Independent Auditor's Report

To the Plan Administrator
Rotek Incorporated Pension Plan for
Aurora-Ravenna Hourly Employees

We were engaged to audit the modified cash basis financial statements of Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees (the "Plan") as of December 31, 2011 and 2010 and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 3, which was certified by The Bank of New York Mellon/BNY Mellon, N.A., the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the Trustee as of December 31, 2011 and 2010 and for the years then ended that the information provided to the plan administrator by the Trustee is complete and accurate.

As described in Note 2, these financial statements were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the Trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees

Notes to Financial Statements December 31, 2011 and 2010

Note 1 - Plan Description

The following description of Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees (the "Plan") is provided for general information purposes only. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a noncontributory defined benefit pension plan covering all hourly employees of Rotek Incorporated and subsidiary (collectively, the "Company") who are members of the United Steel Workers of America Local 8565 Union. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective November 1, 2008, new participants are no longer accepted into the Plan. Employees participating in the Plan prior to November 1, 2008 were given a one-time option to "opt out" of the Plan. By electing to "opt out", a participant's accumulation of benefits was frozen. In lieu of benefit accumulation, participants were eligible to receive matching contributions as a participant in the Company's defined contribution 401(k) Plan. Those participants who did not elect to "opt out" will continue to accrue benefits as outlined in the plan document.

Eligibility and Vesting - Employees become participants in the Plan following completion of the eligibility requirements as described in the Plan and are fully vested for normal retirement benefits after five years of service. Employees who terminate service before becoming fully vested forfeit all benefits under the Plan.

Pension Benefits - The Plan provides for normal retirement benefits at age 65, unreduced early retirement benefits as early as age 62 with (i) 25 years of vesting service or (ii) 10 years of vesting service and a seniority date prior to January 1, 1982, reduced early retirement benefits at age 60, surviving spouse death benefits, and disability benefits, as defined in the Plan. The normal individual retirement benefit is equal to credited service times a monthly pension benefit in effect when the years of credited service were earned.

Death Benefits - In certain circumstances, if an active or terminated employee who has a vested interest in the Plan dies prior to his or her normal retirement age, the surviving spouse or designated beneficiary shall receive a survivor benefit, as defined in the Plan.

Funding Policy - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. The Company will also make additional contributions from time to time with the total not to exceed the maximum contribution deductible under the Internal Revenue Code. Annual contributions meet the minimum funding requirements of ERISA.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation - The accompanying financial statements have been prepared on the modified cash basis of accounting. Under the modified cash basis of accounting, contributions and investment income are recorded when received, benefit payments and expenses are recorded when paid, and investments are recorded at fair market value.

Investment Valuation - The Plan's investments are stated at fair value. The fair value of the Plan's interest in the ThyssenKrupp USA Master Trust (the "Master Trust") is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. Common stock, preferred stock, and mutual funds are valued at quoted market prices. Money market funds and interest-bearing cash are valued at their outstanding balances, which approximates fair value. The government securities and corporate obligations are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve, as well as other relevant economic measures. Investments in common collective trust funds and partnerships are valued at the net asset value per share (or its equivalent) of the funds, which is based on the fair value of the funds' underlying assets. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Use of Estimates - The preparation of financial statements in conformity with the modified cash basis of accounting requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Notes to Financial Statements December 31, 2011 and 2010

Note 2 - Summary of Significant Accounting Policies (Continued)

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Administrative Expenses - Administrative expenses of approximately \$55,000 and \$69,000 for the years ended December 31, 2011 and 2010, respectively, were paid by the Company.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including September 20, 2012, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Investment Information

The trustee of the Plan, The Bank of New York Mellon/BNY Mellon, N.A. (the "Trustee"), holds the Master Trust's investments and executes all related investment transactions. The investment balances and related investment results included in the accompanying financial statements, including information summarized in Note 5, are based solely on information provided by the Trustee.

Certain assets of the Master Trust are in investment funds managed by The Bank of New York Mellon/BNY Mellon, N.A. or its affiliates. Since The Bank of New York Mellon/BNY Mellon, N.A. is the trustee of the Plan, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines. The market value of these investments was approximately \$96,000,000 and \$114,000,000 at December 31, 2011 and 2010, respectively.

Note 4 - Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered to the valuation date. These include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees

Notes to Financial Statements December 31, 2011 and 2010

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The normal individual retirement benefit is equal to the participant's years of credited service multiplied by a monthly pension benefit in effect when the years of credited service were earned.

The actuarial present value of accumulated plan benefits is determined by the independent actuary, Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts and interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, and retirement) between the valuation date and the expected date of payment. The determination was made as of January 1, 2011 and 2010.

The more significant actuarial assumptions underlying the actuarial computations at January 1, 2011 and 2010 are as follows:

Actuarial cost method	- Projected unit credit cost method
Interest rate	- 8.0 percent and 8.5 percent, respectively
Mortality basis	- 1994 Group Annuity Mortality Basic Table projected to January 1, 2006 for males and females
Retirement	- Based upon defined table of ages and percentages

The foregoing actuarial assumptions are based on the presumption that the Plan will continue indefinitely. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of January 1, 2011 and 2010 was as follows:

	2011	2010
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 2,093,172	\$ 1,603,744
Other vested participants	2,520,713	2,491,163
Total vested benefits	4,613,885	4,094,907
Nonvested benefits	729,663	686,437
Total actuarial present value of accumulated plan benefits	<u>\$ 5,343,548</u>	<u>\$ 4,781,344</u>

Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees

Notes to Financial Statements December 31, 2011 and 2010

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The following table summarizes the components of the net increase in actuarial present value of accumulated plan benefits for the years ended January 1, 2011 and 2010:

	<u>2011</u>	<u>2010</u>
Actuarial present value of accumulated plan benefits -		
Beginning of year	\$ 4,781,344	\$ 4,442,805
Increase (decrease) during the year attributable to:		
Benefits accumulated including actuarial gains and losses	136,572	151,012
Interest due to the decrease in the discount period	408,868	382,498
Benefits paid	(259,375)	(194,971)
Change of assumptions	<u>276,139</u>	<u>-</u>
Net increase	<u>562,204</u>	<u>338,539</u>
Actuarial present value of accumulated plan benefits -		
End of year	<u>\$ 5,343,548</u>	<u>\$ 4,781,344</u>

Change in assumptions consists of a change in the interest rate to 8.0 percent in 2011 from 8.5 percent in 2010. This change was made in order to better reflect anticipated plan experience. Also, the 2010 actuarial present value of accumulated plan benefits was impacted by an amendment to freeze participation in the Plan.

Note 5 - Interest in Master Trust

The Plan's investments are in the Master Trust which was established for the investment of assets of the Plan and several other pension plans sponsored by affiliated participating employers of ThyssenKrupp, USA, Inc. Each participating benefit plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by the Trustee. At December 31, 2011 and 2010, the Plan's interest in the net assets of the Master Trust was approximately .67 percent and .68 percent, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon average monthly balances invested by each plan.

Note 5 - Interest in Master Trust (Continued)

The investment income for the Master Trust for the years ended December 31, 2011 and 2010 are as follows:

	2011	2010
Net appreciation (depreciation) in fair value of investments:		
Mutual funds	\$ 724,295	\$ 3,167,524
Common collective trust funds	21,890,801	44,658,762

Securities lending income	180,060	277,245
Net investment income	<u>\$ 56,018,928</u>	<u>\$ 121,831,405</u>

Securities Lending - The Master Trust participates in a securities lending program with the Trustee for its U.S. and non-U.S. securities held in custody with the Trustee. The program allows up to \$150,000,000 of qualified assets to be on loan at any given time. These securities are lent to certain unrelated third-party brokers in exchange for cash and noncash collaterals. U.S. assets and non-U.S. assets on loan are collateralized at 102 percent and 105 percent, respectively, of the assets' market value.

The net assets of the Master Trust reflect, as an asset, the collateral received under the securities lending arrangement with an offsetting liability representing the Master Trust's obligation to return the collateral to the borrower. The collateral received from borrowers totaled \$95,922,480 and \$114,486,791 as of December 31, 2011 and 2010, respectively. This consisted of cash collateral received of \$93,179,439 and \$114,486,791, which was received in the ASL short-term fund, a money market fund, and noncash collateral of \$2,743,041 and \$0 at December 31, 2011 and 2010, respectively. The noncash collateral received primarily consisted of fixed income securities and letters of credit. In the event that a loaned security is called, the Master Trust will receive the market value of the asset in cash. The market value of the loaned securities totaled \$93,676,810 and \$111,844,553 at December 31, 2011 and 2010, respectively.

Note 5 - Interest in Master Trust (Continued)

Derivative Instruments - The Master Trust is party to certain agreements, which are designed to manage exposures to foreign exchange and interest rate risks. The interest rate and foreign currency instruments are used for the purpose of hedging changes in the fair value of assets that result from interest rate changes and currency fluctuations, or as an efficient substitute for traditional securities. The notional amount represents the contract amount, not the amount at risk. The notional amount of interest rate instruments was approximately \$6,400,000 and \$13,000,000 at December 31, 2011 and 2010, respectively. The notional amount of foreign currency instruments was approximately \$5,600,000 and \$8,900,000 at December 31, 2011 and 2010, respectively. The estimated fair value of derivative instruments at December 31, 2011 and 2010 is insignificant. For the years ended December 31, 2011 and 2010, a gain of \$2,667,785 and \$1,636,794, respectively, attributable to derivative instruments was recognized as investment income in the statement of changes in net assets available for benefits.

The investment managers, on behalf of the Master Trust, manage its interest rate and foreign currency risks by limiting exposure to and by monitoring the financial condition of each counterparty. In the unlikely event that a counterparty fails to meet the terms of an interest rate or foreign currency agreement, the Master Trust's risk is limited to the fair value of the instrument.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2011 and 2010 and the valuation techniques used by the Plan to determine those fair values.

Level 1 - In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees

Notes to Financial Statements December 31, 2011 and 2010

Note 6 - Fair Value Measurements (Continued)

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer. There were no significant transfers between levels of the fair value hierarchy during 2011 and 2010.

The Plan also holds other assets and liabilities not measured at fair value on a recurring basis, including accrued income, receivables for security sales, accrued liabilities and payables, and unsettled trades. The fair value of these assets and liabilities approximates the carrying amounts in the accompanying financial statements due to the short maturity of such instruments.

Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees

Notes to Financial Statements December 31, 2011 and 2010

Note 6 - Fair Value Measurements (Continued)

- (2) This class represents investments in actively managed common collective trust funds with investments in both equity and debt securities. The investments may include common stock, corporate bonds, U.S. and non-U.S. municipal securities, interest rate swaps, options, and futures.
- (3) GMO Multi-Strategy Fund (Offshore), L.P. invests in various investment funds seeking a variety of investment strategies including common stock, depository receipts, bonds (including sovereign debt of emerging countries), commodities, currencies, forwards, futures, options, and swap agreements.
- (4) Western Asset Global Multi Strategy, LLC invests primarily in global fixed-income securities in both developed and emerging market countries that are generally rated at least BBB by Standard & Poor's, or equivalent quality.

Note 7 - Tax Status

The Plan obtained its latest determination letter on March 2, 2009, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. The Company has applied for a new determination letter and the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

In accordance with guidance on accounting for uncertainty in income taxes, management evaluated the Plan's tax position and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The plan administrator believes it is no longer subject to tax examinations for years prior to 2008.

Note 8 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefits Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee while other benefits may not be provided for at all.

Inclusion date

The valuation date coincident with or next following the enrollment date on which the employee becomes a participant.

Plan-related expenses

The amount included this year for plan-related expenses is \$5,516. This amount is determined as the average of the administrative expenses other than PBGC premiums charged to the trust in the prior three years. Rotek currently does not pay PBGC premiums from the trust and therefore no addition to the assumed administrative expenses is made.

Mortality

The prescribed mortality assumption under IRC §430(h)(3)(A) using static tables with separate mortality rates for annuitants and non-annuitants.

Valuation date

First day of plan year.

Funding target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.

Participant data

Employee data was supplied in electronic format as of the valuation date.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2010 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Rotek, Incorporated and, based on that review, is not aware of any significant benefits required to be valued that were not.

SCHEDULE SB ATTACHMENTS

Early retirement

Eligible at age 60 with at least 10 years of Vesting Service.

The monthly benefit available at early retirement is the amount of normal retirement benefit based on service up to actual retirement (accrued normal retirement benefit). The benefit commences at age 65 unless the employee elects a reduced benefit commencing prior to age 65. The reduction is 1/180 for each month that commencement precedes age 65.

Effective January 1, 1999, participants age 62 with at least 25 years of Vesting Service or participants age 62 with 10 years of Vesting Service and a seniority date prior to January 1, 1982 are eligible for the monthly benefit described above, but without reduction for early commencement.

Effective November 1, 2001, these participants are eligible to receive an additional benefit of \$350 per month until age 65 or for one year, if shorter.

Disability pension

Eligible if disabled after 10 or more years of Vesting Service.

The accrued normal retirement benefit is payable immediately (unreduced).

Termination

Eligible after 5 years of Vesting Service.

The deferred vested benefit is the accrued normal retirement benefit payable at age 65 or, alternatively, a reduced pension payable as early as age 60 if the employee has at least 10 years of Vesting Service. The reduction is 1/180 for each month that commencement precedes age 65.

Regular pre-retirement spouse's benefit

Upon death of an employee after age 60 and completion of 10 years of Vesting Service, the surviving spouse will receive 50% of the benefit which would have been paid if the employee had retired on the day prior to his death. The 50% is reduced by 1/2% for each year that the employee is more than 5 years older than the spouse.

Pre-retirement spouse's benefit for vested participants

Upon death of a married participant after 5 years of Vesting Service and not eligible for retirement from employment with the Company, the surviving spouse will receive 50% of the benefit which would have been paid if the participant had terminated employment on the earlier of his date of death or actual termination date and had survived to and retired on his Earliest Retirement Date under the 50% Joint & Survivor option.

Prior plan account value distribution

Each participant's account due to participation in the Plan in effect on December 31, 1975 earns annual interest at a rate equal to 6% prior to 1983 and the Fund earnings rate on a market value basis for each Plan Year thereafter and vests at the rate of 10% a year beginning after 1 year (the 10% is changed to 20% effective January 1, 1989). Upon termination of employment, the reduced vested portion of a member's account will be paid in five annual installments, including interest on the undistributed portion. The reduction, if any, equals the actuarial value of benefits for which the employee is eligible upon termination of employment and which are due to service prior to January 1, 1976.

Form of payment

For normal, early, or disability retirements, the normal form of payment is a 50% Joint and Survivor annuity providing the participant was married on his date of retirement; otherwise, a straight-life basis applies.

For the deferred vested termination benefit, unless elected otherwise, actuarially reduced benefits are automatically paid to married participants on a 50% Joint and Survivor basis; otherwise a straight-life basis applies.

Changes in plan provisions since last actuarial valuation

None.
