Report of Independent Auditors

The Goodrich Corporation
Benefit Design and Administration Committee
Goodrich Corporation Wage Employees' Pension Plan

We were engaged to audit the accompanying statements of net assets available for benefits of the Goodrich Corporation Wage Employees' Pension Plan as of December 31, 2010 and 2009, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 5, which was certified by the Bank of New York Mellon, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2010 and 2009, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the investment information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements

December 31, 2010 and 2009

1. Significant Accounting Policies

Basis of Accounting

The financial statements of Goodrich Corporation Employees' Pension Plan (Plan) are prepared on the accrual basis.

Reclassifications

Certain amounts in the prior year financial statement have been reclassified to conform to the current year presentation.

New Accounting Guidance Adopted in 2010

The Plan adopted a new accounting standard included in Accounting Standards Codification (ASC) 820, *Fair Value Measurement*, which provided guidance on how to determine the classes of assets and liabilities to be presented for disclosure purposes. The standard also requires the Plan to disclose the amount of and reasons for significant transfers between Level 1 and Level 2 of the fair value hierarchy and the reasons for any transfers in or out of Level 3 of the fair value hierarchy. The guidance clarifies certain existing disclosure requirements. See the "Valuation of Investments" section of this Note and Note 5, *Investments*, for these disclosures. Since this standard only affects fair value measurement disclosures, adoption did not affect the Plan's net assets available for benefits or its changes in net assets available for benefits.

New Accounting Guidance Not Yet Adopted

In May 2011, new accounting guidance was issued which will be included in ASC 820. This guidance amends the requirements for measuring fair value and disclosing information about fair value measurements and is effective for the Plan on January 1, 2012. Upon adoption, Goodrich Corporation (Company or Plan Sponsor) management does not currently expect this new guidance to have a material impact on the Plan's net assets available for benefits or its changes in net assets available for benefits. The Company will include the enhanced disclosures upon adoption.

Valuation of Investments

The Plan's interest in the Goodrich Corporation Master Trust for Qualified Employee Benefit Plans (Master Trust), a master investment trust administered by The Bank of New York Mellon (Trustee), is based on the value of participation units of the Master Trust as certified by the Trustee. Investments of the Master Trust are stated at fair value. The Plan's assets are presented at the fair value of the underlying value of the Master Trust investments. The fair value of the Plan's interest in investment income/loss and realized and unrealized appreciation/depreciation in the fair value of investments in the Master Trust was allocated to the Plan based on its percentage interest in the Master Trust. The underlying investments of the Master Trust are valued as follows:

Derivatives

Derivatives are primarily exchange-traded futures and forward contracts used to manage a portion of the interest rate and currency exposures. Leveraging and speculation are not permitted. Credit risk is not deemed to be significant because the derivative contracts are entered into with highly rated counterparties. Futures contracts are held within the fixed income portfolios to manage the interest rate exposure and adjust portfolio duration and are designed to offset 40% to 100% of the effects of interest rate changes on the Plan's funded status. Forward contracts are held within the international and Global Tactical Asset Allocation (GTAA) portfolios to manage the currency exposure in the Master Trust and to add value to total return related to investments in international securities denominated in currencies other than the U.S. dollar. No individual currency exposure can be targeted at a net short position. The maximum net exposure to any one of the major currencies is not permitted to exceed the percentage weight of that currency in the applicable benchmark plus 25% and any non-major currency is not permitted to exceed the percentage weight of that currency in the applicable benchmark plus 15%.

The derivative financial instruments are reflected at fair value using a market approach based on prices obtained from primary or secondary exchanges for exchange-traded derivatives or using proprietary pricing models which incorporate observable inputs including, but not limited to, volatility, index levels, interest rates, yield curves, prepayment speeds, default rates and other market-corroborated inputs. Realized gains and losses and changes in fair value of the derivative financial instruments are reflected currently in the net appreciation/depreciation of the Master Trust.

Commingled Funds (Applicable to Money Market, Equity, Fixed Income, Commodity, Securities Lending Collateral and Real Estate Investments)

The Master Trust invests in commingled funds that are institutional investment instruments valued at the fair value of the ownership interests in the funds. The Net Asset Value (NAV) per unit which is provided by the fund administrator is the primary input into the valuation of the ownership interest. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities, divided by the number of shares outstanding. Commingled investment funds generally are valued based upon the observability of the prices or inputs used to value the underlying portfolio instruments.

The underlying assets of the real estate investments are valued using unobservable inputs from the investment manager principally annual third party appraisals based on market, income or cost valuation techniques. Unobservable inputs include prices of sales of similar properties, estimates of operating income, discount rates and estimates of reproduction or replacements costs.

The underlying portfolio securities of the remaining commingled funds investments are money market, U.S. and non-U.S. equity, fixed income and commodity financial instruments. These instruments are valued using a market approach with either unadjusted quotes in active markets or quoted prices for similar assets or other observable inputs. The assets of the global tactical asset allocation (GTAA) that are invested in commingled funds are reported in the equity, fixed income or commodity commingled fund classifications, as applicable.

Certain of the Plan's commingled equity investments during 2010 and 2009 were subject to withdrawal limitations (see the "Global Equity Investments" section of Note 6, *Net Asset Value per Share*). This limitation did not impact the Plans' ability to generate sufficient liquidity to service ongoing needs from other Plan investments. The Company systematically moved assets out of the restricted fund to a fund with no withdrawal limitations and completed the transition in August 2010.

In addition to the NAV, consideration is given to any specific rights or obligations that pertain to investments in the commingled fund, which if deemed significant, may adjust the fair value of the ownership interest and result in a lower, less observable fair value hierarchy level. There are no significant specific rights or obligations pertaining to these commingled funds that require an adjustment to the fair value.

Equity

Individual equity securities, including, but not limited to common stock, real estate investment trusts (REITS), preferred stock, rights and warrants, are valued using a market approach primarily based on observable quoted prices obtained from the primary or secondary U.S. and international exchanges on which they are traded.

Fixed Income

U.S. Treasury bonds, bills and other obligations are valued using a market approach primarily based on prices obtained from the primary or secondary exchanges on which they are traded.

Government, corporate and asset and mortgage backed fixed income securities are valued either (1) based on market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, including consideration of yield or price of securities of comparable quality, coupon, maturity and type or (2) based on quotes from bankers, brokers, dealers or other qualified appraisers. Fair value is within a "bid-ask spread" and is considered to be the price at which the security would be exited. These securities are valued principally using a market approach, which may include matrix pricing to value securities on quoted prices combined with their relationships to other benchmark quoted securities and indices. Certain securities may be valued using an income approach based on cash flows and observable inputs such as discount rates, industry research reports, the value of underlying assets or guarantees and issue structure.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 4, *Accumulated Plan Benefits*) are those estimated future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to services rendered by covered employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on the employees' cumulative benefit service. The accumulated plan benefits for active employees are based on their accumulated service and average compensation, where applicable, preceding the valuation date. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

2. Description of the Plan

The Plan is a defined benefit plan that covers certain employees of the Company and certain of its subsidiaries and provides for retirement and survivor benefits. The Company contributes such amounts as are necessary to provide assets sufficient (see Note 3, *Funding Policy*) to meet the benefits to be paid to Plan participants.

The Company has the right under the Plan to discontinue such contributions at any time and terminate the Plan. In the event of a termination of the Plan, the net assets of the Plan will be distributed to the participants based on priorities established by the Employee Retirement Income Security Act of 1974 (ERISA), as amended. Generally, the net assets would be set aside first for the payment of vested benefits and then for the payment of accrued but nonvested benefits.

To the extent that assets were not available to pay these benefits, distributions would be made on a pro-rata basis; however, the Pension Benefit Guaranty Corporation (PBGC) guarantees the payment of all nonforfeitable basic benefits, subject to certain limitations prescribed by ERISA. Any amount of Plan assets remaining after the payment of all vested and nonvested benefits would be returned to the Company.

Additional information about the Plan, the vesting and benefit provisions provided by the Plan, and the PBGC's benefit guarantee is contained in the Summary Plan Description and Plan documents. Copies of these documents are available from the Company's human resource department.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

3. Funding Policy

The Company's funding policy is to contribute amounts at least sufficient to satisfy regulatory funding standards but which do not exceed the maximum tax deductible contribution limit. Effective January 1, 2008, the Pension Protection Act of 2006 (PPA) amended ERISA and significantly changed the rules used to determine minimum funding requirements for qualified defined benefit pension plans in the United States. The funding targets contained in the law are generally consistent with the Company's internal targets. The Plan's funding objectives include avoidance of benefit restrictions under the PPA, which begin if the Plan's Adjusted Funding Target Attainment Percentage (AFTAP) falls below 80%. Additionally, the Plan's funding objectives include avoidance of at-risk status designation of the Plan, which begins if (1) the Plan's AFTAP falls below 80% and (2) the Plan's AFTAP falls below 70% when using more conservative retirement assumptions prescribed by the PPA. As of January 1, 2010, the Company's independent actuary has certified the Plan's AFTAP was at 83.48% which was above these thresholds to avoid these restrictions.

Under the PPA, minimum funding requirements require an employer contribution to the Plan sufficient to fund the Plan's target normal cost (including administrative expenses) and if a plan's AFTAP falls below 96% for 2010, a seven year amortization of the funding shortfall. The Plan has met minimum funding requirements prescribed by ERISA as amended.

4. Accumulated Plan Benefits

The Company's independent actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The actuarial calculations were made using the accrued benefit cost method.

The accumulated plan benefit information for the Plan as of December 31, 2009 is as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:	
Participants currently receiving benefits	\$ 297,185,196
Other participants	186,803,449
	<u>483,988,645</u>
Nonvested benefits	1,707,127
Total accumulated plan benefits	<u><u>\$ 485,695,772</u></u>

The change in the actuarial present value of accumulated plan benefits during 2009 is accounted for as follows:

Actuarial present value, December 31, 2008	\$ 485,321,131
Increase due to:	
Benefits Accumulated	5,641,468
Decrease in discount period	40,766,392
Plan amendments	552,115
Decrease due to:	
Experience gain	(6,914,532)
Benefits paid	(39,670,802)
Actuarial present value, December 31, 2009	<u><u>\$ 485,695,772</u></u>

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

4. Accumulated Plan Benefits (continued)

Significant assumptions underlying the actuarial computations were as follows:

Interest rate	8.75%, net of expense
Salary scale	5.00%
Average retirement age	63
Mortality basis	RP 2000 Healthy Combined Mortality Table with projections using Scale AA phased out by 2015

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The decrease in accumulated plan benefits from experience gains was due primarily to (1) higher terminations than expected; (2) a decrease in compensation for those whose pension benefit formula considers compensation; and (3) foregone early retirement subsidies for those employees remaining active beyond their expected retirement. The change in the accumulated plan benefits from Plan amendments was due primarily to updated negotiated benefit levels for wage employees.

5. Investments

The Plan's investments are held by the Master Trust in a bank-administered trust fund which was established for the investment of assets of the Plan and other retirement plans sponsored by the Company. All investment information disclosed in the accompanying financial and notes, including investments held at December 31, 2010 and 2009, and net appreciation/depreciation in fair value of investments, interest and dividends, and administrative expenses paid by the Master Trust for the years ended December 31, 2010 and 2009, was obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by the Trustee.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

5. Investments (continued)

As of December 31, 2010 and 2009, the investment in the Master Trust represents the Plan's proportionate interest in the assets of the Master Trust. The Plan's investment in the Master Trust represented 24.5% and 24.8% of the total net assets of the Master Trust at December 31, 2010 and 2009, respectively.

The Company defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The following three levels of inputs are used to measure fair value:

Level 1 – quoted prices in active markets for identical assets and liabilities.

Level 2 – observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 – unobservable inputs in which there is little or no market data available, which require the Plan to develop its own assumptions.

6. Net Asset Value Per Share

The following is a summary of the Master Trust investments in commingled funds that use the NAV per ownership unit to estimate fair value for the years ended December 31, 2010 and 2009:

Money Market Assets – include demand and short-term notes, United States Treasury and other short-term government obligations, commercial paper and other money market instruments held in collective trusts. The funds aim to provide interest income while preserving a NAV of \$1 per share. Valuations may be suspended when the New York Stock Exchange (NYSE) or any relevant exchange is closed, when trading on the NYSE or relevant exchange is restricted or as permitted by an appropriate regulatory agency.

Global Equity Investments – include investments in equity securities held by collective trusts. The funds invest in U.S. equity securities that track the performance of the S&P 500® Index and non-U.S. equity securities that track the Morgan Stanley Capital Index (MSCI) Emerging Markets Index and the MSCI EAFE Index. Valuations may be suspended when the NYSE or any relevant exchange is closed, when trading on the NYSE or relevant exchange is restricted or as permitted by an appropriate regulatory agency. Certain of these investments imposed a 4% per month withdrawal limitation in March 2009 due to liquidity and valuation issues around investors' interests in the securities lending cash collateral pool held by the fund (see the "Commingled Funds" section of Note 1, *Significant Accounting Policies*).

GTAA – seeks to outperform a static mix of various asset classes and markets by investing in a variety of daily valued funds to tactically gain exposure to certain U.S. and international equity, fixed income and commodities markets, including the use of long and short positions in physical securities and derivatives. The portion of the GTAA assets that are invested in commingled funds may invest in funds of the Collective Trust of the Bank of New York, including the EB DV International Stock Index Fund, the EB DV All Country World Index (ACWI) ex-US Fund, the EB DV ACWI Fund, the EB DV Stock Index Fund, the EB DV Mid Cap Stock Index Fund, the EB Long-Term Government Bond Index Fund, the EB Long-term Credit Bond Index Fund, the EB DV Emerging Markets Stock Index Fund, the EB Temporary Investment Fund, the EB DV Small Cap Stock Index Fund, the EB DV Commodity Index Fund, the EB DV Commodity Alpha Fund and the EB DV Global Inflation-Linked Bond Index Fund. Valuations may be suspended when the NYSE or any relevant exchange is closed, when trading on the NYSE or relevant exchange is restricted, as permitted by an appropriate regulatory agency or when the manager deems suspension is consistent with orderly liquidation.

*The daily valued funds that the GTAA invests in have daily redemption frequency with a one-day notice period.

Fixed Income Assets – include investments in U.S. and non-U.S. debt securities, including obligations secured by mortgages or other interests in real property, held by collective trusts. Redemptions are subject to available cash and may be pro rated based on the fair market value of participants' relative interests in the total net asset value of the funds as of the valuation date. Valuations may be suspended when banks in New York City are authorized or required to be closed, when the NYSE or any relevant exchange is closed, when trading on the NYSE or relevant exchange is restricted, as permitted by an appropriate regulatory agency or when the manager deems suspension is consistent with orderly liquidation.

During 2009, and a portion of 2010, the Plan's real estate investments were subject to a redemption queue; however, this did not impact the Plan's ability to generate sufficient liquidity to service ongoing needs from other Plan investments. At December 31, 2010 there was no remaining redemption queue.

7. Income Tax Status

The Plan received a determination letter from the IRS dated July 17, 2002, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related Master Trust (see Note 5, *Investments*) is exempt from taxation. Subsequent to this determination by the Internal Revenue Service, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Benefit Design and Administration Committee and the Benefit Plan Asset Committee of the Plan Sponsor believe the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believe that the Plan, as amended, is qualified and the related Master Trust is tax-exempt.

The Company has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. Although the Plan is subject to routine audits by taxing jurisdictions, the Company believes it is no longer subject to U.S. federal examination for years prior to 2006, and with few exceptions, state and local examinations for years before 2000.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

8. Transactions With Parties in Interest

Certain legal and administrative expenses are paid by the Company. Administrative fees relating to accounting, actuarial, benefits administration and investment advisory services are paid by the Plan. In addition, the Plan pays certain legal fees related to the Plan design and administration. Other than as described above or pursuant to certain trust agreements (see Notes 1, *Significant Accounting Policies* and 5, *Investments*), the Plan does not have agreements or transactions with parties in interest.

9. Risks and Uncertainties

The Master Trust invests in various financial instruments, including derivatives which are used by the investment managers in the normal course of managing their respective strategies. Financial instruments, including derivative financial instruments, are exposed to various risks such as interest rate risk, credit risk, counter party risk, market risk arising from changes in the prices of portfolio financial instruments, foreign currency exchange rate risk and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and those such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

10. Securities Lending

In April 2006, the Master Trust entered into a securities lending agreement which authorizes the Trustee to engage in the lending of certain Master Trust assets. Securities lending is an investment management strategy that utilizes the existing securities (government bonds, corporate bonds or equities) of the Master Trust to earn additional income by loaning securities to a select group of approved broker-dealers. In return for the loaned securities, the Trustee simultaneously receives collateral in the form of cash or United States Treasury bills as a safeguard against possible default of any borrower on the return of the loan. Each security lending transaction is collateralized by a margin requirement, as specified in the terms of the securities borrowing agreements, from a minimum of 102% to a maximum of 105% of the fair value of the securities loaned plus accrued interest. The collateral is marked-to-market on a daily basis to maintain the margin requirement.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

10. Securities Lending (continued)

At December 31, 2010 and 2009, the Master Trust had securities on loan of \$63,895,004 and \$28,878,152, respectively, and debtors provided the Trustee with collateral totaling \$65,686,242 and \$29,757,157, respectively. Cash received by the Trustee is invested in money market securities by the Master Trust and accordingly, recorded at fair value in the financial statements with a corresponding obligation to repay the collateral in accordance with the securities borrowing agreements. There was no noncash collateral provided to the Master Trust at December 31, 2009. At December 31, 2010 there was both cash and U.S. treasury bills received as collateral. The income earned by the Master Trust under the securities lending program with the Trustee in 2010 and 2009 was \$122,068 and \$110,743, respectively.

Certain of the Plan's commingled investments also participate in securities lending activities on terms similar to those of the Master Trust securities lending agreement during 2009 and a portion of 2010. One of those investments imposed withdrawal limitations during 2009 due to liquidity and valuation issues around investors' interests in the securities lending cash collateral pool held by the fund (see the "Commingled Funds" section of Note 1, *Significant Accounting Policies*). The Plan had exited this restricted fund to a non securities lending fund with no withdrawal limitations by August 2010.

11. Subsequent Events

On September 21, 2011, the Company (Plan Sponsor) entered into an Agreement and Plan of Merger (Merger Agreement) with United Technologies Corporation (UTC). The Merger Agreement provides that, upon the terms and subject to the conditions set forth in the Merger Agreement, the Plan Sponsor will be acquired by UTC in a cash-for-stock transaction (Merger). The Company has agreed to various covenants in the Merger Agreement, including, among other things, to conduct its business in the ordinary course consistent with past practice during the period between the execution of the Merger Agreement and the time of the Merger.

The Plan is required to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the statement of net assets available for benefits. The Company has evaluated subsequent events through October 13, 2011, the date these financial statements were issued.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefit.
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of fair value, including contributions receivable.</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed value that reflect the underlying market value of plan assets but fluctuate less than market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits Not Valued	All benefits were valued except for benefits payable in the event of future reduction in force or plan shutdowns, the potential refund of employee contributions with interest upon death before retirement. For benefit provision with staggered effective dates, benefit level in effect at December 31, 2010 is recognized for funding. Towers Watson has reviewed the plan provisions with Goodrich and, based on that review, is not aware of any significant benefits required to be valued that were not.
Change in Assumptions and Methods Since Prior Valuation	<p>The funding interest rate was changed from the full corporate bond yield curve as of the third month prior to the valuation date (October), to 24-month average segment interest rates as of the fourth month prior to the valuation date (September), as provided under the Pension Protection Act of 2006 (PPA).</p> <p>The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements to comply with PPA requirements.</p> <p>Assumed Administrative expense for the Wage Plan increased from \$1.3M to \$1.6M.</p> <p>The assumed salary increases were changed from a flat 4.50% to age-related rates which average 4.00%.</p>

Monthly disability benefit	A monthly pension equal to the accrued normal pension at disability retirement.
----------------------------	---

Eligibility for Benefits

Normal retirement	Retirement on NRD.
-------------------	--------------------

Early retirement	Retirement before NRD and on or after both attaining age 60 and completing at least ten years of vesting service.
------------------	---

Postponed retirement	Retirement after NRD.
----------------------	-----------------------

Disability	Totally and permanently disabled prior to reaching age 65, after at least ten years of benefit service.
------------	---

Deferred vested	Termination for reasons other than disability, death or retirement after completing at least five years of vesting service.
-----------------	---

Pre-retirement spouse benefit	Death while eligible for normal, early, postponed or deferred vested retirement benefits having been married at least one year.
-------------------------------	---

Monthly Benefits Paid Upon the Following Events

Normal retirement	Monthly pension benefit determined as of NRD.
-------------------	---

Early retirement	Monthly pension benefit determined as of early retirement date, reduced 5/9 of 1% for each month of payment before age 65.
------------------	--

Postponed retirement	Monthly pension benefit determined as of actual retirement date.
----------------------	--

Disability	Monthly pension benefit determined as of disability date, payable on the first day of the month after at least 26 weeks have elapsed since disability began. In addition, a temporary benefit is payable in an amount equal to \$16.00 for each year of benefit service at retirement (not to exceed \$400). This temporary benefit shall not be payable for any month after the employee attains age 65 or becomes eligible for an unreduced Social Security benefit, whichever occurs first.
------------	--

When a disabled retiree reaches age 65 or the qualifying age for an unreduced Social Security benefit, he shall thereafter receive a normal retirement pension and shall no longer be considered to be on disability retirement.

Termination with deferred vested benefit	The normal retirement pension based on benefit service at date of termination payable at age 65. However, the employee may elect to commence benefits after reaching age 60 and before age 65, in which
--	---

event his monthly benefit would be reduced as for early retirement.

Death with pre-retirement spouse benefits	If an employee dies after attaining age 60 with ten years of benefit service, his spouse receives the spouse benefit assuming the employee had retired early and elected the 50% joint and survivor option the day before his death. If an employee dies before age 60, the benefit is calculated as if the employee terminated his employment on his date of death, survived to his earliest retirement date and elected the 50% joint and survivor option. Benefit is not paid before employee would have been age 60.
Normal form of payment	Life annuity if the participant has no spouse as of the date payments begin. If married, benefits are paid in the form of a 50% joint and survivor annuity.
Optional form of payment	Life annuity or 50% joint and survivor annuity. Actuarial equivalence for optional forms uses 1994 GAM (75% male/25% female) for participant mortality and 25% male/75% female for joint annuitant mortality, and an interest rate of 6%.
Maximum on benefits	All benefits for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code.
