The Company may elect to make discretionary matching contributions at an amount equal to a percentage, as determined by the Company, of the participant's deferral contributions, not to exceed 6% of the participant's compensation, and may contribute additional amounts as determined by the Board of Directors. During 2010, the Company contributed a matching contribution of 50% of the first 6% of compensation that a participant contributed to the Plan. Additionally, the Company may make discretionary profit sharing contributions on behalf of each participant in an amount to be determined and declared annually by the Board of Directors. 1. Description of Plan, Continued

Participant Loans

Participants may borrow from their fund accounts a minimum of $1,000 up to a maximum equal to the lesser of $50,000 or 50 percent of their vested account balance. The loan terms range from one to five years or up to twenty years for the purchase of a primary residence. The loans are secured by the balance in the participant's account and bear interest at a rate, which is determined by the Plan administrator and is based on local prevailing rates. Participant loans outstanding as of December 31, 2010 and 2009 totaled **$1,034,466 and $1,334,145** respectively, and bear interest at rates ranging from **3.25% to 8.25%** per year during 2010 and 2009.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the Untied States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein. Actual results may differ from those estimates.

Risks and Uncertainties

The Plan provides for various investment options. These investment options are exposed to market risk, which generally means the risk of loss in the value of certain investment securities due to changes in interest rates, commodity prices and general market conditions. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term, and such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits and the statement of changes in net assets available for benefits.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Investments in registered investment companies ("mutual funds") are valued at quoted market prices, which represent the net asset value of shares held by the Plan at year end. The Plan's interest in the common collective trust is valued based on information reported by the trustee using the audited financial statements of the common collective trust at year-end. Participant loans are valued at amortized cost, which approximates fair value.

Net appreciation (depreciation) in fair value of investments includes realized gains and losses on the sales of investments during the year and unrealized appreciation (depreciation) in the fair value of investments held at the end of the year.

Purchases and sales of securities are recorded on a trade-date basis. Interest is recorded as earned. Dividends are recorded on the ex-dividend date.

2. Summary of Significant Accounting Policies, Continued

Recent Accounting Pronouncement

In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements ("SFAS 157"). SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 was in effect for the Plan on January 1, 2010 and 2009. The adoption of SFAS 157 did not have a material impact on the Plan's financial statements.

3. Investments

The following table presents the Plan's investments. Investments that represent 5% or more of the Plan's net assets are separately identified.

	31-Dec-10	31-Dec-09
American Funds Cash Management Trust	4,820,001	5,332,923
American Funds Bond Fund of America	1,909,158	2,105,600
American Funds American Balanced Fund	2,942,755	3,211,602
American Funds Growth Fund of America	9,187,313	9,667,479
American Funds Fundamental Investors Fund	4,554,087	4,552,607
American Funds New Perspective Fund	4,999,173	5,310,777

American Funds Investment Co. of America	2,897,124	2,753,994
Investments less than 5% of net assets	7,179,581	6,011,673
Total investments	**41,849,689**	**41,787,141**

During the year ended December 31, 2010 and 2009, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated (depreciated) in value as follows.

	2010	2009
Registered investments companies (mutual funds)	$3,735,118	$7,844,258
Net appreciation (depreciation) in fair value of investments	$3,735,118	$7,844,258

4. Fair Value Measurements

SFAS 157 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under SFAS 157 are described below:

Level 1 — *Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.*

Level 2 — *Inputs to the valuation methodology include:*

- *Quoted prices for similar assets or liabilities in active markets;*
- *Quoted prices for identical or similar assets or liabilities in inactive markets;*
- *Inputs other than quoted prices that are observable for the asset or liability; and,*
- *Inputs that are derived principally from or corroborated by observable market data by correlation or other names*

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — *Inputs to the valuation methodology are unobservable and significant to the fair value measurement.*

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Mutual funds: Valued at the net asset value ("NAV") of shares held by the Plan at year-end.
Money market funds: Valued at amortized cost, which approximates fair value.
Common collective trusts: Values at fair value based on information reported in the audited financial statements of the collective trusts at year-end.
Participant loans: Valued at amortized cost, which approximates fair value.

4. Fair Value Measurements, Continued

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2010 and 2009:

December 31, 2010

	Level 1	Level 2	Level 3	Total
Mutual funds	$41,849,689			$41,849,689
Participant loans			$1,034,466	$1,034,466

Raymond James Form 5500 Schedule C Disclosure

Raymond James may receive payments from mutual fund companies to provide mutual fund information to financial advisors, to assist mutual fund companies with strategic planning support, and to provide opportunities for assisting with professional development workshops, study groups, and other events and conferences. Raymond James also provides distribution support for prospectuses and promotional materials relating to these companies' mutual funds and for including their funds on the Raymond James sales system. The amounts of such payments, which may consist of both asset-based and sales-based components, vary by mutual fund company and the agreement in effect between Raymond James and the particular mutual fund company. The payments received from mutual fund companies are typically calculated as a percentage of the average daily net asset value of the companies' funds held by clients together with the dollar value of fund sales of during the period. The asset-based percentage rate varies based on the total value of fund assets held by Raymond James clients and the sales-based percentage is generally a fixed percentage established per the contracts with various mutual fund companies. The payments are generally made from the resources of the mutual fund company and not from any fund's return on investment.

A general description of these payments paid by a particular mutual fund company can be found in the mutual fund company's prospectus under the section titled "Payments to Financial Intermediaries" and in the mutual fund company's "Statement of Additional Information." Information about the payment rates and which mutual fund companies participate in the Raymond James education and marketing support program can be found on the Raymond James public web site at:
