In our opinion, the accompanying Statements of Net Assets Available for Benefits as of December 31, 2011 and 2010 and the related Statements of Changes in Net Assets Available for Benefits for the years then ended and the Statement of Accumulated Plan Benefits as of January 1, 2011 and the related Statement of Changes in Accumulated Plan Benefits for the year then ended, present fairly, in all material respects, information regarding the net assets available for benefits of the Cooperative Retirement Income Plan (the "Plan") at December 31, 2011 and changes therein for the year then ended and its financial status as of January 1, 2011, and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

NOTES TO FINANCIAL STATEMENTS – continued

1. Plan Description

The following brief description of The Cooperative Retirement Income Plan (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

L-3 Communications Corporation acquired certain business operations from Bulova Technologies on December 19, 2001, and in conjunction with the acquisition assumed sponsorship of the Plan. The Plan is a contributory defined benefit pension plan for eligible employees of L-3 Fuzing and Ordnance Systems, Inc. (formerly known as the BT Fuze division of L-3 Communications Corporation) who are members of the collective bargaining unit represented by the American Federation of Grain Millers AFL-CIO, CLC Local 387. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

In February 2011, the Plan sponsor discontinued the Voluntary Investment Plan (VIP) Feature of the Plan and transferred VIP contributions and accumulated earnings to an after-tax account in the L-3 Communications Master Savings Plan for each participant with account balances on the date of the transfer.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared using the accrual basis of accounting.

Investments

Investment assets of the Plan are maintained in the L-3 Communications Corporation Master Trust (the “Master Trust”) administered by The Bank of New York Mellon, as Trustee. The Plan participates in the Master Trust along with other defined benefit plans sponsored by the Company (collectively, the “L-3 Participating Plans”). The fair value of the Plan’s interest in the Master Trust is determined based on the beginning of year value of the Plan’s interest in the trust plus actual contributions and allocated investment income (loss) less actual distributions and actual administrative expenses. Assets held in the Master Trust primarily consist of corporate equity securities, commingled trust funds and mutual funds, and corporate bonds. See Note 7 for a description of the valuation methodologies of the assets of the Master Trust.

The Master Trust records investment transactions on the trade-date, dividend income on the ex-dividend date, interest income as earned and determines realized gains and losses on sales of securities based on the average cost method.

THE COOPERATIVE RETIREMENT INCOME PLAN
NOTES TO FINANCIAL STATEMENTS – continued
(Dollars in thousands)

Net Investment Gain from Master Trust

The net investment gain from the Master Trust includes interest and dividend income and net appreciation or depreciation in the fair value of investments, which includes gains or losses realized upon disposition of investments and net unrealized appreciation or depreciation of investments. The net investment gain or loss is allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Benefit Payments

Benefit payments are recorded when paid.

Plan Expenses

The administrative expenses of the Plan are paid for by the Plan. Administrative expenses are allocated to the Plan at the direction of the Company based upon the Plan's respective portion of the expense. Investment management fees of the Master Trust are allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make significant estimates and assumptions that affect the reported amounts of assets, liabilities, benefit obligations, and changes therein, disclosures of contingent assets, liabilities and benefit obligations, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results will differ from those estimates.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are determined based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in the estimates and assumptions in the near term would be material to the financial statements.

The investments held in the Master Trust and the Guaranteed Income Fund (the Fund) are exposed to various risks. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in risks in the near term would materially affect the investments and related allocation reported in the statements of net assets available for benefits and the

THE COOPERATIVE RETIREMENT INCOME PLAN
NOTES TO FINANCIAL STATEMENTS – continued
(Dollars in thousands)

statements of changes in net assets available for benefits.

Subsequent Events

The Plan continued to evaluate events after the Statement of Net Assets Available for Benefits date through September 14, 2012, the date the financial statements were available to be issued.

3. Contributions

Generally, the Company's funding policy is to contribute amounts in accordance with the Internal Revenue Code ("IRC") and the minimum funding requirements under ERISA. Contributions required from the Company in 2011 and 2010 to the Plan under the minimum funding requirements of ERISA were \$512 and \$0 respectively. Contributions are calculated using the Projected Unit Credit Actuarial Cost Method. Under this method, the total actuarial liability for participants is the actuarial present value as of the valuation date of all benefits attributed by the pension benefit formula to employee service rendered prior to that date, which assumes the normal cost will increase each year for each employee as he or she approaches retirement age. The yield (interest, dividends and net realized and unrealized gains and losses) on investments of the Plan serves to adjust future contributions that will be required to provide for the defined level of benefits. The funding target is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.

Defined Benefit Feature - Each participant in the Plan contributed 1 percent of the first \$3 of his/her annual earnings plus 3 percent of earnings in excess of \$3. The Company contributed such remaining amounts as necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid to plan participants. Active employees' accumulated contributions at December 31, 2011 and 2010 were \$0 because there were no active participants.

Employee contributions to the VIP feature of the Plan were made periodically based on payroll withholdings and semi-annual voluntary contributions limited to 10 percent of an employee's annual earnings. In addition, contributions to the VIP feature were subject to the limitations provided for in the Internal Revenue Code.

4. Plan Benefits

With regard to the defined benefit feature of the Plan, the Plan permits early retirement for participants at ages 55 to 62 with at least 5 or more years of service, depending on which set of grandfathered benefit provisions is applicable to the participant. Under all provisions, the benefit may begin at the date of early retirement, reduced by a certain percentage for each year

by which commencement of benefits precedes the normal retirement date, age 65. The monthly benefit a participant is entitled to upon reaching age 65 is $1/12^{\text{th}}$ of the greater of the sum of 2% of the participant's compensation during a period of credited service after January 1, 1989, plus the participant's accrued benefit as of December 31, 1988 or the minimum retirement income per the Plan Table II contained in the plan document. Retirees may elect to receive their pension benefits in the form of a joint and survivor annuity or a life annuity payable monthly from the date of retirement. Under the joint and survivor annuity, if a vested participant dies prior to the date pension benefits commence, the surviving spouse of the deceased vested participant generally receives benefits equal to 75% of the amount which would have been payable to the retiree. Under the life annuity, there are no continuing payments after the death of the retiree.

For the VIP feature, each participant's account was credited with the participant's contribution and an allocation of applicable fund earnings, and charged with an allocation of applicable administrative expenses. Allocations were based on participant earnings or account balances. The benefit to which a participant was entitled was the benefit that can be provided from the participant's vested account. Distribution of a participant's benefit was made as a lump sum payment.

The following presents the more significant assumptions underlying the actuarial computations as of January 1, 2011 and 2010.

Mortality basis	2011: RP 2000 Combined Tables with static projection.
	2010: RP-2000 Combined Healthy Table RP-2000 Combined Disabled Table
Retirement	Retirement in 2011 at 62 and in 2010 at age 64, for terminated vested participants
Discount rate for the determination of the present value of accumulated plan benefits	2011 and 2010 – 7.5%

The foregoing actuarial assumptions are based upon the assumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors may be used in determining the actuarial present value of accumulated plan benefits.

5. *Benefit-Responsive Investment Contracts*

The VIP held investments in the Fund at December 31, 2010. The Guaranteed Income Fund was an insurance company issued Evergreen Group Annuity. Under the group annuity insurance contract that supports the Fund, participants could direct permitted withdrawals or transfers of all or a portion of their account balances at contract value within reasonable timeframes. All investment contracts held by the Fund were held directly between the Fund and the issuer of the contract and are nontransferable. The Fund invested in underlying assets. The Fund's ability to receive amounts due pursuant to these contracts was dependent upon the issuers' ability to meet their financial obligations.

The fair value amount approximated the contract value. There were no specific securities in the general account that backed the liabilities of this annuity contract and Plan management had concluded that it would not be appropriate to use market value of the securities within the insurer's general account to determine a fair value. The Fund owned a promise to pay interest at crediting rates, which were announced and guaranteed for a specified period of time. There were no known cash flows of the Fund that could be discounted.

Interest was credited on contract balances using a single portfolio rate approach. Under this methodology, a single interest crediting rate was applied to all contributions made to the Fund regardless of the timing of those contributions. Interest crediting rates were reviewed on a semi-annual basis for resetting. When establishing interest crediting rates for the Fund, Prudential Insurance considered current economic and market conditions, the general interest rate environment and both the expected and actual experience of a reference portfolio within the issuer's general account. These rates were established without the use of a specific formula. The minimum crediting interest rate under the contract was 1.50%.

Generally, there were no events that could limit the ability of the Plan to transact at contract value paid within 90 days or in rare circumstances, contract value paid over time. There were no events that allowed the issuer to terminate the contract and which required the Plan sponsor to settle at an amount different than contract value paid either within 90 days or over time.

The average yield earned by the Guaranteed Income Fund for all fully benefit-responsive investment contracts for the years ended December 31, 2011 and 2010 was 1.25%, respectively, based on actual earnings, and 1.25% , respectively, based on interest rate credited to participants. The average earnings yield was calculated by dividing the earnings credited to the Plan on the last day of the plan year by the end of the plan year fair value annualized. The average crediting rate was calculated by dividing the earnings credited to the participants on the last day of the plan year by the end of plan year fair value annualized.

7. Fair Value Measurements

The Plan adopted the standards for fair value measurements. The provisions of the standards are applicable to all of the Plan's assets and liabilities that are measured and recorded at fair value. The standards establish a framework for measuring fair value and expand related disclosures. The standards define fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants. It establishes a fair value hierarchy that gives the highest priority to observable inputs and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are described below.

Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date. The Plan's Level 1 assets include equity securities, certain mutual funds and U.S. Treasury bonds, all of which fair value is derived from quoted market prices.

Level 2: Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date. The fair value is determined using a valuation model based on observable market inputs. The Plan's Level 2 assets include commingled trust funds, certain mutual funds, corporate bonds, government securities and forward contracts.

Level 3: Pricing inputs that are generally unobservable inputs and not corroborated by market data. The Plan has no Level 3 assets.

The table below reports by level, within the fair value hierarchy, the assets held in the Master Trust at fair value as of December 31, 2011 and 2010, including a description of the valuation methodologies. As required by the standards, each asset is classified based on the lowest level of input that is significant to the fair value measurement.

⁽¹⁾ Equity securities consist of investments in common stock of U.S. and foreign companies. The fair value of equity securities is based on quoted market prices available in active markets at the close of a trading day, primarily the New York Stock Exchange (NYSE), National Association of Securities Dealers Automated Quotations (NASDAQ), and various foreign exchanges. The Level 2 investment balance is derived from a pooled equity fund offered by a registered investment company, which fair value is based on net asset value (NAV). NAV is calculated by the fund manager based on the fair value of the fund's holdings, primarily equity securities traded in active markets, determined as of the end of each month. Withdrawals are permitted monthly based on NAV.

⁽²⁾ Approximately 50% in both 2011 and in 2010 of plan assets invested in fixed income — investment grade securities consist of a mutual fund offered by a registered investment company. The mutual fund invests in investment grade fixed income securities, mortgaged-backed securities, U.S. treasury and agency bonds and corporate bonds. This fund is classified by the Company as a Level 1 measurement within the fair value hierarchy as the mutual fund trades on an active market and daily, quoted prices are available.

⁽³⁾ The remaining 50% in both 2011 and in 2010 of plan assets invested in fixed income — investment grade securities is derived from pooled bond

funds offered by registered investment companies. As these funds do not trade in an active market, the fair value is based on NAVs calculated by fund managers based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs.

- (4) Fixed income — high yield consists of investments in corporate high-yield bonds from various industries. The fair values of these investments are based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs.
- (5) Real Estate Investment Trusts (REITs) consist of securities that trade on the major exchanges and invest directly in real estate, either through properties or mortgages.
- (6) Other consists of short term investments maintained in a commingled trust or pooled fund, which primarily invests in short term, high quality money market securities such as government obligations, commercial paper, time deposits and certificates of deposit, which are classified as Level 2.

The Plan's VIP program held investments in the Guaranteed Income Fund. For a description of the valuation methodology of the Guaranteed Income Fund, see Note 5. As required by the standards for fair value measurement, the Guaranteed Income Fund was classified as Level 3.

The table below sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the year ended December 31, 2011.

7. Accounting Standards Issued and Not Yet Implemented

In May 2011, the FASB issued a revised accounting standard for fair value measurement and disclosure. The revisions clarify how to measure fair value and require additional disclosures as follows: 1) transfers between Level 1 and Level 2 of the fair value hierarchy, 2) the valuation process used and the sensitivity of a fair value measurement categorized within Level 3 of the fair value hierarchy to changes in unobservable inputs, and 3) the categorization by level of the fair value hierarchy for items that are not measured at fair value in the Statement of Net Assets Available for Benefits, but for which the fair value of such items is required to be disclosed. The revised accounting standard is effective for the Company beginning after December 15, 2011, and is not expected to have an impact on the Plan's Net Assets Available for Benefits.

8. Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated February 10, 2012, that the Plan is designed in accordance with the applicable sections of the IRC. The Plan has not been amended since receiving the determination letter. The Plan administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable regulations of the IRC; therefore, no provision for income taxes has been included in the Plan's financial statements.

THE COOPERATIVE RETIREMENT INCOME PLAN
NOTES TO FINANCIAL STATEMENTS – continued
(Dollars in thousands)

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions by the Plan, and has concluded that as of December 31, 2011, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to the year ended December 31, 2007.

9. *Related-Party Transactions*

Certain plan investments held in the Master Trust are units of a commingled trust fund managed by The Bank of New York Mellon, the Plan's trustee. Certain plan investments are managed by Prudential Retirement Insurance and Annuity Company.

10. *Termination Priorities*

While the Company has not expressed any intention to do so, it is free to discontinue its contributions at any time and to terminate the Plan, subject to collective bargaining and the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated as specified by the Plan in accordance with ERISA, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination.
- b. Benefits attributable to participants who have retired at least three years before the termination date of the Plan or those participants who were eligible to retire and receive pension benefits at least three years before, but who did not elect to retire at that time.
- c. Benefits commencing at retirement age to participants who are eligible to receive guaranteed benefits under ERISA.
- d. All vested and non-vested benefits.

To the extent the Plan's net assets are not sufficient to fund the accumulated benefits upon Plan termination, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation, up to specified limits.

11. Reportable Event

Effective September 30, 2007, the BT Fuze manufacturing facility in Lancaster, Pennsylvania ceased all operations. As a result of the cessation of operations, L-3 Communications Corporation incurred a liability to the Pension Benefit Guaranty Corporation (PBGC) of \$5,607. The Company and the PBGC have agreed that the Company will issue and renew a letter of credit annually for a period up to and ending on September 30, 2012. Upon expiration of the letter of credit on September 30, 2012, the agreement will terminate and L-3 Communicaitons will no longer have an obligation to the PBGC.

EIN 13-3937436 PN 016

Actuarial Assumptions and Methodologies (Funding)

Interest:	The interest rates used for the 2011 plan year are the 24-month average corporate bond yields ending in August 2010 without a phase-in from the current liability rate. These discount rates are 3.78% for payments in the first 5 years, 6.31% for payments in years 6 – 20, and 6.57% for payments thereafter, which translates to an effective interest rate of 6.16%. This assumption is based on a one-time election by the plan sponsor to use one of the options allowed by law. (Prior year interest rate used for determination of current liability was 6.76%. Prior year interest rates used for determination of maximum deductible contribution were the 24-month average corporate bond yields ending in August 2009, which were 5.03% for payments in the first 5 years, 6.73% for payments in years 6 – 20, and 6.82% for payments thereafter, which translates to an effective interest rate of 6.61%.)
Mortality rates:	RP 2000 combined tables with static projection. This assumption is one of the choices allowed by the regulations. (Prior year mortality table assumption was similar to this year, except with one less year of projection.)
Salary Increases:	N/A – no active participants
Termination rates:	N/A – no active participants
Disability rates:	N/A – no active participants
Retirement (from active status) rates:	N/A – no active participants
Retirement from inactive status:	100% at age 62 (Previously 100% at age 64)
Percent married:	70% of male participants and 55% of female participants are assumed to be married.
Age difference:	For inactive participants for whom a spouse's date of birth was not provided it was assumed that husbands were three years older than their spouses.
Administrative expenses:	An expense assumption is required under PPA. Plan-related expenses of \$125,000 expected to be paid by the plan during the year were assumed in 2011.

Asset method:	Assets are determined by averaging the market value as of the valuation date and the adjusted market values as of the preceding two years. The resulting value is limited to between 90% to 110% of market value of assets. WRERA provides that the averaging method is to be adjusted for expected earnings. The expected earnings are based on an assumed rate of return of 7.50%, not to exceed the applicable third segment rate of 6.69% in 2009 and 6.82% in 2010. (Prior year asset method used for determination of the maximum deductible contribution was similar; the asset method used for all other purposes was smoothed market value under Approval 16 of Revenue Procedure 2000-40.)			
Funding method:	Funding method is unit credit actuarial cost method, as prescribed by law. The liability is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.			
Annuities purchased:	Annuities that were purchased from Cigna during 2003 are not included in the actuarial valuation.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
