Notes to Financial Statements

December 31, 2010

1. Description of the Plan

The following description of the Schneider Electric USA, Inc. Coordinated Bargaining Employees' Pension Plan (formerly Square D Company Coordinated Bargaining Employees' Pension Plan) (the Plan) is provided for general information purposes only. Participants should refer to the plan document for more complete information.

General

The Plan, established on January 1, 1996, is a noncontributory, defined-benefit pension plan that provides retirement benefits for hourly paid employees of Schneider Electric USA, Inc. (the Company) under certain collective bargaining units.

The Employee Benefits Administrative Committee of the Company controls and manages the operation and administration of the Plan. State Street Bank and Trust Company (the Trustee) serves as trustee of the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan's investment assets are held in a trust account and consist of an undivided interest in an investment account of the Schneider Electric USA, Inc. Common Trust (the Master Trust), a master trust established by the Company and administered by the Trustee.

Effective January 1, 2010, the plan name was changed to Schneider Electric USA, Inc. Coordinated Bargaining Employees' Pension Plan.

Pension Benefits

Under the Plan, employees retiring at their normal retirement date are entitled to defined-retirement benefits as specified in the plan document. Covered employees with five or more years of vesting service become fully vested in the Plan and are eligible for pension benefits upon attainment of retirement age or any time after age 55 with 10 or more years of vesting service.

The amount of benefits to be provided at the time of retirement depends upon an employee's years of benefit service and the pension rate in effect on the date of termination. The Plan provides for normal retirement, early retirement, disability retirement, family death benefits, deferred retirement, and spouse's death benefits.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Valuation of Investments and Income Recognition

The Plan's investments are held in the Master Trust and are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). See Note 8 for further discussion of fair value measurements.

A participating allocated contract exists from a prior merged plan for which the Plan receives income.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Administrative Expenses

The Plan pays most of its administrative expenses. All other administrative expenses of the Plan are paid by the Company. The Plan's sponsor provides accounting and other administrative services to the Plan at no charge.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 5) represent the actuarial present value of estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee services rendered to the valuation date.

Subsequent Events

Management has evaluated subsequent events through October 12, 2011, the date the financial statements were available to be issued.

New Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-06, *Improving Disclosures about Fair Value Measurements*. ASU 2010-06 amended Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, to clarify certain existing fair value disclosures and require a number of additional disclosures. The guidance in ASU 2010-06 clarifies that disclosures should be presented separately for each "class" of assets and liabilities measured at fair value and provides guidance on how to determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarifies the requirement for entities to disclose information about both the valuation techniques and the inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2, and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances, and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the guidance in ASU 2010-06 is effective for reporting periods beginning after December 15, 2009. Since ASU 2010-06 only affects fair value measurement disclosures, adoption of ASU 2010-06 did not affect the Plan's net assets available for benefits or its changes in net assets available for benefits.

2. Summary of Significant Accounting Policies (continued)

In May 2011, the FASB issued ASU 2011-04, *Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs*. ASU 2011-04 amended ASC 820 to converge the fair value measurement guidance in U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRSs). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures (although certain of these new disclosures will not be required for nonpublic entities). The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

3. Funding Policy

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the years ended December 31, 2010 and 2009. The Company made a contribution of \$5,500,000 and \$0 for 2010 and 2009, respectively.

4. Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances and subject to bargaining with the collective bargaining units representing employees covered by the Plan, to discontinue its contributions at any time and to terminate the Plan, subject to the provisions set forth in ERISA.

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

5. Accumulated Plan Benefits

An independent actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefit information is as follows:

	<u>December 31, 2009</u>
Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Participants and beneficiaries currently receiving payments	\$ 163,569,481
Other participants	81,096,952
	<u>244,666,433</u>
Non-vested benefits	15,883,465
	<u><u>\$ 260,549,898</u></u>

The changes in accumulated plan benefits are as follows:

Accumulated plan benefits – December 31, 2008	\$ 252,048,577
Changes during the year attributable to:	
Benefits accumulated	(656,596)
Benefits paid	(17,863,365)
Increase for interest	20,680,418
Assumption changes	6,340,864
Net increase	<u>8,501,321</u>
Accumulated plan benefits – December 31, 2009	<u><u>\$ 260,549,898</u></u>

Schneider Electric USA, Inc.
Coordinated Bargaining Employees' Pension Plan
(Formerly Square D Company Coordinated Bargaining Employees' Pension Plan)

Notes to Financial Statements (continued)

5. Accumulated Plan Benefits (continued)

The significant actuarial assumptions used in the valuations were:

Assumed rate of return	2009 – 8.25% 2008 – 8.50%
Retirement age	55 to 70
Life expectancy of participants	2009 – IRS 2009 Applicable Mortality Table 2008 – IRS 2008 Applicable Mortality Table

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

6. Tax Status

The Plan has received a determination letter from the Internal Revenue Service (the IRS) dated December 18, 2002, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended and restated. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and therefore believes that the Plan, as amended and restated, is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2007.

7. Master Trust

The investment in the Master Trust represents the Plan's undivided ownership of the net assets of the Master Trust, which have been accumulated through the Company's contributions and investment activity of the Master Trust, less benefit payments and any transfers to an insurance carrier. Use of the Master Trust permits the commingling of trust assets with the assets of other defined-benefit pension plans sponsored by the Company. Although assets of all plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

All investment information disclosed in the accompanying financial statements, including investments held at December 31, 2010 and 2009, and net appreciation (depreciation) in fair value of investments, interest, dividends, and investment expenses for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the Trustee.

At December 31, 2010 and 2009, the net assets of the Master Trust are summarized as follows:

	<u>2010</u>	<u>2009</u>
Investments, at fair value:		
Common stocks	\$ —	\$ 388,150

8. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.

Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets and liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in markets that are not active.

Schneider Electric USA, Inc.
Coordinated Bargaining Employees' Pension Plan
(Formerly Square D Company Coordinated Bargaining Employees' Pension Plan)

Notes to Financial Statements (continued)

8. Fair Value Measurements (continued)

- Observable inputs other than quoted prices that are used in the valuation of the asset or liabilities (e.g., interest rate and yield curve quotes at commonly quoted intervals).
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity). Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The following is a description of the valuation techniques and inputs used for assets and liabilities measured at fair value.

Common stock: Valued at the closing price reported on the active market on which the individual securities are traded.

Private equity investment funds: Valued at the net asset value (NAV) provided by the investment fund managers. The NAV is calculated using valuation models developed by the investment fund managers and independent third-party appraisals.

Common/collective trust funds: Valued at the NAV provided by the administrators of the funds. The NAV is based on underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding.

Short-term investment fund: Valued at cost, which represents fair value.

- (a) This category includes a common/collective trust fund that is designed to produce a relatively high level of current income combined with moderate appreciation potential. This fund is primarily invested in real estate investments owned directly or through partnership interests and mortgage loans or income-producing real estate. A 45-day redemption notice is required to liquidate the fund. This category also includes a common/collective trust fund that is designed to generate a high level of total return through above-average current income while maintaining the potential for capital appreciation. This fund is primarily invested in equity securities of issuers whose value is derived from development, management, and market pricing of underlying real estate properties. There are no redemption restrictions to liquidate this fund.
- (b) This category includes common/collective trust funds that are designed to provide total return through investments in a diversified portfolio of investment-grade fixed-income securities. The redemption notices range from 45 days to one year for these funds.

- (c) This category includes common/collective trust funds that are designed to provide a diversified profile of equity securities and emphasis on capital appreciation over an extended period of time. The redemption notices range from 45 days to one year for these funds. There are no redemption restrictions to liquidate these funds.
- (d) This category includes limited partnership investments, which offer portfolio diversification along with higher expected long-term market returns. On average, these investments are 10 to 15 years old. There are various restrictions on the redemption of these investments. Certain funds may be redeemed with three months' notice. Other funds generally cannot be liquidated until the funds are terminated.

9. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The Plan's contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Schedule SB, Line 22 – Description of Weighted Average Retirement Age

This age is derived by applying, for an employee with the characteristics of an average new entrant to the plan, the following formula, modified so that the “ ½” is not used for t = FRA-ERA.

$$\sum_{t=0}^{FRA-ERA} ((p_{ERA}) * (q_{ERA+t}^r) * (ERA + t + 1/2))$$

$$\sum_{t=0}^{FRA-ERA} ((p_{ERA}) * (q_{ERA+t}^r))$$

where FRA = age everyone is assumed to retire
ERA = earliest retirement age
 p_{ERA} = probability of surviving to age ERA + t
 q_{ERA+t}^r = probability of retiring at age ERA + t

Retirement: The rates of normal and early retirement are as follows:

Age	Annual Rate of Retirement:	
	Regular	Special *
55	2.5%	15.0%
56	2.5	8.0
57	2.5	8.0
58	2.5	5.0

65	60.0	60.0
66-69	20.0	20.0
70	100.0	100.0

Asset valuation method

The Actuarial Value of Assets is determined using a method that spreads asset gains/(losses) over two years. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the Actuarial Value of Assets.
