining major categories of debt and equity securities to comply with the disclosure requirements of ASC 820. The Plan adopted the guidance in FSP 157-4 for the year ended December 31, 2009. Adoption of FSP 157-4 did not have a material effect on the Plan's net assets available for benefits or its changes in net assets available for benefits.

In May 2009, the FASB issued FASB Statement No. 165, *Subsequent Events*, which was codified into ASC 855, *Subsequent Events*, to provide general standards of accounting for and disclosure of events that occur after the balance sheet date, but before financial statements are issued or are available to be issued. ASC 855 was amended in February 2010. The Plan has adopted ASC 855, as amended.

In January 2010, the FASB issued Accounting Standards Update 2010-06, *Improving Disclosures about Fair Value Measurements*, (ASU 2010-06). ASU 2010-06 amended ASC 820 to clarify certain existing fair value disclosures and require a number of additional disclosures. The guidance in ASU 2010-06 clarified that disclosures should be presented separately for each "class" of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2 and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and

Tektronix, Inc. 401(k) Plan

Notes to Financial Statements (continued)

2. Significant Accounting Policies (continued)

liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the guidance in ASU 2010-06 becomes effective for reporting periods beginning after December 15, 2009. The Plan adopted the provisions of ASU 2010-06 on January 1, 2010, and those provisions did not have a material effect on the Plan's financial statements.

In October 2010, the FASB issued ASU 2010-26, *Reporting Loans to Participants by Defined Contribution Pension Plans*. Under ASU 2010-26, participant loans will be classified as notes receivable from participants in the benefit plan financial statements and measured at unpaid principal balance plus any accrued but unpaid interest. The guidance will result in a change in classification of the Plan's participant loans from plan investments within the statement of financial position. The guidance is effective for reporting periods beginning after December 15, 2010 and the Plan has elected to not early adopt the guidance.

3. Investments

The Plan was established by Tektronix, Inc. on January 1, 2008 when the Tektronix Master Retirement Trust was deunitized. Investment information disclosed in the accompanying financial statements was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the Trustee.

At December 31, 2009, the assets of the Plan are divided among 12 different funds. Plan participants can choose to invest their contributions and the employer matching contributions in any of these 12 funds. The funds available to participants in the Plan are as follows:

Stable Value Fund invests primarily in insurance company investment contracts.

Conservative Index Fund invests in a mix of 20% common stock and 80% fixed income securities.

Moderate Conservative Index Fund invests in a mix of 40% common stock and 60% fixed income securities.

Moderate Aggressive Index Fund invests in a mix of 60% common stock and 40% fixed income securities.

Tektronix, Inc. 401(k) Plan

Notes to Financial Statements (continued)

3. Investments (continued)

Aggressive Index Fund invests in a mix of 80% common stock and 20% fixed income securities.

Small/Mid Cap Growth Stock Fund invests primarily in the common stock of medium-sized companies.

Small/Mid Cap Value Stock Fund invests primarily in the common stock of companies within the Russell 2000 market capitalization range.

Large Cap Value Stock Fund invests primarily in the common stock of large companies that are evaluated by the investment managers to be below market value.

Large Cap Growth Stock Fund invests primarily in the common stock of large companies that are evaluated by the investment managers as having the potential to outperform the general market.

S&P 500 Stock Index Fund invests in common stocks of the S&P 500 index, made up of large U.S. companies.

International Stock Fund invests primarily in the common stock of companies traded outside of the United States.

Fixed Income Fund invests in fixed income securities of varying maturities.

In accordance with ASC 962 *Plan Accounting – Defined Contribution Pension Plans*, investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan.

The Plan invests in fully benefit-responsive investment contracts. These insurance contracts are comprised of the underlying investments, which are based on the fair value as determined by quoted market prices, and the benefit responsive wrappers, which are valued using the replacement cost method (see Note 7). As required by ASC 962, the statements of net assets

available for benefits present the fair value of the insurance contracts and the adjustment from fair value to contract value. The contract value of the insurance contracts represents contributions plus earnings, less participant withdrawals and administrative expenses.

Other than the fair value of the fully benefit-responsive investment contracts with insurance companies and the related adjustment from fair value to contract value for such investment contracts, all investment information disclosed in the accompanying financial statements and supplemental schedule including investments held at December 31, 2009 and 2008, and net appreciation in fair value of investments, interest and dividends for the period ended January 5, 2010 and year ended December 31, 2009, was obtained or derived from information provided to the plan administrator and certified as complete and accurate by the Northern Trust Company, the trustee of the Plan. The contract value of the guaranteed investment contracts was certified as complete and accurate by the trustee.

3. Investments (continued)

For the period ended January 5, 2010 and the year ended December 31, 2009, the Plan's investments (including gains and losses in investments bought and sold as well as held during the year) appreciated in fair value by \$4.8 million and \$101.5 million, respectively. The following summarizes the net realized and unrealized appreciation (depreciation) in the fair value of investments (in thousands):

	Period Ended January 5, 2010	Year Ended December 31, 2009
Corporate stock – preferred	\$ –	\$ 173

4. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under ASC 820 are described below:

- Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.
- Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:
 - Quoted prices for similar assets or liabilities in active markets;

4. Fair Value Measurements (continued)

- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Observable inputs other than quoted prices that are used in the valuation of the asset or liabilities (e.g., interest rate and yield curve quotes at commonly quoted intervals);
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity). Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measure in its entirety.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Noninterest-bearing cash and interest-bearing cash: Valued at cost in US dollars based on exchange rates as of December 31, 2009 and 2008, respectively.

Corporate debt, preferred stock, common stock, and registered investments: Valued at quoted prices in an active market, which represent the net asset value (NAV) of shares held by the Plan at year-end.

Common/collective trusts: The NAV of units held by the plan at year-end approximates fair value. Although the NAV of the common/collective trusts are not available in an active market, the fair value is approximated since the underlying investments are traded in an active market.

Tektronix, Inc. 401(k) Plan

Notes to Financial Statements (continued)

4. Fair Value Measurements (continued)

Investment contracts with insurance companies: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer (see Note 7). Although the investment contracts are not available in an active market, the fair value is approximated since the underlying investments are traded in an active market.

Participant loans: Valued at unpaid principal balance, which approximates fair value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2009 (in thousands):

5. Risks and Uncertainties

The Plan's assets consist primarily of financial instruments including cash, corporate debt, preferred stock, common stock, partnerships and joint ventures, common and collective trusts, registered investments, and insurance/investment contracts. The financial instruments may subject the Plan to concentrations of risk as, from time to time, balances in cash exceed amounts insured by the Federal Deposit Insurance Corporation, market values of debt securities are

5. Risks and Uncertainties (continued)

dependent on the ability of the issuer to honor its contractual commitments and changes in the interest rate environment, and investments in equity securities are subject to changes in market values of the stock. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

6. Related-Party Transactions

Certain Plan investments are shares of common and collective trust funds and registered investments managed by The Northern Trust Company. Certain administrative and investment expenses are paid by the Plan to The Northern Trust Company and Mercer Trust Company, which are included as administrative expenses on the Plan statement of changes in net assets. The Northern Trust Company is the trustee as defined by the Plan and Mercer Trust Company is the recordkeeper for the Plan; therefore, these transactions qualify as party-in-interest transactions.

7. Investment Contracts with Insurance Companies

Insurance Contracts

The Plan has several fully benefit-responsive investment contracts with insurance companies. The insurance companies maintain the contributions in a general account, which is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. As described in Note 3, the statement of net assets available for benefits as of December 31, 2009 and 2008 presents the fair value of the insurance contracts and the adjustment from fair value to contract value. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment in the fully benefit-responsive investment contract at contract value. Management believes that the occurrence of events that would cause the Plan to transact at less than contract value is not probable. These contracts are issued with a fixed crediting rate and a fixed maturity over the life of the contracts. The crediting interest rates are based on a formula agreed upon with the issuer. The contract crediting rates and average yields ranged from 2.039% to 4.467% as of December 31, 2009 and ranged from 2.769% to 4.603% as of December 31, 2008.

Tektronix, Inc. 401(k) Plan

Notes to Financial Statements (continued)

7. Investment Contracts with Insurance Companies (continued)

Synthetic Guaranteed Investment Contracts (GIC)

The Plan provides for internally managed stable value investment contracts which simulate the performance of a guaranteed investment contract through the issuer's guarantee of a specific interest rate (the wrapper contract) and a portfolio of financial instruments that are owned by the Plan. The synthetic GICs include underlying assets held in and owned by the Plan and utilize benefit-responsive wrapper contracts issued by various banks. The contracts provide that participants execute transactions at contract value. Contract value represents contributions made to the fund, plus earnings, less participant withdrawals. The interest rates are typically re-set monthly with a one-month look back for the portfolio statistics. The issuers guarantee a minimum 0% crediting rate although the wrap does not absorb any loss for credit defaults of the underlying portfolio. The gross crediting rate formula is typically: $\text{Credit Rate} = (\text{Market Value} / \text{Book Value}) ^ { (1 / \text{Weighted Average duration of the Portfolio}) } * (1 + \text{annualized dollar or duration weighted yield to maturity}) - 1$. The net crediting rate is equal to the gross crediting rate less the wrap fees. There are a number of factors that can influence the future crediting rates which may include, but are not limited to: portfolio cash flows, underlying portfolio performance, current market interest rates, duration posture, credit downgrades, the unexpected receipt of principal, and interest payments, extraordinary withdrawals and certain wrap contract terms. Certain events such as plan termination or plan merger initiated by the Plan Sponsor may limit the ability of the Plan to transact at contract value or may allow for the termination of the wrapper contracts at less than contract value. The Plan sponsor does not believe that any events that may limit the ability of the Plan to transact at contract value are probable. The spot yield to maturity of the portfolio ranged from 1.878 % to 3.615% for the year ended December 31, 2009.

The spot yield blended crediting rate of the book value of the portfolio ranged from 1.702% to 2.984% for the year ended December 31, 2009 and ranged from 2.652% to 4.911% for the year ended December 31, 2008.

8. Reconciliation of Financial Statements to Form 5500

The accompanying financial statements present fully benefit-responsive investment contracts at contract value. The Form 5500 requires fully benefit-responsive contracts to be reported at fair value. Therefore, the adjustment from contract value to fair value for fully benefit-responsive contracts represents a reconciling item.
