B. Summary of Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair market value. Quoted market prices and/or fair market value calculations are used to value investments. Shares of mutual funds are valued at the net asset value of shares held by the Plan. For a security or asset that is not listed on an exchange the trustee uses appraisals to determine fair market value. Participant loans are valued at their outstanding balance, which approximate fair value.

Purchases and sales of securities are recorded on a trade date basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid.

C. Investments

The following represents investments that are 5 percent or more of the plans net assets:

	2010
Elliott International Limited	$ 29,424,947

Elliott International Limited (the "Company") is an exempted company organized under the laws of the Cayman Islands.

D. Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue and terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100 percent vested in their account balances.

E. Tax Status

The Internal Revenue Service has determined and informed the Company by letters dated June 16, 1995, November 6, 2003 and July 8, 2010, that the Plan and related trusts are designed in accordance with applicable sections of the Internal Revenue Service Code (IRC).

F. Risks and Uncertainties

The Plan invested in various investment securities. Investment securities are exposed to risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.
