Heritage Hourly Compensated Employees (Newcem)
Assumptions and Methods**

Economic Assumptions

Funding interest rate basis:

— Applicable month	September 2009
— Yield curve basis	Segment rates
— Transition from current liability rates	No

Funding interest rate:

▶ First segment rate	5.03%
▶ Second segment rate	6.73%
▶ Third segment rate	6.82%

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefit
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of fair value, including contributions receivable.</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.</p>

Benefits Not Valued

All benefits described in the Plan Provisions of this report were valued except (unless otherwise stated) plant shutdown and other “unpredictable contingent event benefits” which are not valued until and unless the triggering event occurs. Towers Watson is not aware of any significant benefits required to be valued that were not.

Change in Assumptions & Methods

The funding interest rate changed from the IRS prescribed one-month average yield-curve based on bond yields during the October preceding the valuation date to the IRS prescribed segment rates without 3-year transition based on bond yields through the August preceding the valuation date.

The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.

The assumption for administrative expenses included as part of the target normal cost, was changed from the prior year.

Data Sources

Towers Watson used asset data and retiree data supplied by the trustees. Lafarge North America Inc. furnished other participant data and the dates and amounts of the contributions that were paid in 2010. Data were reviewed for reasonableness and consistency, but no audit was performed. Assumptions or estimates were made by the Towers Watson actuaries when data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.
