Report of Independent Auditors

To the Participants and Administrator of The
Berkline Associates Pension Plan

We were engaged to audit the financial statements of The Berkline Associates Pension Plan (the "Plan") at December 31, 2011 and 2010 and for the years then ended, as listed in the accompanying index. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note I, which was certified by The Northern Trust Company, the trustee of the Plans, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2011 and 2010 and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

As explained in Note A, the Plan was frozen effective December 31, 2001. Also, as explained in Note B, the Plan changed the method in which it calculates accumulated plan benefits.

NOTES TO FINANCIAL STATEMENTS

A. Description of Plan:

The following description of The Berkline ("Berkline") Associates Pension Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

Effective July 2002, NCFII Holdings, Inc., an entity created to oversee the LifeStyle Furnishings International Ltd.'s (the "Company" or "LFI") Plans and a subsidiary of Masco Corporation, became the Plan Sponsor for the Plan.

1. *General.* The Plan is a defined benefit pension plan covering eligible employees at Berkline, a former subsidiary of the Company and prior to that, Masco Corporation. Eligible employees participate in the Plan on the first day of the month following completion of one year of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). [The Plan is a cash balance plan which, before it was frozen, provided for individual participant retirement accounts that increase with benefit credits based on annual compensation and investment income.]

As a result of the sale of all of the subsidiaries and assets of the Company, there are no longer any active participants in the Plan. All benefits under the Plan (if any) for employees terminated on their division sale dates were 100% vested, to the extent then funded, regardless of their years of service; however, funds in the Plan as of the sale dates were sufficient to fund benefits only for employees who had five or more years of service on the sale dates.

Effective December 31, 2001, in anticipation of the sale of the assets and business of Berkline, all benefit accruals under the Plan were frozen. As a result, there will be no increases in benefits under the Plan, and no new participants will be added to the Plan, from and after December 31, 2001.

2. *Pension Benefits.* Participants with five or more years of credited service or who have attained normal retirement age (65) are entitled to vested annual pension benefits beginning at normal retirement age. Generally, employees may elect to receive their pension benefits in the form of a joint and survivor annuity, lifetime annuity, or period certain annuity.

Pursuant to the Plan agreement, participants who left the Company after vesting in the Plan but before becoming eligible for early retirement may elect to receive their benefit payment any time after the earlier of reaching Early Retirement Age or at the end of the fourth calendar year following the participant's severance date. Considering the Plan freeze date, most participants became eligible for this payment effective January 1, 2006. Participants in this situation were notified of their benefit options during the 2006 Plan year by the Company.

THE BERKLINE ASSOCIATES PENSION PLAN

NOTES TO FINANCIAL STATEMENTS, Continued

A. Description of Plan, concluded:

3. *Death and Disability Benefits.* If a vested participant dies before retirement, a pre-retirement survivor annuity is paid to the participant's beneficiary. This survivor annuity is payable on the first day of the calendar month following the participant's death or as soon as practicable thereafter. Disability retirement benefits are subject to offsets as described in the Plan agreement.

4. *Funding Policy.* The contributions of the Company are designed to fund an amount which falls between the minimum contribution requirements and the maximum deductible allowance, as determined annually under the provisions of the Internal Revenue Code. The yield on investments of the Plan serves to reduce future contributions that would otherwise be required to provide for the defined level of benefits under the Plan. The Company's contributions for 2011 and 2010 met or exceeded the minimum funding requirements of ERISA. No participant in the Plan is required to make a contribution under the Plan.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

B. Accounting Policies:

The following is a summary of significant accounting policies (in accordance with accounting principles generally accepted in the United States of America) followed in the preparation of these financial statements.

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of additions and deductions during the reporting period. Actual results could differ from these estimates and assumptions.

Risks and Uncertainties

The Plan's invested assets ultimately consist of common and preferred stocks, private equity funds, corporate debt securities, government and other debt securities, common collective trust fund and short-term and other investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in the value of investment securities in the near term could materially affect the amounts reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

THE BERKLINE ASSOCIATES PENSION PLAN

NOTES TO FINANCIAL STATEMENTS, Continued

B. Accounting Policies, continued:

The Plan invests in securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Investment Valuation and Income Recognition

Investments represent the Plan's pro rata interest in the fair value of the net assets of the Masco Corporation Retirement Master Trust ("Master Trust") as determined by The Northern Trust Company ("Trustee"), using closing quoted market prices with the exception of the Private Equity Funds, Corporate Debt Securities and Government and Other Debt Securities, which are based on estimated fair value and the Common Collective Trust Fund, which is based on amortized cost, as of December 31, 2011 and 2010.

Investment transactions are reflected on a trade-date basis. Realized gains and losses on investments are based on average cost. Interest income is recognized on the accrual basis of accounting. Dividend income is recorded on the ex-dividend date. Income from other securities is recorded as earned on an accrual basis.

The Plan presents in the statement of changes in net assets available for benefits the investment income from its interest in the Master Trust. The investment income is comprised of the net (depreciation) appreciation in the fair value of its investments which consists of the Plan's pro rata interest in the realized gains or losses and the unrealized (depreciation) appreciation of the investments of the Master Trust. Also included are the Plan's pro rata share of the interest and dividend income of the Master Trust. Such pro rata allocations are made monthly based on the Plan's weighted average interest in the fair value of the Master Trust net assets.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Other

Certain administrative expenses incurred by the Plan are paid by the Company.

B. Accounting Policies, concluded:

Change in Accounting Principle

On December 31, 2010, the Company adopted the use of the assumed long term rate of return for the Plan. The Company believes that this methodology more accurately reflects the expected returns during the period for which payments of benefits are deferred. The rate of 7.25% was chosen based upon analysis of expected and historical rates of return of various asset classes utilizing the current and long-term target allocation of plan assets. This change in the method resulted in a decrease in the present value of accumulated plan benefits of \$1,257,856 as of January 1, 2011.

Subsequent Event

The Company has evaluated subsequent events through September 17, 2012, the date the Berkline Associates Pension Plan financial statements were available to be issued.

New Accounting Pronouncements

In May 2011, the FASB issued *Accounting Standards Update 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards ("IFRS")*. This update is intended to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. GAAP and IFRS. The update is effective for annual periods beginning after December 15, 2011. Plan management anticipates the adoption of this guidance will not have a material impact on the Plan's financial statements.

Net Assets	<u>\$394,385,808</u>	<u>\$410,965,891</u>

With respect to the Master Trust's investments in private equity funds, the Master Trust had, at December 31, 2011 and 2010, commitments to contribute up to \$18 million and \$16 million, respectively of additional capital to such funds representing the Master Trust's aggregate capital commitment to such funds less capital contributions made to date. The Master Trust is contractually obligated to make additional capital contributions to certain of its private equity funds upon receipt of a capital call from the private equity fund. The Master Trust has no control over when or if the capital calls will occur. Capital calls are funded in cash and generally result in an increase in the carrying value of the Master Trust's investment in the private equity fund when paid.

Securities Lending:

During 2006, Masco Corporation entered into an agreement with The Northern Trust Company authorizing the Trustee to lend securities held in the Master Trust to third parties. The Trustee must obtain collateral from the borrower in the form of U.S. Government securities, irrevocable bank letters of credit, or cash. The cash collateral is invested in interest bearing accounts with The Northern Trust Company. The total collateral for the securities loaned as of December 31, 2011 and 2010 was \$46,733,539 and \$91,942,304, respectively, of which \$387,001 and \$520,024 was non-cash for the years ended December 31, 2011 and 2010, respectively. Both the collateral and the securities loaned are marked-to-market on a daily basis so that all loaned securities are fully collateralized at all times. The Master Trust has a corresponding liability (equal to the collateral) to repay the collateral upon return of the securities. In the event that the loaned securities are not returned by the borrower, the Trustee will purchase equivalent securities by applying the collateral to the payment of the purchase price and demand from the borrower any remaining amounts due and owing. All recoveries will be credited to the Master Trust when received.

The fair value of securities loaned by the Master Trust as of December 31, 2011 and 2010 is \$45,177,813 and \$89,743,155, respectively, as shown below by type of securities:

	<u>2011</u>	<u>2010</u>
Common stocks	\$ 42,255,481	\$ 84,978,037
Corporate debt securities	\$ 2,011,346	\$ 4,362,359
U.S. Government debt securities	\$ 910,986	\$ 402,759

The Master Trust and the Trustee each receive a percentage of the net income derived from securities lending activities based on the type of securities. Income earned by the Master Trust related to securities lending activities during 2011 and 2010 was \$238,662 and \$252,953, respectively, net of bank fees of \$102,163 and \$108,318 for the years ended December 31, 2011 and 2010, respectively.

Although the securities lending activities are collateralized as described above, they involve both market and credit risk. In this context, market risk refers to the possibility that the borrowed securities will not be fully collateralized upon a sudden material change in the fair value of the loaned securities or the collateral. In 2011 and 2010, based on improving market conditions, the Master Trust did not incur any liability related to the securities lending activities.

Security lending in the Master Trust is handled via an electronic platform provided by Equilend, a joint venture of various securities lending agents and security borrowers, in which the Northern Trust Company, the Trustee, has an equity interest. Fees are not charged to the Master Trust for use of the services but are paid by the Trustee.

THE BERKLINE ASSOCIATES PENSION PLAN

NOTES TO FINANCIAL STATEMENTS, Continued

C. Investments, concluded:

Since Northern Trust has a financial interest in the successful operation of Equilend, Equilend has obtained a Prohibited Transaction Exemption from the U.S. Department of Labor. The exemption (a) enables Northern Trust to use Equilend's platform for lending the securities of plans and (b) permits Equilend to sell or license ancillary products to Northern Trust or to a plan to which Equilend is a party-in-interest.

D. Fair Value Measurements:

The Plan follows fair value guidance (ASC 820) that defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. The guidance defines fair value as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date." Further, it defines a fair value hierarchy, as follows: Level 1 inputs as quoted prices in active markets for identical assets or liabilities; Level 2 inputs as observable inputs other than Level 1 prices, such as quoted market prices for similar assets or liabilities or other inputs that are observable or can be corroborated by market data; and Level 3 inputs as unobservable inputs that are supported by little or no market activity and that are financial instruments whose value is determined using pricing models or instruments for which the determination of fair value requires significant management judgment or estimation.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010.

Common and Preferred Stocks and Short-Term and Other Investments: Valued at the closing price reported on the active market on which the individual securities are traded, or based on the active market for similar securities.

Private Equity Funds: Valued based on an estimated fair value using either a market approach or an income approach, each of which requires a significant degree of judgment. There is no active trading market for these investments and they are for the most part illiquid. Due to the significant unobservable inputs, the fair value measurements used to evaluate impairment are a Level 3 input.

Corporate Debt Securities: Valued based on the active market for similar securities or on estimated fair value. For a portion of Corporate Debt Securities there is no active trading market and they are for the most part illiquid. Due to the significant unobservable inputs for these securities, the fair value measurements used to evaluate impairment are a Level 3 input.

Government and Other Debt Securities: Valued based on either the closing price reported on the active market on which the individual securities are traded, the market for similar securities or on estimated fair value. For a portion of Government and Other Debt Securities there is no active trading market and they are for the most part illiquid. Due to the significant unobservable inputs for these securities, the fair value measurements used to evaluate impairment are a Level 3 input.

THE BERKLINE ASSOCIATES PENSION PLAN

NOTES TO FINANCIAL STATEMENTS, Continued

D. Fair Value Measurements, continued:

Common Collective Trust Fund and Securities Lending Collateral Pool: Valued based on a unit value basis, which approximates fair value as of December 31, 2011 and 2010, respectively. Such basis is determined by reference to the respective fund's underlying assets, which are primarily marketable equity and fixed income securities. There are no unfunded commitments or other restrictions associated with these funds.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Master Trust's assets at fair value as of December 31, 2011 and 2010.

NOTES TO FINANCIAL STATEMENTS, Continued

E. Income Tax Status:

The Internal Revenue Service determined and informed the Company by letter dated April 3, 2003 that the Plan and the related trust are designed in accordance with applicable sections of the Internal Revenue Code ("Code"). The Plan has since been amended; however, the Plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Code. The Company has applied for a new determination letter and currently awaits approval. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax period in progress.

F. Related Parties:

Certain plan investments are investments managed by The Northern Trust Company as the Plan Trustee. Therefore, the purchases and sales qualify as party-in-interest transactions. Additionally, the Master Trust participates in Securities Lending programs of the Trustee.

The Plan has an interest in the Master Trust which invests in Masco Corporation Common Stock. As of December 31, 2011 and 2010, the value of Masco Corporation Common Stock in the Master Trust was \$11,741,100 and \$14,183,428, respectively.

G. Actuarial Present Value of Accumulated Plan Benefits:

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) beneficiaries of employees who have died. Benefits under the Plan are based on employees' credited years of service. Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date. The actuarial present value of accumulated plan benefits is determined by an actuary from Towers Watson and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

THE BERKLINE ASSOCIATES PENSION PLAN

NOTES TO FINANCIAL STATEMENTS, Concluded

G. Actuarial Present Value of Accumulated Plan Benefits, concluded:

The significant actuarial assumptions used in the valuation as of January 1, 2011 were (a) life expectancy of participants - the prescribed mortality assumption under Internal Revenue Code 430(h)(3)(A) using static tables with separate mortality rates for annuitants and non-annuitants, (b) retirement age assumptions (the assumed retirement age was 65 for 2011), (c) discount rate assumption of 7.25 percent and 5.4 percent in 2011 and 2010, respectively. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

H. Plan Termination:

Although there is no present intent to terminate the Plan, if the Plan were to terminate at some future time, the net assets of the Plan will be allocated to provide benefits for participants as prescribed by ERISA and its related regulations. To the extent unfunded vested benefits exist, such benefits will be paid by the Pension Benefit Guaranty Corporation, up to applicable limitations. Plan termination priorities are available from the Pension Benefit Guaranty Corporation.

I. Summary of Financial Data Provided by the Trustee:

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the following information was certified by the Trustee as complete and accurate and was not subjected to any auditing procedures performed by the independent auditors.

- a. Total investments, excluding private equity funds, as shown on the accompanying statements of net assets available for benefits of \$3,675,843 and \$4,145,686 as of December 31, 2011 and 2010, respectively.
- b. Total investment (loss) income, excluding private equity funds, as shown in the accompanying statements of changes in net assets available for benefits of \$(144,541) and \$433,885 for the years ended December 31, 2011 and 2010, respectively.
- c. Total Master Trust assets, interest, dividends and net appreciation, excluding private equity funds, as shown in the accompanying Note C.

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Mortality

For all participants: The prescribed mortality assumption under IRC §430(h)(3)(A) using static tables with separate mortality rates for annuitants and non-annuitants.

Retirement

Participants with deferred benefits are assumed to retire at age 65.

Disability Rates (per 100 employees)

None.

Compensation Increases

Not applicable.

Future Increases in Social Security

Not applicable.

Future Increases in Maximum Benefits and Plan Compensation Limitations

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC §415. Plan compensation is limited to the maximum presently allowed under IRC §401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

At-Risk Form of Payment

The at-risk assumption for assumed form of payment is the same as the not-at-risk assumptions, since that meets the at-risk requirement.

All participants are assumed to elect the lump sum option (if the Individual Balance Account was more valuable) or the normal form for a single person.

Marriage

80% of males and 70% of females are married. The male spouse is assumed 3 years older than the female spouse.

Employees

It was assumed there will be no new or rehired employees.

Plan Compensation

Not applicable.

Asset Method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.76%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.00%, and the applicable limitation for the plan year, equal to 6.76%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.69%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.00%, and the applicable limitation for the plan year, equal to 6.69%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

The actuarial valuation performed for the plan year ending December 31, 2011 is used to determine the maximum deductible contribution for the tax year ending December 31, 2011.

Benefits not Included in Valuation

None.

Nature of Actuarial Calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are truncated to be consistent with the instructions for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Plan

The Berkline Associates Pension Plan (includes these prior plans: The Berkline Corporation Salaried Retirement Plan and the Berkline Corporation Hourly Retirement Plan)

Effective Date and Most Recent Amendment

The plan was originally effective January 1, 1994 (plans merged at this date had earlier respective effective dates). The last amendment reflected herein was effective December 31, 2008.

Plan Year

The twelve-month period ending December 31, 2011.

Coverage and Participation

All employees, except salesmen, are eligible to participate in the Plan. An employee becomes a participant on the first of the month following one Year of Service. Participation was frozen effective December 31, 2001.

Years of Service

One Year of Service is earned for each calendar year in which at least 1,000 hours of service are credited. Participants ceased to accrue Years of Service as of March 26, 2002 with the sale of the Company. All covered locations have been closed and there are no remaining active participants. All participants are either retired or terminated with vested benefits.

Normal Retirement Benefit

Normal Retirement Date: Age 65

Benefit Formula: The Accrued Benefit.

Normal Form of Benefit: Single life annuity, if unmarried, and 50% Joint & Survivor annuity, if married, actuarially equivalent to the single life annuity.

Accrued Benefits

The Accrued Benefit is the monthly benefit equal to the actuarial equivalent of the Individual Balance Account.

Prior Annuity Formula: The Annuity Benefit of a Participant who was a Participant in a Prior Plan shall not be less than the amount determined in accordance with the applicable Prior Plan, calculated as if the Participant had terminated employment on December 31, 1993. The types of benefits under the prior annuity formula are:

Hourly Employees: monthly annuity at Normal Retirement Age based on the appropriate Credited Service multiplied by a dollar benefit level.

Salaried Employees: monthly annuity at Normal Retirement Age based on Final Average Earnings, less a Primary Social Security benefit offset.

No Participants accrued any additional benefits under the Plan after December 31, 2001.

Individual Balance Account (Cash Balance Plan)

An Individual Balance Account (IBA) was established for each Participant, the initial balance of which was the value of the Participant's accrued benefit, as determined under the applicable Prior Plan as of December 31, 1993.

For all plan years beginning after December 31, 2001, no additional Company Credits will be made to the Individual Balance Accounts of Participants.

Interest Credits shall be credited at the end of each calendar year equal to 5% of the beginning of year IBA until the date of distribution. The credits shall be applied to a Participant's IBA as of the last day of the calendar year or, if earlier, as of the last day of the month next preceding the Participant's Annuity Starting Date.

Early Retirement Benefit

Eligibility: Age 55 with 5 or more Years of Service.

Benefit: The greater of the Actuarial Equivalent of the Individual Balance Account, or, if the Participant was a Participant in a Prior Plan, the benefit accrued under the Prior Plan, reduced by respective reduction factors under each Prior Plan.

Early Retirement Reduction Factors: For Hourly employees and the Salaried employees' portion of the benefit which is calculated based on Final Average Earnings, 0.25% for each completed calendar month by which the Annuity Starting Date precedes the Normal Retirement Date. For Salaried participants hired after July 1, 1985, the reduction of the Final Average Earnings portion of the benefit shall be 0.50% for each complete calendar month by which the Annuity Starting Date precedes the Normal Retirement Date.

For the Salaried employees' offset portion of the benefit based on the Primary Social Security Benefit, the factors are:

Age	Reduction Factor
64	.8988
63	.8103
62	.7325
61	.6639
60	.6032
59	.5493
58	.5013
57	.4583
56	.4199
55	.3853

Vested Benefits upon Termination of Service

Vesting: Participants are 100% vested upon completion of 5 Years of Service.

Termination Benefit: In the event a Participant separates from service after earning a vested right to his Accrued Benefit, but before becoming eligible for Early Retirement Benefits, he may elect to receive his vested Accrued Benefit as a deferred retirement benefit, commencing at his Normal or Early Retirement, or, if earlier, a lump sum distribution after a 4-year waiting period.

The Early Retirement reduction factors are the same as those used for the Salaried employees' offset portion of the benefit. If the Participant commences his benefit before age 55, the age 55 benefit shall be further reduced based on the actuarial equivalent basis used for conversion to optional annuity forms.

Surviving Spouse Benefit

Eligibility: All Participants eligible for a Vested Deferred Benefit who are married at date of death automatically receive coverage.

Benefit: In the event of a Vested Participant's death prior to benefit commencement, the surviving spouse is entitled to a benefit equal to 100% of the Participant's Individual balance Account. In lieu of a lump sum payment, the Spouse may elect to receive the benefit in the form of an annuity. In no event will the annuity be less than the Actuarial Equivalent of the Pre-Retirement Survivor Annuity, which is calculated assuming that the Participant had retired on the day before his death with a 50% Joint and Survivor Annuity. If the Participant dies before age 55, the benefit would be determined as though the Participant survived to retire at age 55, electing a 50% Joint and Survivor Annuity, and died on the day after retirement.

Postponed Retirement Benefit

The benefit amount for Vested Participants who commence after their Normal Retirement Date will be actuarially increased from their Normal Retirement Date. The postponed retirement benefit is the greater of such benefit and the monthly benefit actuarially equivalent to the IBA balance as of retirement.

Optional Forms of Retirement Income in Lieu of Normal Form

Available to all participants:

Single Life Annuity; For participants with an IBA, lump sum payment of accrued benefit commencing at Normal or Early Retirement, or if earlier, a lump sum distribution after a 4-year waiting period; automatic lump sum payment for values under \$1,000.

Available to participants in the Prior Plans:

50%, 75% or 100% Joint & Survivor benefit; 5, 10, and 15 Year Certain and Life Annuity; Level Income Option.

Actuarial Equivalence for determining lump sum equivalent of accrued benefit, or the annuity equal to the IBA, is the PPA lump sum mortality with 3-segment interest rates. Actuarial equivalence for conversion to all other optional annuity forms is the Revenue Ruling 2001-62 Mortality and 6% interest.

Change in Actuarial Assumptions

The following assumptions were changed since last year's valuation:

- The mortality assumption was changed to the 2011 prescribed mortality assumption under IRC §430(h)(3)(A) using static tables with separate rates for annuitants and non annuitants, consistent with sponsor elections.
- The assumed rate of return on assets after 2010 was reduced from 8.00% to 7.25%.
- 80% of males and 70% of females are assumed to be married.

Change in Methods

- The method used to select the discount rate was changed from the 24-month average segment rates using a January lookback month to a 24-month average segment rates using a September lookback month, consistent with sponsor elections.
- The valuation software used to produce the actuarial information submitted on this schedule is different than used for the previous valuation due to a change in both the enrolled actuary for the plan and the business organization providing actuarial services to the plan, and such change in software may be considered to be a method change.
- The new method is substantially the same as the method used by the prior enrolled actuary and is consistent with the description of the method contained in the prior actuarial valuation report and Schedule SB of Form 5500 (disregarding the effects of any changes that are automatically approved under final IRC §430 regulations). The funding target and target normal cost (without regard to any adjustments for employee contributions and plan-related expenses), as determined for the prior plan year by the new enrolled actuary (using the actuarial assumptions of the prior enrolled actuary and disregarding the effects of any changes that are automatically approved under final IRC §430 regulations) are both within 5% of those values as determined by the prior enrolled actuary. Therefore the change in funding method receives automatic approval under IRS Announcement 2010-3.

Additional Information for Plans in At-risk Status

Description of At-risk Assumption for Assumed Form of Payment

As defined in the PPA, the plan is in at-risk status for the 2011 plan year, because the plan's FTAP for the 2010 plan year was less than 80%, and the plan's FTAP measured using "at-risk assumptions" was less than 70%

At-Risk Assumptions:

- Participants eligible to retire within the next 11 years must be assumed to retire immediately when first eligible, but not before the end of the current year.
- All participants must be assumed to elect the most valuable form of payment available when they begin receiving benefits.
- Plans that have been at-risk in past years may also be required to increase the funding target and target normal cost for prescribed assumed expenses.

At-Risk Form of Payment:

- The at-risk assumption for assumed form of payment is the same as the not-at-risk assumptions, since that meets the at-risk requirement.
- All participants are assumed to elect the lump sum option (if the Individual Balance Account was more valuable) or the normal form for a single person.
