REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Plan Administrator
Emerson Network Power, Energy Systems, North America, Inc.
Personal Pension Account Plan

We were engaged to audit the accompanying statements of net assets available for benefits of the Emerson Network Power, Energy Systems, North America, Inc. Personal Pension Account Plan (the Plan) as of September 30, 2011 and 2010, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in note I, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee as of and for the years ended September 30, 2011 and 2010, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Personal Pension Account Plan
NOTES TO FINANCIAL STATEMENTS
September 30, 2011 and 2010

NOTE A - DESCRIPTION OF THE PLAN

The following description of the Emerson Network Power, Energy Systems, North America, Inc. Personal Pension Account Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan is a defined benefit plan sponsored by Emerson Electric Co. (the Company) covering employees of Emerson Network Power, Energy Systems, North America, Inc. (the Employer), a subsidiary of the Company. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan's investments are held by The Northern Trust Company (the Trustee).

In August 2004, the Company established the Plan as the Emerson Network Power, Energy Systems, North America, Inc. Retirement Plan to receive the transfer of Plan assets from the Outside Power, Plant and Services Business and Task Systems Business (the OPP&S Business) as acquired by Emerson from Marconi USA (Marconi). Under the terms of the agreement with Marconi, the Plan assumed benefits payable under the Marconi plan with regard to current and former employees of the OPP&S Business.

Pension Benefits

Normal retirement age is the later of the date a participant attains age 65, or the third anniversary of Plan participation. The Plan is a cash balance arrangement whereby a participant's account credit at the time of benefit commencement will be converted to an annuity of equivalent actuarial value as provided by the Plan document.

The Plan document provides that benefits accrue, at the end of each Plan year, to participant accounts in the form of pay credits and interest credits.

Pay credits are defined as 4.0% and 1.5% of compensation for RELTEC and regular eligible employees, respectively. In addition, RELTEC eligible employees receive an additional pay credit of 2% of compensation in excess of the Plan's wage base. The Plan was amended effective March 31, 2005, to cease future benefit accruals. Accordingly, compensation earned after March 31, 2005, by any eligible employee was not included in the calculation of pay credits.

Interest credits are calculated by multiplying the amount credited to a participant's account at the beginning of the Plan year by the applicable interest rate, providing that the participant has not commenced receiving benefits. If benefits have commenced, the interest credit is prorated and the participant will not receive credit allocated to the portion of the year during which benefits were received. The applicable interest rate defined by the Plan is based on the yield of the 30-year U.S. treasury bond maturing in February 2031.

At termination of employment, death or disability, the participant is entitled to the vested portion of his or her account. Terminated participants may elect payment in the form of various annuity options or a lump-sum payment.

Vesting

Vesting in the participants' accrued benefits is determined in accordance with the following schedule:

<u>Years of continuous service</u>	<u>Vested percentage</u>
Less than 3 years	0%
3 years	100

With respect to any calendar year in which an employee is credited with at least 1,000 hours of continuous service as defined by the Plan document, he/she receives credit for a year of continuous vesting service. A participant who is credited with less than 1,000 hours of continuous service in a calendar year does not receive vesting credit for that year.

Death and Disability Benefits

If an employee dies after becoming vested but before distributions begin, and the participant's surviving spouse is the sole designated beneficiary, the surviving spouse shall be paid a survivor annuity for life, equal to the annuity which would have been payable to the surviving spouse under an automatic survivor benefit commencing on the date the employee would have become eligible for a retirement benefit, had the employee lived. Active employees who become totally and permanently disabled shall be 100% vested in their accrued benefit under the Plan and shall elect normal payment election and receive retirement benefits as if the employee had reached the normal retirement age.

Contributions and Funding

Contributions from the Company are subject to Internal Revenue Service (IRS) limitations and are based upon actuarial calculations of normal cost. The Company satisfied the minimum funding requirements of ERISA.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements of the Plan are prepared on the accrual basis of accounting.

Adoption of Accounting Guidance

In January 2010, the Financial Accounting Standards Board (FASB) further amended the guidance by adding new disclosure requirements for Level 1 and Level 2, separate disclosures of purchases, sales, issuances and settlements relating to Level 3 measurements, and clarification of existing fair value disclosures. This amended guidance is effective for periods beginning after December 15, 2009, except for the requirement to provide Level 3 activity of purchases, sales, issuances and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010. The amendments do not have a significant impact on the Plan's financial statements.

NOTES TO FINANCIAL STATEMENTS - CONTINUED
September 30, 2011 and 2010

In May 2011, the FASB issued guidance clarifying how to measure and disclose fair value. This guidance amends the application of existing fair value measurement requirements, while other amendments change a particular principle in existing fair value measurement guidance. In addition, this guidance requires additional fair value disclosures, although certain of these new disclosures will not be required for non-public entities. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of the amended guidance will have on the Plan's financial statements.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, disclosure of contingent assets and liabilities, the actuarial present value of accumulated benefits at the date of the financial statements, and the reported amounts of additions to and deductions from net assets during the reporting period. Actual results could differ from those estimates.

Investment Valuation

The Plan's investments in the Emerson Electric Co. Master Trust (Master Trust) are stated at fair value as determined based on the fair value of the underlying investments of the Master Trust. See note D for discussion on fair value.

The Plan's interest in the Master Trust is based on an allocation of the Plan's assets compared to total assets in the Master Trust. Purchases and sales of investments are recorded on a trade-date basis. Investment income is recorded as earned. Dividends are recorded at ex-dividend date.

Investors may use various financial instruments, particularly forward foreign currency contracts, options and futures, commonly referred to as derivatives, to manage risk. No investments are engaged in market making or other speculative activities. Established practices require that derivative financial instruments relate to specific asset, liability or equity transactions or to currency exposure.

Expenses

Investment management and certain administrative expenses are paid by the Plan. Expenses include Pension Benefit Guaranty Corporation (PBGC) premiums and professional fees.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

NOTE C - INTEREST IN MASTER TRUST

The Plan's investments are in the Master Trust that was established for the investment of assets of the Plan and several other Company-sponsored retirement plans. Each plan in the Master Trust has an undivided interest in the Master Trust. At September 30, 2011 and 2010, the Plan's interest in the net assets of the Master Trust was approximately 0.25% and 0.26%, respectively. Investment income and administrative/ investment expenses relating to the Master Trust are allocated to the individual plans based upon average monthly balances invested by each plan. The net assets of the Master Trust at September 30, 2011 and 2010, are summarized as follows (dollars in thousands):

NOTE D - FAIR VALUE MEASUREMENTS

The FASB has issued guidance regarding the disclosure of fair value measurements. The guidance establishes a formal hierarchy and framework for measuring fair value and provides guidance on the disclosure of fair value measurements and the reliability of valuation inputs. Under the guidance, measurement assumes the transaction to sell an asset or transfer a liability occurs in the principal or at least the most advantageous market for that asset or liability. Within the hierarchy, Level 1 instruments use observable market prices for the identical item in active markets and have the most reliable valuations. Level 2 instruments are valued through broker/dealer quotations or through market-observable inputs for similar items in active markets, including forward and spot prices, interest rates and volatilities. Level 3 instruments are valued using inputs that are not observable in an active market, such as company-developed future cash flow estimates, and are considered the least reliable (dollars in thousands).

The primary objective for the investment of Plan assets is to secure participant retirement benefits while earning a reasonable rate of return. Plan assets are invested consistent with the provisions of the prudence and diversification rules of ERISA and with a long-term investment horizon. The Company continuously

monitors the value of assets by class and routinely rebalances to remain within target allocations. The strategy for equity assets is to minimize concentrations of risk by investing primarily in companies in a diversified mix of industries worldwide, while targeting neutrality in exposure to market capitalization levels, growth versus value profile, global versus regional markets, fund types and fund managers. The approach for bonds emphasizes investment-grade corporate and government debt with maturities matching a portion of the longer-duration pension liabilities. The bonds strategy also includes a high-yield element, which is generally shorter in duration. A small portion of the U.S. Plan assets is allocated to private equity partnerships and real assets fund investments for diversification, providing opportunities for above-market returns. Leveraging techniques are not used and the use of derivatives in any fund is limited to exchange-traded futures contracts and is inconsequential.

U.S. equities reflect companies domiciled in the U.S., including multi-national companies. International equities are comprised of companies domiciled in developed nations outside the U.S. Emerging market equities are comprised of companies domiciled in portions of Asia, Eastern Europe and Latin America.

Government bonds include investment-grade instruments issued by federal, state and local governments, primarily in the U.S. Corporate bonds represent investment-grade debt of issuers primarily from the U.S. High-yield bonds include non-investment-grade debt from a diverse group of developed market issuers.

Other assets include cash, interests in mixed asset funds investing in commodities, natural resources, agriculture and exchange-traded real estate funds, life insurance contracts (U.S.) and shares in certain general investment funds of financial institutions or insure arrangements (non-U.S.) that typically ensure no market losses or provide for small minimum return guarantee.

Valuations of Level 1 assets for all classes shown above are based on quoted closing market prices from the principal exchanges where the individual securities are traded. Cash is valued at cost, which approximates fair value.

Equity securities categorized as Level 2 assets are primarily non-exchange-traded commingled or collective funds in which the underlying securities have observable prices available from active markets. Valuation is based on the net asset value (NAV) of fund units held as derived from the fair value of the underlying assets. Funds based on NAV are valued daily and no redemption restrictions.

Debt securities categorized as Level 2 assets are generally valued based on independent broker/dealer bids or by comparison to other debt securities having similar durations, yields and credit ratings. Other Level 2 assets are valued based on an NAV of fund units held, which is derived from either broker/dealer quotations or market-observed pricing for the underlying assets. Funds based on NAV are valued daily and no redemption restrictions.

Limited partnerships are valued based on units/shares held at year-end, which are obtained from a third-party pricing source obtained by fund manager. Insurance contracts are valued by the applicable insurance company. These are Level 3 investments.

NOTE E - PLAN TERMINATION AND PBGC MATTERS

The Company has not expressed any intent to terminate the Plan. However, in the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits for the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder and the Plan document.

Should the Plan be terminated at some future time, all participants become 100% vested in benefits earned as of the termination date.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations.

Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

NOTE F - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated Plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died and (3) present employees of their beneficiaries.

The actuarial present value of accumulated Plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements

such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of September 30, 2010 and 2009, are as follows:

Discount rate	5.0% in 2010; 5.5% in 2009
Mortality	RP2000 Mortality Table without collar adjustments, projected to 2011 using Scale AA in 2010 RP2000 Mortality Table without collar adjustments, projected to 2010 using Scale AA in 2009
Retirement age	Varies by age between 55 and 69 with 100% retired by age 70

The foregoing assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

The actuarial present value of accumulated Plan benefits as of September 30, 2010, is as follows:

Actuarial present value of accumulated Plan benefits	
Vested benefits	
Participants and/or beneficiaries currently receiving benefits	\$1,997,278
Other participants	<u>6,965,510</u>
Total vested benefits	8,962,788
Non-vested benefits	<u>398,115</u>
Total actuarial present value of accumulated Plan benefits	<u>\$9,360,903</u>

The changes in the actuarial present value of accumulated Plan benefits for the year ended September 30, 2010, consist of the following:

Actuarial present value of accumulated Plan benefits, September 30, 2009	\$8,983,577

NOTE G - INCOME TAX STATUS

The IRS has determined and informed the Company by a letter dated August 16, 2004, that the Plan and related Master Trust were designed in accordance with the applicable regulations of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter; however, the Plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC and that the Plan and related Master Trust continue to be tax exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would be sustained upon examination by the IRS or other applicable taxing authorities. The Plan administrator has analyzed the tax positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any periods in progress. The Plan administrator believes it is no longer subject to income tax examination for years prior to 2008.

NOTE H - RISKS AND UNCERTAINTIES

The Plan's investment in the Master Trust is exposed to various risks, such as interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits and may impact the funded position of the Plan. As a result, the Plan may require additional funding in subsequent years.

Plan contributions are made and the actuarial present value of accumulated Plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE I - INFORMATION CERTIFIED BY THE TRUSTEE

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustee has certified that the following data included in the accompanying financial statements is complete and accurate:

- Plan interest in Emerson Electric Co. Master Trust, as shown in the statements of net assets available for benefits as of September 30, 2011 and 2010.
- Plan interest in Emerson Electric Co. Master Trust net investment income, as shown in the statements of changes in net assets available for benefits for the years ended September 30, 2011 and 2010.

- Master Trust net asset and net investment income as of and for the years ended September 30, 2011 and 2010, as shown in note C.

The Plan's independent accountants did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements.

NOTE J - PARTIES-IN-INTEREST

The Plan's investments are held in the Master Trust at the Trustee. The Trustee charges fees for the management of the account. Fees charged to the Master Trust are ordinary and customary. These fees qualify as permitted party-in-interest transactions under ERISA.

NOTE K - SUBSEQUENT EVENTS

Plan management evaluated subsequent events after the balance sheet date of September 30, 2011 through July 12 2012, the date the financial statements were available to be issued. Plan management is not aware of any subsequent events that would require recognition or disclosure in the accompanying financial statements.

Description of Weighted Average Retirement Age
Emerson Network Power, North America, Inc.
Personal Pension Account Plan
EIN: 43 -1897522
Plan Number: 002

The average retirement age for Line 22 was calculated by determining the average age at retirement for those current active participants expected to reach retirement, based on all current decrements assumed.

For illustration purposes only, below is a hypothetical determination of the average retirement age based on retirement as the only decrement.

Age	Retirement Rate	Assumed Number Eligible	Assumed Number Retiring	Age * Number Retiring
55	10%	1,000	100	5,500
56	10%	900	90	5,040

Methods

▶ Valuation date ▶ Funding target ▶ Target normal cost	▶ First day of plan year ▶ Present value of accrued benefits Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable. The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued.
Change in assumptions and methods since prior valuation	The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of July 2009 to June 2010, as provided under the Pension Protection Act of 2006 (PPA). The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. The assumed plan-related expenses added to the target normal cost were changed to reflect the amount expected to be paid during the 10/1/2010 plan year.
Data Sources	Towers Watson used asset data supplied by the trustee. Emerson furnished participant data. Emerson furnished the dates and amounts of the 2009 plan year contributions that were paid during the 2010 plan year. Data were reviewed for reasonableness and consistency, but no audit was performed. Assumptions or estimates were made by the Towers Watson actuaries when data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.
