Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

REPORT OF INDEPENDENT AUDITORS

Plan Administrator
Lockheed Martin Account Balance Retirement Plan

We were engaged to audit the accompanying statement of net assets available for benefits of Lockheed Martin Account Balance Retirement Plan as of December 31, 2010, and the related statement of changes in net assets available for benefits for the year ended December 31, 2010. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 6 as of and for the year ended December 31, 2010, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the year ended December 31, 2010, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements as of and for the year ended December 31, 2010, taken as a whole. The form and content of the information included in the financial statements, other than that derived from the investment information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

We have audited the statement of net assets available for benefits as of December 31, 2009, and in our report dated October 6, 2010, we expressed an opinion that this financial statement presents fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2009, in conformity with accounting principles generally accepted in the United States.

Lockheed Martin Account Balance Retirement Plan (016)

Notes to Financial Statements

December 31, 2010

1. Description of the Plan

The following description of the Lockheed Martin Account Balance Retirement Plan (the Plan) provides only general information. Participants should refer to the Summary Plan Description or the Plan Document for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering salaried employees of the Lockheed Martin Engineering and Sciences Company, a subsidiary of Lockheed Martin Corporation (Lockheed Martin or the Corporation), who were employed as of December 24, 1992, and has been revised and amended from time to time. The Corporation is the Plan Sponsor and the Plan Administrator. Participation and benefit accruals in the Plan were frozen as of December 24, 1992. Additional interest continues to be applied toward the accrued benefits of participants. Interest applied for the years ended December 31, 2010 and 2009 was at the rate of 0.41% and 0.51%, respectively.

The assets of the Plan are held and invested on a commingled basis in the Lockheed Martin Corporation Master Retirement Trust (the Master Trust). The assets of the Master Trust are held by The Northern Trust Company (the Trustee), with the exception of commingled investment funds, limited partnerships and certain futures contracts.

The Plan's year-end is December 24 of each year, and therefore differs from the fiscal year-end of the Master Trust. However, the financial statements of the Plan are presented on a calendar-year basis. All Trustee-supplied information and valuations are reported on a calendar-year basis. The transactions in the intervening period did not materially affect the financial statements as presented.

Contributions

The Corporation has agreed to contribute such amounts as are necessary to provide assets sufficient to meet the benefit obligations to be paid to Plan participants. The Corporation has the right under the Plan to discontinue such contributions at any time and/or terminate the Plan. In the event of termination, the Plan's net assets are to be used first for the payment of retirement benefits, and next for the payment of accrued benefits for the remaining participants. If the net assets allocated for one of the above categories are not sufficient to pay all the benefits in such category, the available net assets shall be allocated pro rata to all the benefits in that category. However, in the event of termination of the Plan, the PBGC guarantees the payment of nonforfeitable retirement benefits subject to certain limitations prescribed by ERISA.

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting. Certain amounts for prior years have been reclassified to conform to the current year presentation.

Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions for credited service by participants from their date of eligibility to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired, terminated and disabled participants or their beneficiaries; and (b) present participants or their beneficiaries. Benefits for retired, terminated and disabled participants or their beneficiaries are based on each former participant's credited service prior to his or her termination or retirement date. Accumulated plan benefits for active participants are based on each participant's credited service preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service prior to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Funding Policy

Contributions by Lockheed Martin met the Employee Retirement Income Security Act of 1974 (ERISA) minimum funding requirements utilizing the entry-age-normal actuarial cost method.

Risks and Uncertainties

The Plan, through the Master Trust, invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Lockheed Martin Account Balance Retirement Plan (016)

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Risks and Uncertainties (continued)

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Investment Valuation and Income Recognition

Investments in the Master Trust are reported at fair value. Fair value is the price that would have been received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for additional disclosure of fair value measurements.

Purchases and sales of securities in the Master Trust are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded as of the ex-dividend date. Net realized and unrealized gain/loss on investments bought and sold as well as held during the year are included in interest in net investment gain of Master Trust on the Statement of Changes in Net Assets Available for Benefit.

Administrative Expenses

Direct administrative expenses are paid by the Master Trust and generally allocated to the Plan either on a pro rata basis or directly if specifically related to the Plan. Other indirect administrative expenses are paid by the Corporation.

Payment of Benefits

Benefit payments to participants are recorded when paid.

Recent Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued an accounting standard update to clarify certain existing fair value disclosures and require additional disclosures related to fair value measurements. The guidance in the update clarified that disclosures should be presented separately for each "class" of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. The update also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in

Recent Accounting Pronouncements (continued)

estimating Level 2 and Level 3 fair value measurements. In addition, the update introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2 and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is effective for fiscal years beginning after December 15, 2010, the guidance in the update was adopted beginning with the Plan's 2010 financial statements. The Plan is currently evaluating the impact of the provisions of the update that are not effective until the Plan's 2011 financial statements.

In May 2011, the FASB issued Accounting Standards Update 2011-04, *Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs*, (ASU 2011-04). ASU 2011-04 amended ASC 820, *Fair Value Measurements and Disclosures*, to converge the fair value measurement guidance in US generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRSs). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

Subsequent Events

The Plan has evaluated subsequent events through October 13, 2011, the date the financial statements were available to be issued.

3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to the accumulated plan benefits earned by the participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

Lockheed Martin Account Balance Retirement Plan (016)

Notes to Financial Statements (continued)

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

The actuarial present value of accumulated plan benefits is as follows:

	December 31,	
	2010	2009
	<i>(In thousands)</i>	
Vested benefits:		
Participants currently receiving payments	\$ 4,360	\$ 4,269
Other participants	9,318	8,925
Total vested benefits	13,678	13,194
Total actuarial present value of accumulated plan benefits	<u>\$13,678</u>	<u>\$13,194</u>

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (RP-2000 Mortality Table), (b) turnover based upon the termination experience of the Plan, (c) assumed retirement age probabilities based on the experience of the Plan, and (d) an annual discount rate of 5.50% and 5.875% for 2010 and 2009, respectively. The interest rate assumption used to calculate the actuarial present value of accumulated plan benefits is adjusted annually to reflect current yields on long-term high-quality corporate bonds. This can result in significant year to year fluctuations in the valuations. The average retirement age is 62.

Factors affecting the change in the actuarial present value of accumulated plan benefits are as follows:

	Year ended December 31, 2010 <i>(In thousands)</i>
Actuarial present value of accumulated plan benefits at end of the prior year	\$ 13,194
Increase (decrease) during the year attributable to:	
Increase for interest due to the decrease in the discount period	750
Benefits paid	(848)
Benefits accumulated	(40)
Changes in actuarial assumptions	622
Net increase	<u>484</u>
Actuarial present value of accumulated plan benefits at end of year	<u>\$ 13,678</u>

Lockheed Martin Account Balance Retirement Plan (016)

Notes to Financial Statements (continued)

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Income Tax Status

The Internal Revenue Service has determined and informed the Corporation by letter dated January 22, 2009, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan Administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable provisions of the IRC.

U.S. generally accepted accounting principles require plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for years prior to 2003.

5. Reconciliation of Financial Statements to Form 5500

Net investment gain from the participation in the Master Trust reported in the financial statements is \$156,000 greater than the amount reported on Form 5500 for the year ended December 31, 2010. Administrative expenses reported in the financial statements are \$156,000 less than the amounts reported on Form 5500 for the year ended December 31, 2010. These differences arose from the classification of certain administrative expenses which are included in the net investment gain in the Master Trust for Form 5500 reporting purposes.

6. Master Trust

General

The Plan's investments are held by the Master Trust, which was established for the investment of the Plan's assets and the assets of several other defined benefit plans sponsored by the Corporation. The Master Trust's net assets, investment income, appreciation (depreciation) of investments, and administrative expenses are allocated to

the Plan on a pro rata basis based on its share of the total contributions made to the Master Trust. The Plan's interest in the Master Trust's net assets as of December 31, 2010 and 2009 was approximately 0.22% and 0.23%, respectively.

The Master Trust owes direct reimbursements to the Corporation for certain expenses incurred by the Corporation and its subsidiaries in providing services to the Plan.

Other than the fair value of the investments listed below in certain equity securities and fixed income securities, all investment information disclosed in the fair value of assets table including investments held as of December 31, 2010, and net appreciation (depreciation), in fair value of investments, interest income, and dividend income for the year ended December 31, 2010, was obtained or derived from information provided to the Plan Administrator and certified as complete and accurate by The Northern Trust Company, the trustee of the Master Trust. Fair Value of Assets

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and expands disclosures about fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1 – Observable inputs – quoted prices in active markets for identical assets and liabilities;
- Level 2 – Observable inputs other than the quoted prices in active markets for identical assets and liabilities – includes quoted prices for similar instruments, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and
- Level 3 – Unobservable inputs – includes amounts derived from valuation models where one or more significant inputs are unobservable and require us to develop relevant assumptions.

The following table presents the fair value of the assets in the Master Trust by asset category and their level within the fair value hierarchy as of December 31, 2010 and their appreciation (depreciation) for the year ended December 31, 2010:

The Master Trust has invested in certain private equity funds (e.g., limited partnerships) that have required capital commitments, which may be called over a specific number of years. Unfunded capital commitments as of December 31, 2010 and 2009 totaled \$1,616,613,000 and \$1,421,770,000, respectively.

Derivative instruments are used in the Master Trust to achieve certain portfolio objectives and to adjust asset allocation in order to manage market risk. Derivative instruments allow internal and external investment managers to achieve these goals efficiently while maintaining appropriate liquidity.

The fair values of these instruments are recorded as investments of the Master Trust. To the extent that a gain has been recognized, the instruments are recorded as assets, and to the extent that a loss has been recognized, the instruments are recorded as liabilities. Changes in the fair value of the derivative instruments are reflected in the investment income as gain/(loss) in the Master Trust.

6. Master Trust (continued)

Fair Value of Assets (continued)

At December 31, 2010, the Master Trust utilized four types of derivative instruments:

Futures Contracts – The purchase of futures contracts allows the Master Trust to achieve desired portfolio positions in various commodities without the need to physically own and store them. From an asset allocation standpoint, futures are used to manage the overall risk to equity and fixed income markets. Foreign exchange futures are used to separate the management of currency exposure from foreign equity exposure. Futures contracts are exchange-traded with initial margin required from both parties and daily settlement of gains and losses; therefore credit and counterparty risks are minimal, and futures contracts have no net market value.

Foreign Exchange Forwards – Foreign exchange forward contracts are traded over-the-counter and are used by investment managers as another means of separating currency risk from investment risk. These contracts allow a manager to lock into a rate at which to exchange an upcoming settlement in a foreign currency into US dollars. The contracts are traded over-the-counter, but are generally very short-term which minimizes counterparty risk.

Options, including Options on Futures – These contracts allow the holder to buy or sell a security or a futures contract at a specified price prior to an expiration date. Options are primarily used to protect against downside risk in an equity, commodity or currency position held by the Master Trust.

Swaps – Swaps are over-the-counter agreements between counterparties to exchange the return stream of one security for another. Swaps are utilized either to provide exposure to a security for which there is no available futures contract, or to achieve an exposure over a specific time horizon.

Valuation Techniques

Cash equivalents are mostly comprised of short-term money-market instruments and are valued at cost, which approximates fair value.

U.S. equity securities and international equity securities categorized as Level 1 are traded on national and international exchanges and are valued at their closing prices on the last trading day of the year. For U.S. equity securities and international equity securities not traded on an active exchange, or if the closing price is not available, the trustee obtains indicative quotes from a pricing vendor, broker, or investment manager. These securities are categorized as Level 2 if the custodian obtains corroborated quotes from a pricing vendor or categorized as Level 3 if the custodian obtains uncorroborated quotes from a broker or investment manager.

Lockheed Martin Account Balance Retirement Plan (016)

Notes to Financial Statements (continued)

6. Master Trust (continued)

Valuation Techniques (continued)

Commingled equity funds and certain real estate funds are investment vehicles valued using the Net Asset Value ("NAV") provided by the fund manager. The NAV is the total value of the fund divided by the number of shares outstanding. Commingled equity funds are categorized as Level 1 if traded at their NAV on a nationally recognized securities exchange. If the NAV is corroborated by observable market data (e.g., purchases or sales activity), commingled equity funds and real estate funds are categorized as Level 2.

Fixed income securities categorized as Level 2 are valued by the trustee using pricing models that use verifiable observable market data (e.g. interest rates and yield curves observable at commonly quoted intervals), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics.

Private equity funds, real estate funds, hedge funds, and certain fixed income securities categorized as Level 3 are valued based on valuation models that include significant unobservable inputs and cannot be corroborated using verifiable observable market data. Valuations for private equity funds and real estate funds are determined by the general partners, while hedge funds are valued by independent administrators. Depending on the nature of the assets, the general partners or independent administrators use both the income and market approaches in their models. The market approach consists of analyzing market transactions for comparable assets while the income approach uses earnings or the net present value of estimated future cash flows adjusted for liquidity and other risk factors. Guaranteed annuity contracts are included in other fixed income securities and are categorized as Level 3. These contracts are valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering credit-worthiness of the issuer.

Commodities categorized as Level 1 are traded on a commodity exchange and are valued at their closing prices on the last trading day of the year. Commodities categorized as Level 2 represent shares in a commingled commodity fund valued using the NAV, which is corroborated by observable market data.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes the valuation methods of the Master Trust are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Statement by Enrolled Actuary (see instructions before signing):

To the best of my knowledge, the information supplied in this schedule and on the accompanying schedules, statements, and attachments, if any, is complete and accurate, and in my opinion each assumption, used in combination, represents my best estimate of anticipated experience under the plan. Furthermore, in the case of a plan other than a multiemployer plan, each assumption used (a) is reasonable (taking into account the experience of the plan and reasonable expectations) or (b) would, in the aggregate, result in a total contribution equivalent to that which would be determined if each such assumption were reasonable; in the case of a multiemployer plan, the assumptions used, in the aggregate, are reasonable (taking into account the experience of the plan and reasonable expectations).

Schedule B, line 8c – Schedule of Active Participant Data
Schedule B, line 9c and 9j – Schedule of Funding Standard Account Bases
Schedule B, line 11 – Changes Since Last Year's Valuation

Each assumption, used in combination, represents the best estimate of anticipated experience under the plan. Each assumption used (a) is reasonable taking into account the experience of the plan and reasonable expectations, or (b) would, in the aggregate, result in a total contribution equivalent to that which would be determined if each such assumption were reasonable.

The actuarial assumptions as of December 25, 2009 used in this report are:

Investment Return:	8.50% per annum, compounded annually.
Current Liability Interest Rate:	The Third Segment Rate based on 24-month average with a 3-month lookback from the valuation date.
<i>RPA '94:</i>	6.82%
<i>Gateway:</i>	6.82%
Target Liability Interest Rate for Maximum:	IRS Segment Rates with a 3-month lookback from the valuation date, with an effective rate of 6.59%.

Mortality:

*All Liabilities,
Except Current Liability
And Maximum:*

RP-2000 Mortality Table projected to 2010 using projection scale AA.

*Current Liability
And Maximum:*

IRS Prescribed Separate Mortality Table: RP-2000 projected to the valuation date plus 7 years for annuitants and 15 years for nonannuitants using projection scale AA.

Termination:

The probabilities that participants at the ages indicated will terminate within the following year are shown in Table A.

The termination rates in Table A are modified by the following factors based on employee service.

Service Years		<u>Factor</u>
<u>From</u>	<u>Less Than</u>	
0	3	2.000
3	4	1.750
4	5	1.500
5	6	1.250
6	N/A	1.000

Salary Scale:

The annual rates of salary increase vary by age and are shown in Table B.

Estimated Expenses:

The amount included this year for Administrative Expenses is \$193,352.

Retirement:*Active Participants:*

Retirement from active service occurs based on the following set of retirement age probabilities.

<u>Age</u>	<u>Rate</u>
55	6.0%
56-59	5.0%
60-64	15.0%
65	60.0%
66-69	40.0%
70	100.0%

The weighted average retirement age is 62.0.

Terminated Vested Participants:

Age 65

Form of Payment:

Account balance benefits are assumed to be paid as a lump sum. Transferred benefits from the Lockheed Salaried Plan are assumed to be paid as a life annuity.

Interest Credit:

5.50%

Survivor's Benefit:

It is assumed that husbands are three years older than wives and that 80% of the male Participants and 80% of the female Participants who are or will become eligible for coverage under the Spouse's Benefit will be survived by an eligible Spouse.

Costs have been computed in accordance with the Entry Age Normal Actuarial Cost Method and reflect the actuarial assumptions described in "Plan Assumptions" of this report.

Normal Cost

The Normal Cost is the annual cost of projected benefits for all employees who are eligible for funding. It is determined on a level percentage of payroll basis from Entry Age (the age at which an employee would have first been considered for funding assuming the plan had always been in effect) to assumed retirement age.

Actuarial Accrued Liability

The Actuarial Accrued Liability which represents the cost of the plan allocated to prior years is the total actuarial present value of all benefits payable under the plan less the actuarial present value of all future normal costs.

The Unfunded Actuarial Accrued Liability, which is used to determine the portion of each year's pension expense allocated to prior years, is the excess of the actuarial accrued liability over the actuarial value of assets.

Whenever significant changes in the plan or actuarial assumptions are adopted, the actuarial accrued liability is adjusted and the resulting increment is amortized over a fixed period of years. Gains or losses as a result of the actual experience of the plan differing from the expected experience under the actuarial assumptions are identified directly and amortized over a fixed period of years. Each increase in the unfunded actuarial accrued liability resulting from a funding method change is amortized over a fixed period of years.

Asset Valuation Method

Smoothed market value, where the actuarial value of assets equals the market value of assets plus a decreasing percentage [75.00%, 50.00%, 25.00%, & 0.00%] of the (gain)/loss in each of the preceding 4 years.

- Definitions:
- i assumed interest rate, set equal to the valuation investment return assumption
 - $C(t)$ sum of contributions and other additions to the fund from all sources other than investment transactions in Plan Year t
 - $W(t)$ sum of all withdrawals and other decreases to the fund from all sources other than investment transactions in Plan Year t
 - $I(t)$ expected investment earnings in Plan Year t
 - $AV(t)$ Actuarial Value of Assets as of Plan Year t
 - $MV(t)$ Market Value of Assets as of Plan Year t
 - $EV(t)$ Expected Value of Assets as of Plan Year t
 - $(G)/L(t)$ (Gain) or Loss for Plan Year t

Method: $AV(t)$ is determined as follows:

$$I(t-1) = MV(t-1) * i + [C(t-1) - W(t-1)] * (i^*p)$$

where i^*p represents a proportionate yield consistent with the portion of the year for which C and W are invested.

$$EV(t) = MV(t-1) + C(t-1) - W(t-1) + I(t-1)$$

$$(G)/L(t-1) = EV(t) - MV(t)$$

$$AV(t) = MV(t) + 75.00\% * (G)/L(t-1) + 50.00\% * (G)/L(t-2) + 25.00\% * (G)/L(t-3)$$

Corridor: $80\% MV(t) \leq AV(t) \leq 120\% MV(t)$

Normal Form of Annuity

Life Annuity.

Normal Retirement Date

The date the Participant attains age 65.

Participation Eligibility

Salaried Employees of LESC who have completed 2 years of service. Participants in Capital Accumulation Plan on the Effective Date are automatically eligible to participate.

Participation in the plan was frozen December 25, 1992; therefore there have been no new active participants since that date.

Account Credits

Account Credits were discontinued as of December 25, 1992.

Interest Credits

Annual rate equal to the average of the 6-month Treasury Bill yields in each of the last four weekly reporting periods ending in December of the previous plan year, plus 25 basis points, expressed as an equivalent 1-year bond yield. Accounts are credited with interest at the end of each month.

**Retirement Benefits
From Prior Plan**

Monthly benefits earned prior to 1981 under the Lockheed Retirement Plan for Certain Salaried Employees are transferred to this Plan, and are paid in accordance with provisions of the prior plan. Benefits are based on service to 12/24/80, but on final average earnings at termination or retirement date.

Income Payable

Amount described in section (a) or (b) below, whichever applies:

- a) If Participant is married as of his retirement date, income shall be paid on the basis of Joint and Survivor form, unless otherwise elected, as stipulated by ERISA, and will be the amount determined under the benefit formula multiplied by the appropriate factor.
- b) If Participant is not married as of his retirement date or elects to receive his income under the Normal Form, retirement income will be the amount determined under the benefit formula.

Early Eligibility

Attainment of age 55 and 10 years of Service.

Early Benefit Amount

An annual benefit payable prior to Normal Retirement, but on or after the Early Retirement Eligibility Date.

Actives and Terminated Vested

Benefits from the Account Balance plan are payable as an immediate lump sum upon termination or as an annuity determined by multiplying the Account Balance by the appropriate Immediate Annuity Conversion Factor.

Predecessor plan benefits are payable as a reduced immediate annuity according the provisions of the Lockheed Retirement Plan for Certain Salaried Employees as of March 31, 1999, or as a lump sum by multiplying the immediate annuity otherwise payable by the appropriate Immediate Annuity Conversion Factor.

Vesting Schedule

100% full and immediate vesting, regardless of age or service at termination.

Preretirement Spouse Benefit*A. Eligibility*

Non-married participant or married for less than 1 year.

Benefit Formula

100% of Account Balance Benefit.

B. Eligibility

Participant married for at least 1 year.

Benefit Formula

100% of Account Balance Benefit plus 50% of the lump sum value of the Prior Plan Benefit.

Vested Benefit

The Account Balance and Prior Plan benefits are payable as lump sums, immediate annuities or deferred annuities.

Changes in Pension Plan Provisions

No changes in the pension plan provisions were recognized with this actuarial valuation.

Legislated Changes

Effective with this valuation, the IRC Section 401(a)(17) Compensation Limit increased from \$230,000 to \$245,000, and the IRC Section 415 Benefit Limit increased from \$185,000 to \$195,000. These changes did not impact the Accrued Liability.

This plan is treated as an eligible government contractor plan as stipulated by Section 106 of the Pension Protection Act of 2006. Thus, the methodology employed to derive the Minimum Contribution has not changed from the prior year, with the exception of the RPA Current Liability basis.

Changes in Actuarial Assumptions

Effective with this valuation, the following actuarial assumption changes were recognized:

Prior

RPA Current Liability Rate	7.26% (1-month average, 1-month lookback)
RPA Current Liability Mortality Table	IRS Prescribed Separate Mortality Table for 2008

Current

RPA Current Liability Rate	6.82% (24-month average, 3-month lookback)
RPA Current Liability Mortality Table	IRS Prescribed Separate Mortality Table for 2009

Changes in Actuarial Cost Method

There were no changes to the actuarial cost method recognized with this valuation.
