Premier Members Federal Credit Union 401(k) Plan
NOTES TO FINANCIAL STATEMENTS
As of January 20, 2010 and December 31, 2009

1. Description of plan

The following description of the Premier Members Federal Credit Union 401(k) Plan (the Plan) provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

Merger

On October 23, 2009, the Benefits Committee of Premier Members Federal Credit Union approved the merger of this Plan into the Pentegra Defined Contribution Plan for Financial Institutions (Pentegra Plan), effective January 20, 2010. As a result, all investments were transferred from the Plan into the Pentegra Plan on that date. The Blackout Period for the Plan occurred from January 4, 2010 to January 20, 2010. Participants began participation in the Pentegra Plan on January 1, 2010.

General and eligibility

The Plan is a defined contribution plan covering substantially all employees of Premier Members Federal Credit Union (the Company). Employees of the Company are eligible to participate in the Plan upon completing three months and are age 21 or older. Participants are entitled to enter the Plan on the first day of each plan year and the first day of the fourth, seventh and tenth months of each Plan year following meeting eligibility requirements. Participants are entitled to employer contributions upon entering the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions and investment options

Each year, participants may contribute pre-tax elective deferrals up to statutory limitations. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. The Company currently makes a matching contribution of 100% of the first 4% of qualified compensation. Participants direct the investment of their contributions into various investment options offered by the Plan. Participants may change their allocation on a daily basis.

Participant accounts

Each participant's account is credited with the participant's contribution, allocations of the Company's contribution, and Plan earnings. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Company's matching contribution portion of their accounts plus actual earnings thereon is based on years of continuous service. A participant is 100% vested after three years of credited service or upon disability, death or attaining age sixty (60).

Participant notes receivable

Participants may borrow from their fund accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of their vested account balance. The loans are secured by the balance in the participant's account and bear interest at rates that range from 3.25% to 8%, which are commensurate with local prevailing rates as determined quarterly by the Plan administrator. Principal and interest is paid ratably through monthly payroll deductions. Loan terms range from 1-5 years or up to 10 years for the purchase of a primary residence.

Administrative expenses

The Company pays the costs of administering the Plan, with the exception of the investment fees and loan fees, which are generally paid by the Plan.

Forfeitures from nonvested accounts may be used to reduce the contributions of the employer. At January 20, 2010, forfeited non-vested accounts totaled \$-0-.

2. Summary of significant accounting policies

Basis of accounting

The financial statements of the Plan are prepared using the accrual basis of accounting.

Investment valuation and income recognition

The Plan's investments are stated at fair value. All Plan assets were transferred to the Pentegra Plan before close of business on January 20, 2010.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The statement of net assets available for benefits presents the fair value of the investment contract as well as the adjustments of the fully benefit-responsive investment contract from fair value to contract value. The statement of changes in net assets available for benefits is prepared on a contract value basis.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Payment of benefits

Benefits are recorded when paid.

Accounting estimates and assumptions

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect amounts of assets, liabilities, and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Subsequent events

Subsequent events were evaluated through April 5, 2012, which is the date the financial statements were issued.

3. Fair value measurements

The Plan adopted the requisite fair value measurement standard for measuring and reporting financial assets and liabilities in the Plan's financial statements. This guidance establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy categorizes assets and liabilities measured at fair value into one of three different levels depending on the observability of the inputs employed in the measurement. The three levels of the fair value hierarchy are described below:

- | | |
|---------|---|
| Level 1 | Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access. |
| Level 2 | <p>Inputs to the valuation methodology include:</p> <ul style="list-style-type: none">○ Quoted prices for similar assets or liabilities in active markets;○ Quoted prices for identical or similar assets or liabilities in inactive markets;○ Inputs other than quoted prices that are observable for the asset or liability;○ Inputs that are derived principally from or corroborated by observable market data by correlation or other means. <p>If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.</p> |
| Level 3 | Inputs to the valuation methodology are unobservable and significant to the fair value measurement. |

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value:

Pooled Separate Accounts: These investment vehicles are valued using the Net Asset Value (NAV) provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The NAV is classified within level 2 of the valuation hierarchy because the NAV's unit price is quoted on a private market that is not active; however, the unit price is based on underlying investments which are traded on an active market.

Guaranteed investment contracts: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations, considering the creditworthiness of the issuer.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

As described in Note 1, all investments were transferred from the Plan on January 20, 2010, therefore there are no investments at January 20, 2010 for disclosure within the fair value hierarchy.

7. Related party transactions

Certain Plan investments are managed by ING Life Insurance and Annuity Company. ING is the Plan's trustee; therefore, these transactions qualify as party-in-interest transactions.

8. Risks and uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

9. Investment contract with insurance company

The Plan entered into a benefit-responsive guaranteed investment contract with ING. ING maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and specified interest rate that is guaranteed to the Plan.

Because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. The guaranteed investment contract is presented on the face of the statement of net assets available for benefits at fair value with an adjustment to contract value in arriving at net assets available for benefits. Contract value, as reported to the Plan by ING, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The fair value of the investment contract at January 20, 2010 and December 31, 2009 was \$-0- and \$264,719, respectively. The crediting interest rate is based on a formula agreed upon with the issuer, but it may not be less than two percent. Such interest rates are reviewed on a quarterly basis for resetting.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (1) amendments to the Plan documents (including complete or partial plan termination or merger with another plan), (2) changes to the Plan's prohibition on competing investment options or deletion of equity wash provisions, (3) bankruptcy of the Plan sponsor or other Plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the Plan, or (4) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA.

The merger of Plan assets into the Pentegra Plan did not result in any Plan participants being unable to transact at contract value with the issuer.

The average yield of the fund and the average yield credited to the participants is the same since there is no ownership right to the assets in the general account, which support the obligations of guaranteed investment contracts. During the year ended December 31, 2009, the average annual yield was 5.08%.
