Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report of Independent Auditors

The Plan Administrator of the Siemens Energy, Inc. Jackson Retirement Plan and the members of the Siemens Corporation Administrative and Investment Committees

We were engaged to audit the accompanying statements of net assets available for benefits of the Siemens Energy, Inc. Jackson Retirement Plan as of March 31, 2010 and December 31, 2009, and the related statements of changes in net assets available for benefits for the three-month period ended March 31, 2010 and year ended December 31, 2009. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 8, which was certified by BNY Mellon Bank, N.A., the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of and for the three-month period and year ended March 31, 2010 and December 31, 2009, respectively, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the investment information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Siemens Energy, Inc. Jackson Retirement Plan

Notes to Financial Statements

March 31, 2010

1. Description of Plan

General

The Siemens Energy, Inc. Jackson Retirement Plan (the Plan) is a contributory defined benefit plan sponsored by Siemens Energy, Inc. (SEI or the Company), a subsidiary of Siemens Corporation (Siemens). The Plan is available to eligible hourly employees of SEI at its Jackson, Mississippi facility who are represented by Local 1956 of the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America, AFL-CIO. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The following brief description of the Plan is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

The assets of the Plan are held in the Master Trust for Siemens Pension Plans (the Master Trust), along with assets of certain other pension plans sponsored by Siemens or by an affiliate of Siemens. The assets of the Master Trust are held by BNY Mellon Bank, N.A. (the trustee).

Effective March 31, 2010, the Plan was merged into the Siemens Pension Plan for Union Employees. Plan assets in the amount of $20,399,859 were transferred to the Siemens Pension Plan for Union Employees on that date. The merger did not impact the Plan's provisions.

Administration

The Administrative Committee of Siemens is responsible for administering the Plan's operations and the Investment Committee of Siemens is responsible for monitoring investments by the Plan. The Administrative Committee is currently composed of the Director of Employee Benefits of Siemens, the Vice President, Treasurer and Controller of Siemens, and four human resource representatives from certain of Siemens' affiliates who are appointed by the Senior Vice President of Human Resources of Siemens. The six-person Investment Committee is currently composed of the following members: the Executive Vice President and Chief Financial Officer of Siemens (who serves as Chairman of the Investment Committee); the President of Siemens Capital Company, LLC; the Senior Vice President, General Counsel and Secretary of Siemens; the Senior Vice President of Human Resources of Siemens; the Vice President of Mergers & Acquisitions of Siemens; and the Vice President, Treasurer and Controller of Siemens, all of whom are appointed by the Board of Directors of Siemens.

1. Description of Plan (continued)

Employee Contributions

As a condition of participation, participants are required to contribute 3% of their annual pretax earnings (not including overtime) in excess of $9,000 to the Plan. Participants are immediately 100% vested in their employee contributions and earnings thereon. Present employees' accumulated pretax contributions at March 31, 2010 and December 31, 2009 were $2,819,636 and $2,978,670, respectively, including interest credited at an interest rate of 2.95% and 2.48% for 2010 and 2009, respectively, compounded annually.

Pension Benefits

A participant with at least five years of vesting service or who retires at the normal retirement age of 65 is entitled to monthly pension benefits for life. For retirements on or after January 1, 1983, the monthly pension benefit amount, for each year of credited service, is equal to 1/12 of the sum of (i) 1.2% of pay up to $9,000 with respect to each year of credited service, and (ii) 2.2% of pay in excess of $9,000 with respect to each year of credited service. "Pay" for purposes of calculating the monthly pension amount under the Plan is equal to the participant's base hourly rate multiplied by 2,080 for each full calendar year of credited service and for each year in which the participant has less than a full calendar year of service the participant's base hourly rate is multiplied by the participant's fractional credited service taken to the nearest 1/10 of a year.

A participant's base hourly rate for calendar years prior to 2009 is the base hourly rate as of December 31 of that year or on the date the participant's credited service terminates, if earlier. The Plan was amended in February 2010 regarding the participant's base hourly rate. For calendar years 2009, 2010 and 2011, the participant's base hourly rate is the rate in effect on December 31 of the prior calendar year and if such participant is employed as of May 1 of a calendar year, the base hourly rate for that calendar year is the rate in effect as of December 31 for the prior calendar year increased by 1.5% with no compounding for calendar years 2010 and 2011.

No individual hourly employee initially hired or rehired at SEI's Jackson, Mississippi facility on or after May 22, 2009 or who is transferred from a non-eligible position to an otherwise eligible position on or after May 22, 2009 shall be eligible to become a participant in the Plan, accrue any benefits under the Plan or have any credited service under the Plan (other than with respect to Early Retirement eligibility) taken into account under the Plan on or after May 22, 2009.

1. Description of Plan (continued)

Participants who were hired prior to May 22, 2009 and who were laid off on or after May 22, 2009 and recalled per the layoff/recall provisions of the applicable collective bargaining agreement resume participation in the Plan upon their return to work when recalled.

The total annual benefit is subject to a minimum of 1% of final five-year average earnings multiplied by total years of credited service. For purposes of the minimum, 1% of final five-year average earnings will not be less than $120 or more than $180.

Alternate benefits are available to certain participants who qualify based on certain provisions, as specified in the Plan.

In certain circumstances, the Plan provides for lump-sum payments of accumulated pension benefits to participants.

The Plan permits participants who have terminated employment to begin to receive a reduced Plan benefit prior to age 65, provided the participant is at least age 55 at the time the participant wants to begin receipt of the Plan benefit and the participant has completed at least ten years of vesting service at the time of the participant's termination of employment. If a participant terminates employment on or after reaching age 60 and the participant has at least ten years of credited service at the time of termination of employment, that participant is eligible to receive an early retirement supplement up to the date the participant turns age 62 equal to $72 per year of credited service (maximum of $1,800 per year).

Death and Disability Benefits

In the event of a participant's death, the Plan provides for a life annuity to the participant's surviving spouse equal to 50% of the monthly benefit amount to which the participant was entitled at the time of death. Benefits commence on the first day that the participant would have been eligible for early retirement unless the surviving spouse elects a later date. If the participant dies without being eligible for the spouse's death benefits, the participant's beneficiary will receive a benefit equal to the portion of the participant's accrued benefit, if any, derived from the participant's own contributions with interest.

1. Description of Plan (continued)

If a retired participant receiving benefits dies, the surviving spouse shall receive 50% of the pension which the participant would receive unless the participant had chosen one of the other optional forms of payment provided under the Plan. If the participant's contributions under the Plan exceed the amount of benefits paid, the participant's beneficiary will also receive a benefit equal to the portion of the participant's accrued benefit, if any, derived from the participant's own contributions with interest.

An active participant who incurs a disability, as defined by the Plan, and has completed at least ten years of credited service, is eligible for disability retirement pension benefits. The amount is equal to the normal retirement benefit, reduced by 5/9 of 1% for each month by which the first pension payment precedes the participant reaching age 62, not to exceed a maximum of 12%. In addition, the participant receives a supplement of $900 a year until age 62. If a disabled participant who is receiving disability retirement payments dies before age 65, any participant contributions paid into the Plan plus interest accrued shall be paid to the beneficiary.

2. Summary of Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plan have been prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Fair Value Measurements

Fair value is defined under Accounting Standards Codification (ASC) 820 as the price that would be received for an asset or paid for a liability in a most advantageous market for these assets or liabilities in an orderly transaction between market participants on the measurement date. To

measure fair value, a hierarchy has been established that requires the Plan to maximize the use of observable inputs and minimize unobservable inputs when determining fair value and also established three levels of classification (see Note 9).

Investment Valuation and Income Recognition

The fair value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions, asset transfers in, and allocated investment income less actual distributions, allocated investment loss, asset transfers out, and allocated administrative expenses.

Certain investments in securities held by the Master Trust are valued using quoted market prices. The last reported sales price on the valuation date is used when no other value is obtainable from the trustee. The amounts reported by the Master Trust for securities that have no quoted market price represent estimated fair value as determined by the trustee. Investments in forward currency contracts are marked to market using quoted exchange rates on the valuation dates. The investment manager values investments in private placement bonds and high-yield bonds when no other value is obtainable from the trustee. Investments in short-term investment funds are reported at cost, which approximates fair value. Investments in limited partnerships are valued based on information provided by the sponsor of the partnership. In the event that no other value is obtainable from the trustee, the investment manager will determine the value. Purchases and sales by the Master Trust are recorded on a trade-date basis. Interest income is recorded by the Master Trust on the accrual basis. The Master Trust records dividends on the ex-dividend date.

Payment of Benefits

Benefit payments to participants are recorded when paid.

Plan Expenses

Certain expenses are paid by the Master Trust and charged to each of the participating plans based upon each of the plan's proportionate interest in the net assets of the Master Trust. Expenses that are attributable to a specific plan are charged to that plan only.

2. Summary of Accounting Policies (continued)

Risks and Uncertainties

The assets of the Master Trust are invested in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statements of net assets available for benefits.

The Investment Committee has diversified the net assets of the Master Trust with the intention of appropriately addressing significant concentrations of risk. The Master Trust's net assets were managed by 13 investment managers for the three-month period ended March 31, 2010 and year ended December 31, 2009.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect amounts reported and disclosed in the financial statements.

New Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-06, *Improving Disclosures about Fair Value Measurements* (ASU 2010-06). ASU 2010-06 amended ASC 820 to clarify certain existing fair value disclosures and require a number of additional disclosures. The guidance in ASU 2010-06 clarified that disclosures should be presented separately for each "class" of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2 and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the guidance in ASU 2010-06 is effective for reporting periods beginning after December 15, 2009. Adoption of ASU 2010-06 did not have a material effect on the Plan's net assets available for benefits or its changes in net assets available for benefits.

3. Funding Policy

The Plan receives contributions from both SEI and its participants.

Contributions from SEI are determined annually by actuarial valuations of the Plan by Hewitt Associates, LLC (Hewitt), an independent consulting actuary. Hewitt determines the maximum amount permitted by law or regulation as a Federal income tax deduction and the minimum amount necessary during any Plan year to avoid an accumulated funding deficiency as defined by ERISA.

Mandatory employee contributions are recorded in the same period SEI withholds payroll deductions from the Plan participants.

SEI funds the normal cost of the Plan on a current basis and initial and additional past service liabilities from Plan amendments, assumption/method changes, and actuarial experience, over 30, 10, and 5 years, respectively. The actuarial funding method was the unit credit cost method. The interest rate assumption used for funding purposes was within the range of 5% to 7% for the three-month period ended March 31, 2010 and year ended December 31, 2009. The contributions for the three-month period ended March 31, 2010 and year ended December 31, 2009 were $0 and $1,832,527, respectively. The minimum funding requirement of ERISA was met for 2009. There is no minimum funding requirement for the Plan for the three-month period ended March 31, 2010, as such funding will be made to the Siemens Pension Plan for Union Employees.

4. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits represent the actuarial present value of estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions for employee services already rendered. Accumulated plan benefits include benefits expected to be paid to (i) retired or terminated employees or their beneficiaries; (ii) beneficiaries of employees who have died; and (iii) present employees or their beneficiaries. Benefits under the Plan are based on employees' years of service and/or (i) the average monthly compensation for the five consecutive calendar years during which compensation was the highest within the last ten calendar years of employment, or (ii) the average monthly compensation for the last 60 months of employment.

4. Actuarial Present Value of Accumulated Plan Benefits (continued)

The accumulated plan benefits for active employees are based on service and/or compensation prior to the date of calculation (the valuation date). Benefits payable under all circumstances – retirement, death, disability, and termination of employment are included, to the extent they are deemed attributable to employees' service rendered and compensation received up to the valuation date.

The actuarial present value of accumulated plan benefits for the Plan was determined by Hewitt and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The more significant actuarial assumptions used in the December 31, 2009 valuation were:

1. Life expectancy of participants: 2008 Generational Mortality Table for Annuitants & Non-Annuitants

2. Accrued benefit interest rate: 6.95%

3. Weighted average retirement age assumption: 61

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of December 31, 2009 and the changes in the actuarial present value of accumulated plan benefits during the year ended December 31, 2009 are as follows:

Vested benefits:	
Participants and beneficiaries currently receiving benefits	$ 8,303,942
Other participants	12,608,681
	20,912,623
Nonvested benefits	1,172,527
Total actuarial present value of accumulated plan benefits	$ 22,085,150

4. Actuarial Present Value of Accumulated Plan Benefits (continued)

Actuarial present value of accumulated plan benefits at beginning of year	$21,037,016
Increase (decrease) during the year attributable to:	
Interest accumulated	1,433,079
Other changes/Plan experience	463,647
Benefits paid	(848,592)
Net increase	1,048,134
Actuarial present value of accumulated plan benefits at end of year	$22,085,150

The "other changes/plan experience" component represents the normal operation of the Plan. It consists primarily of the increase due to ongoing benefit accruals and those items of plan experience that are not associated with asset performance.

As of March 31, 2010, the present value of accumulated plan benefits of the Plan was transferred to the Siemens Pension Plan for Union Employees.

5. Plan Termination

SEI intends to continue the Plan indefinitely without interruption, but reserves the right to discontinue it at any time.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

(a) Benefits attributable to employee contributions, taking into account those paid out before termination.

(b) Annuity benefits that former participants or their beneficiaries have been receiving for at least three years, or that participants eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding the Plan's termination.

5. Plan Termination (continued)

(c) Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. Government agency) up to the applicable limitations (discussed below).

(d) All other vested benefits (that is, vested benefits not insured by the PBGC).

(e) All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2010 and 2009, the ceiling is $4,500 per month. That ceiling, which is adjusted periodically, applies to pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at the time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

6. Tax Status

The Internal Revenue Service (IRS) has issued a favorable determination letter dated January 29, 2004 for the Plan advising that the Plan qualifies for tax-exempt status pursuant to the provisions of Section 401(a) of the Internal Revenue Code (the Code). The Plan's management and management of the Company believe that the Plan conforms to ERISA requirements and continues to qualify as tax exempt under the Code.

7. Parties-in-Interest

The Plan's trustee, BNY Mellon Bank, N.A., also serves as an investment manager with respect to one of the funds of the Plan. In addition, the trustee also serves as the custodian for certain funds managed by INVESCO in which the Plan participates.

8. Information Certified by the Trustee

The Plan's administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan's administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to the following information certified by BNY Mellon Bank, N.A., the trustee of the Plan, as complete and accurate, except for comparing such information certified by the trustee to information included in the Plan's individual financial statements.

BNY Mellon Bank, N.A. has certified to the accuracy and completeness of the individual Plan investments in the net assets of the Master Trust at March 31, 2010 and December 31, 2009 and the investment income for the three-month period ended March 31, 2010 and year ended December 31, 2009, as summarized below:

March 31, 2010:	
Investment in the net assets of the Master Trust	**$ –**
Three-month period ended March 31, 2010:	
Plan's share of investment income of the Master Trust:	
Net appreciation in fair value of investments	**$ 424,064**
Interest	**124,110**
Dividends	**9,638**
Other	**2,657**
Total investment income	**$ 560,469**

8. Information Certified by the Trustee (continued)

December 31, 2009:	
Investment in the net assets of the Master Trust	$18,511,318
Year ended December 31, 2009:	
Plan's share of investment income of the Master Trust:	
Net appreciation in fair value of investments	$ 1,488,522
Interest	451,482
Dividends	56,208
Other	14,751
Total investment income	$ 2,010,963

9. Investment in the Master Trust

All Master Trust amounts were prepared from records certified to be complete and accurate by BNY Mellon Bank, N.A. at March 31, 2010 and December 31, 2009 and for the three-month period ended March 31, 2010 and year ended December 31, 2009.

The Plan has a proportionate interest in the Master Trust. The Master Trust's net assets and investment income are allocated to the individual pension plans on a daily weighted average basis. The Plan's proportionate interest in the Master Trust's net assets at March 31, 2010 and December 31, 2009 was 0.00% and 0.51%, respectively.

Fair Value Measurements

Fair value is defined under ASC 820 as the price that would be received for an asset or paid for a liability in an orderly transaction between market participants on the measurement date. To measure fair value, a hierarchy has been established that requires the Plan to maximize the use of observable inputs and minimize unobservable inputs. As such, the hierarchy gives the highest

9. Investment in the Master Trust (continued)

priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy in ASC 820 are:

- Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.

- Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

  - Quoted prices for similar assets and liabilities in active markets

  - Quoted prices for identical or similar assets or liabilities in markets that are not active

  - Observable inputs other than quoted prices that are used in the valuation of the asset or liability (e.g., interest rate and yield curve quotes at commonly quoted intervals)

  - Inputs that are derived principally from or corroborated by observable market data by correlation or other means

- Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity. Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk)).

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement in its entirety.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at March 31, 2010.

Cash and Cash Equivalents: Cash and cash equivalents comprise short-term investments and are held in a pooled investment vehicle. This fund maintains a $1 per share value. Any gains and/or earnings by the underlying assets are paid out as interest.

9. Investment in the Master Trust (continued)

Common Stock (Foreign and U.S.): All assets in which the Master Trust holds a direct share have been classified as common stocks. These assets are valued at the closing price reported on the active market on which the individual securities are traded.

Corporate Debt Obligations (Foreign and U.S.): Valued based on market data, incorporating various inputs such as benchmark curves, benchmarking of like securities, matrix pricing, etc. as model processes such as the Option Adjusted Spread model to assess interest rate impact of and develop prepayment scenarios. Both models and processes take into account market convention.

Government Debt Obligations (Foreign and U.S.): Valued based on market data, incorporating various inputs such as benchmark curves, benchmarking of like securities, matrix pricing, etc. as model processes such as the Option Adjusted Spread model to assess interest rate impact of and develop prepayment scenarios. Both models and processes take into account market convention.

Preferred Stock: Valued based on market data, incorporating various inputs such as benchmark curves, benchmarking of like securities, matrix pricing, etc. as model processes such as the Option Adjusted Spread model to assess interest rate impact of and develop prepayment scenarios. Both models and processes take into account market convention.

Real Estate Investment Trust (REIT): The REIT is a limited partnership comprising marketable securities. The Master Trust directly holds shares of the underlying assets of the limited partnership and, therefore, the value is reported using the closing price on the active market of the underlying assets.

Commingled and Mutual Funds: These assets have been classified as common stocks on the preceding Master Trust table based on the underlying assets of the funds which are common stocks. The fund calculates a net asset value (NAV) based on the underlying securities' value at market close, less any applicable expenses, divided by the shares outstanding. NAVs may be calculated on a daily/weekly/monthly basis (as determined by the fund).

Limited Partnerships: Limited partnerships are valued based on the information provided by the manager. Quarterly data is usually received one to three months after quarter-end. This creates a "lag" as the data is updated when it is received. There is no material impact as a result of this lag.

9. Investment in the Master Trust (continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies and assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level within the fair value hierarchy the Master Trust's net investments at fair value as of March 31, 2010 and December 31, 2009:

401(h) Account

Included within the assets of the Master Trust is a separate 401(h) account which is maintained with respect to a health-benefit component of the Siemens ElectroCom L.P. Retirement Plan which merged into the Siemens Pension Plan on December 31, 2000. The Siemens Pension Plan also participates in the Master Trust. This asset has been accounted for in accordance with Section 401(h) of the Code. The corresponding liability has been recorded in the statement of net assets of the Siemens Pension Plan and is not reflected in the Master Trust assets above. These assets are not available to the Plan.

Forward Currency Contracts – Net

In order to hedge against foreign currency exchange rate risks, the Master Trust may buy or sell foreign forward currency contracts. Foreign forward currency contracts obligate one party to purchase and the other party to sell a specific currency at a set price on a future date. Foreign forward currency contracts are valued monthly based on forward currency rates with the resulting adjustment being recorded as unrealized gain (loss). At March 31, 2010, the net unrealized gain for forward currency contracts was $1,173 and at December 31, 2009, the net unrealized loss for forward currency contracts was $2,570 as detailed below.

As of March 31, 2010 and December 31, 2009, the Master Trust had open positions to buy foreign forward currency contracts in various denominations in exchange for $1,067,024 and $998,072, respectively, and whose values at March 31, 2010 and December 31, 2009 were $1,068,285 and $998,021, respectively, resulting in a gain of $1,261 and a loss of $51 for 2010 and 2009, respectively.

As of March 31, 2010 and December 31, 2009, the Master Trust had open positions to sell foreign forward currency contracts in various denominations in exchange for $1,067,024 and $998,072, respectively, and whose values at March 31, 2010 and December 31, 2009 were $1,067,112 and $1,000,591, respectively, resulting in a loss of $88 and a loss of $2,519 for 2010 and 2009, respectively.

Securities Lending

As of March 31, 2010 and December 31, 2009, the Master Trust participated in the BNY Mellon Bank Security Lending Program for its U.S. and non-U.S. securities held in custody at BNY Mellon Bank, N.A. These securities are lent to certain unrelated third-party brokers in exchange for collateral, usually in the form of cash. Collateralization levels are equal to a percentage of the market value of the borrowed securities. For U.S. securities, collateral shall not be less than 102%, and for non-U.S. securities, collateral shall not be less than 105% unless it is denominated in the same currency as the collateral, in which case it will be 102%. Collateral received is invested in a short-term collateral re-investment fund that is managed by BNY Mellon's Global Security Lending Group, and the fund consists of high quality short-term investments. The value of loaned securities amounted to $101,000,105 and $88,354,987 at March 31, 2010 and December 31, 2009, respectively. The obligation to return collateral is reflected as a liability in the Master Trust's financial statements.

10. Subsequent Events

Management has evaluated subsequent events for the Plan through December 16, 2010, the date the financial statements were available to be issued.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V—Summary of Plan Provisions

Normal Retirement	
Eligibility	Age 65 with 5 years of service.
Benefit	The annual benefit is based on each year's earnings. For each year of service prior to 1983, the annual benefit is computed as 1% of annual earnings during each year of credited service. For each year of service after 1982, the annual benefit is 1.2% of annual earnings during each year of credited service, plus 1% of such earnings which are in excess of $9,000. The total benefit is subject to a minimum of 1% of final 5-year average earnings (but not less than $120 nor more than $180) multiplied by total years of credited service.
Early Retirement	
Eligibility	Age 60 with 10 years of service.
Benefit	The accrued normal benefit is reduced 5/9% for each month that commencement starts before age 62, with a supplemental benefit payable prior to age 62 of $72 for each year of credited service (maximum of 25 years).
Disability Retirement	
Eligibility	10 years of service.
Benefit	Normal retirement benefit (without the minimum) accrued to date of disability commencing after 6 months of disability reduced by 5/9 of 1% for each month by which the first pension payment precedes age 62, provided such reduction shall not exceed 12%; plus $75 per month payable until eligible for unreduced Social Security benefits.

Termination	
Eligibility	100% vested after 5 years of service.
Benefit	The annual pension is the accrued benefit deferred to age 65 or on or after age 55. If payments commence before age 65, such accrued benefit is reduced.
Death Benefits	
Benefit	Upon death after becoming eligible for regular early retirement, the spouse receives a benefit as if the employee retired on the date of his death with the spouse's option in effect. The spouse's benefit option provides that 50% of his benefit will continue to his spouse after his death. The participant receives an actuarially reduced pension to provide for this optional form of payment. Employee is charged for remaining REA required death benefits.
Employee Contributions	A participant must contribute 3% of each year's earnings which are in excess of $9,000.

Changes in Plan Provisions for the January 1, 2010 Valuation

The January 1, 2010 valuation reflects the following plan change:

- The plan was merged into Siemens Pension Plan for Union Employees effective March 31, 2010.

Changes in Plan Provisions for the January 1, 2009 Valuation

The January 1, 2009 valuation reflected the following plan changes:

- The legislated section 401(a)(17) recognizable pay limit increased from $230,000 for 2008 to $245,000 for 2009; and
- The legislated section 415 dollar limit for defined benefit plans increased from $185,000 for 2008 to $195,000 for 2009.

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

The target liability was calculated using the full yield curve based on corporate bonds rates for December. As such, "0" was entered on line 21b as the applicable lookback month.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following changes to the non-prescribed assumptions:

- A change in the salary increase assumptions applicable to the minimum funding target normal cost and the maximum tax expected benefit increase from 4.05% to 3.75%.

- A change in the Social Security wage base assumption from 3.05% to 2.75%.

These changes were made to better reflect the anticipated plan experience. Neither of these assumption changes reduced the funding shortfall, as such approval of the Commissioner is not required.

Early Retirement

Eligibility	Age 60 with 10 years of service.
Benefit	The accrued normal benefit is reduced 5/9% for each month that commencement starts before age 62, with a supplemental benefit payable prior to age 62 of $72 for each year of credited service (maximum of 25 years).

Disability Retirement

Eligibility	10 years of service.
Benefit	Normal retirement benefit (without the minimum) accrued to date of disability commencing after 6 months of disability reduced by 5/9 of 1% for each month by which the first pension payment precedes age 62, provided such reduction shall not exceed 12%; plus $75 per month payable until eligible for unreduced Social Security benefits.

Termination	
Eligibility	100% vested after 5 years of service.
Benefit	The annual pension is the accrued benefit deferred to age 65 or on or after age 55. If payments commence before age 65, such accrued benefit is reduced.
Death Benefits	
Benefit	Upon death after becoming eligible for regular early retirement, the spouse receives a benefit as if the employee retired on the date of his death with the spouse's option in effect.
