SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The financial statements of Globe Metallurgical, Inc. Hourly Employees Retirement Savings Plan (the Plan) have been prepared using the accrual basis of accounting.

Contributions

Participants may contribute up to 100% of base salary to the Plan on a pre-tax basis. Pre-tax employee contributions during the 2010 and 2009 plan years were limited by federal law to \$16,500 and \$16,500, respectively. Eligible employees may also elect to make "catch up" contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Federal law imposes additional limitations on the amount which the Company may contribute for any particular year. Starting in October, 2007, the company has elected to make a discretionary matched contribution equal to 25% of the first 6% of each participants contribution to their respective 401(k) account. The match applies to all participants except for the collectively bargained union employees of Globe Metallurgical, Inc. Selma division.

Investments

Guaranteed investment contracts are recorded at contract value as determined by the trustee. Other investments are reflected at fair market value as determined by the trustee. Investment transactions are recorded on a settlement-date basis. Total recorded investment value as recorded on a settlement-date basis does not materially differ from what total investment value would be if transactions were recorded on a trade-date basis.

Administrative Expenses

Material administrative expenses are paid directly by the Company and, accordingly, are not reflected in the Plan's financial statements.

Forfeitures

Company contributions to a participant's account in which the participant has not yet vested are forfeited in the event of termination of employment of the participant for any reason other than normal or early retirement, disability, or death. Amounts forfeited are used to reduce future Company contributions to the Plan. There were no forfeited nonvested accounts at June 30, 2010.

Income, Contributions, and Distribution Recognition

Interest income is recognized in the period earned. Dividend income is recognized in the period in which the dividends are declared. Participant and employer matching contributions are recognized when the participant contributions are deducted from the participant's base salary. Employer discretionary contributions are recognized when the employer makes the decision to make the discretionary contribution. Distributions to participants are recorded in the period in which the payment is made.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Loans to Participants

Loans are made available to all participants in accordance with the specific provisions set forth in the Plan. The amount of a loan cannot exceed the lesser of \$50,000 or one-half of a participant's total vested account balance. The loans bear interest at a rate of 1% above prime rate at the time the loan is made. All loans are subject to specific repayment plans and are secured by the participant's nonforfeitable interest in his/her account equivalent to the principal amount of the loan.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in net assets available for benefits during the reporting period. Actual results could differ from those estimates.

SUMMARY OF THE PLAN

The following description of the Plan provides general information only. Participants should refer to the Summary Plan Description for a more complete description of the Plan's provisions.

The Plan was originally established on January 1, 1995, as the Globe Metallurgical, Inc. Niagara Falls Hourly Employees Retirement Savings Plan. The Plan was amended and restated on January 1, 1997 to expand its coverage to include hourly employees of the Selma, Alabama, plant. On the same date, the Plan's name was changed to Globe Metallurgical, Inc. Hourly Employees Retirement Savings Plan.

Generally, employees covered by the Plan are eligible to participate on the first day of any Plan Quarter after completing 90 days of service. A participant becomes eligible to receive distributions upon attaining the normal retirement age of 65. Early distributions and hardship withdrawals are available to participants who meet specific requirements of the Plan. Upon retirement, the entire balance of the participant's account shall be distributed in accordance with the method of distribution selected by the participant and his designated beneficiary. The Plan is contributory for employees. Participants are immediately vested in their contributions plus earnings attributable to those contributions. Participants are 100% vested in employer contributions after one year of continuous service. The employer matching contributions were effective October 1, 2007. The plan allows for a discretionary match, no amendments were necessary.

Effective December 21, 2005, Globe Metallurgical acquired West Virginia Alloy as a subsidiary. As of January 1, 2006, the plan allowed employees from West Virginia Alloy to be eligible participants in the Globe Metallurgical Hourly Employees Retirement Savings Plan.

FEDERAL INCOME TAXES

The Plan uses a volume submitter plan document sponsored by Findley Davies, Inc. Findley Davies, Inc. received an opinion from the IRS, dated March 31, 2008, which states that the volume submitter document satisfied the provisions of Section 401 of the IRC. The Plan itself has not received a determination letter from the IRS. However, the Plan's management believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Accordingly, the accompanying financial statements do not include a provision for federal income taxes.

PARTICIPANTS SEPARATED FROM SERVICE WITH A DEFERRED VESTED INTEREST

As of June 30, 2010, fifteen participants with account balances totaling \$355,094 have separated from service and have not been paid.

SUBSEQUENT EVENT

Subsequent events were reviewed through February 2, 2011. There were no subsequent events to report as of that date.

PLAN RESTATEMENTS

The plan was timely restated during the EGTRRA Remedial Amendment Period.

FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board *Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB Statement ASC 820 are described below:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or Liabilities in active markets that the Plan has the ability to access.
- Level 2: Inputs to the valuation methodology include:
- Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in active markets;
 - Inputs other than quoted prices that are observable for the assets or liability;
 - Inputs that are derived principally from or corroborated by observable market data by correlation or by other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

HOURLY EMPLOYEES RETIREMENT SAVINGS PLAN
NOTES TO FINANCIAL STATEMENTS

FAIR VALUE MEASUREMENTS (CONTINUED)

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value:

Mutual Funds: Valued at the net asset value of shares held by the plan at year end.

Participant loans: Valued at amortized cost, which approximates fair value.

Interest Bearing Cash: Valued at the net asset value of shares held by the plan at year end.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of June 30, 2010:

Assets at Fair Value as of June 30, 2010

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
