Time Manufacturing Company 401(k) Plan

Notes to Financial Statements

December 31, 2011 and 2010

(1) Description of Plan

The following description of the Time Manufacturing Company 401(k) Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

(a) General

The Plan is a defined contribution plan covering all full-time employees of O'Flaherty Holdings Incorporated and Subsidiaries (specifically, Time Manufacturing Company and Lewis & Lambert, L.L.P.) (collectively, the Company) who are age twenty-one or older, excluding union employees and non-resident aliens. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective August 20, 2011, the Plan changed custodians and third-party administrators. Additionally, effective August 20, 2011, eligible participants are automatically enrolled into the Plan upon meeting eligibility requirements, unless they choose to opt out of the Plan.

(b) Contributions

Each year, participants may contribute from 1% to 60% of annual pre-tax compensation, as defined in the Plan not to exceed a specific dollar amount determined by the Internal Revenue Service. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. Participants may direct contributions in percentage increments to any one of the twenty-three investment options. The Company contributes 25% of employee contributions up to a maximum of 1% of compensation. Additional amounts may be contributed at the option of the Company's board of directors. Contributions are subject to certain limitations. Unallocated Company contributions were $80,695 and $62,306 at December 31, 2011 and 2010, respectively.

(c) Participant Accounts

Each participant's account is credited with the participant's contribution, the employer matching contribution, an allocation of Plan earnings and is charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Notes to Financial Statements
(Continued)

(1) Description of Plan (continued)

(d) Vesting

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their accounts is based on years of continuous service. A participant is 100 percent vested after five years of credited service. Full vesting in employer contributions also occurs upon death, total disability or retirement at or after age sixty-five.

(e) Payment of Benefits

On termination of service due to death, disability or retirement, a participant may elect to receive the value of the participant's vested interest in his or her account as a lump-sum distribution. For termination of service for other reasons, a participant may receive the value of the vested interest in his or her account as a lump-sum distribution.

(2) Summary of Significant Accounting Policies and Practices

(a) Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measure attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Statements of Net Assets Available for Benefits present the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statements of Changes in Net Assets Available for Benefits are prepared on a contract value basis.

(b) Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for further discussion of fair value measurements.

Time Manufacturing Company 401(k) Plan

Notes to Financial Statements
(Continued)

(2) Summary of Significant Accounting Policies and Practices (continued)

(b) Investment Valuation and Income Recognition (continued)

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

(c) Payment of Benefits

Benefits are recorded when paid.

(d) Operating Expenses

The Plan document allows for the expenses of maintaining the Plan to be satisfied directly out of the Plan's assets. A portion of the administrative expenses of the Plan is paid by the Company. Also, certain transaction charges are paid by the participants involved.

(e) Income Taxes

The Plan recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs.

(f) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

(3) Investments

The following table presents the fair values of the Plan's investments, all of which are participant directed, at December 31, 2011 and 2010. Investments that represent five percent or more of the Plan's net assets are separately identified.

Notes to Financial Statements
(Continued)

(3) Investments (continued)

During 2011 and 2010, the Plan's investments determined by quoted market prices (including investments bought, sold and held during the year) (depreciated) appreciated in value by $(178,450) and $433,825, respectively.

(4) Unallocated Investment Contract

From January 1, 2010 to August 20, 2011, the Plan invested in a group annuity contract with Transamerica Life Insurance Company (Transamerica Life). Transamerica Life maintained all assets of the group annuity investment contract in separate pooled accounts and an unallocated investment contract. Effective August 20, 2011, the separate pooled accounts were liquidated, and the cash was transferred to the new custodian for the Plan. The unallocated investment contract, Transamerica Stable Value fund, was a fully benefit-responsive investment contract. The unallocated investment contract guaranteed a credited rate of return that was adjusted monthly based on current market conditions and performance of the fund's investments.

Because the Transamerica Stable Value fund was fully benefit-responsive, contract value is the relevant measurement attribute for that portion of net assets available for benefits at December 31, 2010 attributable to the guaranteed investment contract. Contract value, as reported to the Plan by the custodian represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. As described in Note 5, the former custodian of the Plan determined the contract value of the Transamerica Stable Value fund is its fair value, and no adjustment from contract value to fair value was reported at December 31, 2010.

At December 31, 2010, there were no reserves against the contract value for credit risk of the contract issuer or otherwise. The crediting interest rate was set monthly by the issuer and was effective on the first day of the month. The average yield based upon the guaranteed interest rate credited to participants for the year ended December 31, 2010 was 2.86%. The average yield based upon actual earnings during 2010 was 2.64%.

In August 2011, the Plan provided the required 60-day advance notice of its intent to withdraw from the investment. The Transamerica Stable Value fund was fully liquidated on October 31, 2011, and the cash was transferred to the new custodian for the Plan.

(5) Fair Value Measurements

The Plan's investments are reported at fair value in the accompanying Statement of Net Assets Available for Benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values.

Time Manufacturing Company 401(k) Plan

Notes to Financial Statements
(Continued)

(5) Fair Value Measurements (continued)

Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Generally accepted accounting principles establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Plan has the ability to access at the measurement date.
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 inputs are unobservable inputs for the asset or liability.

The level in the fair value hierarchy within which a financial instrument in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

Mutual funds: Valued at quoted market prices which represent the net asset value of shares held by the Plan at year-end.

Common/collective trust: Valued at estimated fair value by discounting the related cash flows based upon current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer.

Investment contract with an insurance company: The pooled separate accounts are valued based on units of ownership in the investment pool. The units of ownership are valued using the net asset value of the shares of the related underlying mutual funds at the end of the year. The Plan's unallocated investment contract (i.e., its stable value option) has no stated maturity. Interest rates were reset monthly as of the beginning of each month, during which a new interest rate was applied daily to the outstanding balance. Accordingly, as determined by the custodian of the Plan, the contract value of the Plan's fully benefit-responsive unallocated investment contract is also its fair value at December 31, 2010.

Balance, December 31, 2011	$ -

(6) Information Certified by the Custodian

For 2011 and 2010, the financial information included in the Plan's financial statements, except for the fair value adjustment for the common collective trust, receivables, excess contributions payable, contributions, benefits paid to participants, and administration expenses, have been derived from information certified as complete and accurate by the custodians of the Plan, in accordance with Section 2520.103-5 of the Department of Labor Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

(7) Components of Net Assets Available for Benefits

Net assets available for benefits may include certain vested and unvested amounts for former participants. The Plan allows vested amounts of former participants to remain in the Plan until they elect to receive the benefits. As of December 31, 2011 and 2010, there are no net assets available for benefits allocated to the accounts of persons who had withdrawn from participating in the earnings and operations of the Plan.

Time Manufacturing Company 401(k) Plan

Notes to Financial Statements
(Continued)

(8) Tax Status

The Plan is using a standardized prototype profit-sharing plan document. In a letter dated January 31, 2006, the Internal Revenue Service (IRS) indicated the standardized form of the Plan is acceptable under Section 401 of the Internal Revenue Code (the Code). The opinion of the IRS regarding the acceptability of the form of the Plan is not a ruling or determination as to whether the Plan qualifies under Code Section 401(a). However, the Plan administrator believes the Plan is currently designed and operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

The Plan is no longer subject to examination by the Internal Revenue Service for years prior to 2008.

(9) Plan Termination

Although it has not expressed any interest to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants will become 100 percent vested in their employer contributions.

(10) Party-In-Interest Transactions

From January 1, 2010 to August 20, 2011, the Plan investments underlying the investment contract with Transamerica Life included investment funds managed by various Transamerica companies. Transamerica Life also provided investment management services to the Plan and was the custodian of the Plan. Further, Transamerica Retirement Services provided recordkeeping services to the Plan. Transamerica Life and other Transamerica companies are all affiliates of AEGON N.V., an international life insurance, pension and investment group, and these entities all qualify as parties-in-interest. Fees paid by the Plan to Transamerica Life amounted to $20,512 and $33,359 for 2011 and 2010, respectively.

The Plan has not considered Company contributions to the Plan or benefits paid by the Plan to participants as party-in-interest transactions.

(11) Risks and Uncertainties

The Plan's investments are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the Statement of Net Assets Available for Benefits.
