Report of Independent Auditors

To the Participants and Administrator of

Hawker Beechcraft Corporation
Retirement Income Plan for Salaried Employees

We were engaged to audit the financial statements and supplemental schedules of Hawker Beechcraft Corporation Retirement Income Plan for Salaried Employees (the "Plan") at December 31, 2010 and 2009, for the years then ended. These financial statements and schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 6, which was certified by Bank of New York Mellon the trustee of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2010 and 2009, for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The form and content of the information included in the financial statements and schedules, other than that derived from the information certified by the trustee have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Retirement Income Plan for Salaried Employees
Notes to Financial Statements
December 31, 2010 and 2009

1. Plan Description

General

The Hawker Beechcraft Corporation Retirement Income Plan for Salaried Employees (the "Plan") is a noncontributory defined benefit pension plan covering substantially all salaried exempt and salaried non-exempt (effective January 1, 1994) employees ("Salaried" employees or "Participants") of Hawker Beechcraft Corporation, Hawker Beechcraft Services, Inc., RAPID Aircraft Parts Inventory and Distribution, LLC and Travel Air Insurance Company, Ltd (collectively, the "Companies") hired prior to January 1, 2007. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). Participants should refer to the plan agreement for more complete information.

Eligibility

Prior to December 31, 1989, all salaried exempt employees were eligible to participate in the Plan. A salaried employee hired after December 31, 1989 must complete one year of service to participate in the Plan. A Salaried employee hired after July 31, 1993 must attain the age of 21 and complete one year of service to participate in the Plan. Any employee hired or rehired on or after January 1, 2007 is not eligible to participate in the Plan.

Pension Benefits

Participants with five or more years of vested service are entitled to monthly income pension benefits beginning at normal retirement age (65) equal to accrued benefits, which is the greatest of:

- (1) The difference between final average monthly salary (average compensation for the 60 highest consecutive calendar months within the last 120 months of credited service) and primary Social Security multiplied by the product of 1.8% times the first 20 years of credited service plus 1.2% times the next 29 years (24 years prior to January 1, 1988) of credited service with a maximum adjustment for Social Security of 60%, or;
- (2) For employees who became participants before January 1, 1988, 1.2% of final average monthly salary (average compensation for the 60 highest consecutive calendar months within the last 120 months of credited service) multiplied by credited service, but not to exceed 60% of final average monthly salary less 50% of the estimated primary Social Security adjustment, or;
- (3) The minimum benefit of one of the following:
 - a. For a salaried employee who was a plan participant on August 1, 1975, the sum of the following:
 - i. A base benefit of \$9.00 per year of credited service through August 1, 1975, plus \$7.00 per year of credited service after that date; and
 - ii. A supplemental benefit equal to 1.2% of base monthly salary in excess of \$350 on October 1, 1959 multiplied by credited service through that date, plus 1.2% of average base monthly salary over years of credited service after October 1, 1959 in excess of \$350 multiplied by credited service after that date.

- b. Effective August 1, 1983, the monthly dollar credit for terminations or retirements is as follows:

Termination Period	Dollar Credit
8/1/83 through 8/4/85	\$ 13.00
8/5/85 through 8/3/86	14.00
8/4/86 through 8/2/87	15.00
8/3/87 through 8/5/90	18.00
8/6/90 through 8/1/93	22.00
8/2/93 through 8/4/96	26.00
8/5/96 through 8/3/97	28.00
8/4/97 through 8/2/98	29.00
8/3/98 through 8/1/99	31.00
8/2/99 through 8/6/00	32.00
8/7/00 through 8/5/01	33.00
8/6/01 through 8/4/02	38.00
8/5/02 through 8/3/03	39.00
8/4/03 through 8/1/04	40.00
8/2/04 through 7/31/05	41.00
8/1/05 through 8/6/06	42.00
8/7/06 through 8/5/07	43.00
8/6/07 through 12/31/08	44.00
On or after 1/1/09	51.00

- (4) The Plan permits early retirement with a reduced benefit after age 55 for participants with 5 years of credited service and with unreduced benefits after age 62 with 5 years of credited service. If participants terminate before rendering 5 years of vesting service, they forfeit the right to receive their portion of accumulated plan benefits. The normal form of a benefit payment is a life annuity. If a participant is married and retirement-eligible at the time of death, a reduced survivorship benefit is payable to the participant's spouse in an amount equal to 50% of the monthly pension the participant would have been entitled to receive. Other options are available upon prior election.
- (5) Annual earnings in excess of \$245,000, adjusted annually for changes in the cost of living as provided in Section 401(a)(17) of the Internal Revenue Code (IRC), are not eligible when determining benefits under the Plan.

Disability Benefits

Active participants terminated due to total and permanent disability who are not covered by the Companies' long-term disability plan receive a monthly income equal to the accrued benefit commencing: (1) on first day of month after determination of disability following a period of absence of a least two months, if disability is work-related; (2) at normal retirement date, if disability is not work-related and participant has less than 10 years of vesting service; or (3) first day of seventh month following disability, if disability is not work-related, but participant has at least 10 years of vesting service. For participants making voluntary contributions under the Companies' long-term disability plan, the participant shall continue to earn credited service while disabled. Final average monthly salary shall be determined assuming compensation at disability continues to normal retirement date. Effective January 1, 2002, approval for disability retirement is subject to the participant being approved for Social Security disability benefits.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting, with the exception of benefit payments, which are recorded when paid.

The accompanying financial statements and related notes for the prior year include certain reclassifications made to conform to current year presentation.

Investment Valuation and Income Recognition

The Plan's interest in the Hawker Beechcraft Master Trust (the "Master Trust") is stated at fair value. Net investment income (loss) from the Master Trust is allocated proportionately on a monthly basis based on the Plan's interest in the Master Trust. See Note 7 for additional information.

Contributions

Employer contributions are funded and recorded as determined by actuarial computations. The employer contributions paid and recorded by the Plan are based on actuarial calculations and recommendations of the Plan Actuary. See Note 4 for the Plan's funding policy.

Plan Transfers

Transfers in and out consist of funds transferred between the Hawker Beechcraft Corporation Retirement Income Plan for Salaried Employees, the Hawker Beechcraft Corporation Retirement Income Plan for Hourly Paid Employees and the Hawker Beechcraft Corporation Base Retirement Income Plan due to participants who retire from one plan and also have service in another. There was also a transfer in 2009 from the Raytheon Company Pension Plan for Salaried Employees, which was the former pension plan under Raytheon.

Benefit Payments

Benefit payments to participants are recorded when paid.

Administrative Expenses

Expenses specifically related to the Plan are included in the statement of changes in net assets available for benefits under "Administrative expenses." Expenses and accruals for expenses paid directly by the Master Trust are included in the statement of changes in net assets available for benefits under "Hawker Beechcraft Master Trust investment income" for the periods ending December 31, 2010 and 2009.

Retirement Income Plan for Salaried Employees
Notes to Financial Statements
December 31, 2010 and 2009

Use of Estimates

The preparation of the Plan's financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for plan benefits at the date of the financial statements, the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for plan benefits during the reporting period and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Recent Accounting Pronouncements

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures* (Topic 820) ("ASU 2010-06") which requires new disclosures and clarifies existing disclosures required under current fair value guidance. Under the new guidance, a reporting entity must disclose separately gross transfers in and gross transfers out of Levels 1, 2, and 3 and describe the reasons for the transfers. A reporting entity must also disclose and consistently follow its policy for determining when transfers between levels are recognized. The new guidance also requires separate presentation of purchases, sales, issuances, and settlements rather than net presentation in the Level 3 reconciliation. ASU 2010-06 also requires that the fair values of derivative assets and liabilities be presented on a gross basis except for the Level 3 reconciliation which may be presented on a net or a gross basis. The ASU also makes clear the appropriate level of disaggregation for fair value disclosures, which is generally by class of assets and liabilities, as well as clarifies the requirement to provide disclosures about valuation techniques and inputs for both recurring and nonrecurring fair value measurements that fall under Level 2 or Level 3. The new disclosure requirements are effective for the Plan year ending December 31, 2010 with the exception of the requirement to separately disclose purchases, sales, issuances, and settlements which will be effective for the Plan year ending December 31, 2011. The Plan adopted ASU 2010-06 in 2010 with the exception of the requirement to separately disclose purchases, sales, issuances, and settlements. See Note 7 for the fair value measurements and disclosures presented by the plan. The adoption of this requirement in 2011 is not expected to have a significant impact on the financial statements.

Risks and Uncertainties

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. See Note 7 for additional information with respect to investment risk.

3. Actuarial Present Value of Accumulated Pension Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) active employees or their beneficiaries. Benefits are based principally upon years of service and compensation. Benefits payable under all circumstances - retirement, death, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Companies' consulting actuaries, Mercer Human Resource Consulting, and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of

Hawker Beechcraft Corporation
Retirement Income Plan for Salaried Employees
Notes to Financial Statements
December 31, 2010 and 2009

money (through discounts for interest) and the probability of payment (by means of decrements for death, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2010 are as follows:

- | | | |
|--|---|--|
| Discount rate | - | 7.75% compounded annually for the present value of accumulated plan benefits |
| Assumed rate of return on investments for accumulated benefits | - | 7.75% |
| Mortality basis | - | RP-2000 Mortality Table for males and females, without adjustment for collar or employee/annuitant distinction, projected to 2018. |
| Retirement age | - | Participants are assumed to retire at varying cumulative frequencies from age 55 (5% frequency) to age 70 (100% frequency) with the greatest individual frequency at age 65 to 69 (40% frequency). |
| Termination | - | Rates as follows for vested and nonvested termination: |

<u>Age</u>	<u>Percent</u>
20	27.0%
25	27.0%
30	23.0%
35	18.0%
40	10.5%
45	4.5%
50	4.5%
55	1.1%
60	1.1%
65 and over	0.0%

- As a further allowance for heavy turnover in the early years of employment, the following additional turnover is based on years of service:

<u>Service</u>	<u>Percent Terminating</u>
1	3.5%
2	3.0%
3	2.5%
4	2.0%
5	1.5%

Plan Changes

There have been changes in plan provisions and actuarial assumptions since the last actuarial valuation on December 31, 2009 as described below:

The compensation limitation under Internal Revenue Code (IRC) Section 401(a)(17) remained at \$245,000 for 2010 and the benefit limitation under Internal Revenue Service (IRS) Section 415(b) remained at \$195,000 for 2010.

As of December 31, 2010, the most recent valuation date, the actuarial present value of accumulated plan benefits is as follows:

Vested benefits	
Participants currently receiving payments	\$220,768,204
Terminated vested participants	66,558,934
Active participants	<u>84,135,133</u>
	371,462,271
Nonvested benefits	<u>6,800,562</u>
Total actuarial present value of accumulated plan benefits	<u>\$378,262,833</u>

The following is an analysis of changes in the present value of accumulated plan benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2009 \$358,155,250

Increase (decrease) during the year attributed to:	
Benefits accumulated and gains	\$ 18,548,086
Interest on prior liability	26,792,525
Benefits paid	(24,890,504)
Change in actuarial assumptions	<u>(342,524)</u>
Net increase	<u>\$ 20,107,583</u>

Actuarial present value of accumulated plan benefits as of December 31, 2010 \$378,262,833

4. Funding Policy

The Companies' funding policy is to make contributions to the Plan in amounts that will fund the pension cost accrued each year (using the methodology established for government contract pricing), which is the sum of the normal cost plus the amount(s) required to amortize: (1) any change in the unfunded actuarial accrued liability due to changes in the Plan over 30 years, and (2) any change in the unfunded actuarial accrued liability due to changes in actuarial assumptions or methods and actuarial gains and losses arising after 1975 over 15 years, plus interest on the preceding items to the date contributions are made. However, the contribution will not be less than the minimum required contribution nor greater than the maximum tax-deductible contribution. A contribution of \$9,200,000 was made in September 2011 to meet the minimum funding requirement for the year ended December 31, 2010. A contribution of \$12,906,000 was made in September 2010 to meet the minimum funding requirement for the year ended December 31, 2009. The

Hawker Beechcraft Corporation
Retirement Income Plan for Salaried Employees
Notes to Financial Statements
December 31, 2010 and 2009

contributions made in 2011 and 2010 to meet the minimum funding requirements are recorded as contributions receivable for the years ended December 31, 2010 and 2009.

Although they have not expressed any intention to do so, the Companies have the right under the Plan to discontinue their contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

5. Termination Policies

The Companies have not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

- a. The assets comprising the Plan, including the net income (loss) of the Plan, shall be revalued at market by the Plan trustee.
- b. The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.
- c. To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation ("PBGC") to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefit obligations, and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Companies may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the plan document for more information.

6. Summary of Information Certified by the Trustee

The following is a summary of the information certified as complete and accurate by The Bank of New York Mellon, N.A. (the "Trustee") as of and for the years ended December 31, 2010 and 2009, respectively.

The Plan's interest in Master Trust net assets certified by the Trustee ("Certified") does not include accrued expenses of \$344,990 and \$325,080 at December 31, 2010 and 2009, respectively, which are included in the statement of net assets available for benefits. The accrued expenses not included in the Plan's Certified interest in the Hawker Beechcraft Master Trust investment income that were recognized on the statement of changes in net assets available for benefits resulted in a difference of \$19,910 between the years ended December 31, 2010 and 2009, respectively.

7. Master Trust

Summary Financial Information

The Plan's assets are held in the Master Trust, which was established for the investment of assets of the Plan and other Company-sponsored defined benefit plans. The assets of the Master Trust are held by the Trustee. The Pension Committee, appointed by the Company, periodically reviews the asset allocation and performance of the investments held in the Master Trust. The Pension Committee permits asset diversification to include a combination of cash, private equities, common and preferred stock, fixed income securities, foreign fixed income securities, real estate, and other investments such as repurchase agreement, reverse repurchase agreements, forwards, and futures.

Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near term, and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Hawker Beechcraft Corporation
Retirement Income Plan for Salaried Employees
Notes to Financial Statements
December 31, 2010 and 2009

At December 31, 2010, the Plan owned approximately 49.1% of the fair value of the Master Trust's net assets, and, at December 31, 2009, the Plan owned approximately 48.2% of the fair value of the Master Trust's net assets. The Companies have obtained certifications from the Trustee, as of and for the years ended December 31, 2010 and 2009, that the information for the Master Trust is complete and accurate. The total net assets of the Master Trust at December 31, 2010 and 2009 were:

Valuation Policy

Effective January 1, 2008, the Master Trust adopted the provisions of ASC 820 *Fair Value Measurement*. ASC 820 defines fair value, establishes a framework for measuring fair value and requires expanded disclosures regarding fair value measurements.

ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into the following three broad categories:

Level 1 Inputs – Quoted prices for identical assets and liabilities in active markets.

Level 2 Inputs – Quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; observable inputs other than quoted prices; and inputs that are derived principally from or corroborated by other observable market data.

Level 3 Inputs – Unobservable inputs reflecting the entity's own assumptions about the assumptions market participants would use in pricing the asset or liability.

The following is a description of the valuation methodologies used for assets measured at fair value:

- Cash equivalents are valued at cost, which, due to their short maturities, approximates fair value.
- Common/collective trusts are valued at their last reported net asset values. Investment units in common/collective trusts are redeemable without restrictions.
- Investments in equity securities (common and preferred) are valued at the last reported sales price. If no sales are reported for that day, the equity securities are valued at the more recent of the last published sale price or the mean between the last reported bid and asked prices, or at fair value as determined in good faith by the Trustee.
- Investments in fixed income securities (U.S. government, domestic and foreign bonds) are valued by a pricing service based upon market transactions at fair value as determined in good faith by the Trustee.
- Investments in private equity securities, including limited partnerships and joint ventures, are valued at estimated fair value based on quarterly financial information received from the investment advisor and/or general partner.

- Investments denominated in foreign currencies are translated into U.S. dollars using the last reported exchange rate.
- Securities and other assets for which market quotations are not readably available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value as determined in accordance with procedures approved by the Investment Committee of the Plan.
- Valuation policies for derivatives investments are disclosed in the "Derivative Policy" paragraph.

Investment Income (Loss)

The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) of the Master Trust is included in the statement of changes in net assets available for plan benefits as Master Trust investment income (loss). The Master Trust's investment income (loss) includes the net appreciation (depreciation) in the fair value of investments, which consists of the realized gains (losses) and the unrealized appreciation (depreciation) on those investments.

Under the Master Trust's agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation.

Dividends are recorded on the ex-dividend date, and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Dividend expense for securities sold short is recorded on the ex-dividend date. Gains or losses on sales of securities are based on average cost.

Investments Sold Short

The Master Trust may enter into dollar roll transactions. A dollar roll transaction may involve the sale of securities by the Master Trust with an agreement by the Master Trust to repurchase substantially similar securities at an agreed date and price. An example of a dollar roll occurs when the Master Trust enters a forward commitment to purchase a security and, instead of accepting delivery, the position is offset by a sale of the security with a simultaneous agreement to repurchase the security in the future. During the period between the sale and repurchase, the Master Trust will not be entitled to accrue interest and/or receive principal payments on the securities sold. The Master Trust is compensated by the difference between the current sales price

Hawker Beechcraft Corporation
Retirement Income Plan for Salaried Employees
Notes to Financial Statements
December 31, 2010 and 2009

and the lower forward price of the future purchase (often referred to as the "drop"), which is reported as interest income, as well as by the interest earned on the cash proceeds of the initial sale. Dollar roll transactions involve the risk that the market value of the securities sold by the Master Trust may decline below the repurchase price of those securities. In the event the buyer of the securities under a dollar roll transaction files for bankruptcy or becomes insolvent, the Master Trust's use of proceeds of the transaction may be restricted pending a determination by or with respect to the other party.

The Master Trust may sell a security it does not own in anticipation of a decline in the fair value of that security or as part of its core investment strategy. The Master Trust, in "selling short," sells borrowed securities that must at some date be repurchased and returned to the lender. The risk associated with this practice is that if the market value of the securities sold short increases, the Master Trust may realize losses upon repurchase at prices which may exceed the proceeds received from the sale of the security. Further, in unusual circumstances, the Master Trust may be unable to purchase securities to close its short positions. The Master Trust is obligated to pay a prime broker interest based on the value of the securities sold short and any dividends declared on the securities sold short. Such fees and dividends are recorded on the accrual basis as an expense to the Master Trust.

The Master Trust utilizes leverage to achieve its objective by combining short sales transactions with repurchase agreements. The concept of leveraging is based on the premise that the Master Trust's cost of borrowing will be at rates that normally will be lower than the rate of return earned on the longer term investments it holds. While the use of leverage may increase the returns to the Master Trust, the use of leverage also increases the risk of loss to the Master Trust because the claims of the lenders to the Master Trust on assets and income of the Master Trust will be senior to the claims of participants.

At December 31, 2010 and 2009, the Hawker Beechcraft Corporation Master Trust had no liabilities for securities sold short.

Repurchase Agreements

The Master Trust may lend extra cash or cash on deposit at brokers in connection with short sales transactions (see the "Investments Sold Short" section) through the use of repurchase agreements whereby the Master Trust agrees to purchase and automatically agrees to sell certain securities at a mutually-agreed upon date and price. At the same time the counterparty to this agreement agrees to pledge some of its securities. The underlying collateral securities consist of securities in which the Master Trust is permitted to invest. In the case of repurchase agreements used to lend extra cash, the Master Trust values the underlying collateral securities daily on a mark-to-market basis to determine that the value, including accrued interest, is at least equal to the repurchase price. If the seller defaults as a result of its bankruptcy or otherwise, and the value of the collateral declines, realization of the collateral by the Master Trust may be delayed or limited.

In the case of repurchase agreements used to invest cash on deposit at brokers in connection with short sales transactions, the collateral is marked to market daily, and the increase or decrease in fair market value of the collateral offset the increase or decrease in fair market value of the securities sold short.

As of December 31, 2010 and 2009, the Hawker Beechcraft Corporation Master Trust did not invest in repurchase agreements.

Reverse Repurchase Agreements

The Master Trust may borrow through the use of reverse repurchase agreements whereby the Master Trust agrees to sell and simultaneously agrees to repurchase certain securities at a mutually-agreed date and price. At the time the Master Trust enters into a reverse repurchase agreement, it is required to pledge securities subject to repurchase. The sale of these securities is not recorded, and the Master Trust agrees to later repay the amount borrowed plus interest. Should the securities' value decline below the repurchase price, the Master Trust may be obligated to pledge additional collateral to the lender in the form of cash or securities.

The Master Trust utilizes leverage to achieve its objective by using reverse repurchase agreements. The concept of leveraging is based on the premise that the Master Trust's cost of borrowing will be at rates that normally will be lower than the rate of return earned on the longer term investments it holds. While the use of leverage may increase the returns to the Master Trust, the use of leverage also increases the risk of loss to the Master Trust because the claims of the lenders to the Master Trust on assets and income of the Master Trust will be senior to the claims of participants.

Reverse repurchase agreements involve the risk that the market value of the securities purchased with the proceeds from the sale of securities subject to the reverse repurchase agreements may decline below the amount the Master Trust is obligated to pay to repurchase these securities. The risk in borrowing, as with any extension of credit, consists of the possible delay in the recovery of securities or possible loss of rights to the collateral should the counter party fail financially. Additionally, there is the risk that the expense associated with the transaction may be greater than the income earned from the investment of the proceeds.

As of December 31, 2010 and 2009, the Hawker Beechcraft Corporation Master Trust had no reverse repurchase agreements pledged as collateral.

Securities Lending Program

The Master Trust participates in a securities lending program with the Trustee. The program allows the Trustee to loan securities, which are assets of the Master Trust, to approved brokers (the "Borrowers"). The Trustee requires Borrowers, pursuant to a security loan agreement, to deliver collateral to secure each loan. The collateral required is 102% of the fair value of U.S. securities borrowed at time of loan inception and 105% for non-U.S. securities borrowed. The Master Trust bears the risk of loss with respect to the unfavorable change in fair value of the invested cash collateral. However, the Borrower bears the risk of loss related to the decrease in the fair value of the securities collateral and, therefore, will have to deliver additional securities to maintain the required collateral. In the event of default by the Borrower, the Trustee shall indemnify the Master Trust by purchasing replacement securities equal to the number of unreturned loaned securities or, if replacement securities are not able to be purchased, the Trustee shall credit the Master Trust for the market value of the unreturned securities. In each case, the Trustee would apply the proceeds from the collateral for such a loan to make the Master Trust whole.

The market value of the securities on loan to Borrowers at December 31, 2010 and 2009 was \$9,224,704 and \$19,989,114, respectively. Cash collateral of \$9,577,021 and \$20,703,077 was received for securities on loan at December 31, 2010 and 2009, respectively, and was invested in an overnight repo pool, which is a fund affiliated to the Trustee. A portion of the income generated upon investment of cash collateral is remitted to the Borrowers, and the remainder is allocated between the Master Trust and the Trustee in its capacity as a security agent. Securities lending income allocated to the Master Trust amounted to \$73,675 and \$178,545 for 2010 and 2009,

respectively. Security lending income allocated to the Trustee amounted to \$24,553 and \$59,499 for 2010 and 2009, respectively.

Derivative Policy

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or by capturing value disparities between financial instruments. The Master Trust utilizes both exchange-traded investment instruments such as equity and interest rate futures, options on futures, over-the-counter ("OTC") options, and forward exchange contracts. Select major financial institutions are used in derivatives transactions. When engaging in OTC and forward exchange contracts, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. The Master Trust manages this exposure through credit approvals, limits, monitoring procedures, and to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. Procedures are in place at the Trustee to regularly monitor and report market and counterparty credit risks associated with these instruments. The Master Trust does not anticipate nonperformance by counterparties to these contracts, and no material loss would be expected from any such nonperformance.

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Foreign Currency Exchange Contracts

A forward foreign currency exchange contract ("forward currency contract") is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies. In 2010 and 2009, the Master Trust typically hedged more than half of the foreign currency exposure of the portfolio invested in the mature foreign markets. It did not hedge its exposure when the stocks or bonds were denominated in the currency of an emerging market country.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies, and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward currency contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward currency contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

The amount of unrealized appreciation (depreciation) in net assets included in the Hawker Beechcraft Master Trust at December 31, 2010 and 2009 was immaterial.

Future Contracts

A future contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated future exchange.

The Master Trust uses equity index, fixed income, cash and cash equivalents, and commodities future contracts to manage exposure to the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held or to hedge the fair value of other fund investments. The Master Trust does not employ leverage in its use of futures; thus, cash balances are maintained at a level at least equal to the contract value of the futures.

Future contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a future contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the future contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the future contract. Such receipts or payments are known as "variation margin," which are settled daily and are included in the realized gains (losses) on future contracts. The Master Trust will record a variation margin receivable or payable in the Master Trust net assets for variation margins that have not yet been paid at the end of the year.

Future contracts involve, to varying degrees, credit and market risks. The Master Trust enters into future contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the future contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a future contract and the underlying index or security.

No pledges of assets as collateral for futures held existed at December 31, 2010 or 2009.

Options

An option contract is a contract in which the writer of the option grants the buyer of the option the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain options, including options on indices, will require cash settlement by the Master Trust if the option is exercised. The Master Trust may enter into put or call option contracts: 1) in order to hedge against potential adverse price movements in the value of the portfolio assets; 2) as a temporary substitute for selling selected investments; 3) to lock in the purchase price of a security or currency it expects to purchase in the near future; 4) as a temporary substitute for the purchase of selected investments; 5) and to enhance potential gain. The Master Trust does not employ leverage in its use of options; thus, cash balances are maintained at a level at least equal to the underlying index exposure of the option contracts.

When the Master Trust purchases or writes an option, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. Options purchased or written are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and ask prices or at the most recent ask price (bid for purchased options) if no bid and ask prices are available. Over-the-counter purchased or written options are valued using dealer-supplied quotations. Gain and loss is recognized when the option contract expires or is closed.

Hawker Beechcraft Corporation
Retirement Income Plan for Salaried Employees
Notes to Financial Statements
December 31, 2010 and 2009

If the Master Trust writes a covered call option, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option, it accepts the risk of a decline in the value of the underlying security below the exercise price. Over-the-counter options have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased options is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts prior to the expiration date, and a change in value of the option contract may not correlate exactly with changes in the value of the securities or currencies hedged.

As of December 31, 2010 and 2009, the Master Trust did not invest in options.

Swaps

The Master Trust may invest in interest rate swap contracts. The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash, at which time both the value of the index or security and the specified interest rate are reset for the next settlement period. During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Changes in the value of the swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

The Master Trust may also invest in credit default swaps. Credit default swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to provide a level of credit protection for a commitment to receive interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Providing credit protection to a counterparty tends to increase the Master Trust's exposure to the underlying instrument. Receiving credit protection from a counterparty tends to decrease the Master Trust's exposure to the underlying instrument held by the Master Trust or to hedge the fair value of other Master Trust investments. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash. During the period that the credit default swap contract is open, the contract is marked-to-market in accordance with the terms of the contract based on the current interest rate spreads and credit risk of the referenced obligation of the underlying issuer and interest accrual through the valuation date. Changes in the value of the credit default swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

Entering into a swap contract involves, to varying degrees, elements of credit, market and interest rate risk in excess of the amounts reported in the statement of net assets available for benefits. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contract. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Trustee of the Master Trust. The Master Trust bears the market risk arising from any change in index or security values or interest rates.

At December 31, 2010 and 2009, the Master Trust did not invest in swaps.

8. Party-in-Interest Transactions

The Plan's investments are managed by The Bank of New York Mellon. Transactions with the Trustee qualify as party-in-interest transactions under ERISA (Employee Retirement Income Security Act). The Plan incurred no Trustee expenses directly related to the Plan for the years ended December 31, 2010 and 2009. The Plan was allocated approximately \$1,439,937 and \$1,137,395 in 2010 and 2009, respectively, of trustee expenses paid directly by the Master Trust to the Trustee. The expenses and accrued expenses paid by the Master Trust are included in the Plan's interest in the Master Trust investment gain. As of December 31, 2010 and 2009, \$344,990 and \$325,080 of trustee expenses were accrued, respectively. The Master Trust net investment balance of \$737,069,096 and \$683,325,925 at December 31, 2010 and 2009 was 100% invested in Trustee-managed accounts.

The Plan may also have certain payables to other plans and receivables from other plans under the Master Trust. Transactions with other plans qualify as party-in-interest transactions and are separately stated on the statement of changes in net assets available for benefits.

Hawker Beechcraft, Inc. provides certain facilities and administrative services relating to the operation of the Plan at no cost. These costs are immaterial to the Plan.

The party-in-interest transactions entered into by the Plan during the year ended December 31, 2010 are considered allowable under ERISA.

9. Tax Status

The Internal Revenue Service has determined and informed the Company by letter dated July 8, 2003 that the design of the Plan meets the requirements for qualification under Code section 401(a), on which the tax exemption of the related trust under Section 501(a) is based. The Plan has been amended since receiving the determination letter. The plan administrator and the Company's benefits counsel believe that the current design and operation of the Plan are consistent with continued qualification of the Plan and exemption of the related trust.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability (or asset) if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions by the plan, and has concluded that as of December 31, 2010 and 2009, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

10. Reconciliation of Financial Statements to Form 5500

The transfers from and to the Hawker Beechcraft Corporation Retirement Income Plan for Hourly Paid Employees and the Hawker Beechcraft Corporation Base Retirement Income Plan are included in the Form 5500 as reconciling items to net income to compute the net increase in net assets available for benefits. There are no reconciling items between the net assets available for benefits or the increase in net assets available for benefits per the financial statements and the Form 5500.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Actuarial methods

Asset methods

The asset valuation method is the fair market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum funding methods

Target liability for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **accrued liability** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the accrued liability and the normal cost for an individual is the sum of the component accrued liability and normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the accrued liabilities for all participants under the plan.

Maximum deductible contribution method

Calculations of maximum deductible contributions include the excess of the funding target computed using the projected unit credit method over the minimum funding target. The objective of the projected unit credit method is to fund each participant's benefits under the plan as they accrue, taking into consideration expected future compensation increases. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

A detailed description of the calculation follows:

- An individual's **projected accrued liability** is the present value of benefits based on credited service as of the beginning of the plan year and projected compensation that would be used in the calculation of the benefit on each expected separation date. If multiple decrements are used, the accrued liability for an individual is the sum of the component projected funding targets associated with the various anticipated separation dates.
- The plan's **projected accrued liability** is the sum of the projected accrued liability for all participants under the plan.

Schedule SB, Part V — Summary of Plan Provisions

Benefits included or excluded

Unless noted below, all benefits provided by the plan, as restated and amended effective January 1, 2009, are included in this valuation.

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* The plan does not have any unpredictable contingent event benefits.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
- **IRC Section 415(b) benefit limitations:** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
