1. Plan Description

The following brief description of the Gallo Vineyards, Inc. Hourly-Paid Ranch Employees Retirement Income Plan (the "Plan") is provided for general information purposes only. Participants should refer to the summary plan description for more complete information.

General – The Plan is a defined benefit plan which provides pension benefits to substantially all full-time hourly paid ranch employees of Gallo Vineyards, Inc. (the "Company"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions – The Company makes annual contributions based on actuarially determined amounts. The Plan satisfied the minimum funding requirements of ERISA for the years 2011 and 2010.

Vesting and benefit payments – The Plan has a 5 year cliff vesting schedule, whereby the participants' benefits are 100% vested upon completion of five years of service and are payable beginning at age 65. Employees may elect to receive their benefits as a life annuity or a joint and survivor annuity, payable monthly after retirement or termination. When an annuity is elected, it is based on the benefit rate, years of service and the employee's compensation.

Plan termination – The Plan is intended to be permanent, however, the Company's Board of Directors retains the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In such event, accrued benefits for all participants become fully vested and the assets of the Plan shall be allocated as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

b. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).

c. All other vested benefits (that is, vested benefits not insured by the PBGC).

d. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, a statutory ceiling exists which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For pension plans terminating in 2012, the maximum guaranteed amount is $4,653 per month ($55,836 annually). That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old as the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

2. Significant Accounting Policies

The following is a summary of significant accounting policies applied in the preparation of these financial statements:

Basis of accounting – The Plan uses the accrual basis of accounting.

Use of estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits during the reporting period and disclosure of the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment valuation – Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements. Purchases and sales of investments are recorded on a trade-date basis. Interest income is accrued when earned. Dividend income is recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Benefits – are recorded when paid.

Plan fees – except PBGC premiums, are paid by the Company.

3. Tax Status

The Plan obtained its latest determination letter on December 30, 2011, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC).

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more than likely would not be sustained upon examination by the Internal Revenue Service and Department of Labor. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2009.

4. Fair Value Disclosures

The Plan's investments are reported at fair value in the accompanying statements of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Financial Accounting Standards Board (FASB) establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described as follows: Level 1- inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access; Level 2 – inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means; Level 3- inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010:

Registered investment companies (mutual funds) and pooled separate accounts: The fair values of mutual funds and pooled separate accounts are valued at quoted market prices which represent the net asset value of shares held by the Plan at year-end.

The following table sets forth by level within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2011 and 2010:

6. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts, excluded from Plan assets, are excluded from accumulated Plan benefits.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary, Massachusetts Mutual Life Insurance Company, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of January 1, 2011 and January 1, 2010 were (a) life expectancy of participants (the RP 2000 Combined Mortality Table was used, (b) retirement age assumptions (the assumed average retirement age was between 55 to 65), and (c) investment return. The 2011 and 2010 valuations included assumed average rate of return of 7.50%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

The actuarial present value of accumulated plan benefits at January 1 was as follows:

	2011	***2010***
Vested benefits:		
Participants currently receiving benefits	$ 128,057	$ 58,056
Other vested benefits	6,119,174	5,555,172
Total	6,247,231	5,613,228

Date	Amount Paid in Cash	Plan Year	Value as of January 1, 2011

Total	$ 1,700,000		$ 1,605,858

Schedule SB, Line 22 - Description of Weighted Average Retirement Age

Assumed Retirement Age

This age is derived by applying, for an employee with the characteristics of an average new entrant to the plan, the following formula, modified so that the "1/2" is not used for t = FRA - ERA.

$$\frac{\sum_{t=0}^{FRA-ERA} ({}_tp_{ERA}) * (q^r_{ERA+t}) * (ERA + t + 1/2)}{\sum_{t=0}^{FRA-ERA} ({}_tp_{ERA}) * (q^r_{ERA+t})}$$

where

FRA	=	age by which everyone is assumed to retire
ERA	=	age before which nobody is assumed to retire
${}_tp_{ERA}$	=	probability of surviving at work to age age ERA + t
q^r_{ERA+t}	=	probability of retiring at age ERA + t

The assumed annual rates at retirement are as follows:

Age	Percent Retiring	Age	Percent Retiring
55	3%	60	10%
56	3%	61	10%
57	4%	62	25%
58	4%	63	10%

Schedule SB, Part V - Statement of Actuarial Assumptions & Methods

Describe all non-prescribed actuarial assumptions used to determine the funding target and target normal cost. Also, describe the method for determining the actuarial value of assets and any other aspects of the funding method for determining the Schedule SB entries that are not prescribed by law.

Actuarial Assumptions

Interest:	January, 2011 IRS Segmented Yield Curve
Preretirement Mortality:	IRC Sec 430 2011 Static Non-Annuitant Tables
Postretirement Mortality:	IRC Sec 430 2011 Static Annuitant Tables
Postretirement Mortality for Cash:	IRS 2011 Applicable Table under 417(e)(3)
Retirement Age:	Tabular (see rates on next page)
Termination:	Termination Table T-9 from the Actuary's Handbook

Marriage:	It is assumed that 80% of males and 80% of females are married and that a male is 3 years older than his female spouse.
Optional Forms:	Liabilities include no load to account for the value of optional annuity forms.

Actuarial Cost Method

The Target Normal Cost is equal to the present value as of the valuation date of the increase in the accrued benefit arising from the service and salary increase in the current plan year plus administrative expenses expected to be paid out of plan assets. The Funding Target as of the valuation date is the present value of the accrued benefit as of the valuation date.

Asset Valuation Method

The Actuarial Value of assets is equal to market value.
