Smith Dairy Products Company Retirement Plan
Orrville, Ohio

We have audited the accompanying statements of net assets available for benefits of Smith Dairy Products Company Retirement Plan as of September 29, 2011 and 2010, and the related statement of changes in net assets available for benefits for the year ended September 29, 2011. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of Smith Dairy Products Company Retirement Plan as of September 29, 2011 and 2010, and the changes in its financial status for the year ended September 29, 2011, in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedule of assets held at end of year as of September 29, 2011, is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

NOTES TO FINANCIAL STATEMENTS

SMITH DAIRY PRODUCTS COMPANY RETIREMENT PLAN

Note 1. Description of the Plan

The following brief description of the Smith Dairy Products Company Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

General

The Plan is a defined benefit pension plan designed to provide retirement benefits to substantially all non-union employees of Smith Dairy Products Company (the Sponsor) age 21 or older. A participant is fully vested after five years of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

During 2008, the Plan Sponsor Board of Directors voted to freeze this plan. Therefore, effective March 31, 2008, the Plan was amended to no longer allow new participants into the Plan. The Plan was again amended effective December 31, 2008 to freeze pension benefits and cease all future benefit accruals for all participants.

Pension Benefits

Under the terms of an agreement with the Sponsor, participants are eligible for monthly benefit payments or a lump-sum payment upon reaching age 65, or may receive early retirement pension benefits (up to 10 years early) providing 8 years of continuous service have been attained.

The amount of normal retirement benefits is calculated by the formula below:

1.1% of the participant's annual compensation averaged over the five highest consecutive compensation periods multiplied by the participant's completed years and months of service with the employer, up to a maximum of 40 years.

Disability and Death Benefits

The Plan also provides for disability and death benefit payments. Death benefits are paid according to the following: if death occurs prior to the retirement date, no benefit is available except for those provided under the Joint and Survivor Annuity or the Preretirement Survivor Annuity. If death occurs after retirement but prior to benefit commencement, the beneficiary will be entitled to a death benefit equal to the deceased's retirement benefit. If death occurs after benefit commencement, the beneficiary will be entitled to a death benefit dependent upon the arrangements made for the payment of the retirement benefit. Disability benefits are also available for those employees incapable of performing their usual duties. This benefit is calculated as if benefits will begin at normal retirement age. If such benefit is received prior to this date, it will be actuarially reduced.

NOTES TO FINANCIAL STATEMENTS

SMITH DAIRY PRODUCTS COMPANY RETIREMENT PLAN

Note 2. Significant Accounting Policies

The significant accounting policies followed by the Plan are:

Basis of Accounting

The financial statements are prepared under the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Cash

Cash consists of investment income that has not been reallocated to investments as of September 29, 2011 and 2010.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 7 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net depreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service that the employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

Benefits under the Plan are based on employees' highest consecutive compensation during a five-year period of credited service. The accumulated plan benefits for active employees are based on their average compensation during the five years ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided through annuity contracts are excluded from plan assets and are also excluded from accumulated plan benefits.

NOTES TO FINANCIAL STATEMENTS

SMITH DAIRY PRODUCTS COMPANY RETIREMENT PLAN

Note 2. Significant Accounting Policies (Continued)

The actuarial present value of accumulated plan benefits is determined by an actuary from Tegrit Group and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of September 30, 2011, the latest actuarial information available, include: (a) assumed retirement age of 65 for employees who have 30 years of service; (b) assumed rate of return on investments of 7.75% compounded annually; (c) assumed mortality, turnover, retirement and disability rates based on statistical data and tables (the IRS 2011 Mortality Table was used).

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

All expenses of administration may be paid out of the Plan assets unless paid by the Sponsor. Certain administrative functions are performed by officers or employees of the Sponsor. No such officer or employee receives compensation from the Plan.

Pending Accounting Pronouncements

In May 2011, the FASB issued ASU 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs" (ASU 2011-04). ASU 2011-04 amended the FASB *Fair Value Measurements and Disclosures* topic to converge the fair value measurement guidance in U.S. generally accepted accounting principles and International Financial Reporting Standards. Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in the *Fair Value Measurements and Disclosures* topic. In addition, ASU 2011-04 requires additional fair value disclosures. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011.

Plan management is currently evaluating the effect that the provision of ASU 2011-04 will have on the Plan's financial statements.

Subsequent Events

The Plan has evaluated subsequent events through July 12, 2012, which is the date the financial statements were available to be issued.

NOTES TO FINANCIAL STATEMENTS

SMITH DAIRY PRODUCTS COMPANY RETIREMENT PLAN

Note 3. Funding Policy

The Sponsor has voluntarily agreed to make contributions to the Plan sufficient to meet the minimum funding requirements of Section 412 of the Internal Revenue Code. Although the Sponsor has not expressed any intent to terminate the pension plan agreement, it may do so at any time. Under provisions of ERISA, if the Plan is terminated, the Sponsor may be obligated to make termination payments to the Plan and participants may be eligible for continuation of benefits under insurance provided by the Pension Benefit Guaranty Corporation ("PBGC").

The contributions of the Sponsor are designed to fund the Plan's current service costs on a current basis. The Sponsor was not required to and did not make any contributions for fiscal 2010, but made a required contribution of \$186,000 in 2011.

Note 4. Plan Termination

In the event of a complete termination of the Plan, the assets then remaining in the Plan, subject to provision for expenses of administration or liquidation, shall be allocated in the following priority: first, equally among retirement benefits of individuals who began receiving benefits at least three years before termination or who would have been eligible for retirement three years prior to termination; second, among all other retirement benefits of individuals under the Plan guaranteed under the termination insurance provisions of ERISA, in accordance with the rulings of the PBGC; third, among all other uninsured vested benefits under the Plan; and fourth, among all other benefits under the Plan.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

NOTES TO FINANCIAL STATEMENTS

SMITH DAIRY PRODUCTS COMPANY RETIREMENT PLAN

Note 5. Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated Plan benefits information as of September 30 are summarized as follows:

	2011	2010
Vested benefits for future payments	\$ 4,961,176	\$ 4,788,983
Participants receiving benefits	217,169	192,122
Nonvested benefits	34,829	50,477
	<u>\$ 5,213,174</u>	<u>\$ 5,031,582</u>

The changes in the actuarial present value of accumulated Plan benefits for the year ended September 30, 2011 are summarized as follows:

Actuarial present value of accumulated Plan benefits, beginning	\$ 5,031,582
Increase (decrease) during the year attributable to	
Benefits accumulated and actuarial gains and losses	(120,409)
Benefits paid	(84,403)
Increase for interest due to the decrease in the discount period	386,404
Actual present value of accumulated Plan benefits, ending	<u><u>\$ 5,213,174</u></u>

Note 6. Investments

There were no individual investments that represented 5% or more of the Plan's net assets at September 29, 2011 or 2010.

During fiscal 2011, the Plan's investments (including gains and losses on investments bought and sold, as well as held, during the year) depreciated in value by \$151,604, as follows:

Net appreciation (depreciation) in fair value	
Common and Preferred Stock	\$ 22,004
Corporate Bonds and Notes	(16,359)
Certificates of Deposit	(15,840)
Mutual Funds	(141,409)
	<u><u>\$ (151,604)</u></u>

NOTES TO FINANCIAL STATEMENTS

SMITH DAIRY PRODUCTS COMPANY RETIREMENT PLAN

Note 7. Fair Value Measurement

The FASB topic *Fair Value Measurements and Disclosures* provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under this FASB topic are described as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.
- Level 2 Inputs to the valuation methodology include
 - Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability;
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means.If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at September 29, 2011 and 2010.

Common and Preferred Stock: Valued at the closing price reported in the active market in which the individual securities are traded.

Corporate Bonds and Notes: Certain corporate bonds and notes are valued at the closing price reported in the active market in which the bond is traded. Other corporate bonds and notes are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds or notes, the bond or note is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Mutual Funds: Valued at the net asset value of shares held by the Plan at year end.

Certificates of Deposit: Valued at cost adjusted for accreted original issue discount (a non-cash payment of interest, reflecting interest earned while the investment is owned) on long-term (more than 1 year) CDs.

Money Market Funds: Valued using amortized cost which approximates fair value.

NOTES TO FINANCIAL STATEMENTS

SMITH DAIRY PRODUCTS COMPANY RETIREMENT PLAN

Note 7. Fair Value Measurement (Continued)

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of September 29:

Assets at fair value as of September 29, 2011				
	Level 1	Level 2	Level 3	Total
Money Market Funds	\$ 131,136	\$ -	\$ -	\$ 131,136

Total assets at fair value	\$3,958,703	\$1,590,233	\$ -	\$5,548,936

Note 8. Tax Status

The Internal Revenue Service has determined and informed the Sponsor by a letter dated December 3, 2003, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination, including the resolution of appeals or litigation processes, if any. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of September 29, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.

Note 9. Risk and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 10. Party-in-Interest Transactions

Certain Plan investments are managed by UBS Financial Services, Inc. (UBS). These transactions qualify as party-in-interest transactions as UBS is a custodian of the Plan.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

ACTUARIAL COST METHODS

Traditional Unit Credit

The actuarial cost method used in the valuation was the unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. For active participants whose credited service equals or exceeds the plan maximum, if any, and for non-active participants, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit

The actuarial cost method used in the development of the maximum contribution and the at-risk liabilities was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
