2. Summary of Significant Accounting Policies:

Basis of Accounting - The accompanying financial statements are prepared on the accrual basis of accounting.

Use of Estimates - The preparation of financial statements in conformity with auditing principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

2. Summary of Significant Accounting Policies - Continued

Fair Value Measurements - The fair value measurement accounting literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority. Level 2 inputs consists of observable inputs other than quoted prices for identical assets, and Level 3 inputs have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 3 inputs were used only when Level 1 or 2 inputs were not available.

Level 1 Inputs - Fair values are based on quoted prices (unadjusted) in active markets for identical assets that the plan has the ability to access at the measurement date (e.g. prices derived from NYSE, NASDAQ or Chicago Board of Trade).

Level 2 Inputs - Fair values are based on inputs other than quoted price included within Level 1 that are observable for valuing the asset or liability, either directly or indirectly (i.e. interest rate and yield curves observable at commonly quoted intervals, default rates, etc.). Observable inputs include quoted price for similar assets or liabilities in active or non-active markets. Level 2 inputs may also include insignificant adjustments to market observable prices.

Level 3 Inputs - The guaranteed investment contract with an insurance company and participant loans are not actively traded and significant other observable inputs are not available. Thus, the fair value of the guaranteed investment contract is determined by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer. The fair value of participant loans approximates the amortized cost of the loans because the loans are secured by each respective participant's account balance.

The Manning & Napier Conservative, Extended, Moderate and Oppenheimer Developing Markets accounts each represent 5% or more of net assets available for benefits.

The following table provides further details of the Level 3 fair value measurements.

Investment Category	Beginning Balance	Total Gains or Losses	Interest Credited	Purchases Issuances Settlements	Ending Balance	Unrealized Gains or Losses
Guaranteed Interest Accounts	$1,728	$(78)	$62	$(1,712)	$ -	$ -

5. Amounts in Accounts of Terminated Participants:

At December 31, 2010, the Plan's net assets available for benefits included fully and partially vested amounts in accounts of terminated participants. These amounts are considered immaterial to total net assets.

6. Forfeited Accounts:

For the year ended December 31, 2010, there were $48 of forfeited nonvested accounts of withdrawing participants.

7. Tax Status:

The Plan obtained its latest determination letter on March 31, 2008, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. The Plan administrator and the Plan's tax counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability (or asset) if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.
