Killion Industries, Inc. Savings Plan
Notes to Financial Statements

A. DESCRIPTION OF PLAN

The following description of the Killion Industries, Inc. Savings Plan ("Plan") provides general information only. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan was established on April 1, 1985 as a defined contribution plan. The Plan covers all employees of Killion Industries, Inc. (the "Company") who have completed one year of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions

Each year, participants may contribute pre-tax compensation, as defined in the Plan. Participants may also contribute amounts representing distributions from other qualified retirement plans. The Company contributes 50% of the first 10% of compensation that a participant contributes to the Plan. The Company also has the option to make an annual profit sharing contribution. There were no profit sharing contributions to the Plan for the years ended December 31, 2011 and 2010.

Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Company's contributions and (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. Forfeited balances of terminated participants' non-vested accounts are used to pay administrative expenses of the Plan. The Plan used $1,637 of forfeitures to pay administrative expenses during the year ended December 31, 2011. There were no forfeitures available to pay future administrative expenses at December 31, 2011. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their account plus actual earnings thereon is based on years of continuous service as follows: 25% vested after one year of service; 50% vested after two years; 75% after three years; and 100% after four years of service.

Payment of Benefits

Participants are eligible to receive a lump-sum distribution of benefits upon termination of employment, death, disability, retirement or Plan termination. Distributions may also be made for hardship withdrawals, which are authorized by the Plan administrator and conform to the "deemed hardship" standards set forth in Treasury Regulation Section 1.401(k)(d)(2). Such hardship distributions are subject to certain limitations.

A. DESCRIPTION OF PLAN (CONTINUED)

Investment Options

Principal Life Insurance Company as Trustee ("Principal" or "Trustee") under a trust agreement holds the assets of the Plan, including all contributions and earnings thereon. Upon enrollment in the Plan, participants may direct contributions to a variety of investment options.

B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Accounting Estimates

The Plan administrator uses estimates and assumptions in preparing the Plan's financial statements in accordance with accounting principles generally accepted in the United States of America. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported changes in net assets. Actual results could vary from the estimates that were used.

Valuation of Investments

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Investments in pooled separate accounts are valued based on the Plan's pro rata share of fund equity as determined by the Trustee, based on fair values of the underlying investments. See Note F for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

The Plan had guaranteed investment contracts with Principal, which maintains the contributions in pooled accounts. The accounts are credited with actual earnings on the underlying investments and charged for Plan withdrawals and administration expenses charged by Principal. The contracts are included in the financial statements at fair value as reported to the Plan by Principal. Fair value is the amount plan participants would receive currently if they were to withdraw or transfer funds within the Plan prior to their maturity for an event other than death, disability, termination or retirement. Fair value represents contract value adjusted to reflect current market interest rates, only to the extent such market rates exceed crediting rates. The guaranteed interest contracts are not considered benefit responsive. The effective interest rate was 0.77% at December 31, 2010. The average yields during the year ended December 31, 2010 ranged from 3.55% to 3.65%. At December 31, 2011, the plan did not have any guaranteed investment contracts.

B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Risks and Uncertainties

Investments are exposed to various risks, such as interest rate, market fluctuation and credit. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in risks in the near term could materially affect the amounts reported in the statements of net assets available for benefits and the statement of changes in net assets available for benefits.

Plan Expenses

The Company sponsors the Plan. Personnel within the Company perform various administrative services for the Plan. The payroll and related overhead costs associated with these services are not included as Plan expenses. Most administrative expenses of the Plan, including record keeping, consulting, investment, legal, and audit fees, are paid by the Company.

Payment of Benefits

Benefits are recorded when paid.

Subsequent Events

The date to which events occurring after December 31, 2011, the date of the most recent statement of net assets available for benefits, have been evaluated for possible adjustment to the financial statements or disclosures is July 16, 2012, which is the date on which the financial statements were available to be issued.

C. PARTY-IN INTEREST

There were no party-in interest transactions between the Plan and Principal Life Insurance Company other than payment of investment fees from the Plan assets for services rendered.

D. INCOME TAX STATUS

The Plan obtained its latest determination letter on March 31, 2008, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's tax counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

E. PLAN TERMINATION

Although it has not expressed any intent to do so, the Plan sponsor has the right to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants will be entitled to their entire account balance.

F. FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board (FASB) Accounting Standards Codification 820, *Fair Value Measurement and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements), and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under generally accepted accounting principles are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010.

Pooled separate accounts: Valued based on the Plan's pro rata share of fund equity as determined by the trustee, based on fair values of the underlying investments.

Guaranteed interest account: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer (see Note B – Valuation of Investments).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

F. FAIR VALUE MEASUREMENTS (CONTINUED)

The following table sets forth, by level within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2010:

	Assets at Fair Value as of December 31, 2010

H. U.S. PROPERTY SEPARATE ACCOUNT

On September 26, 2008, a contractual limitation was put in place on the Principal U.S. Property Separate Account. The limitation delays the payment of most withdrawal requests, and provides for payment of such requests on a pro rata basis (a "Queue") as cash becomes available for distribution. The limitation was put in place as a result of the global credit crisis and the already challenging conditions in the real estate market. At December 31, 2009, the outstanding balance in the queue was $1.17 billion. Payments were made during the year ended December 31, 2010, and were determined based on unit values at the time of payment. At December 31, 2010, there was no balance in the queue and payments to completely satisfy all outstanding requests were made during the year ended December 31, 2010.
