Actuarial Methods for Funding Purposes

1. Actuarial Cost Method

The actuarial cost method is the Unit Credit Actuarial Cost Method.

Under this cost method, the target liability is defined as the present value of the accrued benefits on the valuation date. The funding shortfall is the excess, if any, of the amount by which the target liability exceeds the actuarial value of Plan Assets.

The target normal cost, determined on the valuation date, is the amount required to fund the benefit expected to be earned in the current year plus expected expenses.

2. Asset Valuation Method

Under this method the Plan Assets are equal to the average of the fair market value on the valuation date and the adjusted fair market value on each of the preceding two valuation dates, but not less than 90% nor more than 110% of the Fair Value of Assets. The adjusted fair market value as of any preceding valuation date is equal to the fair market value as of such date increased for contributions reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, decreased for benefits payments and expenses reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, and adjusted for expected earnings (not in excess of the third segment rate, with no phase-in, applicable to the corresponding valuation date).

2010 Schedule SB, Line 24 - Change in Actuarial Assumptions

The following is a summary of the assumptions updated from the assumptions used in the 2009 Plan Year valuation to the assumptions used in the 2010 Plan Year valuation.

Effective January 1, 2010, the interest rate used to determine the liability for funding purposes was changed from October 2008 yield curve to the January 2010 segment rates. The reason for this change is that using the yield curve for any month other than the month that contains the valuation date is no longer permitted under IRS regulations. Per Reg. 1.430(h)(2)-1(h)(3), this change is treated as having been approved by the Commissioner and does not require the Commissioners specific prior approval.

1. DESCRIPTION OF THE PLAN

The following description of Hourly Rate Pension Plan of GMI Holdings, Inc. Shenandoah, Virginia Facility (the “Plan”) provides only general information. Participants should refer to the plan document, available from the Alliance Employee Relations Office, for a more complete description of the Plan’s provisions.

(a) General

The Plan is a noncontributory defined benefit pension plan for employees of the Shenandoah, Virginia Facility of GMI Holdings, Inc. (the “Company”) who are employed within the collective bargaining unit represented by the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers AFL-CIO No. 750 (the “Union”). The Company is a wholly-owned subsidiary of Overhead Door Corporation, which is a wholly-owned subsidiary of Sanwa Shutter Corporation. The Plan is subject to the provisions of the Employee Income Security Act of 1974 (“ERISA”).

(b) Plan Administration

This Plan is administered by a committee (the “Pension Plans Administrative Committee”) whose members are appointed by the Company’s board of directors. Under the plan agreement, PNC Bank, N.A. (the “Trustee”) is responsible for the custody of all trust assets and trust financial matters.

(c) Eligibility and Vesting

A union employee automatically becomes a participant in the Plan if he or she has attained the age of 20½ and has been employed for at least six months. Full vesting of benefits results after five full years of credited vesting service. A participant receives one year of credited vesting service for each calendar year in which he or she is paid for at least 1,000 hours.

The eligibility requirements for benefits are as follows:

Normal retirement	-	Age 65
Early retirement	-	Age 55 and ten years of credited vesting service
Disability retirement	-	After ten years of credited vesting service
Termination	-	Deferred or lump-sum benefits with five years of credited vesting service

determined basis to provide the Plan with assets sufficient to meet the benefits to be paid to Plan participants. The Company uses the unit credit actuarial cost method.

Contributions to the Plan by the Company are generally paid in quarterly minimum required payments subsequent to January 1 of each year with the balance due on or before the extended due date of the federal income tax return of the Company, which is the September 15th immediately following the end of the plan year. The Plan has met the minimum funding requirements of ERISA for the plan years ended December 31, 2010 and 2009.

(e) Benefit Payments

The basic monthly benefit at the normal retirement date is equal to the number of full and fractional years of a participant's credited benefit service as of the date of retirement, up to a maximum of 30 years, multiplied by the benefit rate as shown below.

<u>Date of Retirement</u>	<u>Benefit Rate</u>
February 1, 1990 through January 31, 1991	\$ 9.00
February 1, 1991 through January 31, 1992	9.50

The basic monthly benefit for early and disability retirement is equal to the accrued benefit at the date of early retirement or date of termination reduced by four-tenths of one percent for each month by which the benefit commencement date precedes the normal retirement date.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

HOURLY RATE PENSION PLAN OF GMI HOLDINGS, INC.
SHENANDOAH, VIRGINIA FACILITY
Notes to Financial Statements
As of December 31, 2010 and 2009
And For the Year Ended December 31, 2010

(b) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

(c) Valuation of Investments and Income Recognition

The Plan's investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date, and interest income is recorded on the accrual basis. Net appreciation (depreciation) in fair value of investments includes realized gains and losses on investments sold during the year as well as appreciation (depreciation) of the investments held at the end of the year.

(d) Benefits Paid to Participants

Benefit payments to participants are recorded upon distribution from the Plan.

(e) Administrative Expenses

Certain administrative expenses of the Plan are paid by the Company and totaled approximately \$18,000 for the years ended December 31, 2010. In addition, all legal and actuarial fees incurred by the Plan are paid by the Company. These expenses, if not paid by the Company, will be paid by the Plan.

3. ACCUMULATED PLAN BENEFITS

Accumulated Plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by participants to the valuation date. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries and (b) present participants or their beneficiaries. Retirement benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the benefit valuation date as specifically defined in the Plan document or clearly implied by the Plan's provisions.

The actuarial present value of accumulated Plan benefits is determined by an actuary and is that amount which results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the probability of payment (by means of decrements such as for death,

The information below is presented as of December 31, 2009 for the valuation date as of January 1, 2010. The actuary has confirmed to the Company that the one day difference would not cause a significant difference in the valuation had it been performed as of December 31, 2009.

The following significant assumptions used in the valuation are presented in the following table as of December 31:

Retirement age	Age-graded retirement rates pay from 5% at age 55 to 100% at age 70	Age-graded retirement rates pay from 5% at age 55 to 100% at age 70

The actuarial present value of accumulated Plan benefits as of December 31 is as follows:

Vested benefits		
Participants currently receiving payments	\$ 957,364	\$ 816,557

The mortality assumption used to determine the liability for funding purposes was changed from the 2009 Static Mortality Table to the 2010 Static Mortality Table. Effective January 1, 2009, the interest rate used to determine the liability for funding purposes was changed from the October 2008 yield curve to the January 2010 segment rates.

4. INFORMATION PREPARED AND CERTIFIED BY THE TRUSTEE

The plan administrator elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the plan administrator limited auditing procedures with respect to the information which was certified by PNC Bank, N.A., the trustee, as being complete and accurate, including investments at fair value reported in the statements of net assets available for benefits, total investment income/(loss) as reported in the statements of changes in net assets available for benefits, the information disclosed in Note 5, and all information presented in the supplemental schedule, Schedule H, line 4i – schedule of assets (held at end of year). The Plan's auditors performed no auditing procedures other than agreeing these amounts to the certified custodian statements.

5. INVESTMENTS

The fair value of individual investments at December 31, 2010 and 2009, that represent 5% or more of the Plan's net assets is as follows:

	<u>2010</u>	<u>2009</u>
Baird Aggregate Bond Fund	\$ 895,465	\$ 806,198

MFS Value Fund	443,885	397,452
T. Rowe Price Growth Stock Fund	430,628	382,804

6. FAIR VALUE MEASUREMENTS

The Company utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

And For the Year Ended December 31, 2010

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

Registered investment companies: Fair value of each investment is computed by using closing prices of the underlying securities, on nationally recognized stock exchanges or over-the-counter markets where no formal exchange exists. Where the investment is in shares of a mutual fund or portfolio, fair value is computed by using the net asset value per share provided by that mutual fund or portfolio.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31:

7. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. PLAN TERMINATION

The Plan can be terminated by the Company in certain limited situations. If the Plan is terminated, the net assets of the Plan will be distributed to the participants in order of priority as outlined in the plan document and determined in accordance with ERISA and its applicable regulations.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") should the Plan terminate. Generally, the PBGC guarantees most vested, normal-age retirement benefits, early retirement benefits, and certain disability and survivors pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit. The monthly statutory limits during 2010 and 2009 were \$4,500.

Whether all participants receive benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide such benefits, the priority of the benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

9. INCOME TAX STATUS

The Plan obtained its latest determination letter on September 3, 2002, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter; however, the plan administrator believes the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.
