Report of Independent Auditors

To the Participants and Administrator of
Pension Plan for Newark Hourly Employees of
Anheuser-Busch, Inc. Who are Represented by Local 102

In our opinion, the accompanying statements of net assets available for benefits as of December 31, 2010 and December 31, 2009 and the related statements of changes in net assets available for benefits for the years then ended present fairly, in all material respects, information regarding the net assets available for benefits of Pension Plan for Newark Hourly Employees of Anheuser-Busch, Inc. Who are Represented by Local 102 (the "Plan") at December 31, 2010 and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Pension Plan for Newark Hourly Employees of Anheuser-Busch, Inc. Who are Represented by Local 102

Notes to Financial Statements

December 31, 2010 and 2009

1. Description of the Plan

The following brief description of the Pension Plan for Newark Hourly Employees of Anheuser-Busch, Inc. Who Are Represented by Local 102 (the Plan) is intended to give a general summary of its principal provisions. Participants should refer to the Plan Document for more complete information.

General

The Plan was a defined benefit plan that provided normal and early retirement, disability and death benefits to employees covered by the collective bargaining agreement between the Local No. 102, International Brotherhood of Teamsters of Newark, New Jersey (the Union) and Anheuser-Busch, Inc. (the Company). Employees did not contribute to the Plan.

The Plan was subject to the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Plan Administration

The Plan Administrator was the Company. State Street Bank and Trust Company (Trustee), as sole trustee of the Plan, held all Plan assets and was responsible for benefit payments from the Anheuser-Busch Companies Master Trust (Master Trust) according to information submitted by the Plan Administrator.

Plan Benefits

Under the Plan's provisions, each participant who retired at age 65 (normal retirement) was entitled to a monthly pension benefit equal to \$1.50 multiplied by credited service prior to January 1, 1951 and the applicable amount of monthly pension specified in the Plan Document multiplied by credited service after January 1, 1951. The Plan also provided for a reduced early retirement benefit for participants retiring after age 55 with 10 years of vesting service. This benefit was equal to the normal retirement benefit reduced by 1/6 of 1% for each month that early retirement precedes the normal retirement date. In addition, if a participant retired after age 57 with 25 years of credited service or after age 60 with 10 years of vesting service, the participant received his accrued benefit, unreduced for early retirement. Credited service was based on the number of covered days of employment during each Plan year. Effective March 1, 2010, the benefit multiplier increased to \$115.60 from 114.46.

Vesting service was used in determining eligibility for early retirement and disability benefits. A participant earned one year of vesting service for each Plan year during which the participant completed one thousand hours of service. Plan participants earned a fractional year of vesting service for years in which they did not complete one thousand hours of service. Plan participants became fully vested after completing five years of vesting service.

Expenses of the Plan

Under the Master Trust agreement with the Trustee, the Company paid all expenses incurred in the administration of the Plan, including trustee fees, but was not obligated to do so. Trustee expenses not paid by the Company were paid by the Master Trust and proportionately allocated to participating plans. All other expenses were paid by the Plan.

Plan Merger

The Plan was merged effective December 31, 2010 (Note 9). This merger will not affect the participants' pension benefits because the benefit provisions of the Plan will be incorporated into the merged pension plan.

2. Summary of Significant Accounting Policies

Basis of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting with the exception of benefit payments, which are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and the reported amounts of additions to and deductions from net assets during the reporting period. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are reported at fair value. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in fair value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Risks and Uncertainties

Investment securities are exposed to various risks such as significant world events, interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the Statement of Net Assets Available for Benefits.

Plan contributions were made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Allocation of Assets

The assets of the Plan were invested in the Master Trust along with the assets of certain other retirement plans sponsored by the Company. The method of allocation utilized by the Plan was Equitable Share Accounting (ESA). ESA valued each plan's participation in the Master Trust based on a percentage of the fair value of total Master Trust assets. ESA determined this applicable percentage using a weighted average based on cash flows of each individual plan. Earned income and realized and unrealized gains or losses are retained in the Master Trust and are allocated to participating plans by the Trustee, based on ESA.

3. Recent Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued guidance for improving disclosures about fair value measurements. The new guidance requires new disclosures for transfers in and out of Level 1 and 2 classifications and for more detail about the activity in Level 3 fair value measurements. The new guidance also clarifies previous disclosure requirements by increasing the level of disaggregation to the class level for investments and by requiring more disclosures about inputs and valuation techniques for fair value measurements in Level 2 and Level 3 investments. The disclosures required under this guidance for the current year are included in Note 6 and did not have a material impact on the Plan's financial statements.

4. Funding Policy

The Company funded pension contributions. Annually, an independent actuary performs a valuation of the Plan and related trust fund to determine the status of the fund and the normal cost and contribution limits prescribed by ERISA. The methods of valuation employed by the actuary were the Traditional Unit Credit Method for liabilities and a smoothed value of assets. The Plan met the minimum funding requirements of ERISA, as determined by the independent actuary for the Plan years ended December 31, 2010 and 2009.

Effective December 22, 2010, the Company elected funding relief under the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 for the 2009 Plan year, using the 15-year amortization method. This allows the Company to elect in any two Plan years from 2008 to 2011 extended amortization periods of the Plan year's losses. Electing to lengthen the amortization schedule for a given Plan year reduces that Plan year's minimum contribution requirement.

5. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on an employee's credited service. Benefits payable under all circumstances - retirement, death, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered up to the valuation date.

The accumulated plan benefit obligation is determined by the Plan's independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. Significant actuarial assumptions used in the valuation as of January 1, 2010 and 2009 are as follows:

- Mortality - For 2010, RP-2000 Mortality Tables for males and females, with blue collar adjustment, projected to 2007 using Scale AA. For 2009, RP-2000 Mortality Tables for males and females, with blue collar adjustment, projected to 2005 using Scale AA
- Assumed rate of return (discount rate) - 7.5% per annum as of December 31, 2010 and 2009
- Retirement - According to a graded retirement schedule based on years of service and age

6. Interest in Anheuser-Busch Companies Master Trust

At December 31, 2010 and 2009, the Plan's interest in the investments of the Master Trust was approximately 0.0% and 5.9%, respectively.

The following table presents the fair values of investments in the Master Trust at December 31, 2010 and 2009:

Direct Financing Lease

A direct financing lease is a lease which (1) includes a bargain purchase option or transfers title to the lessee at the end of the lease, (2) provides for minimum lease payments, including guaranteed residual values, sufficient to recover 90% or more of the Master Trust's investment in leased property or (3) has noncancelable terms in excess of 75% of the useful lives of the property leased. Revenue from the direct financing lease is recognized over the lease term on the interest method, which results in a level rate of return on the net investment in the lease.

The components of the Master Trust's direct financing lease as of December 31, 2010 are as follows:

Future minimum rentals receivable	\$ 152,915,647
Unearned income to be recognized in future years	<u>(82,654,466)</u>
	70,261,181
Cumulative appreciation in fair value	<u>4,608,820</u>
Fair value of direct financing lease	<u>\$ 74,870,001</u>

Future minimum rentals receivable under the direct financing lease as of December 31, 2010 are as follows:

2011	\$ 6,282,919
2012	6,439,992
2013	6,600,991
2014	6,766,016

Fair Value Measurements

The Master Trust follows accounting rules that provide a framework for measuring fair value for all assets and liabilities that are measured and reported at fair value. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk or the risks inherent in the inputs to the valuation, were used in the valuation process. Inputs to valuation can be readily observable, market corroborated, or unobservable. Valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs were used. That framework also establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. All financial assets and liabilities carried at fair value were classified in one of the following three hierarchy levels:

- Level 1 Inputs based on quoted prices in active markets for identical assets or liabilities that the Master Trust has the ability to access at the reporting date.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Inputs to the valuation methodology include:
- quoted prices for similar assets or liabilities in active markets;
 - quoted prices for identical or similar assets or liabilities in inactive markets;
 - inputs other than quoted prices that are observable for the asset or liability; and
 - inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 Inputs to the valuation methodology that are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Common/Collective Trusts

Common/collective trusts consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures.

The fair values of participation units held in the common/collective trusts are based on the net asset value (NAV) after adjustments to reflect all fund investments at fair value. The common/collective trusts generally permit redemptions daily. Certain common/collective trusts held by the Master Trust only allow redemptions on a weekly or bi-weekly basis. The fair values of the Plan's interest in the common/collective trusts are based on quoted market prices in active markets and securities and contracts are valued using observable inputs. The Master Trust is permitted to redeem investment units at NAV on the measurement date, and as a result, the investment is classified as a Level 2 asset in the fair value hierarchy.

Notes to Financial Statements

December 31, 2010 and 2009

Direct Financing Lease

Fair value is based on the fair value of the underlying properties. The properties are valued based on appraisals performed using a combination of the income approach and sales approach.

Short-Term Investments

Short-term investments are considered to be cash equivalents due to their short term maturities, and are valued at cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth, by level within the fair value hierarchy, assets measured at fair value on a recurring basis as of December 31, 2010 and 2009.

7. Transactions with Parties-in-Interest

The Master Trust holds investments in the following State Street Bank and Trust Company funds. These investments are managed by State Street Bank and Trust Company, as Trustee. These transactions are allowable party-in-interest transactions under ERISA.

The SSGA Treasury Fund had a market value of \$14,494,364 and \$13,931,300 at December 31, 2010 and 2009, respectively. In 2010 the Master Trust purchased a total of \$216,590,627 and sold \$216,027,563 of the fund. In 2009 the Master Trust purchased a total of \$122,762,398 and sold \$272,049,666 of the fund.

The SSGA Provisional ACWI ex US Fund had a market value of \$227,221,051 and \$147,993,659 at December 31, 2010 and 2009, respectively. During 2010, the Master Trust purchased a total of \$206,958,962 and sold \$153,917,335 of the fund. In 2009, the Master Trust purchased a total of \$239,528,120 and sold \$268,131,062 of the fund.

The Master Trust also holds operating properties that are leased to the Company. The fair value of the properties at December 31, 2010 was \$74,870,001. The Master Trust received rental payments for the year ending December 31, 2010 of \$4,774,661. These transactions are allowable party-in-interest transactions under ERISA.

8. Income Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated November 21, 2003, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code. Therefore, the underlying trust of such a plan is exempt from federal income taxes under Section 501 of the Internal Revenue Code. The Plan has been amended since receiving the latest determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan was designed and was operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

**Pension Plan for Newark Hourly Employees of
Anheuser-Busch, Inc. Who are Represented by Local 102**
Notes to Financial Statements
December 31, 2010 and 2009

GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for Plan years prior to 2007.

9. Plan Merger

Effective as of the close of business on December 31, 2010, all assets and accumulated plan benefits of the Plan were merged into the Pension Plan for Certain Newark Hourly Employees of Anheuser-Busch, Inc.

10. Subsequent Events

Management has evaluated subsequent events through October 10, 2011, the date which the financial statements were available to be issued.

SCHEDULE SB ATTACHMENTS

Schedule SB, Line 8a Portion Used to Offset Prior Year's Funding Requirement

Funding relief was elected for the 2009 plan year and was not reflected on the 2009 Schedule SB. The 2009 Minimum Required Contribution decreased by \$804,191 as a result of this election. The amount shown on line 35 of the 2009 Schedule SB included "excess" amounts of 1/1/2009 funding standard carryover balance elected to be used against 2009 minimum contribution requirements in the amount of \$804,191. Therefore, the amount shown on line 8a of the 2010 Schedule SB does not match the amount shown on line 35 of the 2009 Schedule SB by a difference of \$804,191.

\$117.88	From 3/1/2012 to 2/28/2013
\$119.02	On or after 3/1/2013

Normal Form of Benefit: Life Annuity with five years certain.

Optional Forms of Benefit: Life annuity with 10 years certain, 50% joint and survivor, 75% joint and survivor, and 100% joint and survivor.

Late Retirement

If retirement occurs after the normal retirement date, the late retirement income will be equal to the normal retirement benefit calculated using credited service as of the late retirement date, offset by the actuarial equivalent value of any retirement payments received.

Early Retirement Benefit

Eligibility: Age 55 and 10 years of vesting service.

Monthly Benefit: If at least age 57 with at least 25 years of credited service, the accrued benefit as of the early retirement date is unreduced.

If at least age 60 with at least 10 years of vesting service, the accrued benefit as of the early retirement date is unreduced.

If at least age 55 with at least 10 years of vesting service, the accrued benefit as of early retirement date is reduced by 1/6 of 1% for each month that early retirement precedes age 65.

Disability Benefit

Eligibility: Total and permanent disability of participant prior to Normal Retirement Date, 5 years of vesting service, and eligible to receive Social Security disability benefits.

Monthly Benefit: The accrued benefit without reduction for early commencement.

Vested Benefits Upon Termination of Service

A participant is 100% vested upon completion of 5 years of vesting service. However, all participants become 100% vested upon reaching their Normal Retirement Date.

Preretirement Death Benefit

Eligibility: Must be a vested participant.

Monthly Benefit: The participant's spouse of at least one year will receive a monthly retirement income payable for life in an amount equal to 50% of the amount the participant would have received if he had terminated on his date of death (or actual termination date if earlier), survived to his earliest retirement date, elected to commence receiving benefits under the qualified joint-and-50% survivor option, and then immediately died.

Plan Participants' Contributions

None.

Significant Events During Plan Year Not Reflected in Valuation

A voluntary reduction program was enacted which resulted in the earlier-than-expected termination of over 10% of active plan participants.

Effective at the close of business on December 31, 2010, this plan merged into the Pension Plan for Certain Newark Hourly Employees of Anheuser-Busch, Inc.

Asset method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.69%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.69%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.38%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Participant data

Employee data was supplied electronically by Anheuser-Busch and Milliman USA. Data on persons receiving benefits was supplied electronically by Milliman USA.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2010 is used to determine the maximum deductible contribution for the tax year ending December 31, 2010.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

At-Risk Calculations

Calculations of at-risk liability and normal cost reflect the statutory required assumptions regarding retirement or termination of employment. In addition, for at-risk calculations, the normal form of payment was assumed to be the most valuable option under the plan. All of assumptions for at-risk calculations reflect the regular valuation assumptions.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are rounded to the nearest .01% to be consistent with the rounding specified for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Changes in assumptions and methods since last actuarial valuation

Other than the prescribed changes in mortality, the following assumptions have changed since last year:

1. The discount rate assumption was changed to the 3-segment rates (applicable month of September 2009, no transition) from the October 2008 full yield curve. Approval for this change is not required by the IRS.
2. The valuation software used to produce the actuarial information submitted in this report has been changed and the valuation methodology used has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to these changes in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.69%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.69%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.38%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Participant data

Employee data was supplied electronically by Anheuser-Busch and Milliman USA. Data on persons receiving benefits was supplied electronically by Milliman USA.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2010 is used to determine the maximum deductible contribution for the tax year ending December 31, 2010.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

At-Risk Calculations

Calculations of at-risk liability and normal cost reflect the statutory required assumptions regarding retirement or termination of employment. In addition, for at-risk calculations, the normal form of payment was assumed to be the most valuable option under the plan. All of assumptions for at-risk calculations reflect the regular valuation assumptions.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are rounded to the nearest .01% to be consistent with the rounding specified for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Pension Funding Relief (PRA 2010)

On December 22, 2010, Anheuser-Busch elected to use the 15-year amortization method for the 2009 plan year.

SCHEDULE SB, LINE 25 – CHANGE IN METHOD**

Changes in assumptions and methods since last actuarial valuation

Other than the prescribed changes in mortality, the following assumptions have changed since last year:

1. The discount rate assumption was changed to the 3-segment rates (applicable month of September 2009, no transition) from the October 2008 full yield curve. Approval for this change is not required by the IRS.
2. The valuation software used to produce the actuarial information submitted in this report has been changed and the valuation methodology used has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to these changes in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
