Report of Independent Certified Public Accountants

To the Plan Administrator,
Georgia-Pacific Retirement Plan for Consumer Products and Packaging Employees:

We were engaged to audit the financial statements of **Georgia-Pacific Retirement Plan for Consumer Products and Packaging Employees** (the Plan) as of December 31, 2010 and 2009, and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 3, which was certified by Bank of New York Mellon/BNY Mellon, N.A., the trustee of the Plan, except for comparing the information with the related information included in the financial statements. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2010 and 2009, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America as established by the American Institute of Certified Public Accountants and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to financial statements

1 Description of the Plan

The following description of the Georgia-Pacific Retirement Plan for Consumer Products and Packaging Employees (the Plan) provides only general information. Participants should refer to the Plan document for more complete information.

General

The Plan is a noncontributory defined benefit plan, established to provide retirement, death, and disability benefits. The Plan covers certain hourly non-union employees of Georgia-Pacific LLC, a Delaware limited liability company, and its affiliates (the Employer or Company) and certain hourly employees covered by collective bargaining agreements, as described by the appendices and exhibits to the Plan document. Each eligible employee, as defined by the Plan document, shall become a participant on the first day on which the participant is credited with one hour of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

State Street Bank and Trust Company (State Street) was the trustee of the Plan through December 31, 2008. Effective January 1, 2009, the Plan administrator amended and restated the Plan and appointed Bank of New York Mellon/BNY Mellon, N.A., as the trustee. Also effective January 1, 2009, the Plan administrator transferred all investment assets of the Plan from the Georgia-Pacific LLC Master Trust for Employee Benefit Plans (Georgia-Pacific Master Trust) into the Koch Industries, Inc. Defined Benefit Master Trust (Koch Industries Master Trust).

All assets and liabilities of the Plan were transferred to the Georgia-Pacific LLC Hourly-Rated Pension Plan on December 31, 2010. Each participant of the Plan became a participant in the Georgia-Pacific LLC Hourly-Rated Pension Plan on that date.

Funding Policy

The Company makes contributions to the Plan based on the funding recommendations of the Plan's independent consulting actuary to meet the minimum requirements under ERISA. The Plan was in compliance with applicable ERISA funding requirements for 2010 and 2009.

Vesting

Participants become vested after accumulating five years of vesting service, upon reaching age 65 or the date determined by the various locations as outlined in individual schedule exhibits to the Plan document.

Pension Benefits

The Plan provides benefits to participating employees upon normal or early retirement, upon termination of employment if eligible for a deferred vested benefit, upon disability if eligible for a disability benefit, and upon death if eligible for a pre-retirement spouse's benefit.

The normal retirement benefit is payable at age 65, unless otherwise specified in the specific schedule to the Plan document. As determined by the Plan document, there are three basic types of benefit formulas: (i) a flat dollar benefit times service formula, (ii) a final average pay formula, which is not integrated with Social Security, and (iii) a final average pay formula, which is integrated with Social Security.

The early retirement benefit is based on either the participant's final pay (if the formula is pay-related) or the benefit level (if the formula is a flat dollar formula) and service as of the termination date and is calculated under the same formula as the normal retirement benefit. Participants are eligible for early retirement at age 55 if they meet the service requirement. Benefits are reduced by various reduction schedules depending on the applicable schedule exhibit for commencement of benefit payments prior to age 65. Certain schedule exhibits to the Plan document may allow for unreduced early retirement benefits prior to age 65.

A participant who terminates employment prior to attaining eligibility for early retirement and who has met the vesting requirements is eligible for a deferred vested benefit. The benefit is the accrued normal retirement benefit and is reduced at commencement according to the applicable schedule to the Plan document.

The normal form of benefit is a life annuity. All other benefit forms are actuarially equivalent to the life annuity.

Disability Benefits

A participant who terminates employment due to a disability and has met the eligibility requirements under the Plan is entitled to a disability benefit. The benefit is the accrued normal retirement benefit commencing immediately with no reduction for commencement prior to age 65.

Death Benefits

A pre-retirement spouse's benefit is provided upon the death of vested participants. Certain schedule exhibits to the Plan document also provide for a lump sum postretirement death benefit.

2 Summary of Significant Accounting Policies

Basis of Presentation

The financial statements of the Plan are presented on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investment in the Koch Industries Master Trust is stated at fair value (Note 3). Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (Note 4).

Investments held by the master trust that are traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year. Investments in preferred stocks, preferred debt instruments, other debt securities, and cash equivalents are valued based on yields available on comparable securities. Investments in common trust funds are based on quoted redemption values on the last business day of the Plan year, as determined by the trustee of the Plan. Investments in limited partnerships are valued at appraised values at the end of the Plan year as reported by the partnerships' respective general partners and the trustee of the Plan. Appraised values are developed using various modeling techniques, including, but not limited to, the strong correlation of the underlying security to one or more broad-based securities market indices and/or other financial instruments. Other investments consist primarily of synthetic equity options that are indexed to specific equity market benchmarks and are valued based upon observable market data. Investments in derivative instruments are marked to market daily based on quoted prices or widely accepted models that use readily observable market parameters as their basis. Amounts owed or due on open derivative contracts are recorded as receivables or payables to the master trust. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Investment related expenses of the master trust, such as trustee and investment manager fees, are paid by the master trust and are netted against (added to) net investment gain (loss) from the master trust.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (Note 5) represent estimated future periodic payments, including lump-sum distributions, to be made in accordance with the Plan's provisions with respect to service which employees have rendered to the valuation date. It includes benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and represents the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Significant actuarial assumptions and the method underlying the actuarial valuations as of December 31, 2009 are as follows:

Mortality	RP-2000 projected with Scale AA to 2010, no collar
Assumed rate of return on investments	8.50%
Average retirement age	61
Method	Standard unit credit cost method

These actuarial assumptions are based on the presumption that the benefits under the Plan will continue. Were benefits under the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Benefits Paid

Benefits are recorded in the year in which they are paid.

Expenses

Administrative expenses include PBGC premiums, record keeping, legal, and other administration fees directly incurred by the Plan.

Subsequent Events

The Plan administrator has evaluated subsequent events through October 7, 2011, the date the financial statements were available to be issued.

Recently Issued Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-06 – *Improving Disclosures about Fair Value Measurements*. ASU 2010-06 requires new disclosures on the amount and reason for transfers in and out of Level 1 and 2 recurring fair value measurements. The standard also requires disclosure of activities, on a gross basis, including purchases, sales, issuances, and settlements, in the reconciliation of Level 3 fair value recurring measurements. The standard clarifies existing disclosure requirements on levels of disaggregation and disclosures about inputs and valuation techniques. The new disclosures regarding Level 1 and 2 fair value measurements and clarification of existing disclosures are effective for periods beginning after December 15, 2009. Since the new standard only amends the disclosure requirements, its adoption did not impact the Plan's statement of net assets available for benefits or statement of changes in net assets available for benefits. The additional disclosures regarding the reconciliation of information in Level 3 recurring fair value measurements are required for periods beginning after December 15, 2010.

3 Financial Information of Master Trust

The Koch Industries Master Trust was established for the collective investment of the assets of participating employee benefit plans of Koch Industries, Inc. and certain of its subsidiaries. Fund assets are allocated among participating plans by assigning to each plan those transactions (primarily contributions, benefit payments, and specific administrative expenses) which can be specifically identified. Income and expenses resulting from the collective investment of the assets are allocated (on a monthly or daily basis) in proportion to the fair value of the assets assigned to each plan.

The assets of the Koch Industries Master Trust are accounted for on a units-of-participation basis. At December 31, 2010 and 2009, the Plan held 0 and 597,931,624 units of the Koch Industries Master Trust with an individual unit estimated fair value of \$1.000, respectively. The Plan's unit holdings at December 31, 2010 and 2009 had fair values of \$0 and \$597,931,624, respectively, which represented approximately 0% and 14.3% of the net assets of the Koch Industries Master Trust.

The trustee of the Plan has certified the completeness and accuracy of substantially all investments reflected in the accompanying statements of net assets available for benefits and substantially all of the related investment activity reflected in the statements of changes in net assets available for benefits of the Plan. The net assets of the Koch Industries Master Trust certified as complete and accurate by the trustee totaled \$4,701,751,628 and \$4,154,754,207 at December 31, 2010 and 2009, respectively. Net investment gain (loss) of the Koch Industries Master Trust certified as complete and accurate by the trustee totaled \$497,846,759 and \$668,013,251, and excluded \$45,187,649 and \$19,819,517 of net investment gain related to certain investments in limited partnerships and investment expenses for the years ended December 31, 2010 and 2009, respectively. The Plan's independent auditors have not audited investment information certified by the trustee of the Plan.

Net appreciation in fair value of investments	\$ 540,367,478	\$ 656,665,030

The Koch Industries Master Trust's overall strategy is to provide investment diversification to minimize risk and maximize long-term investment returns while maintaining sufficient liquidity. As a part of this strategy, the master trust holds certain investments that have redemption restrictions, future funding commitments, and other requirements that vary by individual investment. Redemption restrictions are generally short term with the exception of certain limited partnership investments, of which funds frequently cannot be withdrawn for the life of the investment. At December 31, 2010 and 2009, the Koch Industries Master Trust had noncancelable commitments to make future investments in certain limited partnerships totaling \$95,432,192 and \$145,097,732, respectively. The commitments mature at various dates designated by the respective fund agreements.

At December 31, 2010 and 2009, the Koch Industries Master Trust held \$432,193,973 and \$152,140,758, respectively, of collective trust funds managed by Bank of New York Mellon/BNY Mellon, N.A. In addition, fees paid by the Koch Industries Master Trust to the trustee, or an affiliate thereof, for trustee and investment management services approximated \$258,000 and \$649,000 for the years ended December 31, 2010 and 2009, respectively. Transactions with Bank of New York Mellon/BNY Mellon, N.A., qualify as party-in-interest transactions.

During 2010 and 2009 the Koch Industries Master Trust invested in a limited number of derivative financial instruments. Certain investment managers were allowed to use derivatives for such strategies as portfolio structuring, return enhancement, and hedging against deterioration of investment holdings from market and interest rate changes. Derivatives are also used as a hedge against foreign currency fluctuations. Derivative instruments included equity index, government and money market forwards and futures, credit default swaps, as well as interest rate swaps and options. The resulting fair value changes of derivative instruments were included in the net (depreciation) appreciation in fair value of investments. Derivative positions held at December 31, 2010 and 2009 were not material and the use of derivative instruments was not believed to materially increase the credit or market risk of the master trust's investments.

4 Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The valuation methods described in Note 2 may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. There have been no changes in the methodologies used at December 31, 2010 and 2009.

The following table sets forth by level, within the fair value hierarchy, a summary of the Koch Industries Master Trust's investment assets at fair value as of December 31, 2010.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Plan management evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2010, there were no significant transfers in or out of levels 1, 2 or 3.

6 Related-Party Transactions

Certain Plan investments are managed by the trustee and therefore, these transactions qualify as party-in-interest transactions.

7 Income Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated September 3, 2008, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (the Code). The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code.

8 Risks and Uncertainties

The Plan through the Koch Industries Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The Plan through the Koch Industries Master Trust invests in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income (loss) of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Georgia-Pacific LLC Retirement Plan for Consumer Products
and Packaging Employees
EIN: 93-0432081
Plan Number: 034

Aspect of Valuation	Old	New
Valuation Interest Rate	The full corporate yield curve for October 2008 (two-month lookback)	January 2010 applicable month IRS-prescribed 24-month average segment rates
Expenses	Assumed plan-related expenses added to normal cost were 0.16% of Market Value of Assets for 2009	Assumed plan-related expenses added to normal cost were \$1,800,000 in 2010

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

The valuation software used to produce the actuarial information submitted on the schedule is different than used for the previous valuation due to a change in both the enrolled actuary for the plan and the business organization providing actuarial services to the plan, and such change in software may be considered to be a method change. The new method is substantially the same as the method used by the prior enrolled actuary and is consistent with the description of the method contained in the prior actuarial valuation report and Schedule SB of Form 5500 (disregarding the effects of any changes that are automatically approved under the final IRC 430 regulations). The funding target and target normal cost (without regard to any adjustments for employee contributions and plan-related expenses) as determined for the prior plan year by the new enrolled actuary (using the actuarial assumptions of the prior enrolled actuary and disregarding the effects of any changes that are automatically approved under final IRC 430 regulations) are both within 5% of those values as determined by the prior enrolled actuary. Therefore the change in funding method receives automatic approval under IRS Announcement 2010-3.
