F. ADMINISTRATION OF PLAN ASSETS:

Plan assets are held and managed by the trustee, which invests contributions, interest, and dividend income and makes distributions to participants. Substantially, all the information included in the financial statements has been certified by the trustee. This information has not been audited by independent accountants.

Certain administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

G. SPECIAL RULE FOR CERTAIN PARTICIPANT - DIRECTED TRANSACTIONS:

The Investment of transactions are directed by the participants; therefore, those transactions are no longer required to include the cost computation of the investments as reported on the Schedule of Assets (held at end of year).

H. RELATED PARTY TRANSACTIONS:

The Plan allows for transactions with certain parties who may perform services or have fiduciary responsibilities to the Plan, including the company. Certain Plan investments are shares of various mutual funds which are owned and managed by John Hancock Financial Trust Services Company, who has been designated as the investment manager. These transactions qualify as party-in-interest transactions.

NOTES TO FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2011

I. RECONCILIATION OF FINANCIAL STATEMENTS TO 5500

The following, is a reconciliation of net assets available for benefits, per the financial statements, at December 2011 to Schedule H of Form 5500.

	Audited 2011	Compiled 2010
Net Assets Available for Benefits per The Financial Statements	$ 2,095,500	$ 1,023,408
Net Assets Available for Benefits per Schedule H of Form 5500	$ 2,095,500	$ 1,023,408

J. RISKS AND UNCERTAINTIES:

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

K. PLAN TERMINATION:

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100 percent vested in their employer contributions.

L. FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820-10 are described as follows:

- Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.
- Level 2 inputs to the valuation methodology includes the following:
  -Quoted prices for similar assets or liabilities in active markets
  -Quoted prices for identical or similar assets or liabilities in inactive markets
  -Inputs other than quoted prices that are observable for the asset or liability
  -Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means
  If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

NOTES TO FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2011

L. FAIR VALUE MEASUREMENTS (CONT'D):

- Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The assets or liability's fair market value measurement level within the fair value hierarchy is based on the lowest level of any input tat is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31 2011.

- *Common stocks, corporate bonds, and U.S. government securities*. Valued at the closing price reported on the active market on which the individual securities are traded.
- *Mutual funds*. Valued at the net asset value of shares held by the plan at year end.
- *Participant loans*. . Valued at amortized cost, which approximates fair value.
- *Guaranteed investment contract*. Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations, considering the creditworthiness of the issuer.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
