To the Plan Administrator
Maxwell Systems, Inc. 401(k) Plan
King of Prussia, Pennsylvania

We were engaged to audit the accompanying statements of net assets available for benefits of Maxwell Systems, Inc. 401(k) Plan (the "Plan") as of December 31, 2011 and 2010, and the related statement of changes in net assets available for benefits for the year ended December 31, 2011, and the supplemental schedules of delinquent participant contributions and assets (held at end of year) as of December 31, 2011. These financial statements and supplemental schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Notes 3, 4, 5 and 6, which was certified or provided by Great-West Life & Annuity Insurance Company and Orchard Trust Company, the custodian and trustee of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedules. We have been informed by the Plan Administrator that the custodian and trustee hold the Plan's assets and execute transactions. The Plan Administrator has obtained certifications from the custodian and trustee regarding the completeness and accuracy of the information summarized in Note 3 that was provided to the Plan Administrator by the custodian and trustee as of and for the year ended December 31, 2011, and as of December 31, 2010.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The supplemental schedules are presented for the purposes of additional analysis and are not a required part of the financial statements but are required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified or provided by the custodian and trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 1. Description of Plan

The following description of the Maxwell Systems, Inc. 401(k) Plan (the "Plan") provides only general information. Participants should refer to the Plan documents for a more complete description of the Plan's provisions.

General: The Plan is a defined contribution 401(k) plan covering substantially all employees of Maxwell Systems, Inc. (the "Company") who are 21 years of age. There is no service requirement for employees to make elective deferrals. Employees may enter the plan on the first day of the month following the date on which an employee meets the eligibility requirements. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions: Each year, participants may elect to contribute to the Plan an amount equal to from 1% to 80% of their compensation, subject to certain limitations as outlined in the Plan. Employees hired after August 1, 2007 automatically defer 3% of eligible compensation unless the employee elects otherwise. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans.

The Company may make a matching contribution to the Plan that is based upon a percentage of the participants' deferrals. The matching contribution for 2011 is equal to 20% of the participants' elective contribution up to a maximum of 0.6% of eligible wages for the calendar year. A participant must be employed on December 31 of each year and must have been credited with at least 500 hours of service to receive a matching contribution for that year. The Company may make a Qualified Non-Elective Contribution based upon a percentage of the participant's compensation in order to pass certain tests required by law. No such contribution was made for the 2011 Plan year.

Participant Accounts: Each participant's account is credited with the participant's elective and rollover contributions and an allocation of the Company's contribution and Plan investment earnings, and charged with withdrawals, distributions and a share of Plan investment losses and account administration fees. The allocation of the matching contributions is based on participant deferrals. The allocation of discretionary employer contributions is based on eligible participant compensation. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Participant Investment Options: Participants direct their deferral contributions to selected investments as made available and determined by the Plan Administrator. Participants may change their investment options at any time during the year.

Vesting: Participants are immediately vested in their contributions plus actual earnings thereon. A participant is gradually vested in employer contributions after five years of credited service. Each participant is credited with a year of service upon the completion of 1,000 hours of service during the Plan year.

Notes Receivable from Participants: Participants may borrow from their accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of the value of the participant's vested interest in his account. Loan terms range from one to five years, except that longer terms are allowed for the purchase of a principal residence. A participant may have two loans outstanding at any one time. The loans are secured by the balance in the participant's account. The interest rate charged on the loan is the prime rate plus 1% (currently 4.25%). Principal and interest are paid ratably through payroll deductions.

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 1. Description of Plan (Continued)

Payment of Benefits: Upon the attainment of age 59 ½ or termination, a participant may elect to receive the value of their accumulated Plan benefits, in accordance with the provisions of the plan, in a lump-sum distribution. Hardship withdrawals of elective contributions are also permitted. The Plan provides an early retirement option upon reaching age 55 and completing 10 years of service.

Funding Policy: The Company generally remits employee deferral contributions to the Plan on a bi-weekly basis, concurrent with payroll frequency. Company matching contributions are remitted annually.

Forfeitures: Forfeitures may be applied to future employer matching contributions. As of December 31, 2011 and 2010, forfeited non-vested accounts approximated \$9,081 and \$4,108, respectively, which have been used in the subsequent year.

Note 2. Summary of Significant Accounting Policies

Basis of Accounting: The accompanying financial statements are prepared on the accrual basis of accounting. Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The plan invests in an insurance company general account. At December 31, 2011 and 2010, the contract value of the general account approximates its fair value. This determination is based on Great-West Life & Annuity Insurance Company's ("Great-West") credit rating and the yield of its general account, which resets quarterly, being comparable to a ten-year treasury bond.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets available for benefits and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Payment of Benefits: Benefits are recorded when paid.

Investment Valuation and Income Recognition: Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of fair value measurements.

Great-West ("the custodian") maintains certain contributions in an unallocated general account. Contributions are deposited into the general account if selected by the participant. The general account is credited with contributions and investment earnings on the underlying investments and charged for Plan withdrawals and investment earnings or losses on the underlying investments. As transfers are made into the general account, participants are assigned units of the fund with a value equivalent to their deposit amounts. Periodically, the custodian assigns fair values to the units of the general account which reflect their earnings and the fair value of the underlying assets.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Net Appreciation and Depreciation in Fair Value of Investments: The Plan presents in the statement of changes in net assets available for benefits the net appreciation and depreciation in the fair value of its investments which consists of the net of the Plan's realized gains or losses and unrealized appreciation or depreciation on its investments.

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

Notes Receivable from Participants: Notes receivable from participants are measured at their unpaid principal balances plus any accrued but unpaid interest. Delinquent loans are treated as distributions based upon the terms of the plan document.

Administrative Expenses: Plan administrative expenses may be paid by the Plan or the Company. Administrative expenses consist of investment management fees and other administrative fees. The Company currently pays all significant administrative expenses of the Plan.

Recent Accounting Developments: In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. ASU 2011-04 amended Accounting Standards Codification ("ASC") Topic 820, *Fair Value Measurement and Disclosures*, to converge the fair value measurement guidance in U.S. generally accepted accounting principles ("GAAP") and International Financial Reporting Standards ("IFRS"s). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC Topic 820. In addition, ASU 2011-04 requires additional fair value disclosures, although certain of these new disclosures will not be required for nonpublic entities. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

Subsequent Events: The Plan Administrator has evaluated subsequent events through August 14, 2012, the date the financial statements were available to be issued.

Note 3. Information Certified by the Custodian and Trustee

The following is a summary of the plan's asset information as of December 31, 2011 and 2010, and for the year ended December 31, 2011, included throughout the Plan's financial statements and supplemental schedules, that was prepared by or derived from information provided by Great-West Life & Annuity Insurance Company (the custodian) and Orchard Trust Company (the trustee), and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the custodian and trustee that the information provided to the Plan Administrator by the custodian and trustee related to the following assets is complete and accurate to the best of their knowledge. Accordingly, as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information in Notes 3, 4, 5 and 6 and supplemental schedules related to the following assets:

	2011	2010
Mutual funds, at fair value	\$ 8,711,059	\$ 9,013,460

Great-West Life & Annuity Insurance Company and Orchard Trust Company also certified to the completeness and accuracy of \$625,245 of net depreciation of fair value of investments, \$5,448 of interest, and \$258,749 in dividends related to the aforementioned assets for the year ended December 31, 2011.

Note 5. Fair Value Measurements

ASC Topic 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy under ASC Topic 820 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 5. Fair Value Measurements (Continued)

An asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011.

Mutual funds: Investments in mutual funds are valued at the net asset value of shares held by the Plan as determined on an active market.

Unallocated contracts: Investments in unallocated contracts are valued at contract value. Contract value is the amount plan participants would receive currently if they were to withdraw or transfer funds within the Plan prior to their maturity for an event other than death, disability, termination or retirement. Fair value represents contract value adjusted to reflect current market interest rates only to the extent such market rates exceed crediting rates.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2011 and 2010:

	Assets at Fair Value at December 31, 2011

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 6. Insurance Contracts

The Plan has an investment contract with Great-West Life & Annuity Insurance Company, the custodian. The custodian maintains the contributions to the investment contract in an unallocated general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

Because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. Contract value, as reported to the Plan by Great-West Life & Annuity Insurance Company, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. The contract values of \$2,062,256 and \$1,491,635 approximated fair value at December 31, 2011 and 2010, respectively. There are no reserves against contract value for credit risk of the contract issuer or otherwise.

The methodology for calculating the interest crediting rate is based on the earnings of the underlying assets in the entire medium-long term new portfolio compared to the minimum interest crediting rate, as stated in the contract, and prevailing market conditions. Interest crediting rate is reset quarterly. The average interest rate yield earned and credited to participants during 2011 and 2010 is as follows:

	2011	2010
Average yields:		
Based on actual earnings	2.03%	2.49%
Based on interest rate credited to participants	2.03%	2.49%

Certain events may limit the ability of the Plan to transact at contract value with the issuer. Such events may include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (3) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The Plan Administrator does not believe that the occurrence of any such event, which would limit the Plan's ability to transact at contract value with participants, is probable.

This contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

Note 7. Risks and Uncertainties

The Plan invests in various investment instruments. Investment securities are exposed to various risks, such as credit, interest rate, and market risks.

Credit risk arises from the potential for an issuer or other counterparty to default on its contractual obligations to the Plan. Investments are recorded at fair value. This represents the maximum credit risk exposure of the Plan.

Interest rate risk refers to the impact of interest rate changes on the Plan's financial position. Interest rate changes directly impact the fair value of fixed income securities held in the Plan. Interest rate changes will also have an indirect impact on the other investments held by the Plan.

Notes to Financial Statements

Note 7. Risks and Uncertainties (Continued)

Market risk is the risk that the market value of an investment will fluctuate as a result of changes in market price. For the unallocated contract, in subsequent periods if market conditions change, such as the insurance company credit rating or interest rate environment, the difference between contract value and fair value could become significant.

Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participant account balances and the amounts reported in the statements of net assets available for benefits.

Note 8. Plan Termination

Although they have not expressed any intent to do so, the Company has the right under the Plan to discontinue their contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants will become 100% vested in their accounts.

Note 9. Income Tax Status

The Internal Revenue Service stated, in a letter dated November 27, 2001, that the prototype used by the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

Note 10. Related Party Transactions

Certain Plan investments are invested in funds managed by Great-West Life & Annuity Insurance Company and Orchard Trust Company, the custodian and trustee of the Plan. Therefore, these transactions qualify as party-in-interest transactions.

Certain administrative functions are performed by officers and management of the Company. No such officers or employees receive compensation from the Plan.

Note 11. Voluntary Correction Program

During 2009, the Plan applied to the United States Department of Labor's ("DOL") Voluntary Correction Program to cure certain operation failures related to a plan merger which occurred in 2007. In March 2010, the DOL notified the Plan that it approved of the Plan's method of correction and revisions to administrative procedures. There were no significant fines or penalties imposed by the DOL as a result of this action.

Note 12. Prohibited Transactions

During 2010, the Plan Sponsor inadvertently failed to deposit approximately \$3,664 of participant referrals within the required time frame as stated by the DOL. The DOL considers late deposits to be prohibited transactions. The Plan Sponsor has filed the Form 5330 for the aforementioned plan year and has paid excise tax for the year affected. The excise tax payment was made from the Plan Sponsor's assets and not from the assets of the Plan.

Note 14. Subsequent Events

Effective March 1, 2012, the Company amended the Plan to remove all restrictions on eligibility. All employees are immediately eligible to participate upon employment and may participate on the first day of the first month following their date of hire. Additionally, the amendment removed the plan's automatic deferral provision.

To the Plan Administrator
Maxwell Systems, Inc. 401(k) Plan
King of Prussia, Pennsylvania

We were engaged to audit the accompanying statements of net assets available for benefits of Maxwell Systems, Inc. 401(k) Plan (the "Plan") as of December 31, 2011 and 2010, and the related statement of changes in net assets available for benefits for the year ended December 31, 2011, and the supplemental schedules of delinquent participant contributions and assets (held at end of year) as of December 31, 2011. These financial statements and supplemental schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Notes 3, 4, 5 and 6, which was certified or provided by Great-West Life & Annuity Insurance Company and Orchard Trust Company, the custodian and trustee of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedules. We have been informed by the Plan Administrator that the custodian and trustee hold the Plan's assets and execute transactions. The Plan Administrator has obtained certifications from the custodian and trustee regarding the completeness and accuracy of the information summarized in Note 3 that was provided to the Plan Administrator by the custodian and trustee as of and for the year ended December 31, 2011, and as of December 31, 2010.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The supplemental schedules are presented for the purposes of additional analysis and are not a required part of the financial statements but are required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified or provided by the custodian and trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 1. Description of Plan

The following description of the Maxwell Systems, Inc. 401(k) Plan (the "Plan") provides only general information. Participants should refer to the Plan documents for a more complete description of the Plan's provisions.

General: The Plan is a defined contribution 401(k) plan covering substantially all employees of Maxwell Systems, Inc. (the "Company") who are 21 years of age. There is no service requirement for employees to make elective deferrals. Employees may enter the plan on the first day of the month following the date on which an employee meets the eligibility requirements. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions: Each year, participants may elect to contribute to the Plan an amount equal to from 1% to 80% of their compensation, subject to certain limitations as outlined in the Plan. Employees hired after August 1, 2007 automatically defer 3% of eligible compensation unless the employee elects otherwise. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans.

The Company may make a matching contribution to the Plan that is based upon a percentage of the participants' deferrals. The matching contribution for 2011 is equal to 20% of the participants' elective contribution up to a maximum of 0.6% of eligible wages for the calendar year. A participant must be employed on December 31 of each year and must have been credited with at least 500 hours of service to receive a matching contribution for that year. The Company may make a Qualified Non-Elective Contribution based upon a percentage of the participant's compensation in order to pass certain tests required by law. No such contribution was made for the 2011 Plan year.

Participant Accounts: Each participant's account is credited with the participant's elective and rollover contributions and an allocation of the Company's contribution and Plan investment earnings, and charged with withdrawals, distributions and a share of Plan investment losses and account administration fees. The allocation of the matching contributions is based on participant deferrals. The allocation of discretionary employer contributions is based on eligible participant compensation. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Participant Investment Options: Participants direct their deferral contributions to selected investments as made available and determined by the Plan Administrator. Participants may change their investment options at any time during the year.

Vesting: Participants are immediately vested in their contributions plus actual earnings thereon. A participant is gradually vested in employer contributions after five years of credited service. Each participant is credited with a year of service upon the completion of 1,000 hours of service during the Plan year.

Notes Receivable from Participants: Participants may borrow from their accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of the value of the participant's vested interest in his account. Loan terms range from one to five years, except that longer terms are allowed for the purchase of a principal residence. A participant may have two loans outstanding at any one time. The loans are secured by the balance in the participant's account. The interest rate charged on the loan is the prime rate plus 1% (currently 4.25%). Principal and interest are paid ratably through payroll deductions.

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 1. Description of Plan (Continued)

Payment of Benefits: Upon the attainment of age 59 ½ or termination, a participant may elect to receive the value of their accumulated Plan benefits, in accordance with the provisions of the plan, in a lump-sum distribution. Hardship withdrawals of elective contributions are also permitted. The Plan provides an early retirement option upon reaching age 55 and completing 10 years of service.

Funding Policy: The Company generally remits employee deferral contributions to the Plan on a bi-weekly basis, concurrent with payroll frequency. Company matching contributions are remitted annually.

Forfeitures: Forfeitures may be applied to future employer matching contributions. As of December 31, 2011 and 2010, forfeited non-vested accounts approximated \$9,081 and \$4,108, respectively, which have been used in the subsequent year.

Note 2. Summary of Significant Accounting Policies

Basis of Accounting: The accompanying financial statements are prepared on the accrual basis of accounting. Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The plan invests in an insurance company general account. At December 31, 2011 and 2010, the contract value of the general account approximates its fair value. This determination is based on Great-West Life & Annuity Insurance Company's ("Great-West") credit rating and the yield of its general account, which resets quarterly, being comparable to a ten-year treasury bond.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets available for benefits and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Payment of Benefits: Benefits are recorded when paid.

Investment Valuation and Income Recognition: Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of fair value measurements.

Great-West ("the custodian") maintains certain contributions in an unallocated general account. Contributions are deposited into the general account if selected by the participant. The general account is credited with contributions and investment earnings on the underlying investments and charged for Plan withdrawals and investment earnings or losses on the underlying investments. As transfers are made into the general account, participants are assigned units of the fund with a value equivalent to their deposit amounts. Periodically, the custodian assigns fair values to the units of the general account which reflect their earnings and the fair value of the underlying assets.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Net Appreciation and Depreciation in Fair Value of Investments: The Plan presents in the statement of changes in net assets available for benefits the net appreciation and depreciation in the fair value of its investments which consists of the net of the Plan's realized gains or losses and unrealized appreciation or depreciation on its investments.

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

Notes Receivable from Participants: Notes receivable from participants are measured at their unpaid principal balances plus any accrued but unpaid interest. Delinquent loans are treated as distributions based upon the terms of the plan document.

Administrative Expenses: Plan administrative expenses may be paid by the Plan or the Company. Administrative expenses consist of investment management fees and other administrative fees. The Company currently pays all significant administrative expenses of the Plan.

Recent Accounting Developments: In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. ASU 2011-04 amended Accounting Standards Codification ("ASC") Topic 820, *Fair Value Measurement and Disclosures*, to converge the fair value measurement guidance in U.S. generally accepted accounting principles ("GAAP") and International Financial Reporting Standards ("IFRS"s). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC Topic 820. In addition, ASU 2011-04 requires additional fair value disclosures, although certain of these new disclosures will not be required for nonpublic entities. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

Subsequent Events: The Plan Administrator has evaluated subsequent events through August 14, 2012, the date the financial statements were available to be issued.

Note 3. Information Certified by the Custodian and Trustee

The following is a summary of the plan's asset information as of December 31, 2011 and 2010, and for the year ended December 31, 2011, included throughout the Plan's financial statements and supplemental schedules, that was prepared by or derived from information provided by Great-West Life & Annuity Insurance Company (the custodian) and Orchard Trust Company (the trustee), and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the custodian and trustee that the information provided to the Plan Administrator by the custodian and trustee related to the following assets is complete and accurate to the best of their knowledge. Accordingly, as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information in Notes 3, 4, 5 and 6 and supplemental schedules related to the following assets:

	2011	2010
Mutual funds, at fair value	\$ 8,711,059	\$ 9,013,460

Great-West Life & Annuity Insurance Company and Orchard Trust Company also certified to the completeness and accuracy of \$625,245 of net depreciation of fair value of investments, \$5,448 of interest, and \$258,749 in dividends related to the aforementioned assets for the year ended December 31, 2011.

Note 5. Fair Value Measurements

ASC Topic 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy under ASC Topic 820 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 5. Fair Value Measurements (Continued)

An asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011.

Mutual funds: Investments in mutual funds are valued at the net asset value of shares held by the Plan as determined on an active market.

Unallocated contracts: Investments in unallocated contracts are valued at contract value. Contract value is the amount plan participants would receive currently if they were to withdraw or transfer funds within the Plan prior to their maturity for an event other than death, disability, termination or retirement. Fair value represents contract value adjusted to reflect current market interest rates only to the extent such market rates exceed crediting rates.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2011 and 2010:

	Assets at Fair Value at December 31, 2011

(a) This category includes insurance contracts which provide a guarantee of principal and a guaranteed interest rate, through the backing of the general account assets of an insurance company (See Note 6).

Maxwell Systems, Inc. 401(k) Plan

Notes to Financial Statements

Note 6. Insurance Contracts

The Plan has an investment contract with Great-West Life & Annuity Insurance Company, the custodian. The custodian maintains the contributions to the investment contract in an unallocated general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

Because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. Contract value, as reported to the Plan by Great-West Life & Annuity Insurance Company, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. The contract values of \$2,062,256 and \$1,491,635 approximated fair value at December 31, 2011 and 2010, respectively. There are no reserves against contract value for credit risk of the contract issuer or otherwise.

The methodology for calculating the interest crediting rate is based on the earnings of the underlying assets in the entire medium-long term new portfolio compared to the minimum interest crediting rate, as stated in the contract, and prevailing market conditions. Interest crediting rate is reset quarterly. The average interest rate yield earned and credited to participants during 2011 and 2010 is as follows:

	2011	2010
Average yields:		
Based on actual earnings	2.03%	2.49%
Based on interest rate credited to participants	2.03%	2.49%

Certain events may limit the ability of the Plan to transact at contract value with the issuer. Such events may include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (3) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The Plan Administrator does not believe that the occurrence of any such event, which would limit the Plan's ability to transact at contract value with participants, is probable.

This contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

Note 7. Risks and Uncertainties

The Plan invests in various investment instruments. Investment securities are exposed to various risks, such as credit, interest rate, and market risks.

Credit risk arises from the potential for an issuer or other counterparty to default on its contractual obligations to the Plan. Investments are recorded at fair value. This represents the maximum credit risk exposure of the Plan.

Interest rate risk refers to the impact of interest rate changes on the Plan's financial position. Interest rate changes directly impact the fair value of fixed income securities held in the Plan. Interest rate changes will also have an indirect impact on the other investments held by the Plan.

Notes to Financial Statements

Note 7. Risks and Uncertainties (Continued)

Market risk is the risk that the market value of an investment will fluctuate as a result of changes in market price. For the unallocated contract, in subsequent periods if market conditions change, such as the insurance company credit rating or interest rate environment, the difference between contract value and fair value could become significant.

Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participant account balances and the amounts reported in the statements of net assets available for benefits.

Note 8. Plan Termination

Although they have not expressed any intent to do so, the Company has the right under the Plan to discontinue their contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants will become 100% vested in their accounts.

Note 9. Income Tax Status

The Internal Revenue Service stated, in a letter dated November 27, 2001, that the prototype used by the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

Note 10. Related Party Transactions

Certain Plan investments are invested in funds managed by Great-West Life & Annuity Insurance Company and Orchard Trust Company, the custodian and trustee of the Plan. Therefore, these transactions qualify as party-in-interest transactions.

Certain administrative functions are performed by officers and management of the Company. No such officers or employees receive compensation from the Plan.

Note 11. Voluntary Correction Program

During 2009, the Plan applied to the United States Department of Labor's ("DOL") Voluntary Correction Program to cure certain operation failures related to a plan merger which occurred in 2007. In March 2010, the DOL notified the Plan that it approved of the Plan's method of correction and revisions to administrative procedures. There were no significant fines or penalties imposed by the DOL as a result of this action.

Note 12. Prohibited Transactions

During 2010, the Plan Sponsor inadvertently failed to deposit approximately \$3,664 of participant referrals within the required time frame as stated by the DOL. The DOL considers late deposits to be prohibited transactions. The Plan Sponsor has filed the Form 5330 for the aforementioned plan year and has paid excise tax for the year affected. The excise tax payment was made from the Plan Sponsor's assets and not from the assets of the Plan.

Total per the Form 5500	<u>\$ 453,466</u>

Note 14. Subsequent Events

Effective March 1, 2012, the Company amended the Plan to remove all restrictions on eligibility. All employees are immediately eligible to participate upon employment and may participate on the first day of the first month following their date of hire. Additionally, the amendment removed the plan's automatic deferral provision.
