Schedule SB, line 25—Change in Funding Method

The funding valuation reflects the following method changes:

- A change in the interest rate basis from the full yield curve with a two-month lookback to segment rates with a four-month lookback.
- A change in the asset valuation method from using a two-year (three-point) smoothed value method to using the market value.

Note that these changes will affect the comparability of the funding valuation results for the 2010 plan year and the funding valuation results for prior plan years.

These changes have automatic approval under final regulations, Notice 2009-22 or other IRS guidance.

GENERAL

The Plans are defined benefit pension plans that cover eligible employees of Johnson Controls, Inc. and designated affiliates ("Company"). The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

The Plans are administered by the Employee Benefit Policy Committee appointed by the Company. Hewitt Associates LLC contracts to be responsible for plan administration and is the third-party administrator.

Plans included in the financial statements are as follows (Plan numbers indicate Master Trust account numbers, not Plan numbers filed with the Internal Revenue Service ("IRS")). Refer to Note 9 for a discussion of Plan mergers occurring at December 31, 2009.

VESTING

One year of vesting service is credited each year a participant completes 1,000 or more hours of service. A participant receives a year of vesting service for each 12 months of employment by the Company or an affiliated company beginning on the first day of the month of hiring and ending on the severance date. The participant also receives partial vesting service for less than a 12-month period. A break in service of less than 12 months also counts as vesting service. The participant is fully vested after five years of vesting service. For employees hired by Johnson Controls after the acquisition of Findlay Industries West Carrollton, Ohio facility, the hire date with Findlay Industries is used to credit vesting service.

FUNDING POLICY

The Company's funding policy is to make contributions to the Plans in amounts that meet or exceed the minimum amounts required by ERISA. The Company's contributions for the years ended December 31, 2010 and 2009 met or exceeded the ERISA required minimum amounts.

Although it has not expressed any intention to do so, the Company has the right under the Plans to discontinue its contributions at any time and to terminate the Plans subject to the provisions set forth in ERISA.

ADMINISTRATIVE EXPENSES

Administrative expenses are paid by the Plans, as allowed by the Plans' provisions, with all remaining expenses paid by the Company.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

The accompanying financial statements are prepared on the accrual basis of accounting.

USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

JOHNSON CONTROLS, INC. MASTER PENSION TRUST

The Company has entered into a Master Pension Trust agreement (the "Master Trust") with U.S. Bank, N.A. (the "Trustee"). Under the agreement, the Plans participate under a master trust arrangement whereby all the assets of the plans are pooled and invested in one or more investment accounts.

JOHNSON CONTROLS, INC.
PENSION PLANS
NOTES TO THE FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2010 AND 2009

The Master Trust holds investments in short-term securities, U.S. government securities, bonds, mutual and pooled equity funds and common stocks as of December 31, 2010 and 2009.

The Company requires collateral at a minimum of 102% of the value of any securities lending transactions.

Each Plan's interest in the investments of the Master Trust is evidenced by units of participation, as no Plan has a right, title or ownership of any of the specific assets in the Master Trust. In accordance with the Master Trust agreement, net investment income of the Master Trust is prorated to each participating Plan in proportion to the number of units held by each Plan. Plan participation in the Master Trust is adjusted as required to reflect benefit payments to the Plans' participants and for Company contributions.

The following represents the percentage interest in the Master Trust by Plan:

*The JCIM US, LLC plan, which is included in the Master Trust, has a June 30 year end. As such, a separate report is prepared for each plan year.

The Statements of Financial Position as of December 31, 2010 and 2009 and the Statement of Operations and Changes in Participating Plans' Equity of the Johnson Controls, Inc. Master Pension Trust for the year ended December 31, 2010 are presented in Note 10.

DATE OF MANAGEMENT'S REVIEW

Management has evaluated subsequent events through September 16, 2011, the date which the financial statements were available to be issued.

NOTE 3 – INVESTMENTS

Assets of the Plans, with the exception of the employer contribution receivable and accrued administrative expenses, as shown in the Statements of Net Assets Available for Benefits, investment income as shown in the Statements of Changes in Net Assets Available for Benefits, and the Master Trust financial information appearing in Note 10, have been derived from information prepared and certified as complete and accurate by the Trustee, in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

NOTE 4 – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments that are attributable under the Plans' benefit provisions based on employees' years of service. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits. The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. The actuarial assumptions used for the January 1, 2010 and 2009 valuations are based on the Standard Unit Credit Cost Method for all Plans. The current actuarial assumptions are based on the presumption that the Plans will continue. If the Plans were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by an actuary from Hewitt Associates LLC.

The significant actuarial assumptions used in the valuations at January 1, 2010 and 2009 were:

Description	Assumption	
Retirement Age	Varies based on the probability of retirement at social security retirement age of 65 to 67, with 100% at age 70.	
Mortality Rates	2010: 2010 Static Mortality Table for annuitants and non-annuitants. 2009: 2009 Static Mortality Table for annuitants and non-annuitants.	
Withdrawal Rates	A graduated scale from higher to lower as years of service increase.	
Disability Rates	A graduated scale from lower to higher as age advances.	
Interest Rates	2010: Based on segment rates with a four month lookback, as follows: 1st Segment Rate – 5.03% 2nd Segment Rate – 6.73% 3rd Segment Rate – 6.82%	2009: Based on the full Yield Curve with a two month lookback (October 2008 yield curve), with sample rates as follows: Duration 0.5 – 5.45% Duration 5.5 – 8.25% Duration 10.5 – 8.87% Duration 15.5 – 8.65% Duration 20.5 – 8.11 % Duration 25.5 – 7.71% Duration 30.5 – 7.46%

NOTE 5 – TAX STATUS

The Company has received favorable determination letters from the IRS as to the qualified status of the Plans under the Internal Revenue Code ("IRC") and these Plans are, therefore, exempt from federal income taxes. Some of the Plans have been amended since receiving the determination letters. However, the Plan administrator believes that all the Plans are currently designed and being operated in compliance with applicable requirements of the IRC.

NOTE 6 – PLAN TERMINATION

The Company anticipates and believes the Plans will continue without interruption but reserves the right to discontinue any Plan at any time in accordance with the respective plan provisions and provisions set forth in ERISA. In the event of a Plan termination or permanent discontinuance of contributions to a Plan, the assets of the Plan will be distributed in accordance with the requirements of 29 CFR 4044 of ERISA.

Certain benefits under the Plans are insured by the Pension Benefit Guaranty Corporation ("PBGC"), a U.S. government agency, in the event of Plan termination. The net assets of the Plans will be allocated as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination.
2. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plans. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits insured by the PBGC up to the applicable limitations.
4. All other vested benefits (not insured by the PBGC).
5. All non-vested benefits.

Certain benefits under the Plans are insured by the PBGC if the Plans terminate. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plans, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plans are guaranteed at the level in effect on the date of the Plans' termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2011, that ceiling is $4,500 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants, or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should a Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan's sponsor and the level of benefits guaranteed by the PBGC.

NOTE 7 – PARTY-IN-INTEREST TRANSACTIONS

Transactions involving the account administered by the Trustee and the funds of the investment managers for the Plans are considered party-in-interest transactions. These transactions are not, however, considered prohibited transactions under 29 CFR 408(b) of the ERISA regulations.

NOTE 8 – RISKS AND UNCERTAINTIES

The Plans' investments are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the values of investments, it is at least reasonably possible that changes in risks in the near term would materially affect the amounts reported in the Statements of Net Assets Available for Benefits and the Statements of Changes in Net Assets Available for Benefits.

The actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the value of accumulated plan benefits.

NOTE 9 – PLAN MERGER

Effective December 31, 2009, the Shelbyville Union Pension Plan merged into the Johnson Controls Pension Plan. Also, the Automotive Systems Group Cadiz Retirement Income Plan, the Automotive Systems Group Greenfield Plant Retirement Income Plan and the Johnson Controls Pension Plan Automotive Systems Group/West Carrollton Production Employees merged into the Johnson Controls Pension Plan Battery Division Owosso UAW Employees.

As a result of the December 31, 2009 Plan mergers, the actuarial present value of accumulated plan benefits for the Johnson Controls Pension Plan at January 1, 2010 increased by $622,879 because of the transfer of accumulated plan benefits from the Shelbyville Union Pension Plan, and the Johnson Controls Pension Plan Battery Division Owosso UAW Employees increased by $31,329,979 because of the transfer of accumulated plan benefits from the remaining three merged Plans.

NOTE 11 – FAIR VALUE MEASUREMENTS

ASC 820, "Fair Value Measurements and Disclosures," defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also establishes a three-level fair value hierarchy that prioritizes information used in developing assumptions when pricing an asset or liability as follows:

Level 1: Observable inputs such as quoted prices in active markets;

Level 2: Inputs, other than quoted prices in active markets, that are observable either directly or indirectly; and

Level 3: Unobservable inputs where there is little or no market data, which requires the reporting entity to develop its own assumptions.

ASC 820 requires the use of observable market data, when available, in making fair value measurements. When inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement.

The following table sets forth by level, within the fair value hierarchy, the Master Trust's assets at fair value as of December 31, 2010 and 2009:

	Assets at Fair Value as of December 31, 2010			
	Level 1	Level 2	Level 3	Total
Fixed Income Fund	$ 666,024,510	$ -	$ -	$ 666,024,510
Equity Investments	1,653,354,373	-	-	1,653,354,373
Investment in Real Estate	-	-	193,021,453	193,021,453
Hedge Fund	-	-	93,722,876	93,722,876
Total assets at fair value	$ 2,319,378,883	$ -	$ 286,744,329	$ 2,606,123,212

	Assets at Fair Value as of December 31, 2009			
	Level 1	Level 2	Level 3	Total
Fixed Income Fund	$ 511,071,289	$ -	$ -	$ 511,071,289
Equity Investments	1,223,401,223	-	-	1,223,401,223
Investment in Real Estate	-	-	89,857,772	89,857,772
Hedge Fund	-	-	88,655,565	88,655,565
Total assets at fair value	$ 1,734,472,512	$ -	$ 178,513,337	$ 1,912,985,849

Following is a description of the valuation methodologies used for assets measured at fair value.

Fixed Income Fund: The fair value for the Fixed Income Fund is determined by indirect quoted market prices. The value of the fund is not published, but the investment manager reports daily the underlying holdings. The underlying holdings are direct quoted market prices on liquid and regulated financial exchanges.

Equity Investments: The fair value for the Equity Investments is determined by indirect quoted market prices. The value of the fund is not published, but the investment manager reports daily the underlying holdings. The underlying holdings are direct quoted market prices on liquid and regulated financial exchanges.

Investment in Real Estate: The fair value for the investments in the Russell Real Estate Fund is valued by a fund manager, Russell Private Real Estate. Russell values the investment the same way as other stocks that trade on organized public exchanges. The prices of the shares represent the present values of expected future rent income. Assumptions used to revalue the properties are updated every quarter and independent valuations are obtained to support valuation models. Rockwood Real Estate is in the early stages of funding, and therefore properties are currently recorded at cost. The partnership manager regularly updates valuations to ensure the carrying value approximates the fair value. The Company believes this is the appropriate methodology to obtain the fair value of the assets. In determining the value of the interest in real estate properties of the Invesco Core Real Estate Fund and the Morgan Stanley Prime Property Fund, all properties are valued on a quarterly basis by independent appraisers.

Hedge Fund: The fair value of the Hedge Fund is accounted for by Union Bancaire Privée's custodian, Citibank. Citibank obtains valuation from underlying managers based on market quotes for the most liquid assets and alternative methods for assets that do not have sufficient trading activity to derive prices. The Company and Union Bancaire Privée reviewed the methods used by the underlying managers to value the assets held at Citibank. The Company believes that the appropriate methodology is used to obtain valuations that are as close as possible to the fair value of the assets.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. The fair values of other assets and liabilities approximate their carrying values.
