Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Independent Auditors' Report

The Pension Committee
Specialty Equipment Companies, Inc:

We were engaged to audit the accompanying statements of net assets available for plan benefits of the Specialty Equipment Companies, Inc. Market Forge Company and United Steelworkers of America (AFL-CIO) Pension Plan (the Plan) as of June 30, 2011 and 2010, and the related statements of changes in net assets available for plan benefits for the years then ended, and the statement of accumulated plan benefits as of June 30, 2010, and the related statement of changes in accumulated plan benefits for the year then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 (ERISA), the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in note 6, which was certified by Bank of New York Mellon N.A. (the Trustee), except for comparing such information with the related information included in the financial statements. We have been informed by the Plan Administrator that the Trustee holds the Plan's investment assets and execute investment transactions. The Plan Administrator has obtained certifications from the Trustee covering the period as of and for the years ended June 30, 2011 and 2010 that the information provided to the Plan Administrator by the Trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the Trustee, has been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

(1) Description of the Plan

(a) General

The following brief description of the Specialty Equipment Companies, Inc. Market Forge Company and United Steelworkers of America (AFL-CIO) Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the plan agreement for more complete information. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan is a noncontributory defined benefit pension plan sponsored by United Technologies Corporation (UTC or the Company) covering employees in the bargaining unit represented by the United Steelworkers of America (AFL-CIO) and covered by the union agreement. Market Forge Company (now known as FM Manufacturing, Inc.), the previous plan sponsor, was sold by Specialty Equipment Companies, Inc. (Specialty) on October 31, 1993. However, Specialty has retained liabilities related to the Plan. In connection with the sale, the Plan became frozen. As a result, participants no longer accrue benefits, although the Plan will remain in existence to pay benefits that were already accrued. UTC acquired Specialty effective November 21, 2000.

(b) Vesting and Benefit Provisions

Upon the October 31, 1993 sale of Market Forge Company, all participants became fully vested. Under the provisions of the pension agreement, eligible employees are entitled to monthly pension benefits based on the amount calculated by multiplying the employee's years of credited service at October 31, 1993 by the "Monthly Pension Unit" in effect on such date. Effective August 16, 1990, the Monthly Pension Unit is Twenty Dollars (\$20.00). Normal retirement age is 65. An early retirement election is possible as early as 55, if an employee has completed at least 5 years of credited service. A married employee who retires shall receive payments under this Plan in the form of a qualified joint and survivor annuity if the employee's spouse is living on the benefit commencement date. In lieu of the qualified joint and survivor annuity, an employee may elect (with the consent of a spouse), by written application filed with the retirement committee at any time within the ninety (90) day period ending on the annuity starting date, to receive the accrued benefit as a single life annuity. If the present value of an employee's vested accrued benefit exceeds \$5,000 and the accrued benefit is "immediately distributable", the employee and the employee's spouse (or where the employee or the spouse has died, the survivor) must consent to any distribution of such accrued benefit.

(2) Summary of Accounting and Reporting Policies

The significant accounting and reporting policies followed by the Plan are summarized below:

(a) Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting.

**SPECIALTY EQUIPMENT COMPANIES, INC.
MARKET FORGE COMPANY AND UNITED STEELWORKERS
OF AMERICA (AFL-CIO) PENSION PLAN**

Notes to Financial Statements

June 30, 2011 and 2010

(b) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of net assets available for plan benefits at the dates of the financial statements and the changes in net assets available for plan benefits during the reporting periods. The actuarial present value of accumulated plan benefits and contributions to the Plan are estimates which are based upon the actuarial methods and assumptions selected regarding the return on investments, mortality rates, and other factors. Actual results could differ from those estimates.

(c) Contributions

Employer contributions are determined on an actuarial basis and are recorded during the Plan year to which they pertain. The Company remits contributions to the Trustee as necessary to meet the funding requirements of the Plan.

(d) Administrative Expenses/Related Party Transactions

Expenses incurred in the administration of the Plan, such as service center administration and consulting services performed by outside service providers and other expenses, primarily actuarial fees, audit fees and Pension Benefit Guaranty Corporation (PBGC) premiums, are paid from the Plan's assets.

Plan investments are managed by the Trustee. Transactions with the Trustee qualify as party-in-interest transactions. For the years ended June 30, 2011 and 2010, fees paid by the Plan for investment advisory services and trustee fees amounted to \$17,783 and \$12,552, respectively.

(e) Master Trust

The Plan's interest in the UTC Master Trust (Master Trust) is based upon the value of units of participation as certified by the Master Trust Trustee (see note 6). Master Trust investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of the Plan's interest in investment income/(loss) and realized and unrealized appreciation/(depreciation) in the market value of the invested assets of the Master Trust, net of investment advisory and trustee fees, is allocated to the Plan by the Trustee based on the Plan's proportionate interest in the Master Trust.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date. Interest income is recorded as earned.

Notes to Financial Statements

June 30, 2011 and 2010

(f) *Risks and Uncertainties*

The investment managers retained by the Plan Administrator have discretion to invest Master Trust assets in derivative financial instruments to manage risk as well as to enhance yields. These derivatives are primarily in the form of forward foreign exchange contracts, and various equity and interest rate futures. Such derivative instruments are reported at fair value within the Master Trust, and the changes in fair value are reported currently in the net appreciation/(depreciation) of the Master Trust and not deferred. The forward foreign exchange contracts represent an obligation to receive or disburse the change in the market value of the currency price. A portion of the Master Trust's assets are invested in international securities. As a result, certain Master Trust assets are exposed to risk from fluctuations in foreign exchange rates.

By nature, all financial instruments involve risk, generally market risk, arising from changes in interest rates, equity markets, or currency exchange rates, and credit risk, the risk that an issuer or counter party will default on an agreed-upon transaction.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(g) *Payment of Benefits*

Benefits are recorded when paid.

(h) *Fair Value Measurement*

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC 820), Fair Value Measurements and Disclosures, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

- **Level 1** – The types of instruments classified as Level 1 are valued based on quoted market prices in active markets.
- **Level 2** – The types of instruments classified as Level 2 are valued based on inputs other than quoted prices that are observable for the asset, such as quoted prices for similar instruments in active markets or similar instruments in markets that are not active and model-based valuations for which all significant assumptions are observable or can be corroborated by observable market data.

**SPECIALTY EQUIPMENT COMPANIES, INC.
MARKET FORGE COMPANY AND UNITED STEELWORKERS
OF AMERICA (AFL-CIO) PENSION PLAN**

Notes to Financial Statements

June 30, 2011 and 2010

- **Level 3** – Investments classified as Level 3 have inputs based on unobservable price data. They typically trade infrequently and therefore have little or no price transparency. Fair value pricing is developed based on the best information available which can include the reporting entity's own data.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

(i) New Accounting Pronouncements

In May 2011, the FASB issued ASU No. 2011-04, "Fair Value Measurements" This ASU clarifies the concepts related to highest and best use and valuation premise, blockage factors and other premiums and discounts, and the fair value measurement of financial instruments held in a portfolio. The guidance includes enhanced disclosure requirements about recurring Level 3 fair value measurements, the use of nonfinancial assets, and the level in the fair value hierarchy of assets and liabilities not recorded at fair value. The provisions of this ASU are effective prospectively for interim and annual periods beginning on or after December 15, 2011. Early application is prohibited. The Plan does not anticipate the adoption of this new ASU to have a material impact on its financial statements.

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-06, Fair Value Measurements and Disclosures (Topic 820) – "Improving Disclosures about Fair Value Measurements". This guidance requires: (i) separate disclosure of significant transfers between Level 1 and Level 2 and reasons for the transfers; (ii) disclosure, on a gross basis, of purchases, sales, issuances, and net settlements within Level 3; (iii) disclosures by class of assets and liabilities; and (iv) a description of the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. This guidance is effective for reporting periods beginning after December 15, 2009, except for the Level 3 disclosure requirements, which will be effective for fiscal years beginning after December 15, 2010 and interim periods within those fiscal years. The guidance required for 2010 was adopted by the Plan as of July 1, 2010 and did not have a material impact on the Plan's financial statements.

(j) Reclassifications

Certain reclassifications have been made to the prior year amounts to conform to the current year presentation.

(3) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service employees have rendered as of October 31, 1993.

**SPECIALTY EQUIPMENT COMPANIES, INC.
MARKET FORGE COMPANY AND UNITED STEELWORKERS
OF AMERICA (AFL-CIO) PENSION PLAN**

Notes to Financial Statements

June 30, 2011 and 2010

Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) beneficiaries of employees who have died.

The actuarial value of accumulated plan benefits is determined by the Plan's actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation to determine obligations as of June 30, 2010 (date of most recent valuation) were:

a. Discount rate	4.90%
b. Mortality	RP-2000 static tables
c. Retirement age	Age 65

During the year ended June 30, 2010, the discount rate assumption changed from 6.10% to 4.90% resulting in a \$538 thousand increase in the actuarial benefit obligation. During the year ended June 30, 2010, the actuarial benefit obligation decreased \$59 thousand resulting from demographic experience.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(4) Funding Policy

UTC's funding policy is to make periodic contributions to the Plan in amounts computed by the Plan's actuary using the Unit Credit Cost Method. This method and the actuarial assumptions have been designed to provide sufficient funds to pay benefits as they become payable under the Plan. UTC was not required to make contributions for the Plan years ended June 30, 2011 and 2010 as the Plan has met the minimum funding requirements of ERISA and the Internal Revenue Code, as amended.

(5) Plan Termination

Although UTC has not expressed any intent to terminate the Plan, it may do so at any time. In the event the Plan terminates, the net assets generally will not be available on a pro rata basis to provide for participant's benefits. Whether a particular participant's accumulated plan benefits will be paid depends on the priority of those benefits, the financial condition of the Plan Sponsor, and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. The maximum amount of PBGC guaranteed benefits for terminations in 2011 is \$4,500 per month. Some benefits may be fully or partially provided for by the existing Plan assets and the PBGC guarantee while other benefits may not be provided for at all.

Notes to Financial Statements

June 30, 2011 and 2010

Upon termination, UTC shall give notice to the PBGC and shall comply with its procedures and lawful orders. As soon as it may do so, UTC thereupon shall cause all amounts in the hands of the Trustee to be allocated and distributed in the manner and order set forth in Section 4044 of ERISA to the extent of the sufficiency of the Plan's assets.

Additional information concerning the priority order of participants' claims to the assets of the Plan upon termination can be obtained from the Plan document, which is available from the Plan Administrator.

(6) Investment in Master Trust (Unaudited)

UTC has entered into a Master Trust agreement with Bank of New York Mellon, N.A. as Trustee. Under this agreement, certain pension plans of UTC and its subsidiaries combine certain of their investments in the Master Trust.

Participating plans receive units of participation in this pool of investments based on their contributions and other transfers to the Master Trust. The plans redeem units of participation when the Master Trust pays pension benefits, administrative expenses, or other transfers from the Master Trust on behalf of the plans. The Plan's interest in the Master Trust was less than 1% at June 30, 2011 and 2010.

UTC stock held in the Master Trust had a fair value of approximately \$566,222,000 and \$564,065,000 at June 30, 2011 and 2010, respectively. UTC stock held in the Master Trust represents approximately 3.2% and 3.9% of the Master Trust's net assets at June 30, 2011 and 2010.

As of June 30 2011 and 2010, the Master Trust held no individual investment representing 5% or more of the Master Trust's net assets at year end.

Notes to Financial Statements

June 30, 2011 and 2010

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at June 30, 2011 and 2010.

Quoted market prices are used to value equity, certain actively traded debt, and mutual fund investments when available. Investments in securities traded on national and foreign securities exchanges are valued using the pricing services' reported sale prices on the last business day of the year or, if no sales were reported on that date, at the last reported bid prices.

Forward currency contracts, futures and options are valued at the exchange rates and market prices prevailing on the last business day of the year. Both exchange rates and market prices are readily available from published sources. Temporary cash investments are stated at fair value.

For securities that have no quoted market price, many factors are considered in arriving at fair market value.

Common Collective Trusts invest in other public or private individual assets as determined and managed by the fund. The Plan's interest in the common/collective trust funds are based on the fair values of the underlying investments. Investments in collective trust funds are valued at their respective net asset value per share/unit on the valuation date.

For fixed income securities, the market approach pricing methodology is primarily used where observable prices are obtained for market transactions involving identical or comparable securities of issuers with similar credit ratings. Mortgages have been valued on the basis of their future principal and interest payments discounted at prevailing interest rates for similar investments.

Real estate investments are valued on a quarterly basis; principally rental property subject to long-term leases has been estimated on the basis of future rental receipts and estimated residual values discounted at interest rates commensurate with the risks involved. These valuation estimates are supplemented by third-party appraisals on an annual basis.

Limited partnerships, principally private equity investments, are valued quarterly by the general partner using various valuation methods such as discounted cash flows, earnings multiples and market multiples. Valuation adjustments occur which reflect changes in operating results, financial condition, or prospects of the applicable portfolio company. Since valuation estimates are typically lagged a quarter, a fourth quarter roll-forward valuation process is used for fund level partnerships. This process takes into account latest reported valuation, monthly capital calls, management fees, return of capital, income distributions, and realized gains/losses.

- (d) Primarily includes real estate funds with quarterly redemption frequency and 60 days notice.

In preparing its ASC 820 disclosures, the Plan has considered the nature of the underlying investments in classifying its investments by type and valuation level. The classification of investments in the Master Trust statement of net assets reflects a classification based on the structure of the investment. As an example, real estate held within a limited partnership structure may be classified differently. The Plan believes the presentation of investments by ASC 820 valuation levels is representative of the required disclosures.

The Plan's interest in certain common collective trusts and limited partnerships are reported at the net asset value (NAV) reported by the fund managers. NAV is used to estimate the fair value of the Plan's interest therein, unless it is probable that all or a portion of the investment will be sold for an amount different from NAV. As of June 30, 2011, the Plan had no specific plans or intentions to sell investments at amounts different than NAV.

Nonrecurring Fair Value Measurements

The carrying value of the obligations to return securities lending collateral approximates fair value as of June 30, 2011 and 2010.

(a) Derivative Financial Instruments

The Master Trust invests in equity and currency futures contracts to manage risk and gain asset class exposure while maintaining liquidity.

At June 30, 2011 and 2010, the Master Trust had open foreign currency contracts to purchase approximately \$0.3 billion and \$0.8 billion and sell approximately \$0.3 billion and \$0.8 billion, respectively, of various foreign currencies. The open foreign currency contracts receivable and payable balances are included in the other receivables and other payables captions in the Master Trust's statements of net assets.

(b) Securities Lending Activities

The Master Trust participates in a fee-based securities lending program whereby certain securities in the separate investment accounts are loaned to third-party brokers. The Master Trust retains control over loaned securities, which remain assets of the Master Trust and are not removed from the accounting records. The Master Trust has the ability to sell the securities while on loan. Fees received for loaning the securities, net of direct expenses, are recorded as interest income under the Master Trust. To minimize lending risk, the Securities Lending Agreement requires cash-collateral loans maintain collateralization ratios of 100% to 102% while non-cash-collateral loans maintain collateralization ratios of 100% to 105%. Collateral is priced daily and re-balanced as required. Cash collateral is invested during the period securities are on loan. The value of reinvested collateral has been reduced to reflect unrealized losses as a result of declines in market value. As of June 30, 2011 and 2010, the market value of reinvested collateral had a cumulative decrease of \$2 million and \$71 million, respectively. The value of the collateral has been reduced to reflect this loss, and the losses are included in net depreciation in fair value of debt instruments.

MARKET FORGE COMPANY AND UNITED STEELWORKERS
OF AMERICA (AFL-CIO) PENSION PLAN**

Notes to Financial Statements

June 30, 2011 and 2010

At June 30, 2011 and 2010, Master Trust assets lent under this arrangement had a market value of \$283.8 million and \$357.4 million, respectively.

While these financial instrument lending transactions may expose the Master Trust to credit and market risks in the event that the borrower is unable to fulfill its contractual obligations, the collateral held and the nature of the program of oversight and controls of the Master Trust's management provide risk management features.

(7) Tax Status of the Plan

The Internal Revenue Service has determined and informed the Plan Administrator by a letter dated September 16, 2002 that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since it received the favorable determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability (or asset) if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the plan, and has concluded that as of June 30, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.

(8) Subsequent Events

The Plan evaluated subsequent events through April 16, 2012, the date of issuance of its financial statements and no additional disclosures were required.
