Provision for Expenses

The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes. Expenses were subtracted from the Expected Return on Assets for ASC 715-30 expense purposes.

Fiscal Year

The 12-month period ending each December 31.

Asset Method

Funding: Market Value of Assets plus interest-adjusted accrued but unpaid contributions as of the valuation date, plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end-of-year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.

Employees Valued

Only participants as of the valuation date were valued.

January 1, 2010 Valuation
EIN/PN: 34-0130090/007

***Justification for
Changes in Actuarial
Assumptions***

The mortality and interest rates were mandated changes. The retirement and turnover rates were changed to better reflect plan experience and resulted in an increase in liability. Therefore, the plan did not need IRS approval to change assumptions
