INDEPENDENT AUDITORS' REPORT

To the Participants and Plan Administrator of the
Schlumberger Savings and Profit Sharing Plan for
U.S. Taxpayers Employed Abroad (formerly
Schlumberger Profit Sharing Plan for Citizens of the
United States of America Employed Abroad)

We have audited the accompanying statements of net assets available for benefits of the Schlumberger Savings and Profit sharing Plan for U.S. Taxpayers Employed Abroad (formerly Schlumberger Profit Sharing Plan for Citizens of the United States of America Employed Abroad) (the "Plan") as of December 31, 2010 and 2009, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2010 and 2009, and the changes in net assets available for benefits for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2010 and the supplemental schedule of delinquent participant contributions for the year then ended are presented for the purpose of additional analysis and are not a required part of the basic financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

NOTES TO FINANCIAL STATEMENTS

Note 1 - Description of the Plan

The following brief description of the Schlumberger Savings and Profit Sharing Plan for U.S. Taxpayers Employed Abroad (formerly Schlumberger Profit Sharing Plan for Citizens of the United States of America Employed Abroad) (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of Plan provisions.

General

The Plan is a defined contribution plan covering all full-time employees of Schlumberger Limited, Schlumberger Surenco, S.A., Schlumberger Overseas, S.A., and other affiliated companies outside the U.S. (collectively the "Company") who work outside the U.S. and have met certain requirements, including U.S. citizenship and length of service. It is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

The Plan is administered by an Administrative Committee, which is appointed by the Board of Directors of the Company in accordance with certain provisions of the plan document and is a named fiduciary under the provisions of Section (3)(21) of ERISA. The Administrative Committee, which normally consists of at least three persons, is responsible for general administration of the Plan.

The Finance Committee is appointed by the Board of Directors of Schlumberger Limited in accordance with certain provisions of the Schlumberger Master Profit Sharing Trust (the "Trust") agreement and is a named fiduciary under the provisions of Section (3)(21) of ERISA. The Finance Committee communicates to The Northern Trust Company (the "Trustee") the funding policies and methods which have been established to carry out the objectives of the Plan.

In the event of the Plan's withdrawal from the Trust, the Trustee shall set apart that portion or equitable share of the Trust allocated to participants in the Plan pursuant to a valuation and allocation of the Trust by the Trustee, subject to approval by the Finance Committee.

Effective January 1, 2010, the Board of Directors of Schlumberger Limited approved changing the name of the plan to Schlumberger Savings and Profit Sharing Plan for U.S. Taxpayers Employed Abroad.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2010 AND 2009

Note 1 - Description of the Plan (cont'd)

Eligibility

Each employee is eligible to become a participant in the Plan on the first day of the month following completion of twelve months of active service. An employee who is (a) covered by a collective bargaining agreement which does not provide for participation in this Plan and under which retirement benefits were the subject of good faith bargaining, (b) a non-resident alien who receives no earned income from the employer which constitutes income from sources within the United States, (c) a leased employee providing services for the employer, or (d) designated, compensated or otherwise classified or treated as an independent contractor or leased employee by the employer or any affiliate, shall not be eligible to participate in the Plan.

Contributions

Effective January 1, 2006, the Plan was amended to permit an eligible employee to voluntarily contribute up to 6% of admissible compensation, as defined by the Plan, to the Plan, subject to certain limitations set forth in the Internal Revenue Code ("IRC"). Effective January 1, 2010, the Plan was amended so that participants may defer, as their pretax savings contributions, any whole percentage of their admissible compensation, as defined by the Plan, from a minimum of 1% to a maximum of 15% for highly compensated employees and 20% for non-highly compensated employees, subject to certain limitations set forth in the IRC. Company profit sharing contributions are discretionary, and, when added together with the basic matching contribution and supplemental matching contribution, may not exceed 15% of admissible compensation of the participating employees. Employees age 50 and older may elect to contribute a catch-up contribution. The limit set by the Internal Revenue Service ("IRS") for catch-up contributions during 2010 and 2009 was \$5,500.

Vesting

Participants are immediately vested in their voluntary contributions plus actual earnings thereon. A participant is 100% vested in Company contributions plus actual earnings thereon at termination of employment.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2010 AND 2009

Note 1 - Description of the Plan (cont'd)

Participant accounts

Each participant's account is credited with the participant's contribution and an allocation of the Company's contribution and Plan earnings. Allocations are based on participant admissible compensation or account balances, as defined in the Plan document. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Distributions

Distributions to deceased, retired or terminated participants are made based upon the participants' account balances and their vested interest therein at the time of withdrawal from the Plan.

Note 2 - Summary of significant accounting policies

Basis of accounting

The accompanying financial statements of the Plan are prepared under the accrual basis of accounting.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan's management to make estimates and assumptions that affect certain reported amounts and disclosures in the Plan's financial statements. Accordingly, actual results could differ from those estimates.

Valuation of investments

The Plan has an allocable interest in the net assets of the Trust which serves as the investing medium for this Plan and certain other plans of Schlumberger Limited and its affiliates. The Plan's interest in the Trust is stated at fair value, as determined by the Trustee, and consists of an allocation of the Trust's net assets that is based upon cumulative employer and employee contributions, net of benefits paid to terminated and retired participants, and allocations of Trust's investment income.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2010 AND 2009

Note 2 - Summary of significant accounting policies (cont'd)

Valuation of investments (cont'd)

The Trust owns a proportionate share of the net asset value of the Schlumberger Group Trust (the "Group Trust") which, in 2009, invested in a fully benefit-responsive investment contract that was 100% allocable to the Trust. Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The statement of net assets available for benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contract from fair value to contract value, if deemed necessary. The statement of changes in net assets available for benefits is prepared on a contract value basis. As of December 31, 2009, the Trust has liquidated its entire interest in the fully benefit-responsive investment contract.

The Plan follows the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820, "Fair Value Measurement." Under FASB ASC Topic 820, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date.

FASB ASC Topic 820 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are as described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;

Valuation of investments (cont'd)

- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Plan. Unobservable inputs are inputs that reflect the Plan's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Changes in economic conditions or valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. See Notes 5 and 6 for the disclosures required by FASB ASC Topic 820 with regard to Plan investments.

A fair value measurement is for a particular asset or liability. The unit of account determines what is being measured by reference to the level at which the asset or liability is aggregated (or disaggregated) for purposes of applying other accounting pronouncements. Accordingly, because the Plan does not hold shares of the Trust, the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under the Trust and are not required for the Plan's total interest in the Trust. In the same manner, the disclosures required by FASB ASC Topic 820 are required for the individual investments included in the self-directed investments. Similarly, since the Trust does not hold shares of the Group Trust, the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under the Group Trust and are not required for the Trust's total interest in the Group Trust. Likewise, since the Group Trust does not own shares of the different investment pools which are disclosed in

Note 2 - Summary of significant accounting policies (cont'd)

Valuation of investments (cont'd)

Note 6, the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under each investment pool and are not required for the Group Trust's total interest in each of the investment pools.

In determining the fair value of assets and liabilities underlying the Trust, Group Trust and the investment pools owned by the Group Trust, the Trust and Group Trust use various inputs and valuation methodologies which are described in Notes 5 and 6. There have been no significant changes in the inputs or valuation methodologies used at December 31, 2010 and 2009.

Income taxes

The Plan evaluates each tax position individually using the recognition and measurement criteria established in FASB ASC Topic 740 "Income Taxes." That is, first, the Plan recognizes the financial statement benefit of a tax position if it determines that it is more likely than not (i.e., a likelihood of more than 50 percent), based on the technical merits, that the position will be sustained on examination. Then, the Plan measures the amount of benefit derived from such tax position as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement. The difference between a tax position taken or expected to be taken in a tax return and the tax benefit recognized and measured according to the aforementioned criteria is an unrecognized tax benefit for which a liability is created (and an expense is recorded). The Plan classifies interest and penalties associated with the liability for unrecognized tax benefits as income tax expense. The Plan is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2007.

Relevant accounting developments

In August 2009, the FASB issued ASU No. 2009-05, "Measuring Liabilities at Fair Value." ASU No. 2009-05 provides clarification that in circumstances in which a quoted price in active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the following techniques: a) the quoted price of the identical liability when traded as an asset, b) quoted prices for similar liabilities when traded as assets, c) another valuation technique that is consistent with the principles of FASB ASC Topic 820. The adoption of the provisions of ASU No. 2009-05, as incorporated into FASB ASC Topic 820, as of January 1, 2010, did not have an impact on the Plan's financial statements.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2010 AND 2009

Note 2 - Summary of significant accounting policies (cont'd)

Relevant accounting developments (cont'd)

In January 2010, the FASB issued Accounting Standards Update (“ASU”) No. 2010-06, “Improving Disclosures About Fair Value Measurements.” ASU No. 2010-06 requires a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfers. ASU No. 2010-06 also requires a reporting entity to disclose separately, in the reconciliation for Level 3 fair value measurements, information about purchases, sales, issuances, and settlements. In addition, it clarifies existing disclosures about fair value measurements by requiring that such disclosures be made for each class of assets and liabilities. Finally, this accounting standard update clarifies that the disclosures about the valuation techniques and inputs used to measure fair value are required for fair value measurements that fall in either Level 2 or 3. The new disclosures and clarifications of existing disclosures are effective for the Plan annual periods beginning January 1, 2010, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements, which are effective for the Plan annual periods beginning January 1, 2011. The adoption of the provisions, effective January 1, 2010, of ASU No. 2010-06, as incorporated into FASB ASC Topic 820, did not have an impact on the Plan’s financial statements. The adoption of the provisions effective beginning January 1, 2011 will require additional detailed disclosures in the reconciliation for Level 3 fair value measurements.

In May 2011, the FASB issued ASU No. 2011-04, “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs.” ASU No. 2011-04 was issued to provide a consistent definition of fair value between accounting principles generally accepted in the United States of America (“U.S. GAAP”) and International Financial Reporting Standards (“IFRSs”). This pronouncement is effective for reporting periods beginning on or after December 15, 2011, with early adoption prohibited. Plan management currently is evaluating the impact of the adoption of ASU No. 2011-04 on the Plan’s financial statements.

Risks and uncertainties

Due to various risks (i.e., interest rate, market and credit risk) associated with certain investments of the Trust and Group Trust, and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in the values of the investments of the Trust and Group Trust will occur in the near term, and this could materially affect participants’ account balances as well as the value of the Plan interest in the Trust and the corresponding investment income reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits, respectively.

Note 2 - Summary of significant accounting policies (cont'd)

Risks and uncertainties (cont'd)

The Trust and Group Trust invest in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage-backed securities. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

Expenses

Expenses incurred in the administration of the Plan, except expenses relating to securities transactions, are absorbed by the Company. Expenses are allocated to the Plan through its participation in the Trust.

Benefit payments

Benefit payments are recorded when paid.

Note 3 - Plan termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the terms of ERISA. In the event of Plan termination, participants will become 100% vested in their accounts.

Note 4 - Tax status

The Plan and Trust are exempt from taxation under the applicable sections of the IRC and have obtained a favorable tax determination letter on April 11, 2008 from the IRS. Plan management and tax counsel believe that the Plan, as amended, continues to qualify and to operate as designed.

Note 5 - Interest in the Schlumberger Master Profit Sharing Trust

The Plan's investments during December 31, 2010 and 2009 were entirely in the Trust. The Trust was established for the investment of assets of the Plan and other qualified profit sharing plans sponsored by Schlumberger Limited and its affiliates. Each participating plan has an allocable interest in the Trust. The assets of the Trust are held by the Trustee. At December 31, 2010 and 2009, the Plan's interest in the net assets of the Trust was 3.06% (\$84.1 million) and 3.03% (\$73.8 million), respectively. Investment income and securities transaction expenses relating to the Trust are allocated to the individual plans based upon average monthly balances invested by each plan. The plans' balances reflect transfers to and from the individual plans as well as the plans' share of investment income.

The following table presents the investments of the Trust:

Note 5 - Interest in the Schlumberger Master Profit Sharing Trust (cont'd)

The following tables set forth a summary of changes in the fair value of the Trust's Level 3 assets for the years ended December 31, 2010 and 2009:

(dollars in thousands)

	<u>Common stocks and other equities</u>
Balance, December 31, 2009	\$ 7

Purchases, sales, issuances, and settlements (net)	<u>(13)</u>	<u>(20)</u>
Balance, December, 31, 2009	<u><u>\$ 7</u></u>	<u><u>\$ -</u></u>

For the year ended December 31, 2009, unrealized gains from Level 3 assets are reported in net appreciation in fair value of investments in the statement of changes in net assets of the Trust.

Valuation of investments

The Trust interest in the Group Trust is stated at fair value, as determined by the Trustee, which consists of an allocation of the Group Trust's net assets that is based on amounts contributed by the Trust, and a certain other trust and plan of Schlumberger Limited and its affiliates, net of distributions, that are invested by the Group Trust, and on a respective allocation of investment income and certain administrative expenses.

DECEMBER 31, 2010 AND 2009

Note 5 - Interest in the Schlumberger Master Profit Sharing Trust (cont'd)

Valuation of investments (cont'd)

Cash and cash equivalents are stated at fair value. Cash equivalents include highly liquid investments that are within three months of maturity when acquired, money market funds, and short-term investment funds. Money market funds are valued at fair value based on quoted prices in active markets. Short-term investment funds are stated using a constant price (or amortized cost) of \$1 per unit of participation, which approximates fair value. Other cash equivalents are valued on the basis of a bid evaluation or at amortized cost, which approximates fair value.

Common stocks and most of other equities are stated at fair value, as determined by closing quoted market prices in active markets in which the securities are traded. Certain other equity investments are valued at fair value based on mid prices (i.e., the average of the bid and ask prices).

Mutual funds and other registered investment companies are stated at fair value. Mutual funds are valued at quoted market prices (available to institutions and retail clients) which represent the net asset value of shares owned by the Trust at year-end. Certain other registered investment companies are valued based on the net asset value of the units owned by the Trust at year-end as determined by the investment manager of the other registered investment companies based on the fair value of the underlying investments of the other registered investment companies. Exchange traded funds, also considered to be other registered investment companies, are valued at quoted market prices, which may not represent the net asset value of the units owned by the Trust at year-end.

Corporate bonds and other fixed income obligations consist primarily of investment grade bonds from diversified industries. Corporate bonds and other fixed income obligations are stated at fair value. Certain corporate bonds and other fixed income obligations are valued based on a bid evaluation while others are valued based on mid and bid prices (i.e., a bid price represents a price a dealer is ready to pay for a security). Oftentimes, bid evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

NOTES TO FINANCIAL STATEMENTS

Note 5 - Interest in the Schlumberger Master Profit Sharing Trust (cont'd)

Valuation of investments (cont'd)

Government and other related bonds are comprised primarily of inflation protected U.S. treasuries, and to a lesser extent, other government-related securities (e.g., government agency obligations, municipal, and provincial bonds). Government and other related bonds are stated at fair value. Government and other related bonds, other than for those which have quoted market prices available, are valued based on a bid evaluation (i.e., an estimated price at which a dealer would pay for a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Other short-term securities are valued at amortized cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The disclosures required by FASB ASC Topic 820 are not required for accrued income.

Securities transactions and investment income

Net appreciation or depreciation in fair value of investments includes realized gains or losses on investments sold and unrealized gains or losses on investments held. Unrealized gains or losses on investments represent the change in the difference between the cost and fair value of investments at the end of the year and at the beginning of the year.

Purchases and sales of securities are recorded on a trade-date basis. Gains or losses on securities transactions are recorded as the difference between proceeds received and cost, with cost determined on the moving average basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2010 AND 2009

Note 6 - Interest in the Schlumberger Group Trust

A portion of the Trust's investments are invested in the Group Trust. The Group Trust serves as the investing medium for the Trust and a certain other trust and plan of Schlumberger Limited and its affiliates. Each participating trust and plan has an allocable specific interest in the Group Trust. The assets of the Group Trust are held by the Trustee. At December 31, 2010 and 2009, the Trust's interest in the net assets of the Group Trust was approximately 50.22% (\$2.592 billion) and 51.34% (\$2.294 billion), respectively. Investment income and certain administrative expenses relating to the Group Trust are allocated to the individual trusts and plan based upon average monthly balances invested by each trust and plan in the underlying pooled investments of the Group Trust. Other administrative expenses are allocated to each trust and plan based on the specific services provided to them. The trusts' and plan's balances reflect transfers to and from the individual trusts and plan as well as the trusts' and plan's share of investment income.

At December 31, 2010 and 2009, the Trust's interest in the Group Trust investments was approximately as follows:

	2010	2009
U.S. Equities and Equity Index	48.12%	50.40%
Non-U.S. Equities	43.07%	46.37%
Fixed Income - Short Term	90.66%	84.27%

Valuation of investments and financial liabilities

Cash and cash equivalents are stated at fair value. Foreign currency included in cash is translated using closing spot rates of exchange. Cash equivalents include repurchase agreements, U.S. Treasury bills and other highly liquid investments that are within three months of maturity when acquired, and short-term investment funds. Repurchase agreements are valued at amortized cost, which approximates fair value. U.S. government securities and government agency obligations included in cash equivalents are stated at fair value based on a bid evaluation. Short-term investment funds are stated using a constant price (or amortized cost) of \$1 per unit of participation, which approximates fair value. Other cash equivalents are valued on the basis of a bid evaluation or at amortized cost, which approximates fair value.

Equity securities include U.S. and international equity securities. U.S. equities include companies that are well diversified by industry sector and equity style (i.e., growth and value strategies). Active and passive management strategies are employed. Investments are primarily in large capitalization stocks and, to a lesser extent, mid-and small-cap stocks. International equities are invested in companies that are traded on exchanges outside the U.S. and are well diversified by industry sector, country and equity style. Active and passive strategies are employed. The vast majority of the investments are made in companies in developed markets with a small percentage in emerging markets.

For common stocks and other equities, corporate bonds and other fixed income obligations, government and other related bonds, and other short-term securities, the Group Trust valuation is similar to the Trust valuation (see Note 5).

Mutual funds and other registered investment companies are stated at fair value. Mutual funds are valued at quoted market prices (available to institutions and retail clients) which represent the net asset value of shares owned by the Group Trust at year-end. Certain other registered investment companies are valued based on the net asset value of the units owned by the Group Trust at year-end as determined by the investment manager of the other registered investment companies based on the fair value of the underlying investments of the other registered investment companies. Exchange traded funds, also considered to be other registered investment companies, are valued at quoted market prices, which may not represent the net asset value of the units owned by the Group Trust at year-end. Other registered investment companies include an open-end interval management investment fund that offers its shareholders the

opportunity to purchase and redeem shares on a periodic basis. The fund seeks long-term growth of capital and invests primarily in common stock and other equity securities of issuers in developing countries. The fund redeems its shares at monthly interval and accepts redemption request at anytime (prior to close of business on the first business day of each month). Redemption from the fund is subject to the fund's open-end interval fund liquidity policy.

Collective and other trusts are stated at fair value, represented by the net asset value of the units of participation owned by the Group Trust at year end as determined by the trustees of the collective and other trusts based on the fair value of the underlying investments of the collective and other trusts. The primary objectives of the collective and other trusts are to (1) achieve long-term growth of capital principally by investing in the equity securities of smaller, growing companies; and (2) approximate the risk and return characteristics of market indexes, such as the Russell 1000 Growth Index or the Standard & Poor's 500 Composite Stock Price Index. These indexes are commonly used to represent the large cap segment of the U.S. equity market with a focus on the "growth" style of investing. The overall collective and other trusts' redemption frequency is daily and there is no redemption notice period required, except for one of the trusts which has notification deadline of one day. One of the trusts is subject to withdrawal safeguards and another trust is subject to anti-dilution measures, wherein any flow in or out of the trust that exceeds 2% of the total net assets of the trust must use a transition account so as not to adversely affect other investors in the trust.

Government mortgage-backed securities and other collateralized obligations are debt obligations that represent claims to the cash flows from pools of credit cards, auto loans and mortgage loans which are purchased from banks, mortgage companies, and other originators and then assembled into pools by governmental, quasi-governmental and private entities. Government mortgage-backed securities and other collateralized obligations are stated at fair value. Government mortgage-backed securities and other collateralized obligations are valued based on a bid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

The GIC is stated at fair value, represented by the net asset value as determined by the insurance company, of the underlying investments in the separate account. The GIC's fair value approximates its contract value. The GIC is 100% allocable to the Trust.

Valuation of investments and financial liabilities (cont'd)

Asset derivatives include options, swaps, swaptions and pending foreign exchange purchases. Derivatives are stated at fair value. Exchange traded options and futures are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange purchases are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued based on a mid evaluation (i.e., the average of the estimated prices at which a dealer would pay for and sell a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Short-term securities under security lending program represent short-term investments purchased with proceeds from cash collateral received from borrowers of the Group Trust's securities. Short-term securities under the security lending program are valued at cost, which approximates fair value.

Liability derivatives (which include options, swaps, and pending foreign exchange sales) and other liabilities are stated at fair value. Exchange traded options are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange sales are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued on the basis of a mid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks. Other liabilities are valued at cost which approximates fair value.

The obligation under security lending agreement represents amounts due to borrowers of Group Trust's securities for the cash collateral received from them. The amount due approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Group Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 6 - Interest in the Schlumberger Group Trust (cont'd)

Valuation of investments and financial liabilities (cont'd)

The disclosures required by FASB ASC Topic 820 are not required for due from brokers for securities sold, due to brokers for securities purchased and accrued income and other assets.

Securities transaction and investment income

Net appreciation or depreciation in fair value of investments includes realized gains or losses on investments sold and unrealized gains or losses on investments held. Unrealized gains or losses on investments represent the change in the difference between the cost and fair value of investments at the end of the year and at the beginning of the year.

Purchases and sales of securities are recorded on a trade-date basis. Gains or losses on securities transactions are recorded as the difference between proceeds received and cost, with cost determined on the moving average basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

Derivative financial instruments

The Group Trust enters into various derivative financial instruments in carrying out its investment strategy, principally to: (1) hedge a portion of the Group Trust's portfolio to limit or minimize exposure to certain risks such as foreign exchange risk, interest rate risk, credit risk, and equity risk, (2) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or by capturing value disparities between financial instruments.

Forward foreign exchange contracts are used to protect the Group Trust against the exchange risk associated with the Group Trust's investment in common stock and fixed income obligations denominated in foreign currency because the Group Trust is able to secure an exchange rate in the present for settlement at a future date. The terms of these contracts generally do not exceed one year. Risks in forward foreign exchange contracts arise from the possible inability of counterparties to meet the contract's terms and from movements in currency values. The Group Trust does not anticipate non-performance by counterparties to these contracts, and no material loss would be expected from any such non-performance. Procedures are in place to regularly monitor and report market and counterparty credit risk associated with these instruments.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2010 AND 2009

Note 6 - Interest in the Schlumberger Group Trust (cont'd)

Derivative financial instruments (cont'd)

The Group Trust reflects the fair value of all forward contracts as an asset (forward contracts to purchase foreign currency) or liability (forward contracts to sell foreign currency) in the Group Trust's statement of net assets. The change in value of these forward exchange contracts is included as unrealized gains or losses in the changes in Group Trust net assets. When the forward exchange contract is closed, the Group Trust transfers the unrealized appreciation or depreciation to a realized gain or loss equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Unrealized and realized gains and losses are included in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

Interest rate contracts such as fixed income futures, interest rate swaps, and option premiums are used to manage the interest rate risk.

The Group Trust enters into fixed-income futures contracts in the normal course of its investment activities to reduce the interest rate risk associated with its fixed-income investments, to replicate government bond positions, and as a duration management tool to enhance portfolio returns.

Upon entering into a fixed-income futures contract, the Group Trust is required to pledge to the broker an amount of cash and/or liquid securities equal to the minimum "initial margin" requirements of the exchange. Pursuant to the futures contract, the Group Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which is settled daily and is included in net appreciation (depreciation) in the changes in Group Trust net assets. The Group Trust records a variation margin receivable or payable in the Group Trust's statement of net assets for valuation margins which have not been received or paid at the end of the year. Fixed-income futures contracts are not included in the Group Trust's statement of net assets as cash settlements are made daily.

The risk of counterparty non-performance associated with the use of fixed-income futures is considered to be modest as performance is assured by the futures exchanges, which provide multiple layers of protection, such as the collection of variation margin on a daily basis and the use of standardized contracts to facilitate liquidity.

Note 6 - Interest in the Schlumberger Group Trust (cont'd)

Interest rate swaps are used to adjust interest rate and yield curve exposures and as a substitute for physical securities. Swap agreements involve the exchange by the Group Trust with a counterparty of the respective commitments to pay or receive interest with respect to a notional amount of principal. Market risk of loss is limited to changes in the fair value from December 31 of each year presented through the applicable expiration date. Long swap positions increase exposure to long-term interest rates while short positions decrease exposure.

The Group Trust reflects the fair value of all interest rate swaps as an asset or liability in the Group Trust's statement of net assets. Gains or losses on interest rate swaps are accounted in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

The Group Trust may buy or write put and call options through listed exchanges and in the over-the-counter ("OTC") market. When the Group Trust buys or writes an option, an amount equal to the premium paid or received by the Group Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. The premiums paid or received from buying or writing options are recorded as realized gains or losses upon the expiration of the options. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction also is treated as a realized gain or loss. If an option is exercised, the premium paid or received is recorded as a realized gain or loss if sold or an adjustment to cost if acquired. The Group Trust, as a writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and as a result bears the market risk of an unfavorable change in the price of the security underlying the written option. Options to purchase and sell fixed income securities and swaptions are used to manage interest rate and volatility exposure, while credit spreads are used to manage credit risk. Options will become worthless at expiration if the underlying instrument does not reach the strike price of the option.

NOTES TO FINANCIAL STATEMENTS

Note 6 - Interest in the Schlumberger Group Trust (cont'd)

Derivative financial instruments (cont'd)

Credit default swaps ("CDS") are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure ("selling protection"), obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure ("buying protection"), providing the right to "put" bonds to the counterparty in the event of a default. CDS agreements involve one party making a stream of payments (referred to as the buyer of protection) to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Group Trust will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Group Trust would effectively add leverage to its portfolio because, in addition to its total net assets, the Group Trust would be subject to investment exposure on the notional amount of the swap.

If the Group Trust is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Group Trust is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

The Group Trust may use credit default swaps on corporate issues, sovereign issues of an emerging country or U.S. municipal issues to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Group Trust owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default. The Group Trust also may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

The maximum potential amount of future payments (undiscounted) that the Group Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Group Trust for the same referenced entity or entities.

The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on December 31, 2010 and 2009 was \$ 1,097,757 and \$1,335,132, respectively.

The Group Trust reflects the fair value of all CDS as an asset or liability in the Group Trust's statement of net assets. Gains or losses on CDS are accounted in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

Securities lending

Pursuant to the investment objectives of the Group Trust, stock loan transactions are permitted with the objective of adding investment income to the Group Trust. The Group Trust may lend securities held to unaffiliated broker-dealers registered under the Securities Exchange Act of 1934, or banks organized in the United States of America through the Group Trust's participation in the Trustee's securities lending program. At all times, the borrower must maintain cash or equivalent collateral equal in value to at least 100 percent of the value of the securities loaned. The cash collateral generally is invested in short-term securities which generate income that is allocated between the security lending agent and the Group Trust at predetermined contractual rates. The primary risk in lending securities is that a third-party borrower may default during a sharp rise in the price of the security that was borrowed, resulting in a deficiency in the collateral posted by the third-party borrower. The Group Trust seeks to minimize this risk by requiring that the market value of the loaned securities is recomputed each
