NOTES TO FINANCIAL STATEMENTS

Note 1. Plan Description

The following description of the Supplemental Annuity Plan for Employees of Hollins University (the "Plan") provides only general information. Participants should refer to the Summary Plan Description for a more complete description of the Plan's provisions.

General:

The Plan is a defined contribution tax deferred annuity plan covering eligible employees of Hollins University (the "University"), excluding student employees. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). During the year, the Plan terminated and was merged into the Retirement Plan for Employees of Hollins University. See Note 7.

Contributions:

Each year, participants may contribute a portion of their compensation as a pre-tax deferral as defined in the Plan. Participants may also contribute amounts representing distributions from other qualified plans. Participants direct the investment of their contributions into various investment options offered by the Plan. Contributions are subject to certain limitations. The University does not contribute to the Plan.

Participant accounts:

Each participant's account is credited with the participant's contribution and an allocation of Plan earnings and/or losses. Allocations are based on participant account balances. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting:

Participants are immediately vested in their contributions plus actual earnings and/or losses thereon.

Payments of benefits:

On termination of service due to death, disability, retirement, or other reasons, a participant may elect to receive a lump-sum distribution, partial payments, installment payments, or annuity payments equal to the value of the participant's vested balance in his or her account.

Note 2. Significant Accounting Policies

Basis of accounting:

The financial statements of the Plan are prepared using the accrual method of accounting.

Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires the Plan Administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Valuation of investments and income recognition:

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Benefit payments:

Benefit payments are recorded when paid.

Administrative expenses:

Substantially all Plan fees and administrative expenses are paid by the Plan and are netted with investment income.

Subsequent Events:

Subsequent events have been evaluated through the date of the independent auditor's report, the date the financial statements were available to be issued.

Note 3. Fair Value Measurements

The Plan's investments are reported at fair value in the accompanying statements of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The fair value measurement accounting literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority; Level 2 inputs consist of observable inputs other than quoted prices for identical assets; and Level 3 inputs consist of unobservable inputs and have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 3 inputs were used only when Level 1 or Level 2 inputs were not available.

Note 3. Fair Value Measurements (Continued)

Level 1 Fair Value Measurements

The fair values of mutual funds and the pooled separate account are based on quoted net asset values of the shares held by the Plan at year-end.

Level 3 Fair Value Measurements

The TIAA Traditional Annuity is valued at contract value which equals the accumulated cash contributions and interest credited to the Plan's contracts less any withdrawals. Contract value approximates fair value. The following table provides further detail of Level 3 investments.

Note 5. Investment Contract with Insurance Company

Participants invest in a TIAA Traditional Annuity account that is not fully benefit responsive. This contract pays a guaranteed rate of interest plus additional amounts that are not guaranteed but may be established on a year-by-year basis. These additional amounts, when declared, remain in effect through the end of the "declaration year," which begins each March 1. The guaranteed annual interest rate is generally 3.00%. Interest rates ranged from 3.35% to 4.00% and 3.65% to 4.00% for the years ending 2011 and 2010, respectively.

Participants also invest in a TIAA Traditional Annuity account that is fully benefit responsive. These contracts maintain the participant's contributions plus a specified rate of interest and are guaranteed by TIAA's claims paying ability. The guaranteed annual interest rate is generally 3.00%. The rate of return in the benefit responsive Traditional Annuity account was 3.25% and 3.00% for the years ended 2011 and 2010, respectively. The contract is included in the financial statements at contract value which approximates fair value. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.
