REPORT OF INDEPENDENT AUDITORS

ADMINISTRATIVE BOARD
PENSION PLAN FOR EMPLOYEES OF THE ALUMINUM INDUSTRY AND ALLIED
INDUSTRIES OF THE GREATER YOUNGSTOWN, OHIO METROPOLITAN AREA-
AEROLITE EXTRUSION COMPANY
YOUNGSTOWN, OHIO

We were engaged to audit the financial statements of the Pension Plan for Employees of the Aluminum Industry and Allied Industries of the Greater Youngstown, Ohio Metropolitan Area-Aerolite Extrusion Company (the "Plan") as of January 31, 2011 and 2010 and for the years then ended, and the supplemental schedules as of and for the year ended January 31, 2011 as listed in the accompanying index. These financial statements and supplemental schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Administrative Board instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note C, which was certified by Farmers Trust Company, the trustee of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedules. Farmers Trust Company held the Plan's investment assets as of January 31, 2011 and 2010 and executed investment transactions for the year ending January 31, 2011. The Plan's Administrative Board has obtained a certification from the trustees as of and for the years ended January 31, 2011 and 2010, that the information provided to the Administrative Board by the trustees is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules taken as a whole. The form and content of the information included in the financial statements and schedules, other than that derived from the information certified by the trustees, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

The following description of the Plan provides only general information. Participants should refer to the Plan Document for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan covering salaried employees hired before February 1, 2007, with benefits frozen as of February 1, 2007, and all employees covered prior to February 1, 2007 under the collective bargaining agreement between Aerolite Extrusion Company (the "Company") and the United Steel Workers of America, AFL-CIO (the "Union") and who did not elect to participate in the Aerolite Extrusion Company 401(k) Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions

The Company's funding policy is to make annual contributions to the plan in amounts that are necessary to provide sufficient assets to meet future benefit payments. The Plan has met the minimum funding requirements established by ERISA.

Vesting

Vesting is achieved after a participant has completed five years of continuous service.

Payment of Benefits

Benefit payments are based on years of service and certain rates agreed to between the Company and the Union. Normal retirement age is upon reaching the age of 62 with 5 or more years of participation; early retirement is upon reaching the age of 60 with 15 years of participation. In the event of death of an active employee, the monthly benefit payable to the beneficiary is equal to the survivor's part of the participant's joint and 50% survivor benefit calculated at earliest retirement age, reduced on an actuary equivalent basis for early commencement and for the 50% joint and survivor form of payment.

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC's guaranty while other benefits may not be provided for at all.

Plan Termination

Although it has not expressed any intent to do so, the Company has the right to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, to vested participants based upon an actuarial calculation.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared using the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in net assets during the reporting period. Actual results could differ from those estimates.

Cash Equivalents

Cash equivalents consist of highly-liquid short-term investments with maturities of three months or less at date of purchase.

Investment Valuation

All of the Plan's net assets are invested in the Collective Trust for the Pension Plans for Employees of the Aluminum Industry and Allied Industries of the Greater Youngstown, Ohio Metropolitan Area ("Collective Trust"). As requested by the Department of Labor, investment in the Collective Trust is based upon the Plan's proportionate share of the underlying assets held by the Collective Trust, which are reported at fair value as determined by the trustee. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note D for discussion of fair value measurements.

Within the Collective Trust, purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Payments of Benefits

Benefits are recorded when paid.

Administrative Expenses

All administrative and recordkeeping fees are paid by the Collective Trust and expenses related to a specific participating plan are allocated to such plan.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments, including lump sum distributions, that are attributable under the Plan's provisions to the services rendered by employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. These values have been calculated using an ongoing plan approach which includes the earned portion of retirement, disability, death, and termination benefits.

NOTE C – INVESTMENT IN COLLECTIVE TRUST

The Collective Trust was established for the investment of assets of the Plan and several other plans covered under the Union's collective bargaining agreements. Each participating plan has an undivided interest in the Collective Trust.

The investments of the Collective Trust are maintained in a bank-administered trust. Investment decisions are the responsibility of the trustee. Farmers Trust Company held the Collective Trust's investment assets as of January 31, 2011 and 2010 and executed investment transactions for both years.

All investment information disclosed in the accompanying financial statements and supplemental schedules, including investments held at January 31, 2011 and 2010 and net change in investment income and expenses for the year ended January 31, 2011, was obtained or derived from information supplied to the Trust's Administrative Board and certified as complete and accurate by the trustee.

The following table presents the condensed financial information of the Collective Trust prepared on the accrual basis of accounting:

Exchange traded funds	(32,008)	63,444
Total	\$ 286,806	\$ 197,254

In general, income and expenses of the Collective Trust are allocated to the participating plans based on each plan's relative interest in the assets of the Collective Trust. Contributions, other income, benefit payments, and certain administrative expenses are allocated specifically to each participating plan.

NOTE D – FAIR VALUE MEASUREMENTS

Financial accounting standards establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 fair values are based on unadjusted quoted prices in active markets for identical assets or liabilities. Level 1 assets primarily include exchange traded equity securities, mutual funds and U.S. Treasury bonds. Prices are obtained from readily available sources for market transactions involving identical assets and liabilities.

Fair values for Level 2 inputs are based on inputs other than quoted prices within Level 1 that are observable for the asset, either directly or indirectly. Observable inputs include quoted market prices in active markets for similar assets, quoted prices in markets that are not active for identical or similar assets and other market observable inputs such as interest rate, credit spread and foreign currency exchange rates observable in the marketplace or derived from market transactions. Level 2 assets primarily includes fixed maturity securities (including public and private bonds), equity securities, over-the-counter derivatives, group annuity contracts, pooled separate accounts and other investments. These fair values are generally obtained from third-party pricing services or determined through the use of valuation models or methodologies, including matrix pricing, using substantially all observable inputs. Prices are validated through an investment analyst review process including direct interaction with external sources, recent trade activity or through use of internal models.

Level 3 fair values are based on at least one significant unobservable input for the asset. Level 3 securities contain unobservable market inputs and as a result considerable judgment may be used in determining the fair values. Level 3 assets include certain fixed maturity securities, private equity securities and complex derivatives. These fair values are generally obtained through the use of valuation models or methodologies using significant unobservable inputs or broker quotes. In circumstances where broker quotes are used to value an instrument, a nonbinding quote is generally received. Broker quotes are validated through an investment analyst review process, including direct interaction with external sources, through the use of internal models or other relevant information.

NOTE D – FAIR VALUE MEASUREMENTS (continued)

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at January 31, 2011 and 2010.

Government and federal agency securities: Investments which are traded on a national securities exchange are valued at the last reported sales price on the last business day of the year; investments traded on the over-the-counter market are valued on the last reported bid price.

Corporate bonds, municipal bonds and foreign obligations: Investments which are not actively traded are valued at the derived price of industry pricing providers on the last business day of the year.

Common stock: Valued at the closing price reported on the active market on which the individual securities are traded.

Exchange traded funds: Investment fund, holding assets such as stocks and bonds, which is traded in the active market throughout the day and is valued at the closing price reported on the active market.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of January 31, 2011 and 2010.

NOTE E – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

The Plan's actuary estimates the actuarial present value of accumulated plan benefits which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of February 1, 2010 and 2009 were (a) life expectancy of participants (the Combined Static Mortality Table is used), (b) retirement age assumptions (the assumed average retirement age was 63-1/2), and (c) investment return. The 2010 and 2009 valuations assumed an average rate of return of 7.0%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE F – TAX STATUS

The Plan obtained its latest IRS determination letter in September 2003, in which the IRS stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Administrative Board and the actuary believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

NOTES TO FINANCIAL STATEMENTS

January 31, 2011 and 2010

NOTE F – TAX STATUS (continued)

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability or asset if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of January 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or asset or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.

NOTE G – RISK AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE H – SUBSEQUENT EVENTS

Management evaluates events occurring subsequent to the date of the financial statements in determining the accounting for and disclosure of transactions and events that affect the financial statements. Subsequent events have been evaluated through November 8, 2011, which is the date the financial statements were available to be issued.

DESCRIPTION OF WEIGHTED AVERAGE RETIREMENT AGE**

Retirement is assumed to occur after the completion of 5 years of service based on the following rates:

<u>Age</u>	<u>Percentage Retiring</u>
62	25%
63	33%
64	50%
65	100%

Weighted average retirement age = $62 \times 25\% \times 100\% + 63 \times 33\% \times 75\% + 64 \times 50\% \times 50\% + 65 \times 100\% \times 25\% = 63.5$

**SCHEDULE SB, PART V
SUMMARY OF PLAN PROVISIONS**

Effective Date

February 1, 1963; as last amended and restated effective February 1, 2001. Amended effective February 1, 2009.

Eligibility

All employees of the participating companies who were included in the bargaining unit prior to February 1, 2007 were automatically participants in the plan. Employees were also included under terms of the pension agreement. Effective February 1, 2007, no new participants will be allowed into the plan. The benefits for the salaried participants were frozen as of February 1, 2007.

Retirement Dates

Early - Age 60 and 15 years of continuous service.

Normal - Age 62 and 5 years of participation.

Late - Anytime after Normal Retirement Date.

Disability - 15 years of continuous service if permanently and totally disabled for at least six months.

Retirement and Termination Benefits

Accrued Benefit - A monthly benefit equal to the product of the benefit multiplier in effect as of retirement, termination, disability or death and the participant's years and months of continuous service. Continuous service is years and nearest months of employment completed from date of hire to termination of employment (maximum of 45 years). The negotiated benefit multipliers are as follows:

<u>Effective Date</u>	<u>Benefit Multiplier</u>
February 1, 2003	\$ 19.50
February 1, 2004	20.00
February 1, 2005	21.00
February 1, 2006	22.00
February 1, 2007	23.00
February 1, 2008	24.00
February 1, 2009	25.00

Early Retirement - Accrued benefit actuarially reduced for each month the benefit commencement date precedes normal retirement date.

Normal Retirement - Accrued benefit.

Late Retirement - Accrued benefit determined as of actual retirement date (maximum of 45 years).

Disability - Accrued benefit determined under the normal retirement formula based on service to date of disability.

Vested Termination

A participant is eligible for a deferred vested benefit upon termination of employment after completion of five years of continuous service.

Pre-Retirement Death Benefits

If death occurs prior to completing 5 years of service or while the Member is not married, no benefits shall be payable from this Plan.

Upon the death of a married Member who qualifies for early retirement, the Member's spouse shall receive a monthly benefit for life based on the benefit payable under a Joint and 50% Survivor Annuity which the Member's spouse would receive assuming the Member retired on the day before his death.

The spouse of any married vested participant who was not eligible for early retirement is also eligible for a benefit if the participant should die prior to his normal retirement date. The monthly pension payable at the participant's earliest retirement date will be an amount equal to the benefit calculated as though the participant survived to his earliest retirement age, selected a 50% Qualified Joint and Survivor Annuity, and died on the day after the day of attaining the earliest retirement age.

Employee Contributions

None required.

Payment Forms

Normal: Life Only Annuity, automatically payable as a 50% Joint and Survivor Annuity to married participants.

Optional: Life Annuity
50% Joint and Survivor Spousal Annuity
75% Joint and Survivor Spousal Annuity.

SCHEDULE SB, PART V

STATEMENT OF ACTUARIAL ASSUMPTIONS/METHODS

Method for Contributions

Contributions required to fund the plan benefits are determined according to the provisions of the Pension Protection Act. The Target Normal Cost is the present value of benefits earned during the plan year. The Funding Target is the present value of benefits earned as of the beginning of the plan year. The excess of the Funding Target over the actuarial value of assets represents the Funding Shortfall.

Method for Accrued Benefits

The actuarial present value of accumulated plan benefits is a measure of plan benefits which have been earned to date. This is not only a valuation of retirement benefits, but also of deferred vested, death, and disability benefits. Earnings and service for benefit purposes expected to be earned after the valuation date are excluded from this value.

The actuarial assumptions used to determine this value are identical to those used for the funding purposes with the exception of an interest rate of 7.0%.

Method of Asset Valuation

The asset valuation method is the “smoothed market value” method, using a smoothing period as described in sec. 430(g)(3)(B) of the Internal Revenue Code. Under this method, the actuarial value of assets is equal to the average of the fair market value of assets on the valuation date and the adjusted fair market value of assets determined from the two immediately preceding valuation dates. The adjusted fair market value of assets is the fair market value of assets at the applicable valuation date adjusted with contributions, distributions and expected earnings to the current valuation date as specified by the Secretary of Treasury. Expected earnings will be determined using the applicable third segment rate.

In general, the actuarial value of assets must fall between 90% and 110% of the market value of assets.

Data

The valuation results are based upon participant census and financial data provided by the plan sponsor. The data was tested for reasonableness and consistency with the prior valuation.

Actuarial Assumptions

The following actuarial assumptions were employed in the determination of the liabilities and annual contributions of the plan as developed in accordance with the funding methods described in this report.

1. The rates of mortality will be in accordance with the Combined Static Mortality Table for males and females.
2. The interest rate used for the valuation of benefits are the 24 month average Corporate Bond Segment Rates for February 2010 as published by the IRS. The Effective Interest Rate is 6.57%.
3. The rates of withdrawal are based on the scale T-5 from the actuary's pension handbook; rates for sample ages are shown in the following table:

<u>Attained Age</u>	<u>Percentage Assumed to Withdraw Per Year</u>
25	7.7%
30	7.2%
35	6.3%
40	5.2%
45	4.0%
50	2.6%
55	0.9%
60	0.1%
65	0.0%

4. Retirement is assumed to occur after the completion of 5 years of service based on the following rates:

<u>Age</u>	<u>Percentage Retiring</u>
62	25%
63	33%
64	50%
65	100%

5. All plan participants have been included in the funding.
6. As required by Section 415 of the Internal Revenue Code, the determination of a participant's projected retirement benefit has been limited so that the amount does not exceed \$195,000 per year adjusted if necessary to recognize the participant's assumed retirement age, cost of living adjustments on the valuation date and optional forms of payment.

7. Disability prior to retirement is assumed to occur in accordance with the following table:

<u>Attained Age</u>	Percentage Assumed to Become <u>Disabled Per Year</u>	
	<u>Male</u>	<u>Female</u>
30	.071%	.085%
35	.099	.175
40	.162	.315
45	.270	.465
50	.493	.626
55	.914	.805
60	1.470	1.125
65	2.077	1.715

8. The rates of mortality for disabled lives are based on the Disabled Mortality Table per Revenue Ruling 96-7.
9. Cost calculations for surviving spouse's benefits assume that 80% of the active participants are married and that the wife is four years younger than the husband.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
