Report of Independent Auditors

To the Participants and Administrator of
Anheuser-Busch Packaging Group
Hourly Employee Retirement Plan

In our opinion, the accompanying statements of net assets available for benefits as of December 31, 2010 and December 31, 2009 and the related statements of changes in net assets available for benefits for the years then ended present fairly, in all material respects, information regarding the net assets available for benefits of Anheuser-Busch Packaging Group Hourly Employee Retirement Plan (the "Plan") at December 31, 2010 and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Notes to Financial Statements

December 31, 2010 and 2009

1. Description of the Plan

The following brief description of the Anheuser-Busch Packaging Group Hourly Employee Retirement Plan (the Plan) is intended to give a general summary of its principal provisions. Participants should refer to the Plan Document for more complete information.

General

The Plan is a defined benefit plan which provided normal retirement, early retirement, disability and death benefits to regular hourly employees of the Metal Container Corporation, formerly the Anheuser-Busch Packaging Group (the Company) who were not covered by a collective bargaining agreement under which the Company were required to make contributions to another retirement plan and who have met certain service and age requirements at the following locations—Mira Loma, California Can Plant (formerly the Carson, California Can Plant); Gainesville, Florida Lid Plant; Riverside, California Lid Plant; Windsor, Colorado Can Plant; Oklahoma City, Oklahoma Lid Plant; Ft. Atkinson, Wisconsin Can Plant; Newburgh Can Plant; New Windsor, New York; Rome, Georgia Can Plant; Arnold, Missouri Can Plant; Jacksonville, Florida Can Plant; Columbus, Ohio Can Plant; Marion, Ohio Can Plant; Nashua, New Hampshire Can Plant; and Longhorn Glass Manufacturing, L.P.

The Plan also covered current and former full-time hourly employees of Anheuser-Busch Recycling Corporation not covered by a collective bargaining agreement under which the Company is required to make contributions to another retirement plan at the following currently participating and former locations - Cocoa, Florida Processing Plant, Haywood, California Processing Plant; and Charlotte, North Carolina Processing Plant. The Plan also covers former full-time hourly employees of Precision Printing and Packaging, Inc., and current full-time hourly employees of Eagle Packaging Inc. The Plan was established by the Company effective November 1, 1986. Employees do not contribute to the Plan.

The Plan was subject to the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Plan Administration

The Plan Administrator was the Company. State Street Bank and Trust Company, as sole trustee of the Plan, held all Plan assets and is responsible for benefit payments from the Anheuser-Busch Companies Master Trust (Master Trust) according to information submitted by the Plan Administrator.

Plan Contributions

The Company made contributions to the Plan to satisfy the minimum funding requirements as determined by the Plan's actuary (Note 4).

Plan Benefits

Under the Plan's provisions, each participant retiring at age 65 (normal retirement) was entitled to a Unit of Monthly Pension multiplied by the period of his/her credited service in years and completed fractions thereof, up to a maximum of 35 years. The Unit of Monthly Pension was \$58.00 for the following locations—Oklahoma City, Oklahoma; Riverside, California; Windsor, Colorado; New Windsor NY; Gainesville, Florida; Ft. Atkinson, Wisconsin; Rome, Georgia; and Mira Loma, California. The Unit of Monthly Pension was \$53.00 for employees of the Eagle Packaging, Inc. The Unit of Monthly Pension was \$42.00 for employees of Anheuser-Busch Recycling Co. The Unit of Monthly Pension was \$51.00 for employees of the Arnold, Missouri Can Plant. The Unit of

Monthly Pension was \$28.00 for employees of Precision Printing and Packaging. The Unit of Monthly Pension was \$48.50 for the following employees of Longhorn Glass Manufacturing, L.P.; Mold Support, Glass Specialists, Mix and Melt Technicians, Packaging and Trucker Specialists from January 1, 2010 through August 30, 2010 and \$49.50 from September 1, 2010 through December 31, 2010; \$49.50 for Furnace Technicians from January 1, 2010 through August 30, 2010 and \$50.50 from September 1, 2010 through December 31, 2010; and \$50.50 for Technical Service Specialists, Glass Technicians, Maintenance Journeyman and Mold Makers from January 1, 2010 through August 30, 2010 and \$51.50 from September 1, 2010 through December 31, 2010.

The Unit of Monthly Pension was \$23.75 for employees at the Marion, Ohio location, \$7.80 for employees at the Nashua, New Hampshire location, \$50.00 for employees at the Columbus, Ohio location and \$53.00 at the Jacksonville, Florida location.

Vesting service was used in determining eligibility for early retirement and disability benefits. Vesting service was the period of an individual's employment with any member of the controlled group measured in years and completed twelfths of a year or at least one thousand hours of service in a calendar year, depending on the specific location. Participants became fully vested after five years of vesting service.

Expenses of the Plan

Under the Master Trust agreement with the Trustee, the Company may have paid all expenses incurred in the administration of the Plan, including Trustee fees, but was not obligated to do so. Trustee expenses not paid by the Company were paid by the Master Trust and proportionately allocated to participating plans. All other expenses were paid by the Plan.

Plan Merger

The Plan was merged effective December 31, 2010 (Note 9). This merger will not affect the participants' pension benefits because the benefit provisions of the Plan will be incorporated into the merged pension plan.

2. Summary of Significant Accounting Policies

Basis of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting with the exception of benefit payments, which are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and the reported amounts of additions to and deductions from net assets during the reporting period. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are reported at fair value. See Note 6 for a discussion of fair value measurements.

Anheuser-Busch Packaging Group

Hourly Employee Retirement Plan

Notes to Financial Statements

December 31, 2010 and 2009

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in fair value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Risks and Uncertainties

Investment securities are exposed to various risks such as significant world events, interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the Statement of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Allocation of Assets

The assets of the Plan were invested in the Master Trust along with the assets of certain other retirement plans sponsored by the Company. The method of allocation utilized by the Plan was Equitable Share Accounting (ESA). ESA values each plan's participation in the Master Trust based on a percentage of the fair value of total Master Trust assets. ESA determines this applicable percentage using a weighted average based on cash flows of each individual plan. Earned income and realized and unrealized gains or losses are retained in the Master Trust and are allocated to participating plans by the Trustee, based on ESA.

3. Recent Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued guidance for improving disclosures about fair value measurements. The new guidance requires new disclosures for transfers in and out of Level 1 and 2 classifications and for more detail about the activity in Level 3 fair value measurements. The new guidance also clarifies previous disclosure requirements by increasing the level of disaggregation to the class level for investments and by requiring more disclosures about inputs and valuation techniques for fair value measurements in Level 2 and Level 3 investments. The disclosures required under this guidance for the current year are included in Note 6 and did not have a material impact on the Plan's financial statements.

4. Funding Policy

Pension contributions were funded by the Company. Annually, an independent actuary performed a valuation of the Plan and related trust fund to determine the status of the fund and the normal cost and contribution limits prescribed by ERISA. The methods of valuation employed by the actuary were the Traditional Unit Credit Method for liabilities and a smoothed value of assets. The Plan met the minimum funding requirements of ERISA, as determined by the independent actuary for the Plan years ended December 31, 2010 and 2009.

Anheuser-Busch Packaging Group
Hourly Employee Retirement Plan
Notes to Financial Statements
December 31, 2010 and 2009

The Company made a contribution to the Plan to maintain certain Plan funding levels as required by the Pension Protection Act of 2006.

Effective December 22, 2010, the Company elected funding relief under the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 for the 2009 Plan year, using the 15-year amortization method. This allows the Company to elect in any two Plan years from 2008 to 2011 extended amortization periods of the Plan year's losses. Electing to lengthen the amortization schedule for a given Plan year reduces that Plan year's minimum contribution requirement.

5. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on an employee's credited service. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered up to the valuation date.

The accumulated plan benefit obligation is determined by the Plan's independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. Significant actuarial assumptions used in the valuation as of January 1, 2010 and 2009 are as follows:

- Mortality - For 2010, RP-2000 Mortality Tables for males and females, with blue collar adjustment, projected to 2007 using Scale AA. For 2009, RP-2000 Mortality Tables for males and females, with blue collar adjustment, projected to 2005 using Scale AA
- Assumed rate of return (discount rate) - 7.5% per annum as of December 31, 2010 and 2009
- Retirement - According to a graded retirement schedule based on years of service and age
- Actuarial Cost Method - Traditional unit credit

The foregoing actuarial assumptions were based on the assumption that the plan will continue. Were the plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

6. Interest in Anheuser-Busch Companies Master Trust

At December 31, 2010 and 2009, the Plan's interest in the investments of the Master Trust was approximately 0.0% and 12.5%, respectively.

The following table presents the fair values of investments for the Master Trust at December 31, 2010 and 2009:

	<u>\$ 122,128,526</u>	<u>\$ 161,273,581</u>

Direct Financing Lease

A direct financing lease is a lease which (1) includes a bargain purchase option or transfers title to the lessee at the end of the lease, (2) provides for minimum lease payments, including guaranteed residual values, sufficient to recover 90% or more of the Master Trust's investment in leased property or (3) has noncancelable terms in excess of 75% of the useful lives of the property leased. Revenue from the direct financing lease is recognized over the lease term on the interest method, which results in a level rate of return on the net investment in the lease.

The components of the Master Trust's direct financing lease as of December 31, 2010 are as follows:

Future minimum rentals receivable	\$ 152,915,647
Unearned income to be recognized in future years	<u>(82,654,466)</u>
	70,261,181
Cumulative appreciation in fair value	<u>4,608,820</u>
Fair value of direct financing lease	<u>\$ 74,870,001</u>

Future minimum rentals receivable under the direct financing lease as of December 31, 2010 are as follows:

2011	\$ 6,282,919
2012	6,439,992
2013	6,600,991
2014	6,766,016
2015	6,935,167
Thereafter	<u>119,890,562</u>
	<u>\$ 152,915,647</u>

Fair Value Measurements

The Master Trust follows accounting rules that provide a framework for measuring fair value for all assets and liabilities that are measured and reported at fair value. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between

Anheuser-Busch Packaging Group

Hourly Employee Retirement Plan

Notes to Financial Statements

December 31, 2010 and 2009

market participants on the measurement date. Certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk or the risks inherent in the inputs to the valuation, were used in the valuation process. Inputs to valuation can be readily observable, market corroborated, or unobservable. Valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs were used. That framework also establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. All financial assets and liabilities carried at fair value were classified in one of the following three hierarchy levels:

- Level 1 Inputs based on quoted prices in active markets for identical assets or liabilities that the Master Trust has the ability to access at the reporting date.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Inputs to the valuation methodology include:
- Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability; and
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 Inputs to the valuation methodology that are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Common/Collective Trusts

Common collective trusts consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures.

The fair values of participation units held in the common/collective trusts are based on the net asset value (NAV) after adjustments to reflect all fund investments at fair value. The common/collective trusts generally permit redemptions daily. Certain common/collective trusts held by the Master Trust only allow redemptions on a weekly or bi-weekly basis. The fair values of the Plan's interest in the common/collective trusts are based on quoted market prices in active markets and securities and contracts are valued using observable inputs. The Master Trust is permitted to redeem investment units at NAV on the measurement date, and as a result, the investment is classified as a Level 2 asset in the fair value hierarchy.

Direct Financing Lease

Fair value is based on the fair value of the underlying properties. The properties are valued based on appraisals performed using a combination of the income approach and sales approach.

Short-Term Investments

Short-term investments are considered to be cash equivalents due to their short maturities, and are valued at cost, which approximates fair value.

Notes to Financial Statements

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth, by level within the fair value hierarchy, assets measured at fair value on a recurring basis as of December 31, 2010 and 2009:

7. Transactions With Parties-in-Interest

The Master Trust holds investments in the following State Street Bank and Trust Company funds. These investments are managed by State Street Bank and Trust Company, as Trustee. These transactions are allowable party-in-interest transactions under ERISA.

The SSGA Treasury Fund had a market value of \$14,494,364 and \$13,931,300 at December 31, 2010 and 2009, respectively. In 2010 the Master Trust purchased a total of \$216,590,627 and sold \$216,027,563 of the fund. In 2009 the Master Trust purchased a total of \$122,762,398 and sold \$272,049,666 of the fund.

The SSGA Provisional ACWI ex US Fund had a market value of \$227,221,051 and \$147,993,659 at December 31, 2010 and 2009, respectively. During 2010, the Master Trust purchased a total of \$206,958,962 and sold \$153,917,335 of the fund. In 2009, the Master Trust purchased a total of \$239,528,120 and sold \$268,131,062 of the fund.

The Master Trust also holds operating properties that are leased to the Company. The fair value of the properties at December 31, 2010 was \$74,870,001. The Master Trust received rental payments for the year ending December 31, 2010 of \$4,774,661. These transactions are allowable party-in-interest transactions under ERISA.

8. Income Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated November 21, 2003, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code. Therefore, the underlying trust of such a plan is exempt from federal income taxes under Section 501 of the Internal Revenue Code. The Plan has been amended since receiving the latest determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Anheuser-Busch Packaging Group
Hourly Employee Retirement Plan
Notes to Financial Statements
December 31, 2010 and 2009

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for Plan years prior to 2007.

9. Plan Merger

Effective as of the close of business on December 31, 2010, all assets and accumulated plan benefits of the Plan were merged into the Retirement Plan for Certain Agricultural, Brewery and Packaging Hourly Employees.

10. Subsequent Events

Effective April 30, 2011, the Plan is subject to certain restrictions relating to the payment of accelerated benefit payments. The restrictions apply to period certain options payments. These restrictions resulted from the Plan falling below certain funding levels as required by the Pension Protection Act of 2006.

Management has evaluated subsequent events through October 10, 2011, the date which the financial statements were available to be issued.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Asset method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.69%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.69%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.38%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Participant data

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by Anheuser-Busch.

At-Risk Calculations

Calculations of at-risk liability and normal cost reflect the statutory required assumptions regarding retirement or termination of employment. In addition, for at-risk calculations, the normal form of payment was assumed to be the most valuable option under the plan. All of the assumptions for at-risk calculations reflect the regular valuation assumptions.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are rounded to the nearest .01% to be consistent with the rounding specified for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Changes in assumptions and methods since last actuarial valuation

Other than the prescribed changes in mortality, the following assumptions have changed since last year:

1. The discount rate assumption was changed to the 3-segment rates (applicable month of September 2009, no transition) from the October 2008 full yield curve. Approval for this change is not required by the IRS.
2. The valuation software used to produce the actuarial information submitted in this report has been changed and the valuation methodology used has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to these changes in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
3. The amortization method has changed to reflect the 15-year amortization method for the 2010 plan year only in the funding relief provisions under Notice 2011-3 and the Preservation of Access to care for Medicare Beneficiaries and Pension Relief Act of 2010 (PRA) and the regulations there under.

The percentage changes in funding target, target normal cost and plan assets due to these changes in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
3. The amortization method has changed to reflect the 15-year amortization method for the 2010 plan year only in the funding relief provisions under Notice 2011-3 and the Preservation of Access to care for Medicare Beneficiaries and Pension Relief Act of 2010 (PRA) and the regulations there under.
