INDEPENDENT AUDITORS' REPORT

To the Trustees and Participants of
the ITT Salaried Retirement Plan:

We have audited the accompanying statements of net assets available for benefits of the ITT Salaried Retirement Plan (the "Plan") as of December 31, 2010 and 2009, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2010, and the changes therein for the year then ended and its financial status as of December 31, 2009, and the changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Notes 3 and 6 to the financial statements, the Plan holds a proportionate share of a Master Trust which includes investments valued at \$2.0 billion (44.4% of total assets) and \$1.9 billion (44.2% of total assets) as of December 31, 2010 and 2009, respectively, whose fair values have been estimated by management in the absence of readily determinable fair values. Management's estimates are based on their financial analysis of the investment, including information provided by the investment manager.

ITT SALARIED RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2010 AND 2009 (In thousands)

1. DESCRIPTION OF THE PLAN

The following description of the ITT Salaried Retirement Plan (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General — The Plan is a defined benefit plan where salaried employees of ITT Corporation (the “Company” or “Plan Sponsor”) with at least one year of service and who are at least age 21 are eligible to participate. Retirement income is provided through a percentage formula using final average compensation, benefit service and an adjustment for Social Security. A summary description of the Plan is contained in the Summary Plan Description which has been distributed to participants and filed with the Department of Labor.

Under a trust agreement dated July 1, 1977, The Northern Trust Company (the “Trustee” or “Northern Trust”) serves as trustee of the Plan and administers the Plan’s investment assets. The Plan’s assets consist of an undivided interest in an investment account of the Investment Master Trust of ITT Corporation (the “Master Trust”), EIN 36-6668234, a master trust established by the Company and administered by the Trustee. The Master Trust includes the combined assets of the Plan as well as several other employee benefit plans of the Company. A schedule of Master Trust assets has been filed with the U.S. Department of Labor and includes the Plan’s proportionate share of such assets at December 31, 2010 and 2009.

Effective January 1, 1997, the Plan was amended to include a medical-benefit component in addition to the normal retirement benefits to fund a portion of the postretirement obligations of the ITT Corporation Salaried Medical and Dental Plan in accordance with Section 401(h) of the Internal Revenue Code (“IRC”). A separate account has been established and maintained in the Plan for the net assets related to the medical benefit component (“401(h) account”). In accordance with IRC Section 401(h), the Plan’s investments in the 401(h) account may not be used for, or diverted to, any purpose other than providing health benefits for retirees and their beneficiaries. The related obligations for health benefits are not included in the Plan’s obligations, but are reported as obligations in the financial statements of the ITT Corporation Salaried Medical and Dental Plan.

Use of the Master Trust permits the commingling of trust assets with the assets of certain other Company pension plans for investment and administrative purposes. Although assets of the Plan are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain (loss) of the investment account to the participating plans. The net investment income (loss) of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

Pension Benefits — Participants are eligible for monthly benefit payments upon reaching age 65. The normal monthly benefit payments are determined by multiplication of the participant’s final average compensation by a benefit rate, which depends upon the period of credited service, by the total number of years of credited service, not to exceed 40 years.

Participants are eligible to receive early retirement benefits between the ages of 55 and 65 upon the completion of 10 years of service. Early retirement benefits are computed in a manner similar to normal retirement at age 65, except that they are reduced by certain factors, as outlined in the Plan document, for each month that the early retirement date precedes the normal retirement date.

Death and Disability Benefits — A married employee who is a vested participant is automatically covered by the vested spouse's benefit which provides for spousal survivorship benefits in the event of the employee's death prior to becoming eligible for early or normal retirement benefits. Also, a participant who is eligible for early or normal retirement is automatically covered by a pre-retirement survivor's benefit which provides for survivorship benefits payable to the participant's named beneficiary in the event of the participant's death prior to benefit commencement date.

An employee who becomes totally and permanently disabled and is eligible to receive Social Security Disability Benefits will continue to earn benefit credits under the Plan.

Contributions — Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan annually not less than the minimum required by applicable law and regulations.

Plan Amendments — Effective January 1, 2010 the Plan was amended to reflect certain provisions of the Heroes Earnings Assistance and Relief Tax Act of 2008 (the "HEART Act") and the Worker, Retiree, and Employer Recovery Act of 2008 ("WRERA").

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting — The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates, Risks and Uncertainties — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein. Actual results could differ from these estimates. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Further, the Plan's valuation methods may produce a fair value estimate that may not be indicative of net realizable value or reflective of future fair values. While the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to estimate fair value could result in a different measure of fair value at the measurement date which could materially affect the amounts reported in the financial statements.

Income Recognition — Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Valuation of Investments (Master Trust Fund) — The Plan's interest in the Investment Master Trust of ITT Corporation, a master trust established by the Company and administered by the Trustee is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust.

Administrative Expenses — Administrative expenses of the Plan are paid by the Master Trust on behalf of the Plan, as provided in the Plan document and the Master Trust agreement. The Plan Sponsor provides accounting and other administrative services to the Plan and Master Trust at no charge.

Payment of Benefits — Benefit payments to participants are recorded upon distribution.

Recent Accounting Standards — In May 2011, the Financial Accounting Standards Board ("FASB") issued guidance intended to achieve common fair value measurements and related disclosures between U.S. GAAP and international accounting standards. The amendments primarily clarify existing fair value guidance and therefore the amendments are not intended to change the application of existing fair value measurement guidance. However, the amendments include certain instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This guidance is effective for the periods beginning after December 15, 2011 and early application is prohibited. The requirements are not expected to have a material effect on the Plan's fair value measurements.

3. FAIR VALUE MEASUREMENTS

The Plan's investments are measured at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price).

In measuring Plan assets at fair value, a fair value hierarchy is applied which categorizes and prioritizes the inputs used to estimate fair value into three levels. The fair value hierarchy is based on maximizing the use of observable inputs and minimizing the use of unobservable inputs when measuring fair value. Classification within the fair value hierarchy is based on the lowest level input that is significant to the fair value measurement. The three levels of the fair value hierarchy are defined as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices (in non-active markets or in active markets for similar assets or liabilities), inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the assets or liabilities.

In certain instances, fair value is estimated using quoted market prices obtained from an external pricing service. In obtaining such data from the pricing service, the Plan has evaluated the methodologies used to develop the estimate of fair value in order to evaluate whether such valuations are representative of fair value, including net asset value ("NAV"). Additionally, in certain circumstances, the Plan may adjust NAV reported by an asset manager when sufficient evidence indicates NAV is not representative of fair value.

In September 2009, the FASB provided investors with a practical expedient for measuring the fair value of investments in certain entities that calculate NAV. The Plan adopted this guidance for the year ended December 31, 2010; however, application of the practical expedient did not have a material effect on the Plan's fair value measurements.

The following is a description of the valuation methodologies used for the Master Trust and inputs used to measure fair value for major categories of investments in the Master Trust.

- *Equity securities* — Equities (including common and preferred shares, domestic listed and foreign listed, closed end mutual funds and exchange traded funds) are generally valued at the closing price reported on the major market on which the individual securities are traded at the measurement date. As all equity securities held by the Master Trust are publicly traded in active markets, the securities are classified within Level 1 of the fair value hierarchy.
- *Open ended mutual funds, common collective trusts (“CCTs”) and commingled funds* — Open ended mutual funds, collective trusts and commingled funds are measured at NAV. These funds are generally classified within Level 2 of the fair value hierarchy.
- *Private equity* — The valuation of limited partnership interests in private equity funds may require significant management judgment. The NAV reported by the asset manager is adjusted when management determines that NAV is not representative of fair value. In making such an assessment, a variety of factors are reviewed by management, including, but not limited to, the timeliness of NAV as reported by the asset manager and changes in general economic and market conditions subsequent to the last NAV reported by the asset manager. These funds are generally classified within Level 3 of the fair value hierarchy.
- *Absolute return (hedge funds)* — The valuation of limited partnership interests in hedge funds may require significant management judgment. The NAV reported by the asset manager is adjusted when management determines that NAV is not representative of fair value. In making such an assessment, a variety of factors are reviewed by management, including, but not limited to, the timeliness of NAV as reported by the asset manager and changes in general economic and market conditions subsequent to the last NAV reported by the asset manager. Depending on how quickly the Master Trust can redeem these investments and the extent of any adjustments to NAV, hedge funds are classified within either Level 2 (redeemable within 90 days) or Level 3 (redeemable beyond 90 days) of the fair value hierarchy.
- *Fixed income* — U.S. government securities are generally valued using quoted prices of securities with similar characteristics. Corporate bonds and notes are generally valued by using pricing models (e.g. discounted cash flows), quoted prices of securities with similar characteristics or broker quotes. Fixed income securities are generally classified in Level 2 of the fair value hierarchy.

The following tables sets forth by level within the fair value hierarchy a summary of the Master Trust's investments measured at fair value on a recurring basis at December 31, 2010 and 2009:

- (a) As of December 31, 2010, it was probable that certain funds would be redeemed at a value other than NAV due to pending sales in the secondary market. As a result, the funds were measured based on evidence of the price a market participant would pay in an orderly transaction. As there were no significant unobservable inputs in determining fair value, these funds were reclassified from Level 3 to Level 2.

- (a) Private equity buyout funds are partnership investment vehicles that take a controlling interest primarily in private companies with the intent of developing them for future sale at a higher price to a strategic or financial buyer or through an initial public offering. These investments include \$498,543 where ownership of the partnership interest is directly held and \$416,573 invested through funds of private equity funds. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next three to 12 years.
- (b) Private equity distressed funds are partnership investment vehicles that purchase debt or preferred equity instruments of companies that are distressed, near bankrupt or bankrupt. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next seven to nine years.

- (c) Venture and growth private equity funds are partnership investment vehicles that provide seed or growth capital to start-ups and early stage companies, usually in high growth industries, such as information and clean technology, health care and biotechnology. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next seven to nine years.
- (d) Mezzanine private equity funds provide mezzanine loans to companies that need capital but do not want to sell or dilute their equity interests. Mezzanine loans are subordinated debt or preferred equity securities that represent a claim on the borrower's assets which is senior to the common equity but subordinate to senior secured and unsecured debt. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next 10 to 12 years.
- (e) Absolute return fund of funds include partnership investment vehicles that invest in a diversified portfolio of other hedge funds that employ a range of investment strategies.
- (f) Fixed income/multi-strat absolute return funds are partnership investment vehicles that invest in multiple investment strategies, such as macro, equity long/short, convertible arbitrage and event driven, often with the intent to diversify risk and reduce volatility.
- (g) Equity long/short absolute return funds include partnership investment vehicles that can purchase both long and short positions of publicly traded equities. Management of the fund has the ability to shift investments from value to growth strategies, from small to large capitalization companies, and from a net long position to a net short position.
- (h) Macro absolute return funds include partnership investment vehicles that make investments predicated on the managers views, either fundamentally or quantitatively derived, on different global factors, such as asset allocation (e.g., stocks vs. bonds) interest rates, currency, sovereign risk and commodities over a span of different time frames.
- (i) Redemption restrictions vary by investment management agreement but are based on the initial investment date and take into account summary of liquidity terms, notice period, redemption schedule, withdrawal with or without penalties and the firm's redemption schedule.
- (j) Private equity assets are "redeemed" via a secondary sale market where a broker is contracted to bid out the assets in question.

4. FUNDING POLICY

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan not less than the minimum required by applicable law and regulations.

The Pension Protection Act contains funding requirements for defined benefit pension plans. The Pension Protection Act establishes a 100% funding target over seven years for plan years beginning after December 31, 2007. No shortfall amortization payments are required if the pension plan meets the following targets: 94% funded in 2009; and 96% funded in 2010. The WRERA was passed in December 2008. The WRERA provides (i) the shortfall amortization charge will be based on the transition percentages (94% in 2009, 96% in 2010 and 100% thereafter) as opposed to the original Pension Act language of 100% of funding target, (ii) clarification that the averaging method used to value assets is to be adjusted for expected earnings which results in “asset smoothing”, and (iii) relief from the restriction on benefit accruals in 2009, by allowing a plan sponsor to use the greater of the Adjusted Funding Target Attainment Percentage from January 1, 2008 and January 1, 2009.

Interest, dividends and cumulative net appreciation of investments of the Plan serve to reduce future contributions that would otherwise be required to provide for the defined level of benefits under the Plan document. The Company’s contributions are adjusted to reflect differences between actual contributions in prior years and the amounts required under the Company’s current funding policy to meet the minimum funding requirements of ERISA. The Company met the minimum funding requirements for the years ended December 31, 2010 and 2009.

5. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan’s provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to: (1) retired or terminated employees, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The following amounts were calculated as of the latest actuarial valuation date, which was January 1, 2010.

The actuarial present value of accumulated plan benefits as of January 1, 2010 and 2009 is as follows:

	2010	2009
Vested accumulated plan benefits:		
Retired participants and/or beneficiaries currently receiving benefits	\$ 1,988,781	\$ 2,018,255
Other participants	<u>1,032,716</u>	<u>989,791</u>
Total vested accumulated plan benefits	3,021,497	3,008,046
Nonvested accumulated plan benefits	<u>83,996</u>	<u>89,113</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 3,105,493</u>	<u>\$ 3,097,159</u>

The changes in the actuarial present value of the Plan's accumulated plan benefits for the year ended January 1, 2010, are as follows:

Actuarial present value of accumulated plan benefits at January 1, 2009	\$ 3,097,159
Increase (decrease) during the year attributable to:	
Benefits accumulated	6,200
Benefits paid	(264,946)
Interest	<u>267,080</u>
Actuarial present value of accumulated plan benefits at January 1, 2010	<u>\$ 3,105,493</u>

The actuarial cost method used to measure the present value of accumulated plan benefits is the Accrued Benefit Method. The significant actuarial assumptions used in the January 1, 2010 and 2009 valuations were:

- Mortality: UP-94 mortality table (scale AA projected 16 years) with special mortality table used for the period after disability in 2010 and 2009.
- Retirement age: Age 65.
- Investment return was 9.0% per annum for 2010 and 2009.
- Discount rate was 9.0% per annum for 2010 and 2009.

Actuarial assumptions for the period before normal retirement include factors for mortality, termination of employment, early retirement and disability.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Upon the Plan Sponsor's adoption of certain elements of FASB Accounting Standards Codification Topic 715 for the year ended December 31, 2010, the Company and the Trust determined the optimal presentation for unsettled securities was to allocate these liabilities to the respective asset categories. There is no impact on net assets for 2010 or 2009.

The net investment income of the Master Trust for the years ended December 31, 2010 and 2009 is summarized below:

	2010	2009
Net appreciation (depreciation) investments:		
Common and preferred stocks	\$ 160,559	\$ 262,039

The Master Trust's financial information as of and for the years ended December 31, 2010 and 2009, was derived from information prepared by Northern Trust and furnished to the plan administrator. The plan administrator has obtained a certification from the Trustee that such information is complete and accurate. Subsequent to the issuance of the 2009 financial statements, Plan management determined that other income was overstated by \$62,212 and administrative expenses were understated by \$12,673 in the above table related to the Master Trust only. Accordingly, the Company has adjusted other income from the previously reported amount of \$82,018 to \$19,806 and administrative expenses from \$16,224 to \$28,897. There was no impact on the Plan's interest in the Master Trust's investment income, or on the 2009 Statement of Net Assets Available for Benefits, or the 2009 Statement of Changes in Net Assets Available for Benefits, or any other amounts in the notes to the Plan's financial statements.

Securities Lending Transactions — The Master Trust participated in a securities lending program through the Trustee. Under this program, the Master Trust's investment securities were loaned to investment brokers for a fee. As of November 23, 2010 the Master Trust exited the securities lending program. Securities loaned were fully collateralized by cash which was invested in CCTs. As of December 31, 2009 \$93,183 of the Master Trust's securities was loaned through the Trustee's securities lending program. The value of the collateral received as a percentage of the total current value of the securities on loan by the Master Trust was approximately 101% for the year ended December 31, 2009. The fair value of invested collateral was \$94,110 at December 31, 2009. Income from the program was immaterial for the years ended December 31, 2010 and 2009, respectively. Fees from security lending activities were \$862 and \$3,333, for the years ended December 31, 2010 and 2009, respectively.

At December 31, 2010 there were no Master Trust assets on loan as the Master Trust no longer participated in the securities lending program. The Master Trust assets on loan under the securities lending agreement at December 31, 2009 are as follows:

	2009
Common stock	\$ 84,339
U.S. government securities	2,524
Registered investment companies	2,966
Other	<u>3,354</u>
 Total	 <u><u>\$ 93,183</u></u>

7. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

Certain Master Trust investments are shares of registered investment companies managed by the Trustee. In addition, the Master Trust entered into a securities lending agreement with the Trustee as described in Note 6. These assets and related transactions qualify as exempt party-in-interest transactions.

In addition, the Master Trust invests in shares of ITT Corporation common stock. At December 31, 2010 and 2009, the Master Trust held 1,038 shares of common stock of ITT Corporation, the Plan Sponsor, with a market value of \$54,325 and \$51,607, respectively. During the year ended December 31, 2010 and 2009, the Master Trust recorded dividend income of \$1,038 and \$882 from the common stock of ITT Corporation, respectively. As ITT Corporation is the Plan Sponsor, these transactions qualify as exempt party-in-interest transactions.

Certain administrative functions are performed by officers and employees of the Company (who may also be a participant in the Plan) at no cost to the Plan or Master Trust. These transactions are not deemed prohibited party-in-interest transactions because they are covered by the statutory administrative exemptions from the Internal Revenue Code (IRC) and ERISA's rules on prohibited transactions.

8. FEDERAL INCOME TAX STATUS

The Internal Revenue Service has determined and informed the Company by a letter dated June 25, 2002, that the Plan and related trust are designed in accordance with the applicable sections of the IRC. The Plan has been amended since receiving the determination letter; however, the plan administrator believes that the Plan is currently designed and is currently being operated in compliance with the applicable requirements of the IRC and the Plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

9. PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations there under and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (“PBGC”) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor’s pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan’s termination, subject to a statutory ceiling on the amount of an individual’s monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan’s net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the existing assets and the PBGC guaranty while other benefits may not be provided for at all.

10. RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500

The following is a reconciliation of net assets available for pension benefits per the financial statements to the Form 5500 at December 31, 2010 and 2009:

	2010	2009
Net assets available for benefits per the financial statements	\$3,745,675	\$3,517,326
Net assets held in defined benefit plan — 401(h) account	<u>234,592</u>	<u>205,236</u>
Net assets available for benefits per Form 5500	<u>\$3,980,267</u>	<u>\$3,722,562</u>

The net assets of the 401(h) account included in Form 5500 are not available to pay pension benefits but can be used only to pay retiree health benefits. The following is a reconciliation of the changes in net assets per the financial statements to the Form 5500 for the years ended December 31, 2010 and 2009:

	2010	2009
Increase in net assets per the financial statements	\$228,349	\$575,291
Net increase 401(h) account	<u>29,356</u>	<u>43,431</u>
Increase in net assets per Form 5500	<u>\$257,705</u>	<u>\$618,722</u>

11. SUBSEQUENT EVENTS

For the year ended December 31, 2010, subsequent events were evaluated through July 15, 2011, the date the financial statements were available to be issued. On January 12, 2011, ITT Corporation announced plans to separate its businesses into three distinct, publicly traded companies. We expect this separation to have minimal to no impact on the Plan.

Schedule SB, Line 22 – Description of Weighted-Average Retirement Age

This age is derived by applying, for an employee with the characteristics of an average new entrant to the plan, the following formula, modified so that the “½” is not used for t = FRA-ERA.

$$\sum_{t=0}^{FRA-ERA} ({}_t p_{ERA}) * (q_{ERA+t}^r) * (ERA + t + \frac{1}{2})$$

$$\sum_{t=0}^{FRA-ERA} ({}_t p_{ERA}) * (q_{ERA+t}^r)$$

where

FRA = age by which everyone is assumed to retire
 ERA = age before which nobody is assumed to retire
 ${}_t p_{ERA}$ = probability of surviving at work to age ERA + t
 q_{ERA+t}^r = probability of retiring at age ERA + t

Asset valuation method

The Actuarial Value of Assets is determined using a method that spreads asset gains/(losses) over two years. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the Actuarial Value of Assets.

The expected return on plan assets is 9.00% per annum, limited by PPA to the applicable Third Segment Rate as follows:

2009 measurement period:	6.69%
2008 measurement period:	6.43%

January 1, 1965

Last Amended

January 1, 2010

Eligibility for Membership

All salaried employees age 21 with one year of service.

Normal Retirement Allowance

Eligibility

Age 65.

Benefit

For the first 40 years of benefit service, a participant may elect either of the following benefit accruals:

1) Traditional Pension Formula

2% of final average salary (1.5% for employees who became participants after January 1, 2000) during the 5 years of service in the last 10 years giving the highest average, for each of the first 25 years of traditional formula service, plus 1.5% of such final average salary for traditional formula service between 25 and 40 years, reduced by 1.25% of the Social Security benefit multiplied by traditional formula service up to 40 years.

2) Pension Equity Formula

Lump sum benefit based on the following percentages of final average salary: under age 30, 3% per year of service, age 30 - age 39, 4% per year of service, age 40 - age 49, 5% per year of service, age 50 and over, 6% per year of service. Total years credited cannot exceed 40.

Special Early Retirement Allowance

Eligibility

For employees who became participants before January 1, 2000, age 55 and 15 years of service or age 50 with age and service totaling 80 or more years. For employees who became participants after December 31, 1999 but before January 1, 2005, age 55 and 15 years of service.

Benefit

For pre- January 1, 2000 participants; accrued pension under the traditional formula can commence as early as age 50 and is reduced 5/12 of 1% for each month that payments commence prior to age 60, but not less than 75% of the unreduced benefit that would have been payable at age 60. For post- December 31, 1999 participants; accrued pension under the traditional formula can commence as early as age 55 and is reduced 5/12 of 1% for each month that payments commence prior to age 62, reduced 1/3 of 1% for each month that payments commence prior to age 58 and reduced 1/4 of 1% for each month that payments commence prior to age 57. Social Security reduction is not applied before age 62. Accrued pension under pension equity formula payable in the form of an actuarially equivalent annuity.

Schedule SB, Line 22 – Description of Weighted-Average Retirement Age

This age is derived by applying, for an employee with the characteristics of an average new entrant to the plan, the following formula, modified so that the “½” is not used for t = FRA-ERA.

$$\sum_{t=0}^{FRA-ERA} ({}_t p_{ERA}) * (q_{ERA+t}^r) * (ERA + t + \frac{1}{2})$$

$$\sum_{t=0}^{FRA-ERA} ({}_t p_{ERA}) * (q_{ERA+t}^r)$$

where

FRA = age by which everyone is assumed to retire
 ERA = age before which nobody is assumed to retire
 ${}_t p_{ERA}$ = probability of surviving at work to age ERA + t
 q_{ERA+t}^r = probability of retiring at age ERA + t

Asset valuation method

The Actuarial Value of Assets is determined using a method that spreads asset gains/(losses) over two years. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the Actuarial Value of Assets.

The expected return on plan assets is 9.00% per annum, limited by PPA to the applicable Third Segment Rate as follows:

2009 measurement period:	6.69%
2008 measurement period:	6.43%

Effective Date

January 1, 1965

Last Amended

January 1, 2010

Eligibility for Membership

All salaried employees age 21 with one year of service.

Normal Retirement Allowance

Eligibility

Age 65.

Benefit

For the first 40 years of benefit service, a participant may elect either of the following benefit accruals:

1) Traditional Pension Formula

2% of final average salary (1.5% for employees who became participants after January 1, 2000) during the 5 years of service in the last 10 years giving the highest average, for each of the first 25 years of traditional formula service, plus 1.5% of such final average salary for traditional formula service between 25 and 40 years, reduced by 1.25% of the Social Security benefit multiplied by traditional formula service up to 40 years.

2) Pension Equity Formula

Lump sum benefit based on the following percentages of final average salary: under age 30, 3% per year of service, age 30 - age 39, 4% per year of service, age 40 - age 49, 5% per year of service, age 50 and over, 6% per year of service. Total years credited cannot exceed 40.

Special Early Retirement Allowance

Eligibility

For employees who became participants before January 1, 2000, age 55 and 15 years of service or age 50 with age and service totaling 80 or more years. For employees who became participants after December 31, 1999 but before January 1, 2005, age 55 and 15 years of service.

Benefit

For pre- January 1, 2000 participants; accrued pension under the traditional formula can commence as early as age 50 and is reduced 5/12 of 1% for each month that payments commence prior to age 60, but not less than 75% of the unreduced benefit that would have been payable at age 60. For post- December 31, 1999 participants; accrued pension under the traditional formula can commence as early as age 55 and is reduced 5/12 of 1% for each month that payments commence prior to age 62, reduced 1/3 of 1% for each month that payments commence prior to age 58 and reduced 1/4 of 1% for each month that payments commence prior to age 57. Social Security reduction is not applied before age 62. Accrued pension under pension equity formula payable in the form of an actuarially equivalent annuity.

Schedule SB, Part V - Summary of Plan Provisions

Standard Early Retirement Allowance

Eligibility

Age 55 and 10 years of service.

Benefit

Accrued pension deferred to age 65 or an immediate benefit reduced 1/4 of 1% for each month that payments commence prior to age 65. (For post- December 31, 2004 participants, the reduction is 6.67% per annum for retirements between ages 60 to 65, 6.11% at age 59, 5.71% at age 58, 5.42% at age 57, 5.19% at age 56, and 5.00% at age 55.) Social Security reduction is not applied before age 62 for pre- January 1, 2005 participants. Accrued pension under pension equity formula payable in the form of an actuarially equivalent annuity.

Vested Benefit

Eligibility

3 years of service.

Benefit

Accrued pension based on final average salary at termination.

Vested Spouse Benefit

Eligibility

Death after becoming eligible for a vested benefit and prior to Benefit Commencement. Benefit commences no earlier than earliest retirement date which could have been elected by deceased participant.

Benefit

Accrued pension under traditional formula at time of death, adjusted as if participant had retired on date payments to spouse commence under joint and 50% survivorship option, and then died. For a terminated vested participant there is a charge for each year coverage is in effect after termination date. Coverage for which a charge is made may be waived with consent of the spouse. Accrued pension under pension equity formula in the form of actuarially equivalent annuity or lump sum payment equal to participant's full pension equity benefit.

Automatic Pre-Retirement Survivor Benefit

Eligibility

Death after earlier of age 65 or age 55 with 10 years of service and prior to Benefit Commencement.

Benefit

50% of accrued traditional pension at time of death, no adjustment for early commencement. Accrued pension under pension equity formula in the form of actuarially equivalent annuity or lump sum payment equal to participant's full pension equity benefit.
